How did you check the relay contacts? My neighbor, now SK, had one
with a problem that sounds like yours and it was the relay. You cant
always tell just by looking.

Jimmie

Grab the Schematic, ands start looking where the Transceive Input and
the Receive Only Input connect and then follow the Transceive line back
and test each component clear back to the connector.... You will likely
find it in the contacts, but it may be a PIN Diode Switch, or T/R Relay
problem depending on how the radio was designed...

2037. A warning about pro-code terrorists

Subject: Re: Making Serious Money Online
Date: Wednesday,June 10, 2009, 4:45 PM

~~~~, I Want To Personally Introduce You To An Internet Millionaire!

Hi ~~~,
{Ocie} here with an major
announcement...
http://www.MyPartnersInProfit.com/bootcamp/?id=10286

For 25 people, this will be the most important
e-mail you ever receive. (I hope you're one of them!)

Because my new partner and I are looking for 25 people who are ready
to take part in the greatest Internet marketing joint venture of all
time.

This joint venture is open to anyone. Even if
you have a business already.

Here's the story: http://www.MyPartnersInProfit.com/bootcamp/?id=10286

But here's the catch: In order to make this happen,
We need to be sure that we choose the 25 people most
driven to succeed and responsible people. So if you're
looking for someone to hand you vacations and cars on a
silver platter, then you can stop reading right now.

However, if you have a sincere interest in building
a REAL home business based on something that you
can get passionate about... something you can truly
dedicate yourself to (at least 10 hours per week)
for the next twelve months, then we want to hear from you.

Because to be one of the 25 people accepted, you don't need an
existing online business (but you can). You don't need a technical
background. You don't even need to have any experience. Remember you
are just going to be sending out movies! (we'll work with you on ALL
of these things!)

What you *do* need is a burning desire to succeed
and the ability to be coachable and believe it's possible.

If you want to make an extra $100,000 a year working
part time, so that you or your spouse can stay home
~~~~

with the kids, let's make it happen! If you want to
increase the profits of an existing online business,
so that you make an extra $50,000 - $100,000 per year,
we can help you get there, too!

But please note that because of the huge time
commitment this kind of one-on-one mentoring will
take from me, I can only accept 25 people
at this time and I'm expecting to get literally hundreds
of applications.

So if this sounds like something that might interest
you, we highly recommend that you go to the link below
and watch the short video of my new partner as
he explain everything right away! Then just complete the
application form on the next page.

...We are going to be taking applications first come,
first served as they get accepted.

Don't wait click below or just copy and paste the link into
your browser....

http://www.MyPartnersInProfit.com/bootcamp/?id-10286

To Your Success & A New Partnership,

{From Ocie }

P.S. Keep in mind, we expect these 25 new spots to be
filled extremely fast... Likely in the next few days.
So if you would like to participate, we highly recommend
that you go right now and watch our video, then fill out
the form to get a copy of the movie for yourself, this
will notify us that you would like us to call you and start
working together.

http://www.MyPartnersInProfit.com/bootcamp/?id=10286

Amateur Radio Newsline(tm) Report 1661 - June 12 2009

Amateur Radio Newsline report number 1661 with a release date of
Friday, June 12th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Navy MARS asks permission to close
operation. Will the government say yes? Also, President Obama says
that part of being prepared is having a weatherproof radio at hand,
WB4APR proposes a new 29 to 24 MHz high frequency satellite, the FCC
T-hunts down an alleged shopping mall jammer, Australia tests its first
digital Amateur Television repeater and Toshiba brings the Morse code
to texting. Find out the details on Amateur Radio Newsline(tm) report
number 1661 coming your way right now.

(Billboard Cart Here)

RESTRUCTURING: NAVY-USMC MARS LIKELY TO GO QRT

The days of Navy and Marine Corps MARS may be fast coming to an end.
This, according to a directive released by the commander of the Naval
Network Welfare Command. One that says that this branch of the
Military Affiliate Radio Services will terminate all operations at the
end of this summer. Amateur Radio Newsline's Bruce Tennant, K6PZW, has
the details:

--

According to the May 16th directive, the commander of the Naval Network
Welfare Command has decided to sunset the Navy's MARS mission effective
September 30th. Sunset in this case means to terminate and disband.
As a result, the Naval Network Welfare Command has requested that all
military and civilian positions be deleted and left un-funded after
that date.

Navy and Marine MARS is a joint operation. One of the consequence of
this decision is that all Navy MARS Area Directors have been ordered to
close their offices no later than the September 30th deadline. The
directive also says that none of the equipment located at Area Director
Stations can be transferred to Navy MARS members. It can however be
given over to other official Navy organizations to help start or equip
military recreation stations. However, approval for this will be on a
case by case basis.

And what about all the radio gear out there in the hands of MARS members? Also, the equipment that may have been disposed of over the years by the families of Silent Key Navy MARS operators? Will the Navy be seeking its return? As we go to air, nobody we have contacted seems to have any answers to these and other questions related to the imminent termination of U-S Navy MARS.

There is one caveat. As you are likely aware, all three MARS services operate under the mandate of the Department of Defense and that mandate is still valid. While the Army and Air Force have stated their desire to continue their respective MARS programs, only the Navy has requested to opt out. For that to happen requires approval up the Department of Defense chain of command. If that permission is not given the Navy says that its MARS program will continue, but without any Area Directors.

More on this as we get it. For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

According to Wikipedia dot com, the organization that led to the Military Affiliate Radio System was first called the Army Amateur Radio System or A-A-R-S. It was created in November 1925 by a few dedicated pioneers in the United States Army Signal Corps led by Captain Thomas C. Rives. His original intent was to enlist the talents of volunteer amateur radio operators as a ready source who could train soldiers in the then new technology of radio, as well as pursuing radio research and development to improve radio equipment within the Army. This support would be particularly useful during the mobilization of forces by providing a pool of already trained radio operators. Their efforts were very successful, and the present-day MARS program is the direct descendant of the work of those early pioneers. (K1AA, KZ1Z, others)

RESCUE RADIO: PRESIDENT OBAMA SAYS TO BE PREPARED

United States President Barack Obama has urged residents of hurricane inclined areas to take responsibility for their own safety and start planning now.

Following a recent disaster preparedness briefing at the Federal Emergency Management Agency the president said that individuals should be ready with a supply of nonperishable food, water and first aid kits. This, to wait out any emergency that might hit their area. The leader of the free world added that it is also essential to have at least one waterproof radio that will work in the rain.

At his press briefing the president noted that it is state governments have the primary responsibility for preparing for and responding to disasters. But he added that all the resources of the federal government are there to back them up. (Published news reports)

HAM RADIO IN SPACE: 28 TO 24 MHz HAMSAT PROPOSED

A satellite with a 29 to 24 MHz linear transponder is being proposed by the ham who brought the world A-P-R-S. Bob Bruninga, WB4APR,, who helped in the development of a number of successful amateur radio satellites has floated a proposal for a satellite with the odd combination of frequencies for the on-orbit linear transponder.

In an e-mail to the AMSAT Bulletin Board WB4APR says that consideration is being given to a an HF transponder for the next long range CUBESAT mission planning. It can have three modes, These are APRS at 1200 baud for command and control and APRS on 145.825; a PSK-31 multi-user SSB uplink on 29 MHz and FM down link on 145.825 and lastly the already mentioned 29 MHz uplink and 24 MHz downlink SSB transponder

Bruninga adds that they are looking for someone in the AMSAT community that wants to contribute to the HF transponder design. (WB4APR)

**

HAM RADIO IN SPACE: CIRQUE DU SOLEIL FOUNDER TO VISIT ISS

The British Broadcasting Company reports that the founder of the performance group Cirque du Soleil will visit the International Space Station in September. According to the news service, 49 year old Guy Laliberte will travel to the International Space Station on a Russian Soyuz transport vehicle.

Laliberte trip to the International Space Station is estimated to cost at least $25 million dollars. The Quebec-based billionaire will become the seventh private citizen to visit the orbital outpost since April 2001. No word yet if he plans to obtain an amateur licensee and operate from space as all past space adventurers have.

And for those of you who do not know that Cirque du Soleil means, its French for Circus of the Sun. You can read the full BBC news story at http://news.bbc.co.uk/1/hi/sci/tech/8083336.stm) (Southgate)

EMERGING TECHNOLOGY: THE ANSWER IS BLOWEN IN THE WIND

The UK telecommunications regulator Ofcom has published a report dealing with the effects of interference caused by power generating Wind Farms turbines. This, to Ultra High Frequency and Super High Frequency communications.

The report was prepared by ERA Technology Ltd and Aegis Systems Ltd. It describes a technical study in which a series of measurements were carried out with regard to the presence of wind turbines near to wireless services.

Some of their findings include the fact that a single turbine can produce measured fades as large as 3 dB for UHF scanning telemetry

links and 2 dB for fixed links operating between 1.5 and 18 GHz. This, when the turbine is lying on the transmitter-receiver path. Also established is that a wind farm with seventeen turbines can produce measured fades as large as 10 to 15 dB for 1% of the time when the wind farm is lying on the transmitter-receiver path.

The purpose of the study was to enhance understanding of the effects of wind turbines near to wireless Services. The full text of this propagation study and report in PDF Format is available at http://www.ofcom.org.uk/radiocomms/ifi/licensing/classes/fixed/Windfarms/rf_ measurement/windfarm_report.pdf (ANS)

ENFORCEMENT: FCC T-HUNTS DOWN SHOPPING MALL RADIO SYSTEM JAMMER

Every once in a while, the FCC hits a home run with outstanding direction finding work leading to an important find. The case of Kevin Bondy, the licensee of station WQGX752 who now faces a $24,000 fine is one of those. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the rest of the story:

--

According to the CGC communicator, the case involves a dedicated and industrious jammer causing willful and repeated interference to the radio channels licensed to The Oaks Shopping Center in Thousand Oaks, California . Its also the story of an even more dedicated FCC agent determined to get his man and the FCC release has the full story.

Thousand Oaks is an affluent suburb about 45 miles West of downtown Los Angeles. And it was there the FCC alleges that Kevin Bondy tried to force a local shopping center off of its two-way radio channels for reasons not yet fully understood.

The story goes back to this past February 25th. That's when the Los Angeles FCC Office received a complaint from the security manager for The Oaks Shopping Center. He told the FCC that the malls communications systems 461.375, 462.525, 467.525 and 466.375 MHz were being jammed.

The next day an agent from the Enforcement Bureau's Los Angeles Office contacted the security manager. The security manager also told the agent that the rather brazen jammer had told shopping center to stop

using 461.375MHz which is the security repeater input frequency.

On March 5th the Los Angeles agent T-hunted down the source of pulsating signals on the 461.375 and 466.375 MHz channel pair. It was found to be a repeater located within a secured radio communications facility on Oat Mountain. That's a 3000 foot hilltop in the Santa Susana Mountains that 's very popular with two-way radio users.

While atop Oat Mountain the agent observed radio equipment which he found was the source of the pulsating signals and a beam antenna connected to it pointed in the direction of Thousand Oaks. There seemed no doubt that this set-up was intended to interfere with normal transmissions on the shopping centers frequencies,.

Fast forward to March 6th. The FCC agent was monitoring the 461.375 and 466.375 MHz channel pair in the vicinity of shopping center and again observed pulsating signals. Later that day, in consultation with personnel from The Oaks and the Ventura County Sheriff's Department, the Los Angeles agent came up with a plan to locate the person who source of the transmissions.

Personnel from the shopping center engaged unknown operator into a QSO. The FCC agent had instructed shopping center personnel to keep the subject talking for as long as possible so that he could a fix of the transmissions. They did, and it was during that contact that the jammer told the shopping center personnel that they had "plenty of warning" to vacate the frequencies as he demanded. The jammer then effectively shut down all operations on The Oaks radio systems by transmitting NOAA weather radio over every channel. The jamming station then reportedly said that he would gave The Oaks three weeks to vacate the frequencies. If the center refused, he told them that there would be more jamming to come. He also told the centers personnel that the reason for the jamming was -- and we quote: "we need the channel."

Meantime, the agent was hard at work T-Hunting and at approximately 7:30 p.m., he hit pay-dirt. This, when he found the originating source of the transmissions to be a vehicle located in the National Park Service parking structure across the street from the shopping center.

At this point the Ventura County Sheriff's Department secured the area and identified the subject as Kevin W. Bondy. The Los Angeles FCC agent identified himself to Bondy and asked to inspect the radio equipment in his vehicle. Bondy first refused, then agreed and then refused again. The agent explained that a refusal to allow an inspection could result in a fine. Bondy's refusal was witnessed by Ventura County Sheriff's Department deputies.

On March 9, 2009, the FCC agent revisited the radio communications facility on Oat Mountain. At that time he observed that the beam antenna had been removed and the interference to The Oaks radio systems

had ceased.

And now it has literally become time for Bondy to pay the proverbial piper. In its May 14th Notice of Apparent Liability issued to Bondy, the FCC says that his violations of the Communications Act warrant his being fined $24,000.

Bondy was given the usual 30 days to pay up or to file an appeal. Meantime, the Oaks shopping Center has been interference free thanks to the work of an unknown but very dedicated FCC agent.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The penalties faced by Bondy might not end with just a proposed fine. The FCC can challenge the renewal of his licensee of station WQGX752 or any other FCC issued license he might hold. It could even order a license revocation hearing at an earlier date. The full FCC document is on-line at http://www.fcc.gov/eb/FieldNotices/2003/DOC-290813A1.html) (CGC, FCC)

RESCUE RADIO: HELPING THOSE WHO REALLY NEED IT

"Helping Those Who Really Need It" is the title of an interesting article in the June issue of CQ Magazine dealing with the changing landscape of amateur radio emergency communications. Authored by former police and fire chief Jerry Boyd. N7WR, the article explains the way in which non government organizations such as hospitals, bus systems, schools and independent municipal agencies may be the new clients that will be looking to ham radio for assistance in coming days. Boyd points to the California-based Hospital Disaster Support Communications Service as an excellent example of a ham radio support group that serves a specific need. You can read the entire article beginning on page 52 of the June issue of CQ Magazine. Its on newsstands right now. (ARNewsline(tm))

**

HAM HOLIDAYS: KIDS DAY 2009 - JUNE 20

The second Kids Day operating event of 2009 takes place on Saturday, June 20th. This, from 1800 to 2400 UTC.

According to the ARRL, Kids Day is an on-air event to encourage young people who may or may not yet be licensed to have fun with Amateur Radio. For those who do not hold a set of call letters, it's a chance to give them a bit of on-the-air experience and hopefully foster interest in getting a license of their own.

Kids Day also has an important adult purpose as well. For them, it's a chance for older hams to share their station and love for Amateur Radio with children in their area.

During Kids Day you simply open your heart and your ham station to the kids in your neighborhood and operate as much or as little as you like. All participants are eligible to receive a colorful certificate. More info can be found at http://lists.contesting.com/mailman/listinfo/kids (ARRL, others)

**

YHOTY 2009: THE JUDGING IS TAKING PLACE

And speaking about youngsters, there will be an Amateur Radio Newsline Young Ham of the Year Award presented this year after all. At the last minute a spurt of valid nominations was received and as we go to air the judging committee is beginning its deliberation process.

If things go as they usually do, we should know who this years honoree will be in or around mid-July. In the meantime, please do not contact Newsline asking who the person selected is. The committee work is independent of the editorial office and we find out who the person is only an hour or two before the winner is informed.

And what is and what isn't valid nomination you ask? Well those that said something like "-my 7 year old just got his Tech ticket so give him a radio." Those got tossed in the circular file. (YHOTY)

**

RADIO BUSINESS: OEM SUPPLIERS FEELING ECONOMIC PINCH

A shake-out is brewing among the world's top original equipment manufacturers. These are the folks known as O-E-M's that anonymously to make the latest cellphones, MP-3 players and even many two-way radios for big names such as Nokia, Sony, Dell, Apple and many others.

Sub-contract manufacturers produce much of the world's electronics, with collective revenue of $306 billion in 2008. But as growth dips into single-digits this year due to the worlds economic recession, and companies such as Celestica, Sanmina and Elcoteq are seeing their revenues drop as consumer stop buying and the companies they supply cutback on orders for new merchandise. This in turn can lead to consolidation among some of the top of these OEM manufacturers as the economy worsens and the publics desire for new electronic products continues to erode. (OEM Electronics News)

RETRO RADIO: WE5I ON THE AIR ON 6 METER AM

If you have an old 6 meter Gonset Communicator, Clegg 99'er or any other ancient 6 meter AM transceiver and a crystal for 50 point 4 Megacycles -- er -- Megahertz, then you might want to dust it off and

fire it up. This is because Graham Welch, WE5I, wants to talk to you using good old fashioned full carrier A.M..

With the summer 6 meter DX season fast approaching, Graham, who lives in Oklahoma City, Oklahoma, is on 50 point 4 daily from grid square E-M-15. He is listening for callers from anyone who wants to take the time to talk with middle-America on the Magic Band using A-M. He is also posting his operating schedule on the W6YX VHF Reflector and says that even if you do not hear him first to call him anyway. He just may be listening and waiting to hear your call. (VHF Reflector)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: AUSTRALIAN DIGITAL ATV FOLLOW-UP

A follow-up to our recent story about the Australian Amateur Television repeater that's converting to digital operation. Late word is that a June 7th test transmission made by the VE3RTV machine from a hilltop east of Melbourne went exceedingly well.

Reportedly, more than a half dozen V-K hams in and around the Melbourne area received the repeater signal totally noise free. The test transmitter used commercial quality DVT-B standard digital television boards made in Germany. Receivers were commonly used domestic Australian DTV-B converter boxes that were re-tuned to 446.5 MHz A-T-V frequency.

More on this story can be read in the news section of the Amateur Radio Victoria website www.amateurradio.com.au (AR Victoria)

**

THE SOCIAL SCENE: ATLANTA HAMFEST AT 80

The Atlanta Hamfest will celebrate it's 80th anniversary on June 6th. This, with more than 20 exhibitors, a special event station, ham radio training and testing all crammed into one great day at Jim R. Miller Park in Marietta. Doors open at 8:00 a.m. local time. Enhancing the hamfest will be special event station W4DOC operating both voice and digital modes throughout the event. For more information and directions visit www dot atlantahamfest dot com on the World Wide Web. (N4BFR)

**

THE SOCIAL SCENE: PAPERS SOUGHT FOR AMSAT SPACE SYMPOSIUM

And a call for has gone out for papers to be presented at the 2009 AMSAT Annual Meeting and Space Symposium. Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community. A tentative title of your presentation is required as soon as possible with final copy submitted by September 1st. This, for inclusion in the printed proceedings.

The dates of the symposium are October 9th to the 11th. The venue is the Four Points Sheraton Hotel at the Baltimore Washington Airport.

Abstracts and papers should be sent via e-mail to Dan Schultz, N8FGV. His e-mail is n8fgv (at) amsat (dot) org. (ANS)

**

NAMES IN THE NEWS: W4LAA TO RETIRE FROM NIGHTLY BUSINESS REPORT

Some names in the news. First is Paul Kangas, W4LAA, the co-anchor of "Nightly Business Report" on PBS. He has announced that he will step down at the end of the year, ending a 30-year tenure on the nation's most-watched business newscast.

Kangas told Radio World that he was leaving the anchor chair in part to reduce the pressure of the daily deadlines that come with a TV program. Now 72, he was hired to be a stock market commentator when the "Nightly Business Report" had its premiere in 1979. He became an anchor on the show in 1990. (RW)

**

NAMES IN THE NEWS: WA4AW NAMED NEW SOUTHEASTERN VICE DIRECTOR

Southern Florida Assistant Section Manager Jeff Beals, WA4AW, has been appointed Vice Director in the ARRL's Southeastern Division, effective June 1st.

Beals holds an Extra class licensee, and was first licensed in the early 1960s as WN2OUK. He splits his time between Royal Palm Beach, Florida and Dolthan, Alabama.

WA4AW has served as Southern Florida Assistant Section Manager since 2002. He has also held appointments as Section Emergency Coordinator, Affiliated Club Coordinator, Technical Coordinator, Technical Specialist and District Emergency Coordinator.

Beals replaces his longtime friend and Dolthan resident Sandy Donohue, W4RU, who passed away last month. (ARRL)

**

NAMES IN THE NEWS: W8GSM AND W2GPS TO STEP DOWN FROM AMSAT-NA BOD

Gunther Meisse, W8GSM, and Rick Hambly, W2GPS, have said that neither plans to seek re-election to the AMSAT North America Board of Directors. This leaves only Barry Baines, WD4ASW and Drew Glasbrenner, KO4MA trying for another term.

In addition to Baines and Glasbrenner, others seeking positions on the AMSAT board thus far are Anthony Monteiro, AA2TX, Bill Ress, N6GHZ and Alan Biddle, WA4SCA.

Valid nominations for the 2009 AMSAT Board of Directors elections must be received at the AMSAT office is no later than June 15th. An AMSAT North America director serves a 2 year term. (ANS)

**

NAMES IN THE NEWS: M0OBW ELECTED NEW RSGB PRES

And the UK's David Wilson, M0OBW, has been elected as the new president of the Radio Society of Great Britain. This, to serve for the 2010 to 2011 term.

Wilson currently holds positions of Emerging Technologies and RSGB Convention on the society's board . He is also very active in the RSGB-sponsored Train the Trainer program. (GB2RS)

**

ON THE AIR: CANADIAN GROUP CELEBRATES ASTRONOMY

On the air, word that Canada's Westcoast Amateur Radio Association will be QRV as VE7IYOA during the month of June. Their QTH is Victoria, British Columbia and they are operating to mark the International Year of Astronomy. Their main operating times will be on weekends ands and during the upcoming ARRL Field Day. QSL to VE7DAO. (WARA)

**

ON THE AIR: CELEBRATING THE ORIGINAL 13 US COLONIES

A special event to celebrate the 13 original colonies that be came the United States will be on the air from July 1st at 1300 U-T-C to July 5th at 04:00 U-T-C. According to KU2US. a full color certificate with a map with state flags of all the 1776 colony states will be available to each station who works one or more of the special event stations. Full details are at http://home.comcast.net/~dzabawa/ThirteenColonies.htm (via E-mail)

**

ON THE AIR: CELEBRATING WORLD ENVIRONMENT DAY

The Vienna International Center Amateur Radio Club was on the air as 4U1WED on "World Environment Day. This year the center also celebrates its 30th anniversary and thus and outside Environment Day will use the call 4U30VIC from July until December. QSL cards for both calls should be sent via the bureau to 4U1VIC. (QRZ-DX)

**

DX

In D-X, F5JNE will be active from Belle-Ile-en-Mer between 16 and 24 June. Operation will be CW only on 40 and 20 meters, mainly in the evenings. QSL via F5JNE, direct or by the French REF Bureau.

K7BV will return to San Andres as 5J0BV between June 18th to the 29th. He will concentrate on 6 meter Sporadic E contacts but will also activate the high frequency bands as well QSL direct to K7BV via his QRZ.com address.

F6ITD, will be also be active from the same location between the 20th and 28th of June. Activity will be on many of the HF bands on SSB only. QSL via F6ITD.

G4KIU, has moved to Rarotonga and is operating as E51SC using SSB, RTTY, PSK31 and some CW on 80 through 10m. QSLs via bureau to G4KIU or direct to Nigel Peacock, PO Box 880, Rarotonga, Cook Islands via New Zealand. He is also uploading his log data to the Logbook to the World, but once a week.

8N5I will be on the air from Shikoku Island until June 15th. QSL via the JARL bureau.

W5YDX operating portable VP9 will be on Bermuda through June 24th. He plans to operate holiday style focussing on 20 and 17 meters using 100 watts and dipoles. QSL via W5YDX.

KJ4GNB is on Ascension Island and has been heard as ZD8DC in SSB on 20 meters. The length of his stay is not known. QSL cards should be sent via bureau to KJ4GNB.

Lastly, PF4T will be active as 8Q7TB from Embudu Island through June 25th. He's reportedly operating only SSB on 40 and 20 meters using an FT-897 and a G5RV antenna. QSLs direct or via bureau to PA0LEY.

(Above from various DX news sources)

**

THAT FINAL ITEM: CLIQUE TO TEXTING USING MORSE

And finally this week, texting addicts will soon have a new plaything, but will need to learn C-W to use it. This, as Toshiba teams up with microprocessor manufacturer Intel to produce Clique. This is described as a handheld, thumb-operated communications device that uses only three keys produce Morse code for sending text messages.

A Toshiba spokesperson says that Morse was chosen as the communications medium because it is an easily learned and is ideally suited to the single-digit platform. She explained that the Morse code has been in use for more than 160 years which longer than any other electronic encoding system.

Earlier attempts to create a Morse-based texting device were stymied by the variable length of the Morse characters which made it hard to adapt to automated text conversion circuits. Toshiba's solution is the three keys. One is used for dots, another for dashes and the third that acts as a space-bar between letters. One tap separates letters while two taps go between words.

First released in Japan at the 2008 Microprocessor Forum, the Clique is the size and shape of a lollipop with the handle acting as a miniature joystick. Its reception in Japan has been described as fast and furious as early adopters added ï¿½Clique' to their armory of hand-held communications devices.

The Clique is not yet available in the United States but more about it is on-line at http://mhpbooks.com/mobylives/?pe35 (KZ1Z)

==> FUN, FRESH AIR, FRIENDS AND FOOD: IT MUST BE TIME FOR ARRL FIELD DAY!

The 2009 ARRL Field Day will be here before you know it, so now is the time
to grab your rig, grab your friends, grab some grub and get ready to get
outside June 27-28 <http://www.arrl.org/fieldday>. If you haven't yet started
planning for this year's Field Day, it's not too late -- Field Day packets
are available for download from the ARRL Web site
<http://www.arrl.org/contests/forms/fd-2009-packet.pdf>.

ARRL Field Day Manager Dan Henderson, N1ND, reminds clubs and groups that the
deadline to order exhibit kits and ham radio recruitment handouts is drawing
```

near. "We need to have all orders for kits and brochures no later than Wednesday, June 17. If we have your order by then, we will be able to package your order and get it to you in time for Field Day. Any orders received after June 17 will be fulfilled and they might make it to recipients before Field Day," he explained. Exhibit kits can be ordered online at no cost; there is a small shipping and handling fee <http://www.arrl.org/brochures/>.

If you are looking for a Field Day site to attend, or are looking to publicize your Field Day site, be sure to check out the Field Day Site Locator <http://www.arrl.org/contests/announcements/fd/locator.php>. For more information on this service, please check out the Locator Site Frequently Asked Questions (FAQ) <http://www.arrl.org/news/stories/2008/06/03/10021/?nc=1>. "More than 1000 Field Day sites have been registered on the Locator, with more being added every day," Henderson said.

ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On the fourth full weekend in June, tens of thousands of Amateur Radio operators gather for a demonstration of our service. Field Day is part educational event, part operating event, part public relations event -- and all about fun!
"We all became hams for our own reasons," Henderson said. "Some of us were interested in public service and helping others in times of need. Many discovered the hobby as an outlet to their curiosity about electronics and communications. Still others joined our ranks because of the quest to meet new people and expand their own personal bank of knowledge. Whatever the reason you became an amateur, there is one compelling thread that brought us all together. It is as simple as can be: We became hams for the fun of the hobby!"

Henderson said that while Field Day serves a wide array of interests and purposes, "there is no greater 'fun-damental' goal for Field Day than to have fun! While it encompasses a broad range of Amateur Radio interests -- CW, Phone, Digital, emergency preparedness, public service, satellites, recruitment, antennas, new and vintage equipment and so many more -- Field Day is, above all else, a chance for us to have some fun with our hobby."

Henderson reminded hams that fun is where you find it: "Some will discover the fun by operating overnight, building up their club's total number of QSOs. Others will never make a single Field Day contact, but will derive their fun by helping set up antennas and generators. The joy of sharing your radio knowledge with a newcomer will be fun for many old-timers, while other old-timers will experience the 'Field Day high' when they make their very first QSO using a new digital mode or via one of the Amateur Radio satellites. The camaraderie of the annual club Field Day picnic or covered dish supper will be a fun highlight for many, while still others will find the joy in the hobby by simply being able to spend a couple of hours from home on an otherwise busy weekend, tuning the bands and making a few contacts."

If you want to be one of the best-dressed hams at your Field Day event, be sure to pick up the 2009 ARRL Field Day T shirt, hat and pin

<http://www.arrl.org/catalog/?category=&words=field+day&SearchWords.x=0&SearchWords.y=0>. Featuring a woodsy, outdoor scene, these items are a great way to recognize your involvement in the excitement and fun of this annual operating event. ARRL is also offering Get On The Air (GOTA) pins <http://www.arrl.org/catalog/?item=8911>. It's a great idea to have your GOTA station operators wear these attractive pins. Pins from previous Field Days are also available -- make your collection complete with this year's pin. According to ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R, a new shipment of 2009 Field Day T shirts has just arrived, so be sure to order yours today.

==> CHANGES COMING FOR ARRL NOVEMBER SWEEPSTAKES CONTEST LOG SUBMISSIONS

ARRL Sweepstakes Contest Manager Ken Adams, K5KA, said he and the ARRL Contest Branch intend to "dramatically reduce the timeframe for producing results that are available to all ARRL Sweepstakes participants." According to Adams, the contesting community has requested that results be made available more quickly. Currently, Sweepstakes results are published six months after the contest has taken place.

"To facilitate this request, we would like to make the 2009 ARRL Sweepstakes final results available on the Web in 60 days in the form of a PDF file," he said. "If this effort proves successful, we plan to shorten this window to 30 days in 2010. This PDF would simply be the scores in each category -- full write-ups and detailed analysis of the Sweepstakes contest would still appear in QST and on the Web at a later time."

To meet this aggressive schedule, Adams said that the log submission deadline will be reduced from 30 days to 15 days. For the 2009 Sweepstakes, the deadline for CW Sweepstakes logs will be 0300 UTC on Monday, November 23, 2009. The deadline for the Phone Sweepstakes will be 0300 UTC on Monday, December 7, 2009.

"The number of non-Cabrillo logs received at ARRL HQ must be reduced," Adams explained. "By receiving logs 15 days earlier, we can begin the log checking process that much faster, but we will we need your help on the paper log issue. In 2008, the ARRL Contest Branch received more than 300 paper logs for the Sweepstakes contests. These paper logs were converted to Cabrillo format by a dedicated, yet small, group of volunteers. This took several hundred person-hours of time."

Adams said that there are plans to contact as many paper log submitters as possible and point out resources they can use to generate Cabrillo logs: "I am asking that every club have a special project and meeting this year to insure that 100 percent of their members submit Cabrillo logs for Sweepstakes. If you have club members who don't have computers, please form your own volunteer teams to convert their logs after the contest. This would be a great excuse for a big post-Sweepstakes club pizza party, combining data entry with club camaraderie."

While the ARRL will never turn away a paper log, Adams said that the advantages of electronic log submission are critical to the success of the

accelerated presentation of the Sweepstakes results. "Numerous software contest loggers exist for Windows and DOS, including the free packages CT <http://www.k1ea.com/> and N1MM <http://pages.cthome.net/n1mm/>," he said. Entrants are also able to manually convert their own paper logs to a Cabrillo log at the WA7BNM Cabrillo Web site" <http://www.b4h.net/cabforms/arrlsscw_cab.php>.

"You, the members of the contesting community, have requested faster turnaround of contest results for some time," Adams said. "With every contester's help, we can achieve this goal of dramatically reducing the time between contest and results. We have identified several other areas we hope to improve in the future, such as simplified Web access for Sweepstakes information, historical log search capability, easy access to FAQs, records and the like. We will continue to work on those goals. Thank you for your continued participation and help with the ARRL November Sweepstakes, the greatest domestic contest out there."

==> ALABAMA HAMS ASSIST DURING STATEWIDE EMERGENCY DRILL

During the week of May 4-8, emergency responders and support personnel gathered in Robertsdale, Alabama for a communications interoperability training and full-scale exercise, sponsored by the Alabama Department of Homeland Security (ADHS) <http://www.homelandsecurity.alabama.gov/>. Gathering in a field near the Baldwin County Emergency Operations Center, responders came together to test the quality and effectiveness of communications between various State agencies and support personnel. The exercise simulated a Category 5 hurricane that entered Mobile Bay, causing damage throughout the state.

According to ARRL Alabama Section Manager Jay Isbell, KA4KUN, the Alabama DHS has come to recognize the role that Amateur Radio operators play in emergencies and natural disasters; based on this, the Alabama DHS chose to include Amateur Radio in the exercise. "During Hurricane Katrina, Amateur Radio volunteers played a key part in making sure that communications between agency personnel continued uninterrupted and the public received the help and the timely response needed in this type of catastrophic event," Isbell explained. ARRL Amateur Radio Emergency Service (ARES) operators from SEMA Region 1 and other regions throughout Alabama were on site to support communications.

The Alabama Emergency Management Agency, the Alabama National Guard, the Alabama Department of Public Safety, Region IV of the Federal Emergency Management Agency (FEMA) <http://www.fema.org/>, Alabama Alcoholic Beverage Control Board, Virtual Alabama, Alabama Civil Air Patrol, local sheriffs' office, as well as eight Alabama Regional Communication vehicles also participated in the exercise.

ARRL Southeastern Division Director Greg Sarratt, W4OZK, together with Alabama Region 1 District Emergency Coordinator Patti Link, KI4JEO, worked diligently with both amateur volunteers and professional partner agencies to coordinate and facilitate the role of Amateur Radio during the exercise. According to Isbell, Sarratt was the liaison at the Incident Command Point,

while Link -- working in the Baldwin County EOC -- coordinated amateurs throughout the area, dispatching them with Alabama DHS Regional Communication vehicles and to other locations in the nine-county affected area. Isbell was dispatched to a mock reception center site 60 miles north of the incident, and Section Emergency Coordinator Les Rayburn, N1LF, manned the radio at the State Emergency Operations Center.

"Since the major hurricanes of recent years, the State of Alabama and the Southeast Region of FEMA have really accepted Amateur Radio as a prime player in any major disaster," Isbell told the ARRL. "SEC Les Rayburn has grown Alabama ARES from several independent groups into a well-organized first responder team. Amateur Radio is being accepted as a critical tool during times that the daily manpower and technical resources are stretched beyond their design."

Sarratt said that the Amateur Radio participants learned a lot during the week-long exercise: "This was a good test of the ARES processes and improvements in a full-scale exercise with other agencies since Katrina. Everyone shared and learned about each other's communications capabilities. The relationships built and lessons learned here are invaluable to the Amateur Radio Service."

==> LOOK FOR THE JULY ISSUE OF QST IN YOUR MAILBOX

The July issue of QST is jam-packed with the news and information today's Amateur Radio operator needs. From product reviews to experiments to contesting, the upcoming issue of QST has something for just about everyone.

Al Yerger, WA2EHI, shows you how to take advantage of the multiple leads on a parallel port to control all of your remote operations in his article "A Parallel Port Interface for Your Shack." Follow Richard Kriss, AA6VU, as he solves a pesky TVI problem at his home in Texas. ARRL News Editor S. Khrystyne Keane, K1SFA, along with QST Technical Editor Joel Hallas, W1ZR, give their take on the sights, sounds and smells -- as well as the new radio gear -- of the 2009 Dayton Hamvention in "Dayton DREAM Believer: The 2009 ARRL National Convention and Dayton Hamvention."

ARRL Technical Relations Manager Brennan Price, N4QX, reviews Yaesu's VX-8R handheld transceiver. According to Price, "Yaesu incorporates GPS and APRS capabilities into its new top-of-the-line, feature-packed handheld." ARRL Chief Executive Officer David Sumner, K1ZZ, reviews Array Solution's QSK-MASTER external QSK TR switch for HF amplifiers. Sumner said that the QSK-MASTER "offers owners of older RF power amplifiers a way to add flawless full break-in (QSK) operation without equipment modification."

If it's July, it must be time for the IARU HF World Championships <http://www.arrl.org/contests/rules/2009/iaru.html>. This is a great opportunity to contact many stations all over the world, especially the headquarters station of IARU Member Societies, including W1AW. ARRL Contest Branch Manager Sean Kutzko, KX9X, takes a look multipliers -- what are they, why are they important and how do they work -- in "This Month in Contesting." The results of the 2008 ARRL 10 Meter Contest, the 2009 ARRL RTTY Roundup and

the 2009 ARRL January VHF Sweepstakes are in. Did you top your score from last year? How did your closest rival do? Also, find out about upcoming contests in Contest Corral.

Of course, there are the usual columns you know and expect in July QST: Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Field Organization Reports, Hamspeak and more. Look for your July issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <http://www.arrl.org/join>.

==> JOIN THE FUN IN THE ARRL VHF QSO PARTY THIS WEEKEND

VHF enthusiasts will be generating lots of RF on 6 meters and up this weekend (June 13-15 UTC) during the 2009 ARRL VHF QSO Party <http://www.arrl.org/contests/rules/2009/june-vhf.html>. While many amateurs think of the VHF+ bands as a "local" band used primarily for public service, emergency communications or fun on FM repeaters, weak-signal VHF+ enthusiasts know better. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, even hams who have a modest station can work hundreds -- or even thousands -- of miles on the VHF bands during a good opening.

Kutzko is a big VHF enthusiast: "In my more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do. There is nothing like a good VHF opening; with interesting propagation characteristics like sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce, VHF offers QSO opportunities that HF can never satisfy."

Kutzko said this weekend is a great time to try 6 or 2 meters. "The June VHF QSO Party occurs at the beginning of the summer sporadic-E season, and can produce strong openings on 6 meters and in some cases up to 2 meters," he said. There have been moderate openings on 6 meters in some part of the United States almost nightly for the last two weeks, and southern California enjoyed a brief sporadic-E opening on 2 meters into Texas this past Tuesday evening, over an average path of 1100 miles. "That's fun any way you slice it," Kutzko said. "Because of the contest, many stations will be on. This, coupled with the interesting propagation possibilities, makes for a great weekend."

Getting on the VHF bands is easy, he said. While there will be some contest activity on FM simplex (especially near large population centers), most long-distance VHF+ QSOs are conducted on CW or SSB; that means horizontally polarized antennas. You will also need a radio that can transmit in those modes. Most of the newer HF transceivers have 6 meters built in, and several come with 2 meters and 70 cm, too. "A dipole on 6 meters will work quite well during a decent opening," Kutzko said. "They're easy to make and less than 10 feet long. Throw it up in a tree as high as you can and you'll be in business. For 2 meters and 70 cm, a horizontal loop will work nicely for SSB and CW contacts." You can find plans for simple VHF antennas at the Technical Information Service area of the ARRL Web site <http://www.arrl.org/tis/info/other-v.html>, in the Antennas chapter of the

ARRL Handbook, or in the VHF and UHF Antenna Systems chapter of the ARRL Antenna Book.

Because VHF antennas are generally smaller than their HF counterparts, portable operation is easy. "You can operate from your favorite hilltop, camp site or any location with high terrain and make many QSOs," Kutzko said. All you need to know is the Maidenhead grid square of your operating location; this is the contest exchange. Find your Maidenhead grid square here <http://www.arrl.org/tis/info/grid.html>.

For SSB QSOs on 6 meters, tune between 50.100-50.200 MHz; 50.125 is the W/VE calling frequency, so listen there for band openings. If the band starts to open up, move off the calling frequency and start working folks! Keep in mind that 50.100-50.125 is reserved for intercontinental QSOs, so don't transmit there unless you are trying to work DX. For the CW operators, you will find CW between 50.080-50.100 MHz. Activity on 2 meters will center around the calling frequency of 144.200. Again, monitor the calling frequency for band openings, but move off when activity starts to pick up. Kutzko advises that most activity on 2 meter SSB/CW will be found between 144.170-144.230 MHz, while 70 cm activity will center around 432.100 MHz.

"This weekend promises to be a tremendous amount of fun on the VHF and UHF bands so don't miss out!" Kutzko said. "All amateurs -- from Technicians to Extras, experienced VHF operators to the first-time VHF dabblers -- are welcome to participate." The ARRL June VHF QSO Party runs this weekend from 1800 UTC Saturday until 0300 UTC Monday (Saturday afternoon to Sunday evening for most of the US and Canada). Complete rules and entry forms may be found here. All logs must be e-mailed <JuneVHF@arrl.org> or postmarked no later than 0300 UTC Wednesday, July 15. If you have any questions about the ARRL June VHF QSO Party or any other ARRL contest, please contact the Contest Branch via e-mail <contest@arrl.org>.

==> NATIONAL HURRICANE CENTER PREDICTS "NEAR-NORMAL" HURRICANE SEASON

Forecasters with the National Hurricane Center (NHC) are calling for a "near-normal" Atlantic hurricane season this year. In its initial outlook for the 2009 Atlantic hurricane season -- which runs from June 1-November 30 -- the National Weather Service's Climate Prediction Center (CPC) <http://www.cpc.ncep.noaa.gov/> is calling for a 50 percent probability of a near-normal season, a 25 percent probability of an above-normal season and a 25 percent probability of a below-normal season. According to the CPC, global weather patterns are imposing a greater uncertainty in the 2009 hurricane season outlook than in recent years.

Forecasters say there is a 70 percent chance of having nine to 14 named storms, of which four to seven could become hurricanes, including one to three major hurricanes (Category 3, 4 or 5). Tropical systems acquire a name -- the first for 2009 will be Ana -- upon reaching tropical storm strength with sustained winds of at least 39 MPH. Tropical storms become hurricanes when winds reach 74 MPH and become major hurricanes when winds increase to 111 MPH. An average season has 11 named storms, including six hurricanes with two becoming major hurricanes.

"This outlook is a guide to the overall expected seasonal activity. However, the outlook is not just about the numbers, it's also about taking action," said Dr Gerry Bell, lead seasonal hurricane forecaster at the CPC. "Prepare for each and every season regardless of the seasonal outlook. Even a near- or below-normal season can produce landfalling hurricanes, and it only takes one landfalling storm to make it a bad season."

Rick Palm, K1CE, editor of the ARRL's ARES E-Letter <http://www.arrl.org/FandES/field/ares-el/>, warns that now is the time for ARES members to assess their portfolio of communications equipment and disaster response knowledge. Palm gives several tips for amateurs involved with hurricane operations:

Monitor major HF hurricane networks during events this season. The Hurricane Watch Net (HWN) on 14.325 MHz is one of several key players <http://www.hwn.org/>. It serves either the Atlantic or Pacific during a watch or warning period and coordinates with the National Hurricane Center (NHC) in Miami <http://www.nhc.noaa.gov/>. Frequent, detailed information is issued on nets when storms pose a threat to the US mainland. In addition to hurricane spotting, local communicators may announce that residents have evacuated from low-lying flood areas. Other amateurs across the country can help by relaying information, keeping the net frequency clear and by listening. See the HWN's Web site for more information. The net works closely with the hams at the NHC's Amateur Radio station WX4NHC <http://www.wx4nhc.com/>.

The SATERN Net (Salvation Army Team Emergency Radio Network) <http://www.satern.org/> provides emergency communication support to the Salvation Army and populations at large. They also handle health-and-welfare traffic. SATERN holds high profile nets on 20 meters (14.265 MHz) during major hurricanes and has a long history of excellence, discipline and service. Refer to the SATERN Web site for more information.

The Maritime Mobile Service Net (MMSN) <http://www.mmsn.org/> meets on 14.300 MHz and is composed of hams who serve and assist those in need of communications on the high seas. According to its Web site, the primary purpose of the net is for handling traffic from maritime mobile stations. The network is recognized by the United States Coast Guard and has an excellent working relationship with that agency. The MMSN has handled hundreds of incidents involving vessels in distress and medical emergencies in remote locations, as well as passing health and welfare traffic in and out of affected areas. They also work closely with the NWS and NHC by relaying weather reports from maritime stations.

The VoIP SKYWARN and Hurricane Net <http://www.voipwx.net/> operates by combining both the EchoLink and IRLP linked repeater networks, while handling critical wide area communications during major severe weather and tropical events. These operations have gained national stature in recent years, making the Net a critical partner with WX4NHC. Whenever tropical weather is posing a threat to the US mainland and certain other areas of interest, the VoIP WX net will be fully operational. See the VoIP SKYWARN and Hurricane Net Web site for more information.

Palm said that during hurricane events, there are usually two or three regional nets (usually on 40 or 20 meters) that spring to prominence as major key assets to the disaster response on an ad hoc basis. "Watch for these nets, as well as the nationally recognized networks described above, this season. Don't transmit on their frequencies unless you are absolutely sure you have something substantive to add, and then only under the direction of the net control station," Palm advised.

ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, added that when ARES activates in response to any tropical event, it is crucial that information flows up through the Section and is reported to Headquarters. "These reports allow us to develop the situational awareness and disaster intelligence that is required for us as an organization to support the Sections that are impacted" he explained. "In this way, we are able to respond to relevant requests from the media and finally to coordinate with the governmental and non-governmental organizations. This information also allows us to make the decision at Headquarters on whether to stand up our Incident Management Team to support and coordinate the operations."

If you are interested in Emergency Communications, please be sure to check out the monthly ARES E-Letter <http://www.arrl.org/FandES/field/ares-el/>. You can elect to receive this newsletter free of charge via e-mail by going to the Member Data Page on the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==> QEX: THE JULY/AUGUST 2009 ISSUE

The July/August issue of QEX is coming soon, and it is full of theoretical and practical technical articles and columns that you won't want to miss <http://www.arrl.org/qex>.

In this issue, Gary Steinbaugh, AF8L, presents Part 3 of "A Cybernetic Sinusoidal Synthesizer." This installment describes some limitations of proportional control systems and explains the advantages of adding integration and differentiation steps to proportional controllers. Steinbaugh also describes the construction of the RF power meter circuit used in the project

John Magliacane, KD2BD, and Bill Walker, W5GFE, describe "SPLAT!: An RF Signal Propagation and Terrain Analysis Tool." In addition to VHF/UHF line-of-sight paths, this program includes the Longley-Rice propagation model to predict path loss across irregular terrain. A Web interface provides a convenient way to use the extensive geographic terrain database in the calculations. Rudy Severns, N6LF, presents more of his research in "Experimental Determination of Ground System Performance for HF Verticals." Part 5 focuses on the effects of different numbers of radials on received signal strength for 160 meter vertical antennas.

Tom Warnagiris, K3GSY, introduces the Tapered Area Small Helix (TASH) antenna in "The Chicken Wire Wonder." Chances are, this unique broadband vertical antenna does not look like any antenna you have ever seen! An 80 meter version is 14 feet high and covers an area of about 4 ï¿½ 5 feet on the ground. Maynard Wright, W6PAP, provides information on several "Alternatives to

Octave" for various electronics calculations. ARRL Technical Advisor Robert J. Zavrel Jr, W7SX, presents the case for "Maximizing Radiation Resistance in Vertical Antennas" to increase the efficiency of our antennas.

John S. (Jack) Belrose, VE2CV, another ARRL Technical Advisor, presents a brief discussion "On Elevated Radials" after reading earlier installments of Rudy Severns' series about his experiments with HF vertical antenna radial systems. Ray Mack, W5IFS, continues his software defined radio column. In this installment of "SDR: Simplified," he builds an SDR that will tune a single AM broadcast band station.

Would you like to write for QEX? It pays $50/printed page. Get more information and an Author's Guide <http://www.arrl.org/qex/#aguide>. If you prefer postal mail, send a business-size self-addressed, stamped envelope to QEX Author's Guide, c/o Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111-1494. QEX is edited by Larry Wolfgang, WR1B <lwolfgang@arrl.org>, and is published bimonthly. The subscription rate (6 issues) for ARRL members in the US is $24. For First Class US delivery, it's $37; in Canada and internationally by airmail it's $31. Nonmembers add $12 to these rates. Subscribe to QEX today.

==>SOLAR UPDATE

Tad "Rejoicing in the Sun" Cook, K7RA, this week reports: Sunspot numbers from May 31-June 5 ranged from 13 to 23, then the Sun was blank for two days, followed by sunspot numbers of 12 for both June 8 and 9. This fleeting sunspot was number 1020, and like last week's spot, 1020 had the magnetic signature of a new Solar Cycle 24 spot. Alas, it was another of the frequent sunspots we've seen lately that appear briefly, and then vanish. The last Solar Cycle 23 spot was number 1016 that appeared April 29-30. Sunspot numbers for June 4-10 were 17, 13, 0, 0, 12, 12 and 0 with a mean of 7.7. The 10.7 cm flux was 71, 70.1, 69, 68.9, 69, 69.1 and 69.2 with a mean of 69.5. The estimated planetary A indices were 6, 6, 5, 6, 4, 3 and 5 with a mean of 5. The estimated mid-latitude A indices were 5, 5, 2, 3, 2, 2 and 2 with a mean of 3. For this week, geomagnetic conditions should remain very quiet. Solar flux is estimated to be about 68, rising above 70 June 24-July 1. For more informati
on concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Christina Rossetti's "A Summer Wish" <http://www.readbookonline.net/readOnLine/15719/>.

==>IN BRIEF:

* This Week on the Radio: This week is the ARRL June VHF QSO Party on June 13-15. The Asia-Pacific Sprint is June 13. The GACW WWSA CW DX Contest and the ANARTS WW RTTY Contest are June 13-14. Next week, look for the ARRL Kids Day Contest on June 20. The NCCC Sprint Ladder and the Digital Pentathlon are

June 19. The Feld Hell Sprint and the AGCW VHF/UHF Contest are June 20. One June 20-21, look for the West Virginia QSO Party and the All Asian DX Contest (CW). The Run for the Bacon QRP Contest is June 22 and the SKCC Sprint is June 24. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 28, 2009, for these online course sessions beginning on Friday, July 10, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing
helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* Two New Co-sponsors Pledge Support for HR 2160: Earlier this week, HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 -- gained two new Congressional co-sponsors: Republican Roscoe Bartlett (MD-6) and Democrat Bart Gordon (TN-6). Originally sponsored by Representative Sheila Jackson-Lee, a Democrat representing Texas' 18th District, HR 2160 is also sponsored by Madeleine Bordallo (Guam), Brett Guthrie (KY-02), Mary Jo Kilroy (OH-15), Zoe Lofgren (CA-16), Blaine Luetkemeyer, (MO-9) and Bennie Thompson (MS-02). Click here
<http://www.arrl.org/news/stories/2009/05/12/10818> for information on how to encourage your Congressional representative to sponsor HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>.

* Don Tunstill, W4NO (SK): Don Tunstill, W4NO, founder of the Central America VEC, passed away at his home in Huntsville, Alabama on Monday, June 9. He was 69. Tunstill, an ARRL Life Member, was a charter member of Huntsville Amateur Radio Club and served as president of Huntsville Hamfest
<http://www.hamfest.org/> for more than 30 years. With the FCC, Tunstill assisted with the formulation and implementation of the Volunteer Examiner Coordinator program and the vanity call sign system. He founded the Central America VEC, one of the first VE programs in the state of Alabama. A memorial

service is planned for 10 AM on June 13 at Berryhill Funeral Home in Huntsville.

* Central States VHF Society Seeks Presentations for Annual Conference: The Central States VHF Society (CSVHFS) <http://www.csvhfs.org/> is soliciting presentations and poster displays for their 43rd Annual Conference this summer -- July 23-26 -- at the Holiday Inn in Elk Grove Village, Illinois <http://www.csvhfs.org/conference/index.html>. Possible presentation topics on all aspects of weak-signal VHF and above include, but are not limited to, antennas (modeling, design, arrays and control), equipment construction, propagation, test gear, regulatory issues, operating, digital signal processing and software-defined radio. The submission deadline for presentations and poster displays is June 29; bring posters for display with you to the conference. For more information, visit the CSVHFS 2009 conference Web page <http://www.csvhfs.org/conference/index.html> or contact Kermit Carlson, W9XA <w9xa@yahoo.com>.

* From the DXCC Desk: According to ARRL DXCC Manager Bill Moore, NC1L, questions have been coming into DXCC regarding the status of 5N/LZ1QK in Nigeria. "DXCC is currently working with his QSL manager to resolve the status of this operation," Moore said. "At this time, DXCC accreditation is on hold pending the outcome of the review."

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:

ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

June 15, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, WB2GAI, K3SWZ, N3SL, NG3K, N4AA & QRZ DX, K8YSE, N8OFS, W9DX, W0SD, 5H3TSA, A35RK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PFP, I1JQJ/ IK1ADH & 425 DX News, IV3KKW, IZ4AKS, IZ8CCW, OE8KDK, Pete's-DX-Newsdesk, ON4ATW, PG5M, RSGB IOTA Web Site, SV1EJD, UR5BCP, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), ZL2AL and ZL2CQ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-June, through Sunday, 14th-June there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V8, VE, VK, VP2V, VP8, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA (2009 Scout Jamboree). The 2009 Tanzania National Scout's Jamboree will be held at Mbeya Region, southern part of Tanzania, between June 12-19th. Look for 5H3TSA to be on air on 20 meters and 15 meters (14290 and 21360 kHz). QSL direct only to 5H3TSA.

5R8, MADAGASCAR (Update). Texas DX Society (TDXS) member, Wayne, W5KDJ, will be active as 5R8KD from Antananarivo between July 4-17th. Activity will be on 160-6 meters using CW and RTTY. Wayne will also be active in the IARU Contest (July 11-12th) and operate from the shack of 5R8FU using his new TH-11-DX. QSL via his home callsign. Online log search will be available. Logs will be uploaded to LoTW and eQSL.

9H, MALTA. Giorgio, IV3EPO, will be active as 9H3EP between June 23-29th. Activity will be on 40-10 meters, mainly CW. QSL via IV3EPO, by the Bureau or direct.

A35, TONGA (Update). Paul, A35RK, on Wednesday, June 10th, informed OPDX that "I have received many requests for 'skeds', for several bands and modes. Unfortunately, I am not able to accommodate anyone at this time. I'm too busy, and I am unable to 'promise' to keep any sort of radio schedule at the moment." Pauls states, "My internet connection is intermittent, and I often cannot respond to incoming E-mail. Please ask your readers NOT to send any more requests for skeds. I will be here in Vava'u (OC-064) for about 2 more weeks, and then will return to Ha'apai (OC-169). In the meantime, I will be as active on the air as I can be."

ANTARCTICA EXPEDITION PLANNED. Operators Jean Pierre/ON7ZM and Mehdi/F5PFP are planning an expedition to Antarctica that will probably take place during the Arctic summer of 2011-2012. Mehdi states, "It could be a 6-7 weeks expedition in a way to reach some old bases and refuges which are situated below the Antarctic polar circle, (Loubet coast, Fallieres coast, Marguerite Bay, and we hope one accessible island at least belonging to Alexander Island group)." If someone wishes to join them as an operator or tourist, send Mehdi an E-mail at: f5pfp@aliceadsl.fr
More details are forthcoming.

C2, NAURU (Reminder). Dani, EA4ATI/9M2TI, and possibly other operators are expected to activate Nauru in the Pacific (refer to OPDX.894) as C21TI between June 16-26th. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 5371.5, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
6m - 50.115 MHz (CW/SSB)
Visit their new Web page at http://c21ti.madrono.net/index.html

CE0Y, EASTER ISLAND (SA-001). Operators Stan/SQ8X and Vicky/SV2KBS are planning to be active as CE0Y/homecall from here between October 31st and November 15th. They are looking for one or two operators to join them on this operation. Plans are to have two stations on the air. They understand that Easter Island (SA-001) is not on most wanted lists, but there is a demand by some European stations to work CE0Y (this will be their main goal). More details will be forthcoming.

CQ NEWS..... (Press Releases via Richard Moseson, W2VU, Editor of CQ Amateur Radio):
* CQWW Adds New "Xtreme" Category (Hicksville, NY - June 10th) - A new "Xtreme" category is being added to the CQ World Wide DX Contest to encourage the development of new technologies in amateur radio communi-

cations in general and contesting in particular. According to CQ WW Contest Director Bob Cox, K3EST, this new category has been established to allow amateurs to participate in the CQ WW contest while experimenting creatively with Internet-linked stations and other new technologies. "Contesters are often early adopters of new technologies," said Cox, "and we want to encourage this as a continuation of ham radio's pioneering spirit. However, many of these technologies are not currently permitted in any existing CQ WW categories. The Xtreme category will allow these stations to compete, but only with other stations using new technologies."

Scoring for logs submitted in the new category will be a mix of standard CQ WW scoring plus a more subjective score for level of innovation and originality, as determined by a panel of judges on the CQ WW Contest Committee. The highest-scoring entries in the single-operator and multi-operator categories will win the John Kanzius, K3TUP, Memorial plaques, sponsored by Tim Duffy, K3LR. Kanzius, a prominent contester, was also an experimenter who developed a potentially ground-breaking approach to cancer treatment in the course of his own, ultimately unsuccessful, battle with the disease.

The new category will take effect with the 2009 CQ World Wide DX Contest this fall. It was introduced to contesters at the 2009 Dayton Hamvention and received an immediate positive response. Complete details of the Xtreme category are in the June issue of "CQ" and are on the CQWW page of the CQ magazine website, <http://www.cq-amateur-radio.com/>

* "CQ" Propagation Editor Challenges Revised Solar Cycle (Hicksville, NY - June 10th) - "CQ" magazine's Propagation Editor is challenging the accuracy of the newest predictions on Solar Cycle 24. The revised prediction, issued in late May by a panel of solar experts, suggests a weak sunspot cycle with a peak in 2013. But "CQ" Propagation Editor Tomas Hood, NW7US, is asking "How Credible Are These 'Experts'?"

In an online commentary posted on the "CQ" magazine website, Hood notes that this same group of so-called "experts" has issued multiple predictions for this cycle already, all of which they now say are wrong, and asks why we should believe they're right this time.

"How much credibility should we grant to the panel of solar researchers and scientists that again releases a speculative prediction of the new Solar Cycle?" Hood asks, noting that NASA's lead representative on the panel says "it turns out that none of our models were totally correct."

Hood points out that, while the sun itself is millions of years old, scientists have been tracking solar activity for just a few hundred years. "In my view," he says, "it is pretty arrogant to postulate that mankind has any real understanding and handle on what the sun might do next."

"No one can postulate with any credibility just how intense the new cycle will be because there's no direct correlation between this solar minimum and any regular pattern of past minimums," Hood notes, adding, "If none of the models are totally correct, how are they making this

current prediction with such dismal expectations? I'm not holding my breath in favor of supporting any of the predictions at this point." He also points out that there are already signs of "an awakening Solar Cycle 24," and encourages hams to "enjoy the unique propagation opportunities currently presenting themselves during this quiet phase," and to "prepare now for whatever the sun will do by honing your radio skills...."
The complete text of Hood's commentary is on the CQ website at <http://www.cq-amateur-radio.com> and may be accessed by clicking the "online commentary" link on the lefthand side of the home page.

DXCC 2008 YEARBOOK. Many have received their yearbook this past weekend. Keep watching your mailbox for it.

E51, SOUTH COOK ISLANDS (Update). Nigel, G4KIU, now active as E51SC from the Island of Rarotonga (OC-013), was quite active this past weekend on RTTY on 20 meters and PSK31. He moved to the South Cook Islands and is expected to also be active on 80-10 meters mainly on SSB, RTTY, PSK31 and with some CW. Nigel announced this past week he will be an entry in the RSGB IOTA Contest (July 25-26th) as a Single-Op. Direct QSLs are to be sent to: Nigel Peacock, P.O. Box 880, Rarotonga, Cook Islands (via New Zealand). Please send a SAE, plus 2 USDs or 2 new style IRCs. Any direct cards received without the above items will be returned via the Bureau. Bureau QSLs go to: E51SC via G4KIU/RSGB. **IMPORTANT** There is no QSL Bureau in the Cook Islands. Cards without G4KIU on them will NOT be received. Please "DO NOT" send direct cards to any G4KIU address in England - they will NOT arrive. All E51SC contacts will be loaded to LoTW about once a week. He does not use e.QSL at all.

F, FRANCE (LH Op). Operators Michel/HB9DLO, Pascal/HB9DWR and Pierre-Yves/ HB9OMI will be active as F/HB9LH/p from the Lac du Bourget lighthouse (ARLHS FRA-827, DEP. 73, CP 73100, DDCF 7303) in Phare d'Aix-les-Bains, between 0800z, June 20th and 1600z, June 21st. Activity will be on 3670, 7070 and 14270 kHz (+/- QRM) SSB, and CW and/or other bands according to the propagation. QSL via HB9DLO, by the Bureau or direct. Visit their Web page at: http://www.hb9lh.ch

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader, announced this past week that the Glorioso 2009 team gathered at Frank's, F4AJQ, QTH last weekend (June 6-7th), with some F6KOP team members. During these two days the whole time was spent tuning the antennas, teaching DXpeditioners about their settings, and to coordinating all of the packages. The final setup was 4 complete stations (each with at least a 800 watts PA) that will be shipped to Glorioso's main island. They plan to be active as much as possible during the 24 hour day. Their antenna system will consist of 2 Spiderbeams for 20/15/10m and another for 30/17/12m. They will also have an Inverted L for 160m, one V10, one V80 and one HF2V for 80-40m. Some other vertical elements were packed as well as a K9AY array receiving system. A 6 meters station will monitor the Magic band but only into a G5RV antenna. The complete crew (and they hope it will not change) consists of: Freddy/F5IRO, Yves/F5PRU, Jean-Marc/F5RQQ,

Sylvain/F5TLN, Philippe/F4EGS and three SIRPA agents: Florence (YL) journalist, Yann (director and cameraman) and Didier (cameraman and sound engineer). They would like to thank Jeff/F6AOJ, Floyd/N5FG, Toshi/JA1ELY, Mike/UA0ME and Lee/ZL2AL for being their pilot stations. It was mentioned that they would also like to thank Floyd/N5FG and Jeff/F6AOJ for their big efforts in the back office. For the first time the callsign to be used for the Glorioso operation will be under the new French Antarctic and Austral Territories (TAAF) regulation and is expected to be FT5GA."
ADDED NOTE: As of 2005, the "Iles Eparses", Gloriosos, Tromelin, Juan da Nova and Europa Islands are now put under the new TAAF authority. All future callsigns, for these areas, will be issued with the following prefixes:
FR/G becomes FT#G Gloriosos FR/T becomes FT#T, Tromelin
FR/E becomes Ft#E, Europa FR/J becomes FT#J, Juan da Nova

No changes for FT#W (Crozet), FT#Y (Terre Adelie), FT#X (Kerguelen) and FT#Z (Amsterdam).

GB2, ENGLAND (LH Op). Members of the "Bittern DX'ers" will activate for the 8th time "Blakeney Mariner's Light" GB2BML for the ILLW 2008, on the weekend of August 15-16th. Reference numbers are: ENG-292 and WLOTA 1841). Activity will be on all HF bands using CW, SSB, RTTY, SSTV, PSK31, and 2m FM/SSB. QSL via M0CNP, direct or by the Bureau. Visit the Bittern DX'ers Web page at: http://www.bittern-dxers.org.uk

HG400, HUNGARY (Special Event). Sanyi, HA0HV, is currently active using the special callsign HG400HV through the end of the year (December 31st). Activity is to celebrate his town's 400th anniversary, which was established by the "hajduk" who called their settlement "Hajduboszormeny". The town Hajduboszormeny is in eastern Hungary with a population of approximately 32,000 people. Sanyi expects to operate on all HF bands plus 6 and 2 meters using CW, SSB and the Digital modes. QSL via HA0HV, by the HA Bureau or direct using the QRZ.com address.

IOTA NEWS.....
AS-117. (Special Event/WLOTA Op) Members of the Tokyo Dental College RC (JA1YUC) will activate the special event callsign 8J120TDC/2 from Mikomoto Island (WLOTA-2126) between July 26-28th. Activity will mostly be on 40/20/17/15 meters using CW and SSB which will include an entry in the RSGB IOTA Contest (July 25-26th). Special event callsign is to celebrate the 120th anniversary of the Tokyo Dental College. Mikomoto Island lighthouse WLOTA number will be activated for the first time. The lighthouse was also selected by the International Association of Lighthouse Authorities (IALA) as one of 100 lighthouses particularly important historically in various countries of the world. QSL via JA1YUC, by the bureau or address on QRZ.com.

EU-008. Michael, DL6MHW, will be active as MM/DL6MHW from the Ilse of Mull, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via DL6MHW.

EU-010. Members of the Workington and District Amateur Radio Club will once again be active as MS0WRC from Crannag Cottage, NE Coast Isle of Barra (IOSA OH-11, SCOTIA HI-02, WAB NF70, WLOTA 3126), Outer Hebrides, from September 26th to October 3rd. Operators mentioned are: Steve/G0MTD, Paul/M1PAF, Mark/M0WCR and Glyn/ M3XUH. Activity will be on all HF bands but mainly 80/40/20/17 meters SSB and VHF/UHF FM. The group also plans to travel around the island (active as mobile or portable) and possibly activate some rare WAB Squares. QSL direct to G0MTD or by the Bureau to either MS0WRC or G0MTD. More information can be found on Steve's Web page at: http://www.g0mtd.co.uk

EU-049. Theo, SV1EJD, will be active as SV8/SV1EJD while on vacation from Lesvos Island between July 12-22nd. Activity will be on 80-10 meters using SSB and RTTY. More details will be forth-coming on: http://www.sv1ejd.gr/lesvos.htm

EU-064. Operators Jean-Michel/F1UGV, Nicolas/F4BJW, Jean-Marc/F5NLR, Olivier/F5SRH and Henri/F5DBC will be active as TM5DUM from the Dumet Island (DIFM AT 018), June 20-21st. Activity will be on the HF and VHF bands, propagation permitting, using CW and SSB. For details on the island, go to: http://www.france-secret.com/dumet_art.htm QSL per operator's instructions.

EU-105. Theo, ON4ATW, informs OPDX: "The Rockall 2009 group will participate in the IOTA contest from Ile de Batz, Finistere North. To recover from the trip to Rockall and to start preparation for a new attempt, the crew and the support team will join the DXpedition class in a Multi-Operator, Low-Power effort. Team members include ON3DX, ON4AHF, ON4ATW, ON4HIL, ON4IA, ON6CC, ON6LEO, ON6NL, ON6ZU and ON7YT. The call used will be F/OT2A and QSL will go via the home call."

EU-128. Sebastian, DL1AXX, will be active as DL1AXX/P from the small Island of Warder (O-32 for the German Island Award), between July 11-18th. Activity will be on 80/40/30 meters CW only. QSL via DL1AXX.

EU-176. Jorgen, SM3CXS, will once again be active from Grimskar Island (Grid JP81) as SG3U, June 18-21st. Activity will be limited to his spare time, but look for him on 40-6 meters using CW and SSB. QSL via SM3CXS, direct or by the Bureau.

NA-055. Mike, W2IY, will be active as W2IY/1 from Mt. Desert, Maine, during the RSGB IOTA Contest (July 25-26th). QSL via W2IY, by the Bureau or eQSL.

NA-185. Operators Mike/K9AJ and Bruce/KD6WW will team-up and be active as homecall/VY0 from the Thomson Island (CISA New One!), the Canadian offshore Rankin Inlet, Nunavut, starting during their local Friday evening, July 31st through their local Monday morning, August 3rd. Using two stations, look for them on or

near the usual IOTA frequencies using CW and SSB. QSL via their
home callsigns.

OC-130. Maarten "Moj", PA3GZU, will be active as DU9/PA3GZU from
Mindanao Island (WLOTA 2803), July 6th through August 1st.
Activity will be holiday style on the HF bands with low
power. QSL via his home callsign, the Bureau is preferred.

JT, MONGOLIA. Giampiero, "Peter", I5NOC, will be active as JT1NOC between
now and June 29th. Activity will be on 80-10 meters, possibly 6m, using
CW, SSB and PSK. He was heard this past weekend on 20 meters CW and PSK31.
QSL via I5NOC.

NZART MEMORIAL CONTEST. This special contest is on the air to commemorate
those from our ranks who lost their lives in World War II. The contest is
open to all operators and it is held the first Saturday and Sunday evenings
in July. A total of six operating periods; three each evening of one hour
each from 0800-1100z. Complete rules are available at:
http://www.nzart.org.nz/contests/2009/2009-memorial-rules.pdf

OE100, AUSTRIA (Special Event). Members of the ICOM Radio Club Vienna
and the OVSV (Austrian IARU) will celebrate the 100th anniversary of the
Technical Museum Vienna by activating the special callsign OE100TMW
between June 17-21st, for 100 hours continuously on HF and VHF. During
this 100 hours, the Museum will be also open nonstop as they operate
this "radio-marathon". Every licensed amateur is invited to come to the
museum and operate the special station. Visit the following Web pages
for more info: http://www.hamradio.at/index.php?id=73
http://www.tmw.at/default.asp?al=Englisch&am=home

OH0, ALAND ISLAND. Operators Jukka/OH6LI and Kim/OH6KZP will be active
as OH0V from Geta (EU-002) during the RSGB IOTA Contest (July 25-26th)
as a Multi-Single entry. QSL via OH6LI.

PACIFIC DXPEDITION/TOUR. Gerben, PG5M, informs OPDX that he will be
activating three DXCC entities in the Pacific between September 6-27th.
His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2
September 8-14th: Tuvalu (OC-015); Callsign will be T2G
September 15-16th: Fiji; prefix 3D2
September 17-23rd: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 24-27th: Fiji; prefix 3D2
The callsign is not known for Fiji, but he has requested 3D2G. This will
be an ultra light solo DXpedition and CW only. He will use an Elecraft K3,
and a 2x20m doublet plus vertical antennas. QSL via PG5M, by the Bureau
or direct. For direct requests, please enclose a minimum of 2 USDs for
return postage. More details and updates will be available on:
http://www.dx.to

QSL INFO AND NEWS.....
FT5YJ/VP8DLM/CE9XX QSL STATUS. Mehdi, F5PFP, informs that he has replied
to all the direct QSL cards except for those who are waiting for cards

for: OA0/FT5YJ (Machu Picchu) and FT5YJ/p (Omega Island). He states, "I hope to receive these QSL cards soon from the QSL printer. In case of a problem, send me an E-mail." His E-mail address is: f5pfp@aliceadsl.fr

IRCS AVAILABLE. QSL Manager Steve, N3SL, reports: "As you might expect with an expedition going on (ZK2V), I have over 100 IRCs thus far, and they need to be moved out while they're still good..... I'll be selling these for 1.35 USDs each, postage paid."

MM0DFV/p and GM0WRR/p were expected to be active this past weekend from the Loch Lomond and the Trossachs National Park (WFF reference number is GFF-009, park web info and map at: http://www.lochlomond-trossachs.org) during the WFF Green Days Contest <http://wff44.com/en/contest/>. The station's location was at the Loch Lomond shore in the Rowardennan Forest (WAB NS39, Stirling Council Area). EU Area is SC30 for the EPC awards. As special colorful QSL card will be printed.

QSL N8O via PO BOX 517, Jefferson, OH 44047. Operator Andy, N8OFS, was active as portable caboose for the AC&J (ACJR) Railroad's 25th anniversary from Jefferson, OH.

HV50VR STATUS/QSL MANAGER'S NEW CALLSIGN. A new callsign for the HV50VR QSL Manager has been announced and it is IV3KKW. The address is still the same since February 2008, but Alex changed his callsign in June 2009. All info on his QSL policy is on: http://www.qrz.com/db/IV3KKW Alex informs us that as of today (June 9th) he has no QSL cards pending for HV50VR; all were answered.

Lee, ZL2AL, reports: "All direct ZL7T QSLs have been answered and the last bunch was mailed today (June 8th). The status is 'current' and will be checked on a FIFO basis within a week as they arrive. I am answering the bureau cards as they come in. Many thanks to all for your kind comments on our operation. ADDED NOTE: ZM2M (East Coast Contesters) cards are being checked as above and are current."

QSLS VIA LOTW: K5D (some), LX5A and ZK2V

QSLS RECEIVED VIA MAIL: 3B8MM, 3D2AD, 3XD2Z, 9J2FM, A71CT, CX7CO, H40FN, JD1BMH, JW5LJA, K5D, KH8/N9YU, KH0UA, PS0F, T30M, T30XX, T33ZZ, TO3R, VK0BP, VU2NKS and ZL7T

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S9, SAO TOME (AF-023). Just a reminder that Georg, DK7LX, will once again be active as S92LX and should be on the air by the time you read this through June 27th. Activity will be on 80-10 meters CW only. QSL via his home callsign, direct or by the Bureau (E-mail Bureau requests after the DXpedition to: dk7lx@darc.de). A log search will be available at: http://www.logsearch.de

SILENT KEY. Glenn, K3SWZ, informs OPDX that Tony Malesic, K3BHL (ex-CP1JV, XH8HJ and HI8XDF), suffered a massive stroke at his home in Harrisburg, PA,

on Friday, June 5th, and became a Silent Key (SK) two days later at the age of 67 in a local hospital. He was retired from the State Dept. and lived in the Washington D.C. area during his last years with D.O.S. before retirement. His health had been failing over the last few years and he was inactive in Ham Radio. Tony provided the first RTTY QSOs ever from CP1 and XW8 during his tours there and was most active during his 3 year tour in HI8. OPDX and its readers would like to send out our deepest sympathy to Tony's family and friends.

SV9, Crete. Ron, WB2GAI, will be active as SV9/WB2GAI/P between August 21st and October 5th. This will be his third Dxpedition to Crete. Ron will be celebrating his 50th year in ham radio. Activity, as always, will be on CW and on 80-17 meters. All QSLs via the Bureau.

T7, SAN MARINO (6m Op). Members of the Amateurs Radio Republic of San Marino (A.R.R.S.M.) will activate their club station T70A on 6 meters June 20-21st, primarily looking to give those who need it for a new country on the band. Operators Filippo/IK4ZHH, Giorgio/IZ4AKS, Max/IZ4DPV, Michele/IZ4GWE, Stefano/IW2MJQ and Vittorio/I4YSS will compose the team that operates from the club station. They will use 3 antennas beamed in different directions. QSL via A.R.R.S.M. RADIO CLUB, P.O. Box 77, 47890 SAN MARINO, REPUBLIC OF SAN MARINO.

TO7, MAYOTTE (AF-027). Willi, DJ7RJ, is expected to announce plans to be active as TO7RJ from Mayotte soon. QSL via DJ7RJ. More details are forthcoming.

TZ, MALI (Update). Ed, W0SD, updates OPDX that the TZ6EI DXpedition by operators Ed/W0SD, Holly/N0QJM and Arliss/W7XU will be primarily on six meters, June 26th through July 5th. The group will be on 50.103 MHz. Ed states, "We have our TZ6EI license and VISAs in hand and our necessary immunizations. We will be bringing backup equipment and have permission to operate from the roof of the Hotel Mande in Bamako. There will be RTTY operation concurrent with the six meter operation. There will be CW and SSB operations at night after six meter sporadic E is over. For HF, we are planning to operate on 30, 20 and 17 meters. The complete details are on the web site." QSL via W7XU. DX QSL cards need 2.00 USDs and a SAE or current IRCs. USA cards should have an SASE. Contributions to defray expenses can be sent with the QSL card. The logs will eventually be uploaded to LoTW. The Web page for the TZ6EI Mali operation is: http://w0sd.com/mali/mali.htm

UR, UKRAINE. Members of Ternopil Amateur Radio Club operated on June 12-14th as UR4BZB/p from Medobory National Preserve (URFF-015=2C URDA TE-013). QSL via UT1BC. Information about new award "W-UR-FF" can be found at: http://www.islands.org.ua/wurff/index_e.html

V3, BELIZE. Per, LA5OPA, will be active as V31NP from Ambergris Cay (NA-073) between July 26th and August 12th. Activity will be mostly on 20 meters SSB and PSK31. He will also operate on the other bands, if propagation is open to Europe. Per will be using 100 watts with a Buddipole antenna system. QSL via LA5OPA, by the Bureau or direct.

WP4, PUERTO RICO (LH Op). Members of the Caribbean Amateur Radio Group
(WP4CRG) will be active as W4L from the Arecibo Lighthouse (ARLHS PUR-001,
TWLHD WLH KP4-001), Puerto Rico (NA-099, USI PR-006S, WLOTA 2802) between
1200z, August 14th and 2359z August 23rd. This activity will include the
International Lighthouse/Lightship Weekend (ILLW, August 15-16th). Look
for them on the following frequncies:
SSB - 7150, 14225, 18122 and 28350 kHz
SSTV - 14230 kHz
QSL direct to: CARG, PO Box 140031, Arecibo, PR 00614-0031.

YU, SERBIA (Special Prefixes). Look for Serbian operators to use the
following special prefixes YT25, YU25, YU2009, YT2009, YU09 and YT09
between June 12th and July 12th. Activity is to help promote the 25th
Summer Universiade Belgrade 2009 sporting event (July 1-12th). This is
an Olympic type sport competition with 9000 students from 140 countries
competing in 15 sports and 208 disciplines. The official Universiade
Belgrade 2009 Web is at:
http://www.universiade-belgrade2009.org/eng/Contents/ContentDefault.aspx?temp=0
&sid=50
For an up-to-date list of special callsigns/operators and QSL info, go to:
http://www.yu1srs.org.rs/dl/srs_doc/Znakovi_dodeljeni_Univerzijada.pdf

He doesn't know how to post, nor does he know how to spell. He should be
using rec.test since that is what the group is for.

2053. Conspiracy to Censor: Andrew Langer and Jean Mercer

Newsgroup: rec.radio.amateur.misc
Date: 2009-06-19 00:49:46 UTC
From: Ozymandias' Cat <babustis.chromasome@gmail.com>
Message-ID: <db2b75c9-9198-4443-adf3-fec667ccb0b3@r13g2000vbr.googlegroups.com>
Source record: 6667
Cross-posted to: sci.math,sci.med,sci.engr,rec.radio.amateur.misc,alt.hacker

“Psychologist” Jean Mercer was operating a blog called “child myths” on Psychology Today’s website.

Several people posted questions about her credentials (she has a Ph.D., but not a license) and some of her associates, who have questionable backgrounds (one, Larry Sarner, was involved in in a voting machine investment scam).

Many comments were removed and there is now no mechanism to post new ones.

Is it possible Mercer joined forces with Andrew Langer? Langer, who likes be thought of as a libertarian, is actually a conservative. Langer has stated that he often has issues with anonymous comments, including this entry (http://langrrr.blogspot.com/2005_09_01_archive.html) on his blog.

Langer used to be with the Competitive Enterprise Institute (CEi), which is generally viewed as a “mouthpiece” for the oil and tobacco industries. They promulgate a great deal of pseudoscience, quackery, and misinformation about global warming.

One of their global warming experts, Myron Ebell, admits to having had no scientific training. His appearance on Newsnight (www.youtube.com/watch?v=YyKUblhXJw8) is quite amusing. Ebell did not do a good enough job for the likes of ExxonMobil, and the days of his six figure retainers seem to be over.

Then we have John Berlau. Berlau runs CEI’s Center for Investors and Entrepreneurs, odd, as he’s never been either. Berlau is another global warming denier. He believes that trees pollute more than cars. He believes that DDT is good for the environment.

Once, when asked a series of basic scientific questions, he replied that a gas, when heated, gets heavier!

Langer and his colleagues at CEI have opposed the work of Ileana Rosenthal and her Humanetics Foundation.

Interestingly, Rosenthal has also been opposed by Monica Pignotti.

Pignotti is a former Scientologist. She abandoned Scientology and, after some time, became a devotee of Thought Field Therapy and Voice Technology. She has abandoned those, and is now a frequent collaborator of Jean Mercer, Larry Sarner, and Sarner’s wife, Linda Rosa.

Rosa and Sarner operate various websites and blogs; at least one of them has the disturbing title of child torture.

This blog has also seen fit to publish the “work” of Charly D. Miller.

Miller describes herself as a retired paramedic and author. She plans to, but has not, written travel guides to locales mentioned in the Harry Potter books.

Miller posts a great deal of copyrighted material to her website, and she has, on more than one occasion, removed it.

When these, and other incidents, were questioned on Mercer’s blog, commenting came to an abrupt halt.

One has to wonder whether Andrew Langer, now operating the Institute for Liberty, was involved, given his stated opposition to the use of anonymous comments.

Another possible “suspect” is Brooke Oberwetter. Oberwetter was with CEI for a while, but has subsequently joined “DC Signal” which describes itself as as “communications consultancy.” Is it possible censorship is one of their offerings?

2054. Amateur Radio Newsline(tm) Report 1662 - June 19 2009

Newsgroup: rec.radio.amateur.misc

Amateur Radio Newsline(tm) Report 1662 - June 19 2009

The following is a closed circuit advisory. Ladies and gentlemen, here is amateur radio Newsline's Support Fund administrator, Andy Jarema, N6TCQ:

--

OK, you all know why I am here. Its spring and all the bills from last winter have been mounting up. And, as usual, there is really not very much left in the treasury to pay them. Eventually they have got to get paid or these news reports will cease. That time is now.

So we ask that you take a few moments to send a donation to the Amateur Radio Newsline support fund so that we can keep these newscasts coming your way. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org and click on the button at the top of the page marked "Make Donation." Or you can send in a donation to the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful and these newscasts will be here for you..

Once again that's the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066. Or by Pay Pal at www.arnewsline.org

For the Support Fund, I'm Andy Jarema, N6TCQ.

--

Thank you Andy. That ends the closed circuit advisory. Now, Amateur Radio Newsline report number 1662 with a release date of Friday, June 19th, 2009 to follow in 5-4-3-2-1.

The following is a QST. A new record for International Space Station to schoolroom contacts, the noise goes away from 6 meters as digital television arrives, a World Administrative Radio preparatory conference takes place in Canada and ham radio is again growing in the United States. Find out the details on Amateur Radio Newsline(tm) report number 1662 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISS REACHES 443 SCHOOL CONTACTS

A major milestone for the Amateur Radio on the International Space Station or ARISS school project. This as the total number of ARISS contacts between the astronaut hams on board the orbiting outpost and schoolrooms here on Earth has now reached 443. Bruce Tennant, K6PZW, has the details:

--

An average of 20 students are able to ask questions of an on-orbit crew during a normal ARISS contact. That totals out to well over 8000 school kids world-wide who have gotten a chance to vicariously visit the International Space Station via ham radio since the classroom contact program began.

For those not aware, today's Amateur Radio on the International Space Station to schoolroom educational program is a direct outgrowth of the old SAREX or Shuttle Amateur Radio Experiment. It was begun in the mid-1980's under the aegis of the late Roy Neal, K6DUE, and operated under the joint sponsorship of AMSAT, the ARRL and the educational arm of NASA.

As space experimentation has progressed so has amateur radio's part in it. Today, the ARISS school contact program is an important part of this ongoing work by ham radio volunteers world-wide. Hams working with astronauts and cosmonauts to bring the science of spaceflight a little closer to kids here on Earth.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

A complete listing of all scheduled school contacts, and questions, other I-S-S related websites, along with IRLP and Echolink websites related to this ongoing project can be found on-line. Its at http://www.amsat.org/amsat/ariss/news/arissnews.rtf (ANS)

**

RESTRUCTURING: 6 METER NOISE FLOOR DROPS AS DTV REPLACES ANALOG

A present to the United States VHF and UHF ham community. This from both the broadcasters and the FCC as many of the nations VHF television stations vacate many of the low VHF channels, go digital and lower the overall noise floor on 6 meters.

The big digital television change out began at 00:01 EST on Friday, June 12th. Stations across the nation chose their own time to turn off their analog transmitters and move their operations to their permanent digital channels. Many of the low-band stations opted to move to the UHF band. A lot of them operated on Channel 2 just above the 6 meter ham band. And when those analog channel 2 transmitters went QRT, the noise level on 6 meters dropped in many locations. Places like

Chicago, where Keith Morehouse, W9RM, reported over the VHF Reflector that this is a big plus in Chicago where the long known Channel 2 audio spur is gone. That spur used to trash the WSJT meteor scatter calling frequency 50.260 MHz.

In Milwaukee Ray Greiner, K9KHW, reports on the analog shutdown on VHF channels 4, 6 and 12. He reports that he found most of the VHF and UHF ham bands so quiet that he actually checked and see if his antennas were connected. He says that on 6 meters where the normal noise level was S-3 to S-4, its now zero.

But 6 meters is not the only band seeing a noise floor improvement. Steve Rutledge, N4JQQ, is in Memphis Tennessee/ He says that when VHF channel 3 went to UHF and channels 5 and 13 went digital on their current assignments, that the noise he heard on the 222 MHz ham band when pointing his beam East is now completely gone. He says that in the past, that the noise level was so high that it wiped out any signal from the east, even with a bandpass filter before his tower mounted preamp.

Even some of those living North of the United States and Canadian border are happy about the change. Jordan Arndt, VE6ZT, in Calgary, Ontario says that he can hear the difference up in Grid Square DO-21. This is especially true when the band is open.

Its going to take a few weeks to really assess the impact that the digital television conversion will have on most of the VHF and UHF ham bands, but so far the results seem very good indeed. (ARNewsline, VHF Reflector)

**

RESTRUCTURING: WRC PREP MEETING HELD IN CANADA

Over 100 delegates from countries in the Americas gathered for a meeting June 2nd to the 5th in Ottawa, Canada. This in preparation for the next World Radio Conference that is to be held in Geneva late in 2011. Bill Pasternak, WA6ITF, has more:

--

Almost every item on the WRC Agenda was discussed . The goal was to find common ground that would be supported by the CITEL countries. Some subjects of interest to amateur radio discussed including the future of Broadband Over Powerline standards for adoption at the next meeting in November at Washington, D.C..

A common paper was produced and adopted by the plenary that most probably will be the basis of a joint Region 2 proposal at an upcoming meeting. Also, the delegates agreed to keep an eye on several agenda items that, although not of direct interest to Amateur Radio, could affect us depending on the positions adopted.

For the Amateur Radio Newsline I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

Amateur radio for IARU Region 2 was represented by Daniel Lamoureux, VE2KA, and Dario Jurado, HP1DJ. Jon Siverling, WB3ERA was on the USA delegation and Ken Pulfer, VE3PU, was part of the Canadian contingent. (RAC, Southgate)

**

RESTRUCTURING: SOUTH AFRICA GIVES NEW PRIVILEGES ON 40 AND 20

South African radio amateurs will now have full access to the spectrum 7.000 to 7.200 MHz. In a government notice issued on Wednesday, June 10th, changes to both 40 and 20 meters were made final. In addition to the modification on 40, ZR licensees will now also have access from 14.225 to 14.350 MHz. The expanded privileges for South African hams is a direct result of negotiations begun in February of 2008 between the South African Radio League and that nations telecommunications regulation authority. (SARL)

**

SPECTRUM PLANNING: VK HAMS HOLD REPEATER PLANNING MEETING FOR FUTURE TECHNOLOGIES

Hams in the United States seem to be going in many different directions in planning the future of repeater communications and frequency coordination as it enters a new age. Meantime their counterparts down-under are taking the proverbial bull by the horns. They gathered together on Sunday June 7th to make sure repeaters in Australia are ready for the future and the future is ready for what ham radio repeaters will offer. Robert Broomhead, VK3DN, has the details.

--

Not surprisingly, just like the commercial radio-communications industry, Australian amateur spectrum in the 2 meter VHF band and to a lesser degree in the 70cm UHF band is very congested or not available for new technologies.

The forum was kicked off with a presentation from the two Peters on the issues and how other IARU Regions have tackled similar problems, which stimulated further discussion of the issues. The outcome lead to some positive steps forward for the need to explore better use of CTCSS tone code to protect FM repeaters from unwanted incidental interference, a tentative way forward to address adjacent FM channel interference issues from D-Star mobiles and the development of 12.5 kHz plans for repeaters and simplex channels for wider discussion in the amateur community.

The forum was organized by the WIA to formulate options for addressing identified interference issues between repeaters along the New South

Wales coastal areas and the need to explore future spectrum options for new digital technologies.

For the Amateur Radio Newsline, I'm Robert Broomhead, VK3DN, in Australia.

--

The last Australian meeting to discussion these sorts or issues was held in the early 1970's. That's where the foundations of today's existing V-K band plans for repeaters were made. Here in the United States its been over a decade since the ARRL hosted the famed Big Old Meeting of repeater coordinators and the FCC. (WIA News)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Catalina Repeater Association systems serving Los Angeles and Orange County, California.

(5 sec pause here)

**

RADIO GROWTH: THE NUMBERS ARE UP

The overall number of United States amateur radio operators appears to have increased by 12,877 from June 15 2008 to June 15th, 2009. This according to George Mc Couch, K3UD, who notes that the Technician class had the largest large increase. It showed an overall gain of 9,092 with the General adding 4,427 to its license rolls.

On the downside was the Novice that declined by 1,703 and Advanced by 2,029. This is due to attrition and upgrading away from both of these classes which are no longer offered by the FCC.

Looking at license class popularity, K3UD's numbers indicate that the Technician license is still the most sought after by newcomers and it has continued to make good gains over the last 12 months. But there is still a trend of Technicians upgrading to General begun some years ago that is ongoing. Also being seen is significant movement to Extra. It has shown an increases of 3,090 hams earning the top of the line ticket.

As to actual numbers, on May 16th of this year there were only 17,497 Novice class while Technician growth makes that class the largest with 327,793 holders. Generals number 147,644, Advanced sit at 61,204 and Extra rounds out the service with 117,387. That adds up to 671,525 licensed by the United States F-C-C.

K3UD points out that his figures are a comparison of two snapshots of the numbers taken at two different times and are a snapshot comparison

of two dates a year apart. As such, the numbers do not show the changes taking place every day which sometimes are up and other times downward. (K3UD via QRZ.con)

**

RESCUE RADIO: GAO SAYS FEMA NOT READY

A report issued by the Government Accountability Office says FEMA does not have a plan to coordinate all the national disaster exercises. Also, that it cannot track whether other federal agencies and communities across the country are prepared to respond to disasters. In its response to the report, FEMA said it relies on cooperation from other agencies to complete some of its plans. (Published reports)

**

RADIO LAW: CONGRESS TO HEAR LOUD VOLUME BILL

A measure that would require the FCC to set a standard for commercial volume for broadcast, cable and satellite programming is making its way through Congress. The House Subcommittee on Communications, Technology and the Internet has scheduled a hearing on H.R.1084, better known as the Commercial Advertisement Loudness Mitigation Act. The bill would require the FCC to set a standard for commercial volume for broadcast, cable and satellite programming. The idea is to insure that the volume of ads isn't too loud and isn't louder than the surrounding programming. If enacted into law, the measure would prevent commercials from being excessively noisy or strident; having modulation levels substantially higher than the accompanying program or having an average maximum loudness substantially higher than that of the accompanying program. HR 1804 was introduced last February 13th by Democrat Anna Eshoo of California. It already has 28 co-sponsors. (RW) ** COMMUNICATIONS LAW: A BIG WIN FOR BLOGGERS AND COMMENTERS IN MD A big win for those who like to blog and post comments on the Internet. This as a court in Maryland says posters are protected under that states law. Jim Davis, W2JKD, has the details: -- COMMUNICATIONS LAW: MARYLAND SIDES WITH BLOGGERS IN DEFAMATION VS FREE SPEECH CASE

** Maryland's highest court has ruled that operators of newspaper Web sites, blogs and chat rooms that allow readers to post anonymous comments using pseudonyms do not have to readily reveal the posters' identities in defamation suits. This as the Maryland Court of Appeals reversed a lower court ruling and ordered that NewsZap.com, an online forum run by Independent Newspapers, does not have to disclose the identities of forum participants who engaged in an online exchange about the cleanliness of a Dunkin' Donuts shop in 2006.

The late February finding involves the case of an Eastern Shore businessman, had contended that the anonymous posters using screen name pseudonyms had defamed him in comments about his Centreville restaurant. The Appeals Court ruled that the plaintiff had not correctly identified the forum participants and, therefore, was not

entitled to learn of their identities. More broadly, however, the court used the case to recommend a strict, five-step process for judges to follow to balance the First Amendment right to anonymous speech on the Internet with the opportunity on the part of the object of that speech to seek judicial redress for alleged defamation.

The process, which closely matches one set out by a New Jersey court in 2002, requires a plaintiff claiming defamation from an online comment to try to notify the anonymous poster that the person is the subject of a subpoena including by posting a message on the relevant online message board. The plaintiff must then identify in court filings the exact statements purportedly made by each anonymous poster, as well as show how those comments have caused damage.

Maryland's court also went further than New Jersey's, adding that the plaintiff might have to provide specific evidence supporting each element of the defamation claim. Finally, it indicated that judges also have to balance the anonymous poster's right of free speech against the need to disclose a defendant's identity.

I'm Jim Davis, W2JKD -- This is one of the farthest reaching court decisions aimed at protecting the anonymity of comment posters and bloggers along with their right to express their personal views as they see fit. Its not known if the plaintiff will seek to overturn the Maryland state judicial decision in the federal courts. (ComNews) **
NAMES IN THE NEWS: CQ PROP EDITOR CHALLENGES PROP EXPERTS

Some names in the news. First up is the Propagation Editor CQ magazine who is challenging the accuracy of the newest predictions on Solar Cycle 24.

In an online commentary posted on the CQ magazine website, Tomas Hood, NW7US, notes that this same group of what he term as so-called "experts" has issued multiple predictions for this cycle already. He notes that so far all of which they now say are wrong and he asks why we should believe they're right this time.

Hood points out that, while the Sun itself is millions of years old, scientists have been tracking solar activity for just a few hundred years. He says that in his view it is pretty arrogant to postulate that mankind has any real understanding and handle on what the Sun might do next.

The complete text of Hood's commentary is on the CQ website and may be accessed by clicking the "online commentary" link at www.cq-amateur-radio.com on the left hand side of the home page. (CQ)

**

NAMES IN THE NEWS: K4ZDH JOINS QRZ.COM VOLUNTEER STAFF

The giant QRZ dot com website has announced that former FCC ham radio rules enforcer Riley Hollingsworth, K4ZDH, has become the latest member

of the websites volunteer staff. He will serve as a guest columnist and advisor to the QRZ staff.

Hollingsworth retired from the FCC last year where he had a distinguished career as a Special Counsel in the Enforcement Bureau. He was responsible for the FCC's Amateur Radio Enforcement Program and as a ham himself, has proven himself as great asset to our hobby. (QRZ.com)

**

THE SOCIAL SCENE: NEW UK NATIONAL HAMFEST

On the social scene, a new National Hamfest has been announced in the United Kingdom. According to the Radio Society of Great Britain, the show which is being produced in association with the Lincoln Shortwave Club, has the full support of the major amateur radio vendors and manufacturers and will take place on 2nd and 3rd of October is the George Stephenson Hall at the Newark and Nottingham show-ground. Full details of this event can be found online at www.nationalhamfest.org.uk. (GB2RS)

**

SPECIAL EVENT: THE TECHNICAL MUSEUM OF VIENNA AT 100

And It's a happy 100th birthday to the Technical Museum Vienna Austria. And to celebrate the occasion, members of the ICOM Radio Club of Vienna and the Austrian International Amateur Radio Union will be activating the special callsign O-E-100-T-M-W between June 17th and the 21st.

According to event planners, this will be a 100 hour continuous operation with stations on many of the High Frequency bands as well as VHF. All licensed amateurs are invited to come to the museum and operate the special station or make contact with it on the air. More information is on the event pages on the World Wide Web. They are in cyberspace at http://www.hamradio.at/index.php?id=73 and http://www.tmw.at/default.asp?al=Englisch&am=home (Southgate)

**

OPERATING EVENTS: FIELD DAY 2009 - JUNE 27 - 28

The 2009 ARRL Field Day will be held June 26th and 27th at location near you. According to the League, its Field Day is the most popular on- the-air operating event in amateur radio. Its truly a time in that brings amateur radio to Main Street USA. This, as hams set up stations in parking lots, malls, parks and Emergency Operations Centers to demonstrate the skills that will allow them to better serve their communities.

Demonstrating the hobby in these public venues gives added public relations value. It gives all in a community a chance to see and experience both the fun and public service capability that their ham

radio neighbors bring to the community.

Amateur radio is about knowledge and growth. It is a hobby and service that truly offers "something for everyone. That's why every year, on the fourth full weekend in June, tens of thousands of amateur radio operators gather for a public demonstration of our service. 2009 is expected to be bigger and better than ever before.

More information about Field Day can be found on the American Radio Relay League's website. Its in cyberspace at www.arrl.org/fieldday. (ARRL) **

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: DON TUNSTILL, W4NO - S.K.

A ham who helped to create the nations all volunteer testing and vanity call sign systems has become a silent key. David Black, KB4KCH, takes a look at the life and contributions of Don Tunstill, W4NO:

--

If you have a vanity callsign, you might have Don Tunstill to thank for it. Tunstill will be remembered as a pioneer of sorts. He helped set in motion the process for radio amateurs across the country to become licensed. Tunstill worked closely with the FCC in creating the Volunteer Examiner Coordinator and vanity callsign programs.

--

W4OZK: "He was just a great person and he was a great mentor, a great example for amateur radio and just a great person overall."

--

That's Greg Sarratt, W4OZK, the ARRL's Southeastern Division Director. Tunstill's work extended well beyond helping hams get their licenses. He was a familiar face at the Huntsville Hamfest--he helped start the Hamfest and served as its President for 30 years. In Alabama, Tunstill founded CAVEC, the Central Alabama Volunteer Examiner Coordinator. Under Tunstill's direction, CAVEC license exams eventually extended throughout Alabama and into seven other states. Again, Greg Sarratt:

--

"W4OZK: "Don has done a lot for amateur radio over the years. A lot of what he's done has been behind the scenes, although he has been in the forefront of the Huntsville Hamfest Association, the Huntsville Amateur Radio Club and CAVEC. We've lost a great person."

--

Don Tunstill died June 9th at his home in Huntsville. He was 69. Though suffering from emphysema, Tunstill, who was a life member of the ARRL, remained an active supporter of the Huntsville Hamfest and amateur radio.

>From Birmingham, Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline

--

A memorial service was held for Don Tunstill, W4NO, on Saturday on June 13th in Huntsville, Alabama. (ARNewsline)

**

ON THE AIR: ALTUS OK. TO THE WORLD

Hams in Altus, Oklahoma, are starting a local net with a worldwide outreach. This, thanks to a local repeater tied to the world by Voice over Internet Protocol or VoIP technology.

Dale Town, AF5AF, is the president of the Altus Area Amateur Radio Association. He says hat the new local net will be tied to the world using 444.650 MHz repeater that will also accept stations check-ins from Echolink operators who connect to WX5EM-R node number 361238.

The net will be held on Wednesdays at 01:00 UTC which is 2000 hours Central Daylight Savings Time. All amateur radio operators are encouraged to participate. (KC5FM)

**

WORLDBEAT: ETHIOPIA ON THE JAM

If you regularly listen into the 7.100 to 7.200m kHz range on 40 meters, then you may have noticed some interference that has not yet gone away. Starting at 16.30 GMT and lasting about one hour, you will find on a powerful wideband rushing noise which is some 15kHz wide on 7.165 or sometimes on 7.175 kHz,. Also very faintly you can hear the carrier of a program below the jammer.

The culprit is Radio Ethiopia and it is jamming Voice of the Broad Masses from Eritrea. And this is nothing new because Ethiopia also regularly jams other transmissions in Amharic from radio Deutsche Welle, on 15 and 11MHz.

Back in 2008 Ethiopia commissioned three or four new transmitters, some of which are regularly used for jamming unwanted programs. The jamming uses a rectangular white noise signal that is some 10 to 16 kHz wide.

(Southgate)

**

WORLDBEAT: UK MAN CHARGED IN HIGHWAY ACCIDENT THAT KILLED UK HAM

A follow-up t our story a few weeks ago we brought you the story of a tragic accident that claimed the life of Peter Rushton G7PMZ. He and Ian Firby, G7VCG, were involved in a highway collision on the United Kingdom's M 61 Motorway am May 24th. Rushton died at the scene while Firby was transported to a nearby hospital for emergency treatment.

Now the London Daily Mail reports that the brother of former England cricket captain Mike Atherton has been arrested on suspicion of causing death by dangerous driving. Chris Atherton is alleged to have changed lanes on a motorway, causing another car to swerve and overturn

Atherton, who runs a building firm, was arrested and questioned by officers before being released on bail while an investigation into the crash is carried out. You can read the Daily Mail article at www.dailymail.co.uk/news/article-1190901/Mike-Athertons-brother-arrested-fatal-motorway-crash.html (Southgate)

**

WORLDBEAT: GPS TO BE JAMMED IN SCOTTISH TEST

If you are driving in the very north of Scotland or the Orkneys between July 11th through the 16th, your G-P-S system may go brain dead. Its being jammed ad its perfectly legal.

The U-K Ministry of Defense will be conducting another Global Positioning System jamming exercise. The July tests will be for limited periods between 11.00 and 15.00 UTC. The location for the exercise is to sea westwards from 58 degrees 57.4 minutes North and 3 degrees 13.9 minutes West. This is about 60 nautical miles west of Kirkwall.

The Ministry of Defense conducts occasional tests on military systems that may result in some loss of service to civilian users of the Global Positioning System. This includes such equipment as in-car navigation devices and other networks which rely on GPS signals. (RSGB)

**

WORLDBEAT: SOUTH AFRICAN RADIO AMATEUR EXAMINATION CANDIDATES JUBILANT

The wait is over in South Africa for 98 candidates of the 125 who entered and passed the nations Radio Amateur Examination. The oldest candidate was Mr. E. Smook, ZR2ES, from Port Elizabeth who is 74. The youngest was R. Preston, ZU4RP from who is only 9 years old. (SARL)

**

THE CONTESTING CORNER: CQ ANNOUNCES NEW XTREME CATEGORY FOR CQWW DX CONTEST

CQ Magazine says that it has added a new Xtreme category to the CQ World Wide DX Contest. This, to encourage the development of new technologies in amateur radio communications in general and contesting in particular.

According to CQ World Wide Contest Director Bob Cox, K3EST, this new category has been established to allow amateurs to participate in the contest while experimenting creatively with Internet-linked stations and other new technologies. The highest-scoring entries in the single-operator and multi-operator categories will win the John Kanzius, K3TUP, Memorial plaques, sponsored by Tim Duffy, K3LR. Kanzius, a prominent contester, was also an experimenter who developed a potentially ground-breaking approach to cancer treatment in the course of his own, ultimately unsuccessful, battle with the disease.

The new Xtreme category will take effect with the 2009 CQ World Wide DX Contest this fall. Complete details of the are in the June issue of CQ and are on the CQWW page of the CQ magazine website. Its at www.cq-amateur-radio.com. (CQ)

**

WORLDBEAT: VK HAMS GET SECONDARY STATUS FROM 135.7 - 137.8 KHZ

Meantime, the Australian Communications and Media Authority has advised the Wireless Institute of Australia that any V-K amateur holding an Advanced license may now apply for a variation of their license to allow operation on a secondary basis in the low frequency band from 135.7 to 137.8 kHz. Australian hams are limited to a maximum radiated power of 1 Watt Effective Radiated Power in the new low frequency band. (WIA News)

**

DX

In D-X, word that SU1SK, and several other Egyptian operators will be active as SU8LH. This as the first Egyptian Lighthouse DXpedition on Ras El-Bar Island from August 1st to the 9th.

KP2YL and KP2HC will be back on St. Croix until 30th June. Listen for them using CW and SSB on 160 to 6m. Please note that June is the 6 meter DX season in the Caribbean. QSL direct only via the addresses on QRZ.com.

PF4T will be active as 8Q7TB from Embudu in the Maldives until 24th of June. He will operate SSB on 40 and 20m. QSL direct via his home call or via PA0LEY for the bureau

W5YDX will be active holiday style portable VP9 from Bermuda until the 24th of June. He expects to operate mainly on 20 and 17m SSB. QSL via home call, direct only.

Lastly in DX that's on-orbit, word that HB9OAB will activate from Morocco as CN2AB on the VO-52 ham radio satellite. This, between June

27 through July 20, 2009. More information is on-line at www dot qrz dot com slash CN2AB

(Above from various DX news sources)

**

THAT FINAL ITEM: THE SAGA OF THE FISHY CELLPHONE

And finally this week, the story of United Kingdom resident Andrew Cheatle and his cellphone which the June issue of Popular Communications Magazine may own the most reliable phone in the world.

In a recent interview with a United Kingdom newspaper, Cheatle explained that he was messing playing with his dog near the seashore when his cellphone phone must have fallen and got swept away. Cheatle said that he kept calling it in hope someone may have found it. Nobody answered so he gave up after a couple of days.

Fast forward a week. Cheatle is out with his girlfriend shopping for a new cellphone when her phone rang. She told him that his mobile number was calling hers. The person on the other end identified himself as Glen Kerley. Kerley, a fisherman by trade told Cheatle that he was gutting a large codfish that morning and found Cheatle' s Nokia 1600 phone inside.

Kerley tried using the phone, but it didn't work. So he removed its SIM card, put it in his own handset, and started calling numbers from the SIM' s phonebook to find the owner.

At first Cheatle didn't believe the story but went to meet him. What he found was his phone that was a bit smelly and battered. Now heres the best part. By the time he got to Kerley's place the phone had dried out and incredibly it came back to life.

Kerley says that Cod are greedy fish-they'll eat anything. He's found plastic cups, stones, teaspoons, batteries, and everything else under the sun in them. He says that he's even heard of someone finding false teeth in one.

You can read more fun communications stories like this one on page 6 of the June issue of Popular Communications magazine.

And one last word on this story: Its rumored that Cheatle, who runs an online retail company, apparently still uses the fishy phone. Word is that there's a long line of hungry looking cats following him wherever he goes.

Well not really, but it's sure a fun sentence with which to end this weeks newscast. (PopComm)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. The ARRL Letter
Vol. 28, No. 24
June 19, 2009
***************

IN THIS EDITION:

* + Pacific Division Vice Director Steps Down; Appointment Fills Vacancy

* + FCC Chairman Nominee Genachowski, Current Commissioner McDowell Face
Confirmation Hearings
* + W1AW, WA6ZTY to Conduct Dual-Tone Frequency Measuring Test in July
* + Check Out the July/August NCJ
* + ARRL Teachers Institutes Continue through Summer
* + WX4NHC Announces On-the-Air Station Test Results
* Solar Update
* IN BRIEF:
This Week on the Radio
ARRL Continuing Education Course Registration
+ ARRL to Close in Observance of Fourth of July
+ ARRL Contest Update Offers Valuable Information for All
Jim Tabor, KU5S (SK)
Longtime ARRL Staffer Robert L. Lincoln Passes Away

+Available on ARRL Audio News <http://www.arrl.org/arrlletter/audio/>

REMINDER: Be sure to check out the ARRL Field Day Locator for a Field
Day site near you! You can find the Field Day Locator on the ARRL Web
site <http://www.arrl.org/contests/announcements/fd/locator.php>.

============================================================

==> PACIFIC DIVISION VICE DIRECTOR STEPS DOWN; APPOINTMENT FILLS VACANCY

Citing family and business reasons, ARRL Pacific Division Vice Director
Andy Oppel, N6AJO, has submitted his resignation. President Joel
Harrison, W5ZN, has appointed Jim Tiemstra, K6JAT, of Oakland,
California, to serve the remainder of the current term through the end
```

of 2010.

Oppel had served as Vice Director since being appointed in 2003 to complete the term of Bob Vallio, W6RGG, who became Director upon the death of Jim Maxwell, W6CF. In a message posted to the East Bay Section Web page, he commented: "I regret to inform you that family and work issues have forced me to resign as your ARRL Pacific Division Vice Director. I have enjoyed being able to serve you in that capacity for the past 6+ years and as East Bay Section Manager for 3 years prior to that. I very much appreciate the support and friendship offered by many of you and I hope I still get a chance to see many of you from time to time."

First licensed in 1970 as WN9ELU, Tiemstra, an attorney, is an Amateur Extra class licensee. He has also held the call signs WB9ELU and N6OIK. "I'm thrilled at the opportunity to serve an organization that I have been a member of for my entire Amateur Radio career," Tiemstra said. "I have known of and supported Pacific Division Director Bob Vallio's efforts at the League for many years, and look forward to the opportunity of working with him in those endeavors. I am deeply honored to be chosen to fill the vacancy left by Andy's resignation. Because Amateur Radio certainly has enriched and added value to many aspects of my life, I am elated to have the opportunity to contribute something back to the hobby. The future of Amateur Radio is at a critical crossroads that will involve our appeal to youth."

Tiemstra told the ARRL that his favorite Amateur Radio activities are "contesting -- I seem to have more wallpaper than wall -- DXing with 300 confirmed entities and DXpeditions, a poor but adequate excuse for a vacation. I have operated as 3D2TJ, PJ2/K6JAT and KH6/K6JAT and from V26DX, but I have long been involved in the public service aspects of Amateur Radio."

As a member of the Oakland ARES group, Tiemstra responded to the 1989 Loma Prieta earthquake and the 1991 Oakland Hills firestorm. He worked with Oakland area hams and city officials to gain RACES recognition and was instrumental in forging a formal Letter of Understanding <http://www.ww6or.com/LOU_Oakland_RACES.pdf>. In addition, he assisted Oakland ARES/RACES in successfully championing a proposal to use post-firestorm, bond Measure I funds to acquire and install Amateur Radio equipment in the Oakland's Emergency Operations Center and each of its 30 fire stations. This has been dubbed the Emergency Communication Ham Operation (ECHO) system. Tiemstra also served as Oakland's RACES Radio Officer for more than 14 years.

In 1998, Tiemstra acted as the incorporator of the Oakland Radio Communication Association (ORCA) <http://www.ww6or.com/>, an ARRL affiliated club; he was a founding director and became its first president. He is a member of ORCA's board of directors and trustee of the club's call sign WW6OR. Tiemstra is a member of the Northern California Contest Club (NCCC) <http://www.nccc.cc/>, the Quarter Century Wireless Association (QCWA) <http://www.qcwa.org/> and 10-10

International <http://www.ten-ten.org/>. Tiemstra and his wife, Lilah, KE6EHD, have twin boys, Robert and Matthew, KI6IHP.

==> FCC CHAIRMAN NOMINEE GENACHOWSKI, CURRENT COMMISSIONER MCDOWELL FACE CONFIRMATION HEARINGS

On June 16, Julius Genachowski -- the man President Barack Obama picked to head the Federal Communications Commission -- and current FCC Commissioner Robert McDowell appeared before the Senate's Commerce, Science and Transportation Committee for their confirmation hearing. The Committee voted 24-1 to approve Genachowski's nomination and unanimously approved McDowell for his first full term as a Commissioner, sending their names to the full Senate to be confirmed.

President Obama nominated Genachowski to lead the Commission on March 3, 2009 <http://www.arrl.org/news/stories/2009/03/03/10684/?nc=1>; the president renominated McDowell to his post on June 2 <http://www.arrl.org/news/stories/2009/06/03/10859/>. Genachowski is a Democratic nominee, while McDowell is a Republican. Only three Commissioners may be members of the same political party.

At his confirmation hearing, the Chairman of the Commerce, Science and Transportation Committee Senator John D. Rockefeller IV (D-WV) told Genachowski that he wants "an FCC that is transparent, that inspires confidence and that makes our digital infrastructure a model for the world. Tragically, this has not been the case for some time. Let me be very clear about the challenge before you. Fix this agency or we will fix it for you."

Senator Byron Dorgan (D-ND) praised Genachowski for having the "perfect background" to run the FCC. He then added, "It seems to me that you will lead a rather unhealthy agency. We've been through a period of substantial secrecy."

Senator Rockefeller noted that during former Chairman Kevin J. Martin's tenure, the FCC was under congressional investigation for mismanagement <http://www.arrl.org/news/stories/2008/12/12/10505> and the focus of criticism by the Government Accountability Office (GAO) for its lack of transparency and potential misuse of data. Late last year, the House Committee on Energy and Commerce -- the congressional committee that oversees the FCC -- released its majority staff report "on the bipartisan investigation of the FCC's regulatory processes and management practices." The report -- "Deception and Distrust: The Federal Communications Commission under Chairman Kevin J. Martin" -- stated that the investigation was prompted "by allegations to the effect that [FCC] Chairman Kevin J. Martin has abused FCC procedures by manipulating or suppressing reports, data and information" <http://www.arrl.org/news/files/FCC_Report120908.pdf>.

Genachowski assured the Committee that his career "inside and outside government has convinced [him] that the FCC can be a model for excellence in government, fighting for consumers and families, fostering

investment and innovation, through open, fair, and data-driven processes -- a 21st century agency for the information age. The FCC should consult closely with Congress, and work effectively and efficiently for the American people."

In his testimony, McDowell said the Commission should focus on attracting capital investment to the communications sector, adding that the wireless sector is becoming increasingly important. "I will work to support policies that will promote vigorous growth in the broadband markets to ensure that all Americans have access to the promise of high-speed Internet services and that the Internet remains robust, open and safe," he told the Committee.

Sources on Capitol Hill have said that Genachowski should be confirmed by the time the Senate recesses for the July 4 holiday.

For a video stream of the confirmation hearings, please visit the Web site of the Senate's Commerce, Science and Transportation Committee <http://commerce.senate.gov/public/index.cfm?FuseAction=Hearings.LiveStream&Hearing_id=bca080f3-15a0-4d05-8abd-77f5327a2cb7>.

==> W1AW, WA6ZTY TO CONDUCT DUAL-TONE FREQUENCY MEASURING TEST IN JULY

The Hiram Percy Maxim Memorial Station, W1AW, and WA6ZTY on the West Coast will conduct a summer Frequency Measuring Test (FMT) on July 1 at 9:45 PM EDT (0145 UTC on July 2) <http://www.arrl.org/w1aw/fmt>. According to FMT Coordinator H. Ward Silver, N0AX, the format will be a "do-over" of the dual-tone test conducted in November 2008: "The timing glitches that occurred during the November test have been ironed out, so the format will be repeated to give everyone another opportunity to make measurements."

Silver said that both stations will transmit on a carrier frequency of 3597.5 and 7095 kHz; these are the W1AW digital bulletin frequencies. Two audio tones between 2000 and 2500 Hz will be transmitted in an alternating sequence, with a shift between 100 and 500 Hz. This is similar to what is used for RTTY communication. Beginning on 80 meters, Tone 1 will be transmitted for 10 seconds, followed by Tone 2 for 10 seconds. The tones will then alternate until each tone has been transmitted six times, for a total transmission of 120 seconds. The transmitting station will then change to 40 meters -- after identifying in Morse code -- and repeat the two-tone sequence.

All transmissions for announcing the test, identification and band changes will be in CW at 15 WPM (18 WPM character speed). CW transmissions will be on the carrier frequency, with each lasting more than one minute.

Time Sequence for W1AW (begins at 9:45 PM EDT [0145 UTC July 2, 2009]):
* QST and test announcement on 80 meters.
* Repeat six times: 10 seconds of T1 followed by 10 seconds of T2. This is a total of 120 seconds of transmission.
* ID and notice of QSY to 40 meters.

* QST and test announcement on 40 meters.
* Repeat six times: 10 seconds of T1 followed by 10 seconds of T2. This is a total of 120 seconds of transmission.
* Announce conclusion of W1AW transmission and ID.

Time Sequence for WA6ZTY (begins at 10 PM EDT [0200 UTC July 2, 2009])
* QST and test announcement on 80 meters.
* Repeat six times: 10 seconds of T1 followed by 10 seconds of T2. This is a total of 120 seconds of transmission.
* ID and notice of QSY to 40 meters.
* There will be a pause of five minutes while WA6ZTY reconfigures for 40 meters.
* QST and test announcement on 40 meters.
* Repeat six times: 10 seconds of T1 followed by 10 seconds of T2. This is a total of 120 seconds of transmission.
* Announce conclusion of WA6ZTY transmission and CW ID.

According to Silver, the FMT has been run in the past where a modulated carrier or audio tones are held steady for a very long time. "This 'classic' carrier frequency FMT format will return in November," he said. "The new format addresses the growing importance of digital modes. The challenge of this format is to make quick, accurate measurements of the characteristics of a digital signal where the tones do not stay steady for a long period of time. It's not expected that the level of accuracy demonstrated for a long-tone test will be achieved for these short tone transmissions -- that's not the point."

Silver said that he predicts there will be a future FMT that will conduct a true-FSK test. "In this future test, there would be four variables: Carrier frequency, Audio Tone 1, Audio Tone 2 and Shift," he said. "Given the value of any one of the variables in advance, two of the remaining variables would be measured and the final variable calculated or measured. The symbol rate (the number of transitions per second) would be representative of actual digital signals. For example, a 60 WPM RTTY signal."

Silver said that this can present some challenges to FMT participants: "One of the reasons we conduct the FMTs goes back to FCC Part 97.1(c): '...advancing skills in both the communication and technical phases of the [radio] art.' We look forward to seeing the creativity and innovation of the measurement community applied to this new format" <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.1.pdf>.

Participants should send their FMT reports -- indicating their values of Tone 1, Tone 2 and Shift (the difference between the tones) -- via the Web data collection form <http://www.b4h.net/fmt/fmtentry.php> by July 8. The published results will evaluate error in Tone 1, Tone 2 and Shift. "Be sure to include the details of how you made the measurements, obstacles you faced and how you overcame them," Silver said. "It will make great reading and sharing in the best traditions of Amateur Radio. If you have pictures or diagrams, please send them <fmt@arrl.org> so that they can be posted on the FMT Web page"

<http://www.arrl.org/w1aw/fmt/>.

==> CHECK OUT THE JULY/AUGUST NCJ

The July/August issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you <http://www.arrl.org/ncj/>.

If you're in the market for a new rig, you will want to check out "Choosing an HF Radio for Serious Contesting and DXing" by R. Scott Wright, K0MD. In the first of a multi-part article, John Barcroft, K6AM, takes a look at "A 3 Element Reversible Wire Yagi for 80 Meters." One year after the introduction of CW Skimmer, Pete Smith, N4ZR, gives his perspective in "CW Skimmer One Year Later."

This issue also features "NCJ Profiles" and "NCJ Club Spotlight": Tom Menas, K3WT, introduces us to Dave Mueller, N2NL, of Key West, Florida, while Bob Nash, VE3KZ, takes us inside the Contest Club Ontario.

If you've been waiting to see how you did in the January and February contests, you definitely don't want to miss this issue! Shelby Summerville, K4WW, give readers the rundown on the February 2009 NAQP RTTY Contest. Bruce Horn, WA7BNM, looks at the results of the January 2009 NAQP CW and SSB Contests. Jim Stevens, K4MA, gives his take on the February 2009 North American Phone Sprint and members of the Boring Amateur Radio Club ponder the February 2009 North American CW Sprint.

Of course, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles," by Don Daso, K4ZA; "Contest Tips, Tricks & Techniques," by Gary Sutcliffe, W9XT; "VHF-UHF Contesting," by Jon Jones, N0JK; "DX Contest Activity Announcements," by Bill Feidt, NG3K; "RTTY Contesting," by Don Hill, AA5AU, and "Contesting 101," by Kirk Pickering, K4RO.

All this and more in the July/August issue of NCJ. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today <http://www.arrl.org/ncj/>.

==> ARRL TEACHERS INSTITUTES CONTINUE THROUGH SUMMER

The second and third sessions of the ARRL's Teachers Institute on Wireless Technology of 2009 have wrapped up in Rocklin, California and Tucson, Arizona <http://www.arrl.org/FandES/tbp/ti.html>. These two TIs mark the first time that the ARRL has offered simultaneous sessions of the popular summer program for teachers. According to Education and Technology Program Coordinator Mark Spencer, WA8SME, the addition of two new TI instructors made it possible to hold two sessions at the same time. "With Miguel Enriquez, KD7RPP, and Nathan McCray, K9CPO, on board," Spencer said, "we are able to hold more sessions, and in turn, involve more teachers into learning how to bring wireless technology into their classrooms."

In Tucson, Enriquez led a group of local teachers through the four day curriculum that includes basic electronics, the science of radio, space in the classroom, microcontroller programming and basic robotics. "The Tucson Teachers Institute went wonderfully," he told the ARRL. "I saw lots of smiles, heads nodding in understanding and teachers espousing intended commitment to provide a return on investment."

Spencer led the other session group at the Parallax facility in Northern California. "This group was more geographically diverse," he said, "with teachers from nine states from coast to coast." McCray will lead a session in Michigan that begins on June 29.

Each Teachers Institute session includes 12 teachers. According to Spencer, the curriculum is information packed and intensive. "This year," Spencer said, "we tried to connect the teachers in the Tucson session with the teachers in the California session via an AO-27 contact; satellites are part of the space in the classroom unit. Unfortunately, this was not successful due to unforeseen complications with accessing the satellite; however, a later attempt to demonstrate ham radio space technology was successful."

The final day of the Teachers Institute is dedicated to basic robotics; this unit ties together all of the other content areas taught during the Teachers Institute. There are five more Teachers Institutes scheduled over the next two months. Spencer said that "the aggressive schedule and increased number of teachers participating this year -- 84 -- is testament to the success of this ARRL Educational and Technology program that is supported by the generous League donors who share a passion for education"
<https://www.arrl.org/forms/development/donations/education/2008/>.

==> WX4NHC ANNOUNCES ON-THE-AIR STATION TEST RESULTS

WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio station at the National Hurricane Center <http://www.nhc.noaa.gov/>, conducted its annual On-The-Air Station Test on Saturday, May 30, 2009 <http://www.arrl.org/news/stories/2009/05/15/10821/>. According to Assistant WX4NHC Coordinator Julio Ripoll, WD4R, the station conducted the test to promote awareness of the 2009 hurricane season <http://www.arrl.org/news/stories/2009/06/06/10862/?nc=1> and to verify station equipment performance on the many frequencies and modes that are used to communicate with other stations in affected areas during hurricanes. WX4NHC has been at the NHC for 29 years.

Ripoll said that WX4NHC station was on the air for nine hours, making 154 contacts with stations in the US, the Caribbean, Central America, Canada, Australia, Europe and Africa. "Most contacts made on HF were done using phone (SSB) and on the Hurricane Watch Net <http://www.hwn.org/> frequency of 14.325 MHz, as well as 7.268 MHz in cooperation with the Waterway Net <http://www.waterwayradio.net/>," he said. "We also made contacts using HF and VHF APRS <http://www.arrl.org/tis/info/HTML/aprs/>, and local VHF and UHF repeaters in Miami-Dade and Broward Counties."

Ripoll said that the VoIP Hurricane Net <http://www.voipwx.net/> conducted a two hour simulated Hurricane Net on EchoLink (WX_TALK conference) and IRLP (node 9219) using the same methods of collecting and forwarding data to WX4NHC during hurricanes with great success: "We extend special thanks to Rob Macedo, KD1CY, and the VoIP Hurricane Net Controls for their dedication and continued support of WX4NHC."

On behalf of the WX4NHC Coordinators and operators, Ripoll thanked all the Amateur Radio operators who participated in the WX4NHC Annual Station Test: "We look forward to your continued support during the hurricane season." For a QSL card from the test, please send a self-addressed, stamped envelope to Julio Ripoll, WD4R, 14855 SW 67 Ln, Miami, FL 33193-2027.

==>SOLAR UPDATE

Tad "Spread their wild hues to the sultry Sun" Cook, K7RA, this week reports: I bet you have this memorized: "Solar activity was very low throughout the reporting period, and geomagnetic field activity was at quiet levels during most of the reporting period." Enough said? The first sunspot region of Solar Cycle 24 occurred on January 4, 2008. Since then, though, Solar Cycle 24 spots have been few and far between. A good summary of this solar minimum can be made in two statements. The first statement is that the duration of this solar minimum is unusual compared to the other solar minimums in our lifetime. That's because from the minimum between Solar Cycle 17 and 18 onward, solar minimums have been roughly two years. Thus we've only been exposed to "short" solar minimum periods. A look at all history shows a different story and brings us to the second statement. This solar minimum, which is going on three years now, is pretty much average in duration compared to all history. What this all says is the Sun has been highly variable throughout recorded history. Sunspot numbers for June 11-17 were 0, 12, 0, 0, 0 and 11 with a mean of 3.3. The 10.7 cm flux was 69.3, 69, 68.2, 68.1, 67.4, 68.3 and 67.8 with a mean of 68.3. The estimated planetary A indices were 3, 2, 4, 6, 4, 3 and 3 with a mean of 3.6. The estimated mid-latitude A indices were 2, 1, 3, 4, 4, 4 and 1 with a mean of 2.7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by John Clare's "June" <http://johnclare.blogspot.com/2006/03/from-june-in-anticipation.html>.

==>IN BRIEF:

* This Week on the Radio: This week, look for the ARRL Kids Day Contest on June 20. The NCCC Sprint Ladder and the Digital Pentathlon are June 19. The Feld Hell Sprint and the AGCW VHF/UHF Contest are June 20. On June 20-21, look for the West Virginia QSO Party and the All Asian DX Contest (CW). The Run for the Bacon QRP Contest is June 22 and the SKCC

Sprint is June 24. Next week ARRL Field Day is on June 27-28 -- look for a Field Day site near you <http://www.arrl.org/contests/announcements/fd/locator.php>. The NCCC Sprint and the Digital Pentathlon are on June 26. On June 27-28, check out the His Majesty King of Spain Contest (SSB), the Ukrainian DX DIGI Contest, the Marconi Memorial HF Contest and the ARCI Milliwatt Field Day. The SARL Digital Contest is June 28 and the RAC Canada Day Contest is July 1. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 28, 2009, for these online course sessions beginning on Friday, July 10, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL to Close in Observance of Fourth of July: ARRL Headquarters will be closed in observance of Independence Day on Friday, July 3. There will be no ARRL Audio News, W1AW bulletin or code practice transmissions that day. The ARRL Letter will be posted a day early on Thursday, July 2. League Headquarters will reopen Monday, July 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

* ARRL Contest Update Offers Valuable Information for All: Every two weeks, H. Ward Silver, N0AX, produces the ARRL Contest Update. Each issue is jam-packed with information for all operators -- be they involved in radiosport or not -- operating and technical tips, propagation information and a focus on a technical Web site each issue. Of course, everything you need to know about upcoming contests is right there at your fingertips. Since the ARRL Contest Update is available in HTML, there is a link to the rules for each individual contest listed, as well as pictures. ARRL members can subscribe the ARRL Contest Update

on the ARRL Web site
<http://www.arrl.org/contests/update/about.html#get>.

* Jim Tabor, KU5S (SK): Jim Tabor, KU5S, passed away at his home in Greenwood, Arkansas on May 27; he was 54. A longtime ARRL member, Tabor was head of Kangaroo Tabor Software <http://www.taborsoft.com/>, which published various programs for radio amateurs, such as the WinCAP propagation prediction software, GeoAlert-Extreme Wizard, Beacon-Time Wizard and ID Wizard. Dean Straw, N6BV, who edited several recent editions of The ARRL Antenna Book <http://www.arrl.org/catalog/?item=9876>, remembered Tabor fondly: "Over the course of about a dozen years, Jim provided ARRL with some of his most innovative propagation programs, and allowed us to include them on the CD-ROM accompanying The ARRL Antenna Book. I worked closely with Jim on several such projects, and he was always thorough and analytic in his approach to such collaborations. But more than that, Jim was simply a great guy to work with. I shall miss his unfailingly polite and down-home, gentle demeanor. Jim will remain in my memory a soft-spoken, gentle and talented man, a true gentleman."

* Longtime ARRL Staffer Robert L. Lincoln Passes Away: Robert Lincoln, 94, of Westbrook, Connecticut, passed away at his home on June 13. After his retirement at age 65 from Addressograph Multigraph, Lincoln came to work at ARRL to run the League's in-house printing press. He retired from the ARRL in January 2007 at age 92 after 27 years of service <http://www.arrl.org/?artid=7140>. Around the ARRL HQ building, he was affectionately known as "Mr Lincoln," carrying out his various printing tasks largely out of the public spotlight. A memorial service is planned for June 18 at Swan Funeral Home in Old Saybrook, Connecticut.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from ARRL HQ. To subscribe, unsubscribe or change your address for
e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. (Check "Temporarily disable all
automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You
must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

Nebraska Celebrates Amateur Radio Week

(Lincoln, NE) Nebraska will celebrate amateur radio week from June 22-28, 2009, thanks to a proclamation by Nebraska Gov. Dave Heineman. This coincides with the annual Amateur Radio Relay League's (ARRL) Field Day exercise on June 27. Amateur radio operators are usually know has "hams."

"I'm happy to declare "amateur radio week" to thank all of the Nebraska ham radio operators," said Gov. Heineman. "These radio operations can be very helpful in our state, particularly in disaster preparation. I wish Nebraska hams success on their exercise."

The proclamation was presented to Jeff Bennet and Bob Mitchell of Lincoln representing the ARRL's Nebraska Section as part of a proclamation signing ceremony at the State Capitol Building in June 10.

Field Day is a 24-hour emergency communication exercise by amateur radio operators across the nation. The operators are usually from amateur radio clubs deploying to temporary locations, but any ham radio operator can participate.

It is a day of fellowship and fun with an underlying current of preparing for emergency communications. While many people think that the Internet and cell phone coverage are always at their finger tips, these ways of communicating can be silenced in a disaster.

Which is Field Day is an important exercise. Many hams operate using emergency power - and even green power - so that they are prepared in case of a disaster that disrupts the normal channels of communications.

Clubs and hams throughout Nebraska from Chadron to Falls City, Omaha to Scottsbluff, Norfolk to Hastings and in between will out on Field Day sharing not only camaraderie with each other, but also fine tuning their skills in emergency communications.

ARRL Nebraska Section
Section Manager: Arthur I. Zygielbaum, K0AIZ

Amateur Radio Newsline(tm) Report 1663 - June 26 2009

Amateur Radio Newsline report number 1663 with a release date of
Friday, June 26th, 2009 to follow in 5-4-3-2-1.

The following is a QST. The FCC says no to a petition to regulate the accuracy of signal reports; some new Cycle 24 spots appear on the sun and a new Mode B record on the aging AO7 ham radio satellite. Find out the details on Amateur Radio Newsline(tm) report number 1663 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: THE FCC SAYS ANY SIGNAL REPORT IS A GOOD SIGNAL REPORT

Hams can continue to give any signal reports that they please. This as the FCC denies a petition filed by a Texas ham that sought to regulate the way signal reports are given in the Amateur service, especially during contests. Bruce Tennant, K6PZW, has the details:

--

The FCC has acted very quickly on a petition filed this past May 6, by Jack Najork, W5FG, of Hubbard, Texas, concerning signal reports transmitted by amateur stations that are participating in contests. Specifically, Najork had request that the Commission sanction the American Radio Relay League for not taking any action to prohibit or discourage what he termed as "false 5-9 blanket reporting."

In the petition, Najork stated that contest signal reports have become -- and we quote "wholesale liar's exchanges." He also expressed the concern that the ARRL has -- and again we quote -- "targeted newly licensed radio amateurs with articles in QST to insure they learned and followed this sham reporting system."

But in its almost record-setting dismissal of the Najork petition, the FCC flatly stated that the way in which hams exchange signal reports is of no interest or concern to the regulatory agency. In regard to the message exchanged between stations in contests, the FCC said that these are specified by the various contest sponsors and generally consists of a call sign and a signal report. As to hams giving other hams inaccurate signal reports, here the FCC notes that there is no rule in Part 97 that requires a station to transmit a report of the signal received. Nor is there one that specifies the standard for reporting

signal quality.

In the end the Commission said that it does not regulate amateur contests. Rather, they are self-administered by the amateur community. Based on this, the FCC has dismissed Najork petition and has told him that his concerns should be directed to the various contest sponsors.

Just how Najork might accomplish this is a good question. This is because the majority of ham radio contests are sponsored by individuals or groups in other nations. As such, they are not subject to the same rules as those radio amateurs whose licenses have been issued by the United states FCC.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

And before you ask, this is not some sort of belated April Fool's joke. The petition had been assigned as Docket number DA No. 09-1378 by the FCC. You can read the entire dismissal order for yourself at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-1378A1.doc (FCC)

**

SOLAR CYCLE 24: NEW SUNSPOT GROUP EMERGES

Some possible good news on the propagation and maybe the D-X front as well. Thomas Giella, NZ4O, reports that on Monday, June 22nd, a new solar cycle 24 sunspot group emerged in the South-West quadrant of the Sun. Also that NOAA was expected to assign it the designation 11023 with a beta magnetic signature.

Tom, who lives in Lakeland, Florida, notes that sun watchers have seen four solar cycle 24 sunspot groups this month and six in the past 30 days. He adds that it appears as if solar cycle 24 has finally come alive.

And in what may be related news, word on the VHF Reflector that the 6 meter band has been open in various parts of the world with skip contacts of several hundred to more than a thousand miles. These reports seem to coincide with the emergence of the new sunspot group being reported by NZ4O, but whether or not there is any direct connection between the two events is unknown. (Various Sources)

**

HAM RADIO IN SPACE: AO-7 MODE B 7000 KM QSO RECORD SET

A 7,000 km contact via the aging AO-7 satellite in Mode B has taken place. This as PS8RF in Brazil and makes contact with ON7EQ in Belgium.

The actual distance between the two stations 7622 kilometers which translates into 4736 miles. According to ON7EQ, both stations knew that a theoretical window between their locations only lasts about 1 minute, 30 seconds. Because of this, some careful preparation was required for selection of the optimal window and calculation of Doppler shifts both ways.

In the vend the effective contact was only possible during about 20 seconds. That was just enough time to exchange reports. It was also enough to put PS8RF and ON7EQ into the ham radio satellite record books. (Southgate)

**

RESCUE RADIO: UK RAYNET HAM RADIO NOT INCLUDED IN EMERGENCY PLAN

Ham radio was definitely not on the mind of United Kingdom emergency planners. This, when that nations recent emergency preparedness report was recently made public. Jeramy Boot, G4NJH, is in Nottingham in the U-K, with more:

--

The Government's recent Digital Britain report speaks of the importance of resilient communications networks and the need for regular tests of emergency communications systems.

Mention is made of a planned major test in late 2009 to manage and recover from a major loss of network capability.

The RSGB regrets that Government communications planners seem to have completely overlooked the valuable resource that RAYNET can offer in such emergency situations. Unfortunately RAYNET does not seem to be completely integrated into the nation's emergency communications planning.

For the Amateur Radio Newsline, I'm Jeramy Boot, G4NJH, in Nottingham.

--

RAYNET can best described as the U-K equivalent of the United States ARES and RACES combined. (GB2RS)

**

HAM TECHNOLOGY: W1AW, WA6ZTY TO CONDUCT DUAL-TONE FREQUENCY MEASURING TEST IN JULY

The ARRL's Hiram Percy Maxim Memorial Station, W1AW is joining forces with WA6ZTY on the West Coast to conduct a summer Frequency Measuring Test. The event will take place at 0145 UTC on July 2nd. That's 9:45 p.m. Eastern and 6:45 p.m. Pacific time.

According to Frequency Measuring Test Coordinator Ward Silver, N0AX, the format will be a repeat of the dual-tone test conducted in November 2008. Silver says that the timing glitches that occurred during the

November test have been ironed out, so the format will be repeated to give everyone another opportunity to make measurements.

More about the Frequency Measuring Test can be found on line at www.arrl.org/w1aw /fmt. (ARRL)

RESCUE RADIO: VK BROADCASTER TO ASSIST IN EMCOMM ALERTS

A broadcaster down-under says its going to equip itself to assist in rescue radio operations. This by making itself ready to do local updates when and where they are needed during an emergency. Jim Damron, N8TMW, reports: -- New technology will help the Australian Broadcasting Corporation bring local emergency news coverage directly to communities affected by natural disasters like floods and cyclones. Three fly-in transmitters have been purchased by the company to allow local ABC affiliated stations to set up shop anywhere in Australia.

The units were originally designed for the United States military to use in the Iraq war. They are designed to be set up within an hour and can be powered by a small generator or AC mains power.

Mark Spuurway is the head of transmission services with the ABC. He says that these transmitters will insure that affected communities will be kept informed. -- At airtime its not known how soon these new Australian Broadcasting Company fly-in radio service will be available. (ABC release)

**

ENFORCEMENT: FCC REFUSES TO RENEW TEXAS FM BROADCAST LICENSE

A broadcast station has lost its license In a June 22nd Memorandum Opinion and Order, the FCC has dismissed an Application for Renewal of licensee for station KBKH FM in Shamrock, Texas. This after finding that station owner Terry Keith Hammond lacks the basic requisite character qualifications to be and remain a Commission licensee. Bill Pasternak, WA6ITF, has the rest of the story: -- Back on September 15, 2006, the Commission began a hearing proceeding to determine whether Terry Keith Hammond was qualified to be and remain a licensee. Also, whether his license for Station KBKH FM should be revoked, and whether Hammond's application for renewal of the station's license should be granted.

The case centered around a Hearing Designation order to determine if Terry Keith Hammond made false certifications, misrepresentations, or otherwise demonstrated a lack of candor in applications that he filed with the Commission. Also, whether he willfully and/or repeatedly violated Commission rules governing the operation, location and equipment for Station KBKH FM. Lastly, whether Hammond willfully or repeatedly failed to comply with a Commission rule requiring licensees to provide information concerning matters within the Commission's jurisdiction

The Presiding Judge eventually determined that Hammond received a copy of the Hearing Designation Order but failed to file a written notice of appearance seeking to avail himself of the right to a hearing. Because of this the Judge concluded that Hammond had waived his right to a hearing. He then terminated the hearing proceeding and certified to the Commission the issues in the matter. The Judge also dismissed, with prejudice, the station's renewal application.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles. -- The FCC says that its actions were taken pursuant to authority delegated to the Enforcement Bureau under Section 0.111(a)(17) of the Commission's rules. At airtime, its not known if Hammond plans to file an appeal. (FCC)

** HAM HAPPENINGS: PAPERS BEING SOLICITED FOR MUD 2009

Technical papers are currently being solicited for publication in the ARRL's Microwave Update 2009 Conference Proceedings. The conference is slated for on Friday, October 23 through Saturday, October 24 in Dallas, Texas, but you do not need to attend the conference nor present your paper to have it published.

Strong preference will be given to original work and to those papers that are written and formatted specifically for publication rather than as a visual presentation aid. The deadline for papers is Monday, August 31, 2008. More information is available on-line at www.microwaveupdate.org (ARRL and MUD)

**

HAM RADIO AND THE NET: AMSAT NOW TWEETING ON TWITTER

Get ready for some interesting ham radio in space related tweets. This with the announcement that the Amateur Satellite organization AMSAT is now posting on the Twitter social networking website.

According to Drew Glasbrenner, KO4MA, writing on the AMSAT Bulletin Board, the ham radio space agency new Twitter account is twitter.com/AMSAT. He says that the initial tweets will deal mostly with AO-51 and AO-7, but those with interest in other ham radio satellites are welcome to follow.

Glasbrenner, who is AMSAT North America's Vice President for Operations says that the short postings or tweets will deal with items that are

deemed as small for publication by the AMSAT News Service or to be sent by e-mail, but of interest to the general ham radio space community. (AMSAT-NA)

**

NEW PRODUCT: JETSTREAM INTRODUCES JT220M FOR THE 220 BAND

Its been a long time since a new mobile transceiver for the amateur 222 to 225 MHz band has been announced. Now Jetstream, the company best known for its power supplies and ham station peripherals has introduced the new JT 220 M transceiver.

The JT 220 M is an FM only transceiver that runs 50 Watts out in its high power mode from any of its 99 memory channels or its one programmable call channel. It features a large black on blue LCD display, a backlit DTMF microphone, a time out timer plus both CTCSS and DTS encode and decode built in. There's even an internal tone burst encoder for those rare spots in the world that still use it.

The JT 220 M's newly designed double conversion receiver uses intermediate frequencies of 21.7MHz and 450 kHz to maximize image rejection of unwanted signals. The overall receiver design yields a squelch sensitivity of point one microvolt. In other words, this radio can hear as well as talk. And less we forget, the JT 220 M is computer programmable using an optional cable.

If you have been thinking about getting a radio for 220 but have been looking for something new, the JT 220 M may be the transceiver for you. Judge for yourself on-line at www.jetstream-usa.com/jt220m.shtml (ARNewsline(tm))

**

NEW PRODUCTS: NEW CCRADIO 2 COVERS 2 METERS

The recently announced C. Crane CCRadio-2 is not a transceiver but it can receive anything in the 2-meter band Amateur service band. The California based C. Crane Company says it's the first commercial AM/FM radio that provides this type of ham-band monitoring capability, noting that listeners could find emergency information there that could save somebody's life. More about the CCRadio-2 at the C. Crane website. Its at www.ccrane.com (C. Crane)

**

NET NEWS: THE NET COMES FIRST

The results of a survey released on June 18th says that twice as many Americans would rather give up their cell phone or cable TV than their broadband Internet connection. This, even though they're paying more for the high-speed service this year.

The latest findings by the Pew Internet and American Life Project shows broadband adoption jumped to 63 percent of American adults using a high-speed connection at home compared to 57 percent a year ago. The results appear to indicate that the current economic recession has not kept people from subscribing to a home high-speed connection.

Home broadband users paid more for their service this year over last year. The average monthly bill is $39 this year. This is up by over $4 in 2008 when the average monthly fee was $34.50. (Todays Technology)

**

NAMES IN THE NEWS: C-NET INTERVIEWS KEVIN MITNICK, N6NHG

Some names in the news. First up is former hacker turned Internet security expert Kevin David Mitnick, N6NHG. In an on-line interview with C-Net News Ellinor Mills, Mitnick explains how ham radio lead him to an interest in the nations telephone system and from there to computer hacking and social engineering. This, so he could get all sorts of information that he personally craved to know and to try to understand.

Mitnick also talks openly about other hackers, about his getting caught, his time spent behind bars and how it all lead him to become one of the good guy hackers. Someone working to keep the nations data systems secure from people like his former self.

It all makes an interesting read, especially for those who might have known, or actually knew N6NHG back in the 1980's and 1990's. The article is on-line at http://news.cnet.com/8301-1009_3-10269348-83.html?part=rss&subj=news&tag=2547-1_3-0-20 (C-Net)

**

NAMES IN THE NEWS: K6JAT APPOINTED AS PACIFIC DIVISION VICE DIRECTOR

Jim Tiemstra, K6JAT, of Oakland, California, tis the new ARRL Pacific Division Vice Director. This, after being appointed by League Joel Harrison, W5ZN to serve the remainder of the current term of Andy Oppel, N6AJO, who resigned from the post citing family and business reasons.

Tiemstra is a member of the Northern California Contest Club, the Quarter Century Wireless Association and 10-10 International. He will serve as Pacific Division Vice Director through the end of 2010. (ARRL)

**

NAMES IN THE NEWS: SAN FRANCISCO'S FIRST ATV STATION

And the story of the late Clarence Wolfe, Jr., W6JDI, and his foray into amateur fast scan television in the late 1940's is one of the

features in the July issue of Popular Communications magazine.

According to the article by writer Shannon Huniwell, Wolfe signed on with a home built 525 line Iconoscope camera and transmitter about a year and a half before the first San Francisco commercial station began to light up the airwaves. His programming consisted only of a picture of a girl that other pioneering ham television operators dubbed as Gwendolyn.

How W6JDI pulled it all together and got it on the air for less than $500 is an amazing story. It starts on page 73 of the July Popular Communications on newsstands right now. (PopComm)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: JOE PHILLIPS, K8QOE - S.K.

It is with the deepest of sorrow that we report the passing of our longtime friend Joe Phillips, K8QOE, who died suddenly at his home on Saturday, June 20th. Joe, who since 1998 had been serving as ARRL Ohio Section Manager was not only a devoted ham radio operator and family man, but also a driving force in publicizing the hobby to the world.

First licensed in 1959 as KN9SYL, Phillips first joined the ARRL Field Organization as an Official Emergency Station in 1986. He became a Public Information Officer in 1989 and has served as an Official Observer since 1997. He was elected Ohio Section Manager in 1998.

But titles are only a tiny part of the Joe Phillips story. Rather for many of his 68 years on Earth, Joe was a ham literally out in the trenches of amateur radio. A career as a journalist and a teacher, over the years K8QOE edited six separate ham radio newsletters in Cincinnati before becoming Newsletter Editor for the Ohio Area Repeater Council in 1984. That's a position he held for five years.

In 1986, Phillips organized the first Ohio Repeater Directory and in 1992 he created the Ohio Section Ham Radio Newsletter Contest. He also authored a weekly ham radio newspaper column in the Sunday edition of the Cincinnati Enquirer called "Ham Call" and hosted a similarly named program for cable television also in the Cincinnati area. And for many years he was a fixture at forums he conducted or took part in at the Dayton Hamvention.

In 1994, Joe Phillips was elected to the Greater Cincinnati Amateur Radio Hall of Fame. A year later he was the recipient of the ARRL's McGan Silver Antenna Award. This latter honor is bestowed annually to an ARRL member who demonstrates outstanding public relations success on behalf amateur radio at the local, state or national level. In Joe case, it was all three.

Joe Phillips, K8QOE, is survived by his wife Donna and their three children. A funeral Mass was scheduled for Saturday, June 27th at the Sacred Heart Catholic Church, in Fairfield, Ohio with burial in Youngstown, Ohio.

Needless to say, Joe Phillips, K8QOE, was a very special member of the nations ham radio community. A true contributor to its well being in every sense of the word. He will be missed. (K8JE, N8BV, ARRL, ARNewsline(tm))

**

HAM TECHNOLOGY: WA1ZMS TRANS-ATLANTIC BEACON GETS MORE POWER

The WA1ZMS Trans-Atlantic spotting beacon on 144.285 MHz has just had an increase in power. This CW beacon is also GPS locked and the antenna is beaming at 60 degrees from IARU grid locator F M 07 f m. While it has yet to be heard in the British Isles, its owner Brian Justin, WA1ZMS says that given the right conditions, the signal may make it across the pond. More about this experiment is on-line at www.directivesystems.com/WA1ZMS (WA1ZMS)

**

HAM RADIO IN SPACE: RS-15 10 METER BEACON STILL OPERATIONAL

The 10 meter beacon on the RS-15 Amateur Radio satellite is still going strong. This, over 14 and a half years since the ham radio satellite was launched.

RS-15 was rode into orbit on December 26th 1994. Its 145 to 29 MHz linear transponder has long since ceased operation, however the 10 meter beacon can still be heard. At least when there is enough power generated to bring it on the air.

It should be noted that most commercial low earth orbit satellites cease operating after a few years. The fact that RS-15 can be heard at all is a reflection on the very high standard of design and construction that is put into every amateur satellite. (AMSAT)

**

HAM RADIO IN SPACE: CELEBRATING THE APOLLO 11 MOON LANDING

A group of radio amateurs are reportedly planning a commemorative event to mark this year's 40th anniversary of the Apollo 11 moon landing. Called 'Echoes of Apollo', the Southgate news says that various activities are planned around the end of June and into July to

commemorate this historic event.

As we go to air the organizers are reportedly negotiating with some of the world's largest and most capable amateur radio moon-bounce stations, and some deep space radio facilities. The idea is to network people from various locations using moon-bounce.

Also planned is an HF radio weekend. This, with stations set up near sites that took part in the original support for the Apollo 11 mission. More on this project as details become available. (Southgate)

**

ON THE AIR: MUSCATINE IOWA RADIO CLUB TURNS 60

On the air, the Iowa-based Muscatine Amateur Radio Club will be operating Special Event Station W0M from June 15 through June 30. This is in celebration of the 60th Anniversary of the club. Operations will be on 80, 40 and 10 meters on H-F and locally on 146.910 F-M. QSL with a #10 Self Addressed Stamped Envelope via KC0AQS 1092 Ripley Rd., Muscatine, Iowa. The zipcode is 52761. Logs may be uploaded to Logbook of the World and eQSL sometime after June 30th, but you can only get the certificate through the postal service. (N0LOH)

**

ON THE AIR: THE ANTARCTIC IN 2010

And a lot further South, ON7ZM and F5PFP say that they are planning an expedition to Antarctica. One that will probably take place during the Arctic summer of 2011 to 2012.

According to F5PFP, it could be a 6 to 7 week expedition to reach some old bases and refuges which are situated below the Antarctic polar circle. Possible stops include the Loubet coast, the Fallieres coast, Marguerite Bay, and hopefully one accessible island in the Alexander group. Questions go to f5pfp (at) aliceadsl (dot) fr or keep an ear open here on Newsline for more details. (OPDX)

**

DX

In DX, listen out for DL5YL, and DL5YM who are currently operating portable HB0 from Liechtenstein. The pair are on from the city of Masescha working in CW on all of the high frequency bands. QSL as directed by the operators. This operation ends on July 2nd.

SQ8X and SV2KBS will activate Easter Island from October 31st through November 15th. A few more operators are being sought for this DXpedition. If you are interested to join please contact stan (dot) sq8x (at) gmail (dot) com

IV3EPO will be active from Malta as 9H3EP through June 29th. Listen for him on 40 through 10 meters mainly using CW. QSL direct or via the

bureau to IV3EPO.

F2JD will be operational from the Philippines for the next five months and is hoping to get his DU1 slash G0SHN license extended. He also plans to activate some Islands On The Air locations during his stay. QSL direct or via the bureau to F6AJA.

Lastly, keep an ear open for Madagascar. This as Texas DX Society member W5KDJ comes on the air as 5R8KD from Antananarivo between July 4-17th. His operation will be on 160 through 6 meters using CW and RTTY. Logs will be uploaded to LoTW and eQSL. And an on-line log search will be available. Paper QSL's go via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: A HOOSIER FIELD DAY IN NEW MEXICO

And finally this week, group of Hoosier hams are trekking to New Mexico for a very special Field Day event. Jack Parker, W8ISH, is in Indianapolis, with more:

--

Their goal is making contact with as many North American human Life Forms as possible during the two day event. Five Indy hams and a sixth from the Rocky Mountains are launching their Field Day from a remote mountain top in New Mexico.

Veteran DX'er Mike Koss W9SU and the newly formed Purveyors of Doom will operate from the 86 hundred foot Gallinas Peak in New Mexico. This is near Corona where a UFO reportedly crashed in 1947.

This part of the world isn't alien to Mike Koss. In fact, he has gone where no man, with a ham radio, has never gone before. In July 1997 Mike was traveling through New Mexico on business and was fascinated by the history of Roswell and the 50 year commemoration of the mysterious UFO crash.

Two years later Mike and his brother Bob W9ETA returned to Roswell to operate Field Day from an alleged UFO crash site west of the city. In 2002, the UFO Field Day adventure took off. Three more Hoosiers, including a retired Indianapolis police officer living in Colorado, joined Mike at the crash site.

Their quest for amateur radio contacts and a possible Close Encounter has kept the tradition alive. In 2004 a forest fire in the area forced the trekkers to find a new location for Field Day. They settled for a mountain top near Corona, New Mexico, an area known for UFO activity.

Following a couple of side trips to two epicenters of UFO lore-Roswell, New Mexico and a Nevada site, near area 51, Mike hatched the idea of combining an interest in UFO's and Amateur radio into a new Field

Day group.

This year, using their new call sign of W9UFO, Mike and the Purveyors of Doom radio club, will be operating 2Alpha, along with a VHF station from the remote grid square of DM74. Any contacts made during Field Day 2009 with these alien Hoosiers, will earn you a novel QSL card that satirizes the governments official denial of UFO's.

Reporting from Indianapolis, this is Jack Parker W8ISH.

--

For those who'd like to tune them in, the group be on 14.337 MHz an hour before the start of Field Day at 1700 UTC on Saturday, June 27, renewing its tradition of talking to fellow club members in Indianapolis who couldn't make the trip. But anyone else is welcome to give them a signal report as well. (ARNewsline(tm), W8ISH)

** NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's" only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

FOR IMMEDIATE RELEASE
26 June 2009

>From: NCDXF

>Subject: W0YK, Ed Muns, appointed to NCDXF Advisory Board

The Northern California DX Foundation Board of Directors is pleased to announce the appointment of Ed Muns, W0YK, as an Advisor to the NCDXF Board of Directors. Ed's primary duty, along with Doug Bender, WW6D, will be working with the NCDXF website: http://www.ncdxf.org

Ed became interested in ham radio in high school, working 40 meter CW into Asia in the early morning hours before school. During college, his license expired and he rejoined DXing ten years later in the early part of his 32-year career at Hewlett-Packard. Ed's interest in DXing quickly morphed into contesting where a lot of DX participates. All of his ham radio time today is spent contesting, chasing DX and joining DXpeditions occasionally. Favoring CW, Ed can sometimes be found on SSB as well.

Thanks to his contest club's (NCCC) campaign to win the club competition gavel in the 2004 ARRL RTTY Round-Up, Ed got started in that mode. He holds the SOHP world record in the contest, operating with his P49X callsign, having broken the world record in 2006, 2007 and 2009. In CQ WPX RTTY, Ed also holds the SOHP world record, having broken it in 2007, 2008 and 2009. In 2008, he operated the CQWW RTTY contest, winning SOHP.

Ed was on the YK0A team in 1994 and has operated as 6Y0A and 6Y4A as well as holding the 7J1ACJ call sign. From Aruba, where he holds a permanent visitor license as P49X, he has operated nearly a dozen times, primarily CW and RTTY contests. He has operated from the HC8N mega-station in a M2

operation in the CQWW RTTY, winning the world. He recently joined the Radio Expeditions team, of VP6DX fame, on the management team with specific focus on funding.

Ed has taught the RTTY curriculum at Contest University at Dayton in 2008 and 2009 as well as at Contest Academy at Visalia in 2009. He is the contest manager and log checker for the NCJ NA RTTY Sprint and both CQ RTTY contests: CQWW and CQ WPX. He serves on the CQ Contest Advisory Board. For the NCCC, Ed manages the NCCC, CQP and NCCC Sprint web sites as well as the club's various email reflectors. He has published several articles in the NCJ.

We think Ed will have a lot of insight for what will be needed to keep the NCDXF website a dynamic and useful website for DXers.

The NCDXF Board of Directors wants to thank the many individuals who have contributed support to NCDXF. We realize that these financial times have put a strain on many of us, but think about the thrill of working a "new one" or band counter and its impact on your country totals - priceless, right? If you are currently not a member, please consider contributing to support future DXpeditions.

Since May 2008, NCDXF has provided financial help to the following DXpeditions:

4W6R Timor Lorosa'e
VK9XWW Christmas Island
VK9CJW Cocos-Keeling
OJ0B Market Reef
VK9DWX Willis Island
A5100A Bhutan
E44M Palestine (Bethlehem)
FW5RE Wallis & Fortuna
K5D Desecheo Island
VK9LA Lord Howe Island
S04R Western Sahara

Hopefully you worked one or more of these DXpeditions!

Contributions can now easily be made on-line using our SSL secured web server: https://www.ncdxf.org/donate

Glenn Johnson, W0GJ
Vice President, NCDXF

The ARRL Letter
Vol. 28, No. 25
June 26, 2009
***************

IN THIS EDITION:

* President Obama Makes His Mark on FCC with Four Nominees
* ARRL Seeks Court Action to Compel FCC to Comply with Ruling
* Governors Show Support for Amateur Radio as ARRL Field Day Approaches

* Tennessee Teen Ham Responds to Emergency, Performs CPR
* W1AW Announces 2009 Field Day Bulletin Schedule
* Ohio Section Manager Joe Phillips, K8QOE (SK)
* Solar Update
* IN BRIEF:
This Week on the Radio
ARRL Continuing Education Course Registration
ARRL Field Day in National Spotlight
ARRL to Close in Observance of Fourth of July
Second Edition of "VoIP: Internet Linking for Radio Amateurs"
Introduced

Due to storm-related power outages, there will be no ARRL Audio News for
Friday, June 26. We apologize for any inconvenience.

==> PRESIDENT OBAMA MAKES HIS MARK ON FCC WITH FOUR NOMINEES

Just barely five months into his first term as President of the United
States, Barack Obama has put his personal stamp on the Federal
Communications Commission: On June 25, the US Senate confirmed Julius
Genachowski as FCC Chairman and reconfirmed current FCC Commissioner
Robert McDowell for his first full term as Commissioner. Earlier the
same day, he nominated South Carolina Democrat Mignon Clyburn and
Republican Meredith Attwell Baker for the two vacant Commissioner seats.
If confirmed by the Senate, Clyburn and Baker would bring the FCC to its
```

full complement of five Commissioners.

At around 7:25 PM (EDT), Senate Majority Leader Harry Reid (D-NV) read out only the numbers of the nominations corresponding to their numbers on the day's calendar. Genachowski was calendar number 251, McDowell was 252. The process took only seconds and followers would have had to know their calendar number on the day's agenda to know they had been confirmed. Reid said that it was "too bad" that he could not give individual recognition to the nominees beyond simply reading their names, saying they were people who would "change lives." Click <http://www.c-spanarchives.org/library/vidLink.php?b=1245972129&e=1245972729&n=2> to watch a video clip f the confirmation.

According to Senate insiders, there were senators who reportedly had some remaining issues over answers the nominees had provided to written questions submitted after their confirmation hearing; a single senator can put a hold on a nominee and prevent a vote. Reid had been working since last week to get those holds lifted and the President's FCC nominees in place as quickly as possible, said a Reid spokesperson: "As with all of the President's nominees, it is important that we confirm [Genachowski's] nomination as soon as possible so that he has a full team to address the many issues confronting the nation."

President Obama nominated Genachowski to lead the Commission on March 3, 2009 <http://www.arrl.org/news/stories/2009/03/03/10684/?nc=1> and renominated McDowell on June 2 <http://www.arrl.org/news/stories/2009/06/03/10859/>. Both nominees received bipartisan support from the Senate's Commerce, Science and Transportation Committee before their names were moved to the full Senate for confirmation: Genachowski received a 24-1 vote from the committee, while McDowell received unanimous support. Genachowski is a Democratic nominee, while McDowell is a Republican. Only three Commissioners at a time may be members of the same political party.

Julius Genachowski

Genachowski, 46, is a technology executive and a former classmate of the President's from Harvard Law School. Genachowski will take the seat of Commissioner Jonathan Adelstein. Earlier this year, Adelstein was nominated by President Obama to be the Administrator for the United States Department of Agriculture's Rural Utilities Service <http://www.arrl.org/news/stories/2009/03/23/10716/?nc=1>.

Genachowski has been widely praised by industry executives and consumer-activist groups -- two groups often at odds -- for his wide-ranging experience and intimate knowledge of technology issues. "I can think of no one better than Julius Genachowski to serve as chairman of the Federal Communications Commission," said President Obama. "He will bring to the job diverse and unparalleled experience in communications and technology, with two decades of accomplishment in the private sector and public service. I know him as the son of immigrants who carries a deep appreciation for this country and the American dream;

and as the proud father of three children working with his wife Rachel to be responsible parents in this digital age."

Acting Chairman Copps congratulated Genachowski on his Senate confirmation: "I believe Julius brings just the right blend of talent, experience and dedication to lead the FCC toward the more active role it must play if all our citizens are to enjoy the blessings and bounties of 21st century communications. I look forward to welcoming both Julius and his family into our FCC family. And I look forward to working with Julius and all my colleagues at the Commission in tenacious pursuit of a communications policy that truly puts the public interest first."

After graduating from law school, Genachowski clerked for federal judge Abner Mikva; he also clerked for Supreme Court Justice David Souter. Genachowski later served as chief counsel to Reed Hundt, chairman of the FCC from 1993-1997. After leaving the FCC, Genachowski was a senior executive at IAC/InterActiveCorp, Barry Diller's e-commerce and media company. He went on to found an investment and advisory firm for digital media companies and co-founded the country's first commercial "green" bank. According to President Obama's campaign Web site, Genachowski raised at least $500,000 for Obama during the presidential election campaign.

Early in the Obama presidential campaign, Genachowski urged then-candidate Obama to capitalize on the organizing power of the Internet. The New York Times called Genachowski "a prolific fund-raiser and chairman of the campaign's group of technology-policy advisers, who produced a report advocating an open Internet, diversity in media ownership and a nationwide wireless system for emergency personnel." The Washington Post, which described Genachowski a "local venture capitalist," credited him with "spearheading Obama's online campaign strategy, which used social networking and other tools to spread Obama's campaign message and raise record campaign contributions."

Genachowski explained in his Obama campaign blog that he "was fortunate to chair the group that advised Senator Obama and the [Presidential] campaign on the tech & innovation plan, a large and hardworking group that generated terrific ideas, rooted in the great work that the Senator and his strong Senate staff have been doing in this area for quite some time."

The new FCC Chairman holds a BA in History from Columbia and a JD from Harvard. While in law school, he served as notes editor of "Harvard Law Review." Genachowski is married to lawyer and filmmaker Rachel Goslins. The couple has two children and Genachowski has a son from his first marriage.

Robert McDowell

McDowell, a Republican, was first nominated by President George W. Bush and sworn into office in June 2006, filling the unexpired term of Republican Kathleen Q. Abernathy.

According to the White House, McDowell has collaborated with his fellow Commissioners to develop and establish American communications policy covering the wireless, media and Internet industries, as well as international policy matters. He has worked to create rules governing wireless auctions, establish a framework for unlicensed use of TV "white spaces" spectrum, develop incentives to encourage the development of new broadband technologies, review public interest benefits as part of the approval process of proposed corporate mergers and adjudicate enforcement proceedings.

McDowell brings to the FCC 16 years of private sector experience in the communications industry. Immediately prior to joining the Commission, McDowell was a senior executive for a trade association representing competitive facilities-based telecommunications service providers. He has served on the North American Numbering Council (NANC) and on the Board of Directors of North American Numbering Plan Billing and Collection (NBANC).

McDowell was graduated cum laude from Duke University in 1985. After serving as chief legislative aide to a member of the Virginia House of Delegates, he attended the Marshall-Wythe School of Law at the College of William and Mary. Upon his graduation from law school, McDowell joined the Washington, DC office of Arter & Hadden, a national law firm, now closed, that was based in Cleveland. McDowell is admitted to practice law before the courts of the Commonwealth of Virginia, the US District Court for the Eastern District of Virginia and the US Courts of Appeals for the District of Columbia, First, Fourth and Fifth Circuits, as well as the US Supreme Court. He lives in Fairfax County, Virginia on his family's farm with his wife Jennifer and their three children.

Mignon Clyburn

Clyburn, the daughter of House Majority Whip Representative James Clyburn (D-SC), has served on the Public Service Commission of South Carolina since 1998 <http://www.psc.sc.gov/>. The Public Service Commission regulates South Carolina's investor owned public utilities, including providers of telecommunications services. Before her election to that body, she spent 14 years as the publisher and general manager of "The Coastal Times," a weekly newspaper in Charleston, South Carolina.

In 1998, Clyburn was elected by the South Carolina General Assembly as a Commissioner to represent the Sixth Congressional District; she has been re-elected three times, chairing the Commission from 2002-2004. She is a past chair of the Southeastern Association of Regulatory Utility Commissioners, and is presently the chair of the Washington Action Committee of the National Association of Regulatory Utility Commissioners (NARUC). Clyburn also serves on NARUC's Audit Committee and Utilities Market Access Partnership Board.

Clyburn graduated from the University of South Carolina with a Bachelor of Science degree in Banking, Finance & Economics in 1984.

Meredith Attwell Baker

Baker, the daughter-in-law of former Secretary of State James Baker, formerly served as the Acting Assistant Secretary for Communications and Information and the Acting Administrator of the National Telecommunications and Information Administration (NTIA) <http://www.ntia.doc.gov/> from 2007 to January 2009. Named as Deputy Assistant Secretary in February 2007, Baker first joined NTIA as a Senior Advisor in January 2004, and also served as Acting Associate Administrator for the Office of International Affairs and on detail to the White House, Office of Science and Technology Policy. Baker was replaced by Larry Strickling, who received the Senate's nod to head the NTIA on Thursday, June 25.

"We have serious concerns <http://www.arrl.org/news/files/ItSeemsToUs0408.pdf> regarding the nomination of Meredith Attwell Baker as an FCC Commissioner," said ARRL Chief Executive Officer David Sumner, K1ZZ. "While Ms. Baker was Acting Administrator of the National Telecommunications and Information Administration (NTIA), the NTIA released a deeply flawed report <http://www.arrl.org/news/stories/2008/02/01/101/?nc=1> entitled 'Networked Nation: Broadband in America 2007' <http://www.ntia.doc.gov/reports/2008/NetworkedNationBroadbandinAmerica2007.pdf>. The report seriously and inexcusably overstated the extent of deployment of Broadband over Power Lines (BPL) as a means of delivering broadband services to consumers. Documented FCC figures showed there to be about 5000 BPL customers nationwide, yet the NTIA dismissed this number out of hand and went on a fishing expedition for higher figures that it could quote in the range of 200,000 to 400,000 -- utterly specious numbers without a shred of factual foundation."

Sumner continued: "The ARRL proved that these figures were taken out of thin air <http://www.arrl.org/news/stories/2008/02/06/100/> and twice called upon Acting Administrator Baker to issue a correction. Not only has the NTIA failed to do so to this day, our well documented complaints were not even acknowledged. If her FCC nomination is to go forward, we believe that Ms. Baker first must acknowledge and correct this egregious error that occurred while she was in charge at NTIA."

Baker spearheaded the coupon program for digital-to-analog converter boxes to help facilitate the transition to digital television. She has served on delegations representing the United States at major international telecommunications conferences and engaged in bilateral discussions with senior level officials from countries around the world.

Before joining NTIA, Baker was Vice President at the firm of Williams Mullen Strategies where she focused on telecommunications, intellectual property and international trade issues. From 2000-2002, she held the position as Senior Counsel to Covad Communications. Before that, she was Director of Congressional Affairs at the Cellular Telecommunications Industry Association (CTIA) from 1998-2000. In the 1990s, Baker worked at the US Court of Appeals Fifth Circuit in Houston and later at the law firm of DeLange and Hudspeth. From 1990-1992, she worked in the Legislative Affairs Office of the US Department of State in Washington,

DC.

Baker earned a BA from Washington & Lee University in 1990 and a law degree from the University of Houston in 1994. A member of the Texas State Bar, she resides in McLean, Virginia with her family.

The President of the Senate will send notice of Genachowski's and McDowell's confirmations to the White House. It is up to the White House to decide on a date for their swearing-in. At press time, no word has been received as to when Baker and Clyburn will face their confirmation hearings.

==> ARRL SEEKS COURT ACTION TO COMPEL FCC TO COMPLY WITH RULING

On June 24, 2009, the ARRL filed a petition with the United States Court of Appeals for the District of Columbia Circuit asking the Court to order the Federal Communications Commission to comply with the Court's 2008 decision that remanded the FCC's ruling on Access BPL for further action <http://www.arrl.org/news/stories/2008/04/25/10064/ >.

In its Petition for a Writ of Mandamus, the ARRL asks that the Court "order the Commission to comply with the terms of the Court's mandate by (1) soliciting comment on the unredacted studies placed in the rulemaking record, and (2) providing a reasoned explanation of its choice of an extrapolation factor for Access BPL (or issue a further notice of proposed rulemaking proposing a different extrapolation factor), within sixty days" <http://www.arrl.org/news/files/BPLCourtMandamusPetition06242009.pdf >.

"What's at issue is the fact that after over a year the FCC has not complied with the Court's order," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The FCC needs to ask the public to comment on the scientific studies conducted by the FCC and on which they relied in their BPL decision. It also must either offer a reasoned explanation, based on the scientific studies already in the FCC's record, for its determination of the rate at which radiation from medium voltage power lines carrying BPL decays with distance from the power line, or issue a new Notice of Proposed Rule Making and seek comment on an appropriate standard."

The Court of Appeals issued its decision April 25, 2008 and its mandate on June 13, 2008. ARRL's petition asserts: "By March 31, 2009, the Commission had taken no action with respect to the disclosure of the unredacted scientific studies and had not therefore solicited public comment on the unredacted studies. Petitioner, therefore, filed a Freedom of Information Act request with the Commission seeking the unredacted versions of the studies that the Court ordered be included in the rulemaking record, and about which an opportunity for comment was to be provided by the Agency."

ARRL Chief Executive Officer David Sumner, K1ZZ, said that "We have been waiting patiently for the FCC to fulfill its obligations under the Court of Appeals decision, but after more than a year, it's clearly past time

for the Commission to act. Thanks to the release of the unredacted staff studies in response to the ARRL's most recent FOIA request -- a request that should not have been necessary for us to make -- we finally know what the FCC withheld from public view back in 2004 <http://www.arrl.org/news/stories/2009/05/08/10811/?nc=1 > and what they now must deal with in order to resolve the regulatory uncertainty that continues to hang over BPL. We are hopeful that under its new leadership, the FCC will get back on track and will revise its rules governing BPL interference to be consistent with the technical record and sound science."

On May 1 of this year, the Commission released the unredacted studies without comment or notice. As the ARRL's petition continues, "To date, no public notice of that action has been given and no further action has been taken by the Commission with respect to the provision of an opportunity for the public to comment on the unredacted studies."

Henderson explained that "the release of the unredacted studies is only a partial fulfillment of the Circuit Court's decision. The ARRL's position is that further delay is not warranted by any reasonable, factual standard. There is precedent in law that 'a reasonable time for agency action is typically counted in weeks or months, not years.' It is 14 months since the Court's decision, and still the FCC has no timeline to meet its mandated obligations."

The ARRL is asking that the Court order the Commission to comply with the Court's order within 60 days. The petition states: "Given the simplicity of the Commission's compliance with the two components of the Court's Mandate on remand and the amount of time that the Commission has already taken following the issuance of the Mandate, the Court need not be concerned with the question of how much more time is needed for the Commission to complete its tasks. Sixty days is more than enough to solicit public comment on the unredacted studies and to justify, if it can, the extrapolation factor, or to reopen the rulemaking proceeding in order to determine a different, appropriate extrapolation factor."

==> GOVERNORS SHOW SUPPORT FOR AMATEUR RADIO AS ARRL FIELD DAY APPROACHES

Governors across the United States have shown their support for Amateur Radio, with many proclaiming Amateur Radio Week in their states. Coinciding with ARRL Field Day <http://www.arrl.org/fieldday>, these proclamations show citizens that these states value the contributions made by radio amateurs.

ARRL Media and Public Relations Manager Allen Pitts, W1AGP, said that ARRL Public Information Officers around the country were encouraged to begin work on obtaining proclamations many weeks ago: "Hundreds of local proclamations by city and county leaders -- as well as 25 state proclamations -- have been made, with more expected. Proclamations from the governors of Arizona, Arkansas, Colorado, Connecticut, Florida, Illinois, Indiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska,

New Hampshire, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Washington and Wyoming as well as Delaware's State Senate, are not just recognitions of the past, but keys for future political actions such as PRB-1 <http://www.arrl.org/FandES/field/regulations/local/prb-1_program.html> and legislative issues."

These state proclamations range from Ohio declaring June 27 as Amateur Radio Day, to Florida, Delaware, Illinois, New Hampshire and Pennsylvania pronouncing June as Amateur Radio Month in those states, while other states have designated Amateur Radio Week in their states.

ARRL Field Day is many things to many people -- a competition to a picnic to an emergency drill and more. But according to Pitts, it is also a public relations event and groups can score more than 500 points for working the public relations angle before the weekend even begins.

"Your fellow hams and club members probably already know about Field Day," Pitts said, "but what about your local newspapers and radio and television stations? Local media outlets are always looking for fun and interesting things going on in their community." Having a media hit or link is good for 100 points.

Instead of manning only the radios, how about manning a public information table with brochures, signs and a smile? That's another 100 points. "The ARRL offers publicity materials <http://www.arrl.org/brochures/> at no charge except a small shipping fee," Pitts explained. "It's too late to receive ARRL brochures and handouts if you have not already requested them, but go ahead and order them -- you or your club will never know when the opportunity to tell the world about Amateur Radio will pop up next."

If an elected official visits your Field Day site, you can earn 100 points. "This is easier than many folks might expect. All you have to do is ask!" Pitts said.

If your state is one of the 23 states without a PRB-1 statute on the books, Pitts suggests inviting your elected officials to your Field Day site to see what Amateur Radio is all about. "Chances are, these folks will see the importance of what we do, giving you an inroad into discussing how they can help you get antennas in your community or even across the state. It's amazing to think that a simple invitation could lead to so much, but it's happened before -- why not make your Field Day the next success story."

Visit the ARRL Web site to view the proclamations <http://www.arrl.org/news/stories/2009/06/24/10905/?nc=1>. For a list of the many ways you or your club can earn bonus points this Field Day, please be sure to check out the ARRL Field Day packet <http://www.arrl.org/contests/forms/fd-2009-packet.pdf>.

==> TENNESSEE TEEN HAM RESPONDS TO EMERGENCY, PERFORMS CPR

It was just another day, helping out at another event. It was the third year in a row that 16 year old Cody Anderson, KI4FUV, of Harriman, Tennessee, had volunteered to help out the Roane County Amateur Radio Club (RARC) with the Run for the Child event. But it was the first time that he would help save a life.

May 30 dawned with fog in the sky. Not too hot, but the temperature would reach the mid-80s before the Sun went down. All in all, a good day for a race. Anderson made his way to the race site at the Roane State Community College, set up his equipment at Checkpoint #2 and waited for the runners to pass by. "This year started off just like the past two years," he told his local newspaper, the Roane County News. Twenty minutes later, that all changed.

Twenty minutes later as the runners started their second pass around the marked course, Anderson saw one of the runners fall down. Unlike other runners who fall down on a course, this man did not get up. After waiting about 20 seconds, Anderson left Checkpoint #2 and quickly made his way over to the downed racer. As he did so, he used his handheld transceiver to notify his fellow club members who were at the event, "Runner down."

Sheriff's deputies were also placed along the race route. One who was near Anderson and Checkpoint #2 saw what was going on and came to assist. As Anderson raced on foot, the deputy jumped in his patrol car and drove to the fallen runner. Both reached the fallen runner in about 20 seconds.

RARC Vice President Cliff Segar, KD4GT, said that they all heard Anderson racing toward the runner, "but we just assumed someone just simply tripped and fell." But after hearing Anderson say "Roll EMS" over the radio, he knew it was much more serious.

Another runner -- "I never got his name," Anderson said -- passed the area where the teen and the sheriff's deputy were kneeling next to the runner lying on the ground. The man stopped to help, checking out the man on the ground, who was still breathing. Anderson got back on the radio and told Bill Farnham, KI4FZT, at the command center that the first responders who were on site needed to get to where he was -- immediately. "The man who stopped, I just kind of let him take over," Anderson told the ARRL. "He seemed like he had a bit of medical training, and he started taking vital signs. I was talking to Bill on my radio, letting him know what was going on."

Then the fallen runner stopped breathing.

In February, Anderson took a CPR class that another RARC club member -- Phil Newman, KE4LSH -- had organized. It was the skills he learned at that class that came into play on May 30. He started giving the man mouth-to-mouth resuscitation; the other runner started chest compressions. "We did about three sets of CPR before the Roane County Rescue guys got to us, just a second or two later" Anderson told the ARRL.

"I'm just glad I was able to take the CPR training, else I don't know what I would have done or how I would have reacted," Anderson told the County Times. Anderson efforts, along with those of the unknown runner, kept the man alive long enough for EMS to arrive and use an electronic defibrillator to restart his heart. He was eventually transported to the University of Tennessee Medical Center via Lifestar helicopter. "Last I heard," Anderson said, "was that he was doing okay."

Anderson will begin his senior year at Rockwood High School this fall. When he was 11, he sat for his Technician exam and passed; he is now a General. He likes to help out with the Boy Scouts and give back to the community through his SKYWARN and ARES(r) activities: "I volunteer five weeks every summer to help out at Camp Buck Toms, a Boy Scout camp located in Rockwood, Tennessee. Along with a few other volunteers from the local area, I teach the radio and electronics merit badge courses. Through the Amateur Radio Emergency Service, I've personally helped out with several severe weather outbreaks, the TVA Kingston ash spill in December 2008 and the Kingston Smokin' the Water 4th of July festival a few times."

He is modest about the events of May 30. "I took my first training class for CPR and AED in February 2009, thinking I would never have to use it," he told the ARRL. "On May 30, 2009 -- I used it. I would highly recommend that everyone takes some type of medical training."

Segar calls Anderson a hero. "You never know when training will possibly be the difference between life and death," he said. -- Some information from the Roane County News

==> W1AW ANNOUNCES 2009 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 27-28 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast) according to the schedule below. You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites.

W1AW will operate on the regularly published frequencies. The special PSK31 bulletin will be transmitted on the regular W1AW teleprinter frequencies. CW frequencies: 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz. Teleprinter frequencies (includes PSK31): 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz. Phone frequencies: 1.855, 3.990, 7.290, 14.290, 18.160, 21.390, 28.590 and 147.555 MHz.

Friday
CW: 5 PM PDT, 6 PM MDT, 7 PM CDT, 8 PM EDT
Teleprinter: 6 PM PDT, 7 PM MDT, 8 PM CDT, 9 PM EDT
Phone: 6:45 PM PDT, 7:45 PM MDT, 8:45 PM CDT, 9:45 PM EDT
CW: 8 PM PDT, 9 PM MDT, 10 PM CDT, 11 PM EDT

Saturday
CW: 7 AM PDT, 8 AM MDT, 9 AM CDT, 10 AM EDT
Phone: 8 AM PDT, 9 AM MDT, 10 AM CDT, 11 AM EDT
CW: 5 PM PDT, 6 PM MDT, 7 PM CDT, 8 PM EDT
Teleprinter: 6 PM PDT, 7 PM MDT, 8 PM CDT, 9 PM EDT
Phone: 6:45 PM PDT, 7:45 PM MDT, 8:45 PM CDT, 9:45 PM EDT

Sunday
CW: 7 AM PDT, 8 AM MDT, 9 AM CDT, 10 AM EDT
Phone: 8 AM PDT, 9 AM MDT, 10 AM CDT, 11 AM EDT
PSK31: 9 AM PDT, 10 AM MDT, 11 AM CDT, 12 PM EDT

The Maritime Radio Historical Society's K6KPH
<http://www.radiomarine.org/> will transmit the 2008 W1AW Field Day message for the benefit of West Coast stations on 3.5815, 7.0475, 14.0475, 18.0975 and 21.0675 MHz, CW only. The frequencies for K6KPH Teleprinter (RTTY and FEC AMTOR) will be 7.095 and 14.095 MHz. The K6KPH schedule is accurate as of June 17, 2009.

Saturday
CW: 7:30 AM PDT, 8:30 AM MDT, 9:30 AM CDT, 10:30 AM EDT
CW: 5:30 PM PDT, 6:30 PM MDT, 7:30 PM CDT, 8:30 PM EDT
Teleprinter: 6:30 PM PDT, 7:30 PM MDT, 8:30 PM CDT, 9:30 PM EDT

Sunday

More information on ARRL Field Day is available on the ARRL Field Day Web site <http://www.arrl.org/fieldday>.

==> OHIO SECTION MANAGER JOE PHILLIPS, K8QOE (SK)

Joe Phillips, K8QOE, who served as ARRL Ohio Section Manager since 1998, passed away suddenly at his home on June 20. He was 68. Licensed in 1959 as KN9SYL, Phillips first joined the ARRL Field Organization as an Official Emergency Station (OES) in 1986. He became a Public Information Officer in 1989 and has served as an Official Observer (OO) since 1997. He was elected Ohio Section Manager in 1998.

A graduate of Youngstown University, Phillips had a career as a journalist and a teacher. He edited six separate ham radio newsletters in Cincinnati before becoming Newsletter Editor for the Ohio Area Repeater Council in 1984, a position he held for five years. In 1986, Phillips organized the first Ohio Repeater Directory and in 1992, organized the Ohio Section Ham Radio Newsletter Contest. He authored a weekly ham radio newspaper column in the Sunday edition of the Cincinnati Enquirer called "Ham Call" and hosted a similarly named program for cable television in the Cincinnati area.

In 1994, Phillips was elected to the Greater Cincinnati Amateur Radio Hall of Fame, and in 1995, he was the recipient of the ARRL's McGan Silver Antenna Award. This award is given annually to a League member who demonstrates outstanding public relations success on behalf Amateur

Radio at the local, state or national level. Phillips was excited about having his photo on the cover of the May 2009 issue of QST featuring the annual Dayton Hamvention.

"Throughout a 40-year friendship, Joe and I worked closely together on many occasions," said ARRL Great Lakes Division Director Jim Weaver, K8JE. "From his early days of supporting the county ARES/RACES unit and the Ohio Repeater Council, Joe has always provided energetic and effective leadership with a friendly, personal touch. The magnetism of his style of leadership drew the best from others who soon became solid friends, not mere associates."

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, remembered Phillips fondly: "If you have been to Dayton you have met and laughed with Joe. He was the master of the Wouff Hong ceremony. His red jacket is the stuff of legend in Ohio. Joe was more than a Section Manager -- he really gave all of himself to ARRL for 20-plus years. With him dies the last paper newsletter sent to section membership. When I answered his phone calls, he announced his call with 'Here's your Ohio Nightmare.' He loved baseball, maybe more than I did. He was a good man, and he is really going to be missed."

==>SOLAR UPDATE

Tad "Child of delight, with sunbright hair" Cook, K7RA, this week reports: Two new sunspots appeared last week, numbered 1022 and 1023, and both were Solar Cycle 24 spots, with 1022 lasting through June 23 and 1023 until June 24. On June 24, geomagnetic indices were unsettled. Sunspot numbers for June 18-24 were 0, 0, 0, 12, 24, 12 and 14 with a mean of 8.9. The 10.7 cm flux was 68, 67, 67, 67, 68, 68 and 67 with a mean of 67.4. The estimated planetary A indices were 4, 4, 6, 7, 3, 4 and 19 with a mean of 6.7. The estimated mid-latitude A indices were 2, 1, 5, 6, 2, 5 and 16 with a mean of 5.3. This weekend is ARRL Field Day, and conditions should be stable; Planetary A index is predicted to be around five, which is quiet.. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Emily Bronte <http://en.wikisource.org/wiki/Child_of_delight,_with_sun-bright_hair>.

==>IN BRIEF:

* This Week on the Radio: This week, ARRL Field Day is on June 27-28 -- look for a Field Day site near you <http://www.arrl.org/contests/announcements/fd/locator.php>. The NCCC Sprint and the Digital Pentathlon are on June 26. On June 27-28, check out the His Majesty King of Spain Contest (SSB), the Ukrainian DX DIGI Contest, the Marconi Memorial HF Contest and the ARCI Milliwatt Field

Day. The SARL Digital Contest is June 28 and the RAC Canada Day Contest is July 1. Next week is the Digital Pentathlon on July 3. Check out the Venezuelan Independence Day Contest, the WLOTA Contest, the DL-DX RTTY Contest, the Original QRP Contest, the PODXS 070 Club 40 Meter Firecracker Sprint (local time) Michigan QRP July 4th CW Sprint on July 4-5. The ARS Spartan Sprint is July 7. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, June 28, 2009, for these online course sessions beginning on Friday, July 10, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL Field Day in the National Spotlight: Each year, the ARRL's Media and Public Relations Department makes materials available to Public Affairs Officers (PIOs) for use in promoting Field Day events. Most of these are in forms that local groups can easily modify to include their own information, but there is also a national press release that is sent out direct from ARRL HQ over the news wire <http://www.arrl.org/pio/press_releases/2009/0622.html>. ARRL Media and Public Relations Manager Allen Pitts, W1AGP, said many hams have seen the press release -- either portions of it or in its entirety -- with the headline Field Day -- Over 35,000 radio 'hams' active June 27-28. "This press release has already been printed in hundreds of newspapers and on Web sites, with more to come over Field Day weekend," Pitts explained. "Wire news services, like other merchants, also run 'special deals.' This year, we were also able to have our Field Day logo and caption displayed in the news cycle on the PR Newswire-Reuters news billboards in Times Square in New York City and in Las Vegas June 15-17. For more information on ARRL Field Day -- June 27-28 -- please visit the

ARRL Field Day Web site <http://www.arrl.org/fieldday>.

* ARRL to Close in Observance of Fourth of July: ARRL Headquarters will be closed in observance of Independence Day on Friday, July 3. There will be no ARRL Audio News, W1AW bulletin or code practice transmissions that day. The ARRL Letter will be posted a day early on Thursday, July 2. League Headquarters will reopen Monday, July 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

* "ARRL Introduces Second Edition of "VoIP: Internet Linking for Radio Amateurs": Through a technique called Internet linking, ham radio operators are harnessing the immediacy and portability of radio communication to the global reach of the Internet. Today's radio amateurs are using the Internet as the relay between their radio base stations, handhelds and mobile transceivers for long-distance communication, spanning thousands of miles. The ARRL has released a second edition of "VoIP: Internet Linking for Radio Amateurs", the complete guide to several of the most widely used Voice over Internet Protocol (VoIP) systems used by today's radio amateurs, with particular attention to EchoLink and the Internet Radio Linking Project (IRLP). The book is designed for beginners as well as those hams who are long-time VoIP users. If you're new to VoIP, you'll discover information on how to get started, set up and use these systems. The more advanced ham will find plenty of technical "meat" to dig deeper into VoIP applications and discover how they actually work. Written by EchoLink creator Jonathan Taylor, K1RFD, "VoIP: Internet Linking for Radio Amateurs" is available for $21.95 from the ARRL Web site. Order your copy today <http://www.arrl.org/catalog/?item=1431>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

It is good to read about a teenager performing CPR. Dang the politics.
Just great to hear about people who act in a manner that makes you proud to
be of our genus and species.

The units were made with the intention of being VHF and UHF Land-mobile radios. Methinks it would not be illegal to actually use one on the ham bands if it were clean enough.

The whole situation is a bad precedence though, because what if I have a modified commercial radio that I want to sell to anybody that I could trust to ether use it properly on the ham bands or repair it and put it back into commercial service. I would hope that a complaint arose out of bad advertising or some other glaring error, rather than due to a roundup of swap meet boatanchor junkies.

Those particular radios are truly junk though, and never should have found their way into the country to be dumped on unsuspecting people. I recall an incident where a bad shipment of radios came to my bench and I rejected them, but was labeled "a problem" because I should have passed them along to the customer. That would have resulted in a situation that could only be resolved by my firing.

Let the buyer beware.

Here is the FCCs take on the issue:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-08-513A1.pdf

The units were advertised in a web catalog for sale as new radios for use
from 137-174 MHz and 400-470 MHz. _ OOPS!!

June 29, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KF2TI, N3SL, NG3K, N4AA & QRZ DX, K5WW, K8YSE, N8OFS, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA4ATI/9M2TI, F5NQL & UFT, G1VDP, G3SWH, G3VOF, HB9PL, I1JQJ/IK1ADH & 425 DX News, JI5RPT, JR3TVH, LX2A, LZ1ZF, National Institute of Amateur Radio, PG5M, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SP5UAF, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK3FGRC, VK4FW and ZL1CT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-June, through Sunday, 28th-June there were 203 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (IOTA Op). Remember to look for Akira, JA1NLX, to once again be active as 3D2YA from Mana Island (OC-121) in Mamanuca Group, between June 29th and July 3rd. Activity will be on 80/40/30/20/17/15/12/10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct (w/SASE). Log will be uploaded to LoTW.

3D2/C, CONWAY REEF. Hans, DK9KX (ex-3D2CR), reports that it has been 20 years since the first activation of Conway Reef (3D2CR), but he is happy to announce another DXpedition to that remote and lonely island will take place between October 3-11th. There will be 7 operators, and they will be on 160-6 meters using CW, SSB and RTTY. Sorry, "NO" EME or digital modes on 6m. No callsign was announced, but more info is forthcoming on a Web site.

6W, SENEGAL. Dervin, PD9DX, will be active as 6W/PD9DX between now and July 5th. Activity will be on the HF bands using only SSB. QSL via PD9DX direct only (Europe SAE with 1 USD; Outside Europe SAE with 2 USDs).

8Q, MALDIVES. Pierre, HB9QQ, is now active as 8Q7QQ from Velighoo (North Atoll) between June 30th and July 11th. Carrying a small 50 MHz Linear along, he will be active on 50.183 MHz in JT65A mode (first period) around moonrise and moonset in search of Sporadic E and EME contacts. Other activities include the WARC bands. QSL via his home callsign.

C2, NAURU. It would seem that the C21TI DXpedition by Dani, EA4ATI/9M2TI, and other operators which was to take place between June 16-26th, was postponed. A report indicates that Dani, EA4ATI, had to postpone his C21TI DXpedition due to job reasons. "He is in Pakistan supporting in the humanitarian response to the internally displaced persons." Dani informed your OPDX editor that he hia already booked/rescheduled his flight for Nauru. The dates for the DXpedition are for August 16-24th, and they should be on the air from August 17-23rd. Look for possible updates on the Web page at: http://c21ti.madrono.net/index.html

EI, IRELAND. Olivier, ON4EI, will once again be active as EI/ON4EI from Ireland (EU-EU-115, WLOTA 2484) near Clonmel (IO62EK) between July 8-30th. His activity will include the IARU HF World Championship as Single-Operator/SSB/Low-Power/All Band (July 11-12th) entry and also the RSGB IOTA Contest (July 26-27th). Watch around 7130 kHz +/- QRM. He also plans to be active on 6 meters; watch around 50.200 MHz. His equipment for this activity will include a vertical 18m monopole inverted V and beverages for 160/80/40m, and a Spiderbeam for 20/15/10m. Transceiver is a Elecraft K3 w/100W. QSL via his home callsign.

FS, ST. MARTIN. Sam, WA2EPI, will be active as WA2EPI/FS between Sunday, June 28th and July 5th. No bands or modes of activity were provided, but he will be using a dipole and 100 watts and is expected to be on mostly during the evenings. QSL via K2LAB, by the Bureau or direct. Friends of Sam can request skeds by E-mailing him directly.

IOTA NEWS.....
AF-018. Andrea, IZ2LSC, will be active as IH9/IZ2LSC from Pantelleria Island between July 20-31st. His activity will be holiday style using a Yaesu FT-857 (w/100W) and wire antennas. He will be on the HF bands (except 160 and 80) using SSB and the Digital modes. Andrea will also take part in the RSGB IOTA Contest (July 25-26th) as a Single-Op entry. QSL only via the LoTW or his home callsign by the Bureau. For more info, log search and updates, visit:

http://timpyblog.blogspot.com/2009/06/pantelleria-island.html

AS-037. Ken, JS3OMH, will be active as JS3OMH/6 from Kagoshima on
Kamikoshiki Island (Koshikijima-Islands) between June 27-28th.
Activity will be on 80-6 meters using CW and SSB. QSL via the
Bureau or see QRZ.com.

EU-094. Eight French operators will be activating Saint Nicolas Island
in the Glenan Islands group, France, between September 11-18th.
No callsign was provided but possibly homecall/p. Activity
will be on the HF bands, and 2 meters and up (10 GHz) using
CW, SSB, Digiatal modes and ATV. Look for 6 meter activity on
SSB and possibly CW over 50.200 MHz. Operators mentioned are:
Benoit/F8PDR, Jean-Jacques/F5NKX, Rene/F6CMC, Alain/F6ENO,
Denis/F5RJM, Alain/F5HVI and Rolf/F9ZG. Other reference numbers
are: French Metropolitan Islands Award DIFM: AT-010, Department
Finistere/29, Province Britanny and Grid Square IN77XR. QSL
via F5RJM, direct by CBA (w/SAE and 1 IRC or 1 USD for Europe;
1 IRC or 2 USDs elsewhere) or by the French Ref-Union Bureau.

EU-124. Members of the Strumblehead DX and Contest Group have now
sealed the final permission to activate Ramsey Island, off
the West Wales coast, from the "Royal Society for the Protection
of Birds" who own the island. They will be active from 1800z,
July 24th through 1400z, July 27th. Activity will include an
entry in the RSGB IOTA Contest (July 25-26th). They will be
active using the club callsign MC0SHL for the whole duration
of the operation and using MW9W in the contest. Their activity
will be on all bands from 80-10 meters using SSB. There is
also be some 30m RTTY planned by G1VDP if the other guys allow
him, with participation in the last 80M Club Championships
DATA section. The group will be operational using generators
as power and radios which will consist of 2 K3's and a Yaesu
FT1000MPMkV and amplifiers. Antennas will consist of a Hexbeam,
a windom and dipoles. Most of the activation is for the WAB
award scheme as the square is semi rare and has not been
activated for some time. Also, look for the team to be on from
a farm for a few days before and after their EU-124 operation
using the callsign GB0WFF for the World Flora and Fauna Award
(see http://www.wff44.com for award details), and using the
MC0SHL club callsign while erecting a tower for Rob, MW0RLJ.
The island will not only count for the WAB award but will also
count for the WFF award. A special QSL card printed for both
club callsigns, as well as full details about the groups, are
on the Web site at: http://www.mc0shl.com
QSL via the group's QSL Manager M0URX.

J79, DOMINICA (Update). Operators Babs/DL7AFS and Lot/DJ7ZG are expected
to be active as J79ZG between September 27th and October 15th. Activity
will be on 80-6 meters on the usual DX frequencies, mainly on CW, SSB,
RTTY and PSK, as well as 6 meters. They will look especially for JA

stations. QSL via DL7AFS. Their Web page for this operation is:
http://www.qsl.net/dl7afs/Index_J7.html

JD/O, OGASAWARA. Operators Makoto/JI5RPT (JD1BLY) and Yoshihi/JO1LVZ
(JD1BNF) will be active from Chichijima Island (IOTA AS-031) between
August 9-14th. Activity will be on 160-6 meters using the satellites,
CW, SSB, Digi modes and 2m WSJT EME. QSL via their home callsigns. Log
searches will be available on the following Web sites:
JD1BLY: http://www.ji5rpt.com/jd1/
JD1BNF: http://www.hattsan.com/

LX0, LUXEMBOURG. Look for LX0HQ to be active again from the Headquaters
of the Luxembourg Amateur Radio Society (RL) during the IARU Contest
(July 14-15th). They will have nine stations (w/20 operators) active
from 2 different locations in Luxembourg: Eschdorf (QTH of LX7I) and
Esebuer(QTH of LX0RL). Photos of the LX0HQ stations will be available
after the contest on their Web sites: http://www.rlx.lu
http://www.lx2a.com
A live webcam will be available during the contest from the LX7I QTH
(on www.lx2a.com). Please try to work LX0HQ on as many bands and modes
as possible during the 2009 IARU World HF Championship 2009. The log
will be uploaded to LoTW, and you can request a bureau QSL via lx0hqgrlx.lu
(no need to send a card via bureau!) QSL via LX2A (New QSL Manager!).

LX, LUXEMBOURG. Operators Jan/PA0JED, Herman/PA0TEN, Harry/PA1H, Arend/
PA2AWU, Peter/PA2PKZ, Dick/PA4VHF, Frans/PA5CA, PA5R/Jelmar, Hans/PE2HG
and Dervin/PD9DX will be active as LX/PA6Z from Wiltz between October
4-10th. Activity will be on 160-10 meters including 30/17/12 meters,
possibly 6m, using CW, SSB and PSK31. QSL via PA9M, by the bureau or
direct. For more info, visit the Web site at: http://www.pa6z.nl/lx_2009

LZ01, BULGARIA (WFF Op). Operators Zlatan/LZ4ZD and Gosho/LZ1ZF are
expected to organize a WFF expedition to the Natural Park "Shumensko
Plateau" <http://www.shumenskoplato.com/indexen.html> during the late
evening of June 26th, through the afternoon of June 28th, using the
callsign LZ01WFF. Activity was planned for all the HF bands, 80-10 meters
including the 30/17/12m bands, probably on 6 and 2 meters depending on
conditions. Equipment: FT897D, ACOM1000, GP and wire antennas. Grid Loc:
KN33LG.

NIAR PRESS RELEASE (YL Enters the Limca Book Of Records-2009). The NIAR
reports (edited): "Ms. Sadineni Yamini, VU2YAM, aged 22 years member of
National Institute of Amateur Radio (NIAR), Hyderabad, became the 'first
Indian' to participate in an International Dxpedition conducted in an
uninhabited Cocos Island of Costa Rica, Central America, during February
9-13th, 2008.
'Limca Book of Records' is the Indian equivalent to the Guinness Book
of World Records with emphasis on unique achievements of Indians within
the country and abroad. It's a salute to all those Indians who want to
do something different and be remembered for their distinctive deeds.
Yamini, excelled in her achievements for using voice as well as digital
modes of amateur radio communication technology that enables sending e-mail

without internet from a remote location. Sponsored by NIAR and Austrian Amateur Radio Society, she was also among the youngest and the only woman of the 12 member team consisting of hams from USA, Europe and Asia.
Several national and international organizations have recognized and acknowledged specific achievements made by Sadineni Yamini earlier. This exceptional achievement now finds place in National Record 2009 of the prestigious Limca Book of Records as per the communication received from the Editor, Limca Book of Records.
Yamini took special interest in the field of amateur radio joining as student member at NIAR and continued to pursue this activity with outmost dedication. She continues to motivate youth to become partners in technology development by exhibiting her skills and undertaking challenging expeditions under extremely difficult circumstances in the field of amateur radio, which will remain as an inspiration to younger generation.
Many national and international print and electronic media already covered her achievement.
Recently, in the first week of June, she participated and excelled her performance in the 'Aila' cyclone relief operations from a remote place in West Bengal state in India."

OY, FAROE ISLANDS (Update). Polish operators Mek/SP7VC and Janusz/SP6IXF will be active as OY/homecall between August 10-16th. Activity will be on 160-6 meters SSB and 2m meteor scatter (Random 144355.0 MHz) FSK441 during the Perseid meteor shower. Operations will be from the IP61 grid square. They plan to have amps for every band and will be using the following antenna system: HF - Spiderbeam, R-7 and INV-L for 160-80m + beverages
2m - A 2M5WL yagi
6m - 6 element yagi
Mek, SP7VC, is also going to operate as SP7VC/MM during their trip on a ferry from Denmark via the Shetlands to Faroe Islands. Mek will be using an IC-706 into a 4 element 20m yagi and a vertical for 6m. He plans to activate Marine Squares JO37, 27, 17, 18, 19, 09, and IP 80, 81, 71. QSL via their home callsigns, by the bureau or direct.

PACIFIC DXPEDITION/TOUR (Update/Change In Plans). Gerben, PG5M, informs OPDX that he will be activating three DXCC entities in the Pacific between September 6-27th. His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2 (callsign not known yet)
September 8-14th: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 15-16th: Fiji; prefix 3D2 (callsign not known yet)
September 17-23rd: Tuvalu (OC-015); Callsign will be T2G
September 24-27th: Fiji; prefix 3D2 (callsign not known yet)
The callsign is not known for Fiji, but he has requested 3D2G. This will be an ultra light solo DXpedition and CW only. He will use an Elecraft K3, and a 2x20m doublet plus vertical antennas. QSL via PG5M, by the Bureau or direct. For direct requests, please enclose a minimum of 2 USDs for return postage. More details and updates will be available on: http://www.dx.to

PACIFIC TOUR. Don/G3BJ and Hilary/G4JKS will be on vacation in the South Pacific during September 2009. Their activity schedule is as follows:

September 4-16th - Austral Islands (from Rurutu [OC-050] and Tubuai [OC-152]); callsign will be FO/G3BJ
September 18-25th - Niue (OC-040); callsign ZK2BJ
Operations will be mostly CW on 80-10 meters (no 17/12m). They will use a K3 transceiver and a Butternut HF6.

QSL INFO AND NEWS.....
G3SWH QSL MANAGEMENT WEB SITE. Phil Whitchurch, G3SWH, reports: "Over the past few days, I have had some problems with the 'QSL request' and 'contact me' functions of my web site as a result of my ISP changing servers. However, I'm pleased to announce that these problems have all been resolved and the web site is now fully functional." Web page is: http://www.g3swh.org.uk

QSL HQ9R via K5WW. Erik, K5WW, reports: "It seems that quite a few people are still sending QSL for HQ9R to N6FF. Unfortunately, Dick, N6FF, became a Silent Key in August of 2007. I have been taking care of HQ9R's QSL since then. Please send your QSL requests to me, K5WW."

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

VK9LA QSL UPDATE. Bill Horner, VK4FW, QSL Manager for VK9LA, informs: "After much haggling with the Australian Customs Department and negotiating with a customs clearance broker, we have finally received the QSL cards from Czech Republic. Originally I envisaged having all direct QSLing done by the end of June, however this is not possible now. On July 2nd I will be away from home for 2 months on a family caravaning holiday. Prior to going I am doing as many as is possible and doing daily postings. As such, many of you will receive your cards within a few days, but there will be also many that will not. Please be patient and do not flood me with email questions. Every time I have to answer an email means less QSLing done before departure. If you are one of the lucky ones that receive your QSL card in the next few days and find missing QSOs, be advised it is because they were not in the log."

VY1JA QRT! Steve, N3SL, reports that he received an E-mail from "J", VY1JA (N8JA), on June 25th, and it states that J's work stint in VY0-land has concluded, and he is back home in the Yukon. The bad news, however, is that he is retiring from ham radio. His note says his station has been dismantled, and he is giving/selling everything to "younger Yukon hams." J's last QSO in the log was 10/19/08. It's sad to see him retire. He gave many a ham many a "clean sweep." Steve states, "I will continue to keep his logs and answer QSLs. Akio, JA3JM, handles QSLing for JA."

QSLS VIA LOTW: 6W/DL7CM, C31CT, E51SC, EA1AKS, H44MY, HA9PP, K5D, LX7I, OA4SS, OH2LU, UA4RZ, V26F, VP2V/SP7VC, YO8FZ and ZK2V

QSLS RECEIVED VIA MAIL: 4K8M, AP2NK, E44M, ER4DX, ER4ER, ER0WW, S04R, TO2T, TO3R, TO4T, TO6T, VP8YLI, WP4U and ZL7T

QSLS RECEIVED VIA THE BUREAU: 4O6T, 4O/K1ZZ, 5U1A, 5U9C, 5Z4DZ, 6W/RW3TN, 7Q7RS, 9X0R, EK3GMM, EM75W, ES1QD, HR2/LUQDY, IS0GQX, J20VB, J5UCW,

MJ0LON, OD/UA4WHX, OE50A, SQ9UM/9, ST2VBH, SV3EXU, SX3A, UA3LAR, UT7UV, VU2TS and YT2ED

R3, EUROPEAN RUSSIAN. In preparation for the WRTC-2010, look for the following stations (4 teams) to be active during IARU HF World Championship (July 11-12th) using the special callsign R31WRTC, R32WRTC, R38WRTC and R39WRTC. Activity will be from the WRTC-2010 locations. QSL via the Bureau.

SILENT KEYS.....
K8QOE - Ohio amateurs lost a great friend and dedicated ARRL Ohio Section Manager on Saturday, June 20th. Joe Phillips, K8QOE, suddenly became "SK" at the age of 68. He was a man of many hats (Please read ARRL Special Bulletin ARLX008 and ARRL Letter Vol. No. 25). He was also a DXer and a big "Cleveland Indians" fan (two topics that your editor will miss talking with him about). Ohio amateurs will surely miss Joe.

N0JT - John Trampler, N0JT, became a SK at age 85 on Monday, June 22nd. John was well known in the DX community and was a co-founder of the "247 DX Group" along with Alan/WA4JTK (SK). He also was a DXCC Honor Roll member and a ham for over 60 years.

SPECIAL AWARD AVAILABLE (GB6GEO). Following the very successful event of the Geoparks weekend, the Global network would like to offer a diploma endorsed by HRH The Duke of Edinburgh (the Queen of England's husband) to anybody working either GB6GEO the HQ station as an instant qualifier for the award, or two other Geoparks stations. Radio amateurs who are first to claim the award in their particular country will also get one point towards the two points required for the basic Geoparks diploma. The cost of the award in the UK is 2.20 GBP, in Europe 3 Euros, and 5 USDs anywhere else in the world. Certificate manager for this award is Martin G3VOF; QSL info QRZ.com. For any questions, PLEASE contact Martin at: mgfsystems@yahoo.com

SPECIAL EVENT (6m Op). Andy, N8OFS, will once again be active as N8O "portable caboose" from Jefferson, Ohio, between July 18-19th, during 1800-2100z. Activity is to celebrate the 25th anniversary for the Ashtabula Carson & Jefferson Railway (AC&J). If you missed him the first time here, this will be your last time to work him. Look for him to be on 50.300 and 52.525 MHz FM, 50.400 MHz AM and 50.200 MHz USB. QSL via N8OFS: Andy Sargent, PO Box 517, Jefferson, OH 44047. For more details about the railroad, visit the Web page at: http://www.acjrscenic.net/history.htm

SV, GREECE (Greek IOTA Tour). Gab, IK3GES, will be starting a Greek island tour beginning on June 28th. He plans to visit the following islands, but details of the dates were not provided. The IOTA Islands are:
EU-060 - Skyros Island (GIOTA NAS-098, MIA MG-115, also count for WLOTA LH-2002)
EU-075 - Salamina Island (GIOTA SAS-040, MIA MG-098, also count for

WLOTA LH-4159)
EU-113 - Elafonisos Island (GIOTA INS-007, MIA MG-033, also count for WLOTA LH-0011)
EU-174 - Amoliani Island (GIOTA NAS-046, MIA MG-009)
After activating the above, Gab will then travel to Turkey but is not sure if he will activate any islands there. After Turkey, Gab will team up with Boyan, LZ1BJ, and activate Sveta Anastasiya Island (EU-181, will also count for WLOTA LH-0035). He is expected to start a second island tour from Croatia in September. Details will be forthcoming. QSL via IK3GES, direct or by the Bureau or E-mail Bureau requests.

T32, EASTERN KIRIBATI. Tovia, T32TV, reportedly is a new ham on Christmas Island (OC-024). PLEASE be patient with him. Activity has been on 20 meters SSB after 0600z. QSL route has not been reported.

V6, MICRONESIA (IOTA Op). Yuki, JH1NBN, will be active from three different state island groups of Micronesia. Look for him to activate the following between now and July 21st:
Pohnpei Island (OC-010) - Currently active as V6P through July 4th and will return between July 21-25th.
Chuuk Island (OC-011) - Callsign V6C; between July 4-12th.
Kosrae Island (OC-059) - Callsign V6T; between July 13-21st.
QSL via his home callsign. ADDED NOTE: There has been a report that Yuki may also operate from Guam (OC-026) as KH2/K3ZB on his return back home.

VK9N, NORFOLK ISLANDS (Update/Change). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9NI (not VK9AAA as first announced) between July 22-29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. Equipment to be used are ICOM radios w/Amps using Spiderbeams, verticals, beams and dipoles. Current operators mentioned are: Tommy/VK2IR (Team Leader), Chris/VK3FY (Co-Leader), Peter/VK3FGRC (Team Member/Webmaster), Keith/VK3FT (Team Member), Peter/VK2FPGR (Team Member), Tony/VK3TZ (Team Member), Raffy/VK2RF (Team Member), Andrey/VK5MAV (Team Member) and Alan/VK2GR (Team Member). QSL via W3HNK. More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VP2, MONTSERRAT (NA-103). Bill, W5SJ, will be active as VP2MSJ from VP2MDD's QTH between July 14-21st. His activity will include the CQWW VHF Contest (hoping/praying for some E-skip), but he will be active on other bands that are open, particularly 30 and 60 meters. QSL via W5JAY.

ZK2V OPERATION WRAP-UP. Chris, ZL1CT, reports that his recent ZK2V DXpedition made 15817 QSOs (including 1279 QSOs on RTTY) despite 'flat' band conditions. Many stations enjoyed chasing Chris around the bands and modes to improve their position on the 'ZK2V leaderboard' - Jeff, N8CC, was the overall leader with 16 band-slots out of a possible 20. Chris has organized a different QTH for his next visit to Niue - if you missed ZK2V, there are 2 DXpeditions to Niue in September and October

2009. Please QSL via N3SL (via the Bureau to N3SL is also OK) - all
ZK2V QSOs have been uploaded to LoTW resulting in more than 2000 QSO
matches.

Ohio/Penn DX Special Bulletin No. 914.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 914.1
BID: $OPDX.914.1
June 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Armic/EA3RKR, Ron/K5XK, and Maurice/F5NQL for the following DX information.

*** EDITORS NOTE. Three major developments/announcements have been announced which we felt should be sent out before the usual bulletin that comes out on Sunday.

3B7, ST. BRANDON. QSL Manager Ron, K5XK, reports to OPDX that Rachid, 3B8FQ, has received approval and will activate St. Brandon Island as 3B7FQ again in August. Rachid believes this may be the last trip to St. Brandon for the next five years. As in his previous travels to 3B6FQ and 3B7FQ, this will be a working trip with time shared for maintenance on the island's meteorological equipment. Travel to 3B7 will be by boat, departing Mauritius on August 10th, and returning from St. Brandon on August 30th. Operation will be CW/SSB on 40-10 meters. Another trip to Agalega Island as 3B6FQ is possible in November of this year. QSL 3B7FQ and Rachid's other callsigns via K5XK, per info on QRZ.com.

C2, NAURU (Update). Armic, EA3RKR, provides an update for the upcoming C21TI DXpedition to Nauru. As mentioned in Sunday's bulletin the operation will take place between August 17-23rd. In the new press release the Team Leader of the group Dani/EA4ATI, states dates are now permanent after several postponements. Dani plans to travel back to Spain to finalize preparations and different shipments of equipment for the DXpedition. All was possible thanks to the sponsorship and assistance from: Danish DX Group, Radio Club Valdemoro, European DX Foundation, German DX Foundation, ACR El Madrono, Southeastern DX Club, Swiss DX Foundation, Southwest Ohio DX Association, Section Local URE Valdemoro, Union Radio EA7URS of Seville, and Armic/EA3RKR. There was also individual contributions by (as of to date): EA5AVW, EA3KN, EC3AJW, IK8CNT, ON4IQ, SM7FJE, EA3RKR and EA4YK. Look for activity by C21TI to be on all HF bands from 160-10 meters + 6 meters. Station will have power and a 7 element yagi. The suggested frequencies are:

CW - 1825.2, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.2, 3799, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
6m - 50.115 MHz

Armic, EA3RKR, states in the press relase that they apologize for the delay and thank all for waiting. They hope to work you in August. The team is still looking for donations/funds and your contribution can made via Paypal. QSL via EA4ATI. All the details and QSL information is available at QRZ.com at: http://www.qrz.com/callsign?callsign=C21TI
Also: http://www.gratisweb.com/ea3rkr/esp/noticias/C21TI_NAURU.html

FR/G, GLORIOSOS. In a press release, the Gloriosos 2009 DXpedition has once again been postponed "because of flight problems". They "think", however, that the DXpedition could begin at the end of August. The release states, "The runway on Grande Glorieuse suffers heavy problems of stability which have to be solved very quickly, in next July, to allow again the jumbo planes landing with full security. This postponing will allow us to include new operators, David, F8CRS, and Bernard, F5LPY."
The press release states that there will be seven operators that will now go to FT5G. They will have three stations which will be active 24 hours a day and the 3rd dedicated to monitor the 6 meter. This last station will be used back on HF if propagation opens the lower bands. The length of the stay is always scheduled for three weeks if no other change will happen. They also added, "We must once again remind all of you that the landing on these islands is very difficult and the Go signal is given only when all the security measures are in place, known and applied. We have to thank many for their help: the French Australes and Antarctic Territories Administration, The South Indian Ocean Zone Forces Headquarter, and the Commandment of the French Foreign Legion detachment in Mayotte. More news is to be published in due time... Gloriosos 2009 crew"
There was one last official comment by Didier, F5OGL, team leader (edited): "A part we can say, even if the first event which made the July 2009 Gloriosos postponed hadn't happen; today's aircrash of the Yemenia A310 at sea after 2 hours of flight is a new event which might have made the DXpedition postponed in any case. The plane which would have been used to go from La Reunion to Glorieuses is now on the zone and will participate in the search of survivors for an unknown length of time... These events and to reinforce the runway have been considered by the French Authorities. For the most security, please wait again with us for a few weeks."

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> IT'S OFFICIAL: JULIUS GENACHOWSKI SWORN IN AS FCC CHAIRMAN

On Monday, June 29, US Supreme Court Justice David Souter -- in one his
last official duties on the high court -- swore in Julius Genachowski as
the new Chairman of the Federal Communications Commission. Genachowski,
who clerked for Souter after finishing law school, will complete the
four years remaining in the term of outgoing FCC Commissioner Jonathan
Adelstein. On June 25, the US Senate confirmed both Genachowski and
current FCC Commissioner Robert McDowell -- Genachowski for his initial
term and McDowell for his first full term

<http://www.arrl.org/news/stories/2009/06/25/10913/?nc=1>.

Adelstein has been nominated by President Obama to be the Administrator for the US Department of Agriculture's Rural Utilities Service (RUS) <http://www.arrl.org/news/stories/2009/03/23/10716/?nc=1>; a nomination hearing before the Senate Agriculture Committee is scheduled for July 7.

Genachowski praised Adelstein's record, thanking him for his more than six years of "outstanding public service" as an FCC Commissioner. "Throughout his tenure at the Commission," Genachowski said, "he has tirelessly championed the public interest. The FCC and the public have benefited greatly from his rich understanding of media and technology policy, and his devotion to the democratic process. While I regret that I won't have the pleasure of serving with Jonathan at the FCC, I look forward to forging a strong partnership with him in his future work."

Commissioner Michael Copps, who had served as Acting Chairman since the resignation of then-Chairman Kevin Martin this past January <http://www.arrl.org/news/stories/2009/01/15/10566/>, welcomed Genachowski to the Commission, saying Genachowski begins "what promises to be a public-spirited and distinguished tenure as Chairman. He knows the FCC well, brings impressive private sector and technology experience with him, and enjoys deserved renown for innovative thinking and new approaches. I look forward to working with him on the many issues awaiting his attention."

Copps also expressed his thanks for Adelstein's tenure on the Commission: "Jonathan and I have worked closely together on so many issues that it makes it hard for me to imagine a Commission without him. Our thoughts most often run in the same direction, whether the issue is media, broadband, rural America, the disabilities communities, reaching out to non-traditional stakeholders or upholding a shared vision of the public interest. His intelligence, good judgment, wide experience and invariably good humor combined to make him a highly productive Commissioner across a wide gamut of issues. I will miss him here but wish him all good things as he moves ahead in the confirmation process toward becoming Administrator of the Rural Utilities Service at the US Department of Agriculture. I look forward to our continuing work together and to our friendship through the years."

Commissioner McDowell is expected to be sworn in for his new term on July 2.

==> 2008 ARRL ANNUAL REPORT NOW AVAILABLE

The ARRL Annual Report for 2008, now available online and in print <http://www.arrl.org/announce/annualreport/>, reviews the major events of the year and documents the renewed growth of both the ARRL and the activities of the Amateur Radio Service. In 2008, the ARRL experienced a growth in membership, ending the year with 154,627 members, an increase of 0.7 percent from 2007. The growth was the greatest among International members and in the League's Northwestern, Rocky Mountain

and Delta Divisions.

"As ARRL began 2008, the main question facing us was whether the growth spurt that the Amateur Radio Service had enjoyed the previous year would continue," said ARRL Chief Executive Officer David Sumner, K1ZZ. "It did, with the number of new amateur licenses issued by the FCC rising to 28,066 -- a 5 percent increase over 2007. The ten-year license term makes the total number of licensees a poor indicator of current trends, but after a period of annual declines beginning in 2003 this figure also increased by 1.2 percent during the year. Thus it appears that the regulatory changes that took effect in February 2007 are having more than a short-term impact."

ARRL President Joel Harrison, W5ZN, said that through the ARRL's history, the League's strength has come from "the fact that its leaders have always had a clear understanding of our association's mission. Our mission has been expressed in different words by different generations but has remained fundamentally the same. Our current strategic plan states it in just six words: To advance and advocate Amateur Radio."

Harrison further defined this strength, recalling that in 2005, "we identified four 'pillars' of our association: Public Service, Advocacy, Education, and Membership. Technology supports virtually everything we do, and as time went on we realized that it deserved its own pillar. So, with a bit of fanfare we unveiled technology as the 'fifth pillar' at the ARRL EXPO area of the 2008 Dayton Hamvention."

Sumner said that 2008's "most gratifying development" was the April decision by the United States Court of Appeals for the District of Columbia Circuit in the ARRL's appeal of the FCC's Broadband over Power Line (BPL) rules. "The Court panel found that FCC prejudice had tainted the rulemaking process and that the Commission had violated the Administrative Procedure Act by not disclosing in full the staff studies on which the Commission relied," he said. "The judges also found that the Commission had failed to justify its decision to apply to BPL systems an extrapolation factor that was designed for entirely different technologies and had summarily dismissed empirical data -- submitted at the Commission's invitation -- that supported a different conclusion. The Court even awarded the ARRL some of our costs; this reimbursed only a small fraction of the total cost of the appeal, but it was a moral victory and underscored the fact that we had substantially prevailed in our appeal. Remarkably, at yearend the FCC still had done nothing to comply with the Court's decision. Perhaps the change in administration will cause the FCC finally to meet its obligations."

According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, "The Annual Report is not only useful for showing members the strength of the organization, but it is also a valuable tool in presentations to major public officials. At times they may know little about Amateur Radio, but when they see the quality of the annual report, even before they open it up, they know this is an organization to be taken very seriously. We are indeed a national association and very active."

==> IARU HF WORLD CHAMPIONSHIPS: COMING TO A RADIO NEAR YOU

Radiosport fans are gearing up for the summer's biggest competition: The IARU HF World Championships <http://www.arrl.org/contests/rules/2009/iaru.html>. Calling the 24 hour long contest "an HF operator's delight," ARRL Contest Branch Manager Sean Kutzko, KX9X, explained that the contest will allow amateurs plenty of opportunity to work DX from all around the globe on CW and SSB, as well as make QSOs with many IARU Member-Society club stations and officials.
"The IARU HF Championship is one of Radiosport's distinctive events," said Kutzko. "It's the only major contest that uses International Telecommunication Union (ITU) zones as part of the exchange, and it's the only contest that gives special multiplier status for IARU Member-Society stations and their officials."

Kutzko said amateurs can get in on the fun in a variety of ways: "You may choose to enter as a single operator using SSB only, CW only or a mixture of both modes. Single operator stations can choose from three power levels: High Power (greater than 150 W), Low Power (between 5-150 W) or QRP (5 W or less). You can also get some friends together at one station and participate as a Multioperator station with a single transceiver."

One of the fun things to do is see how many of the IARU special stations you can work during the event. "While most stations give their ITU zone <http://www.iaru.org/ituzonesc.gif> as part of the contest exchange, IARU Member-Society stations give the abbreviation for their IARU Member-Society's name: W1AW -- as W1AW/KL7 -- will be giving 'ARRL' as part of their exchange," Kutzko said. In addition, IARU officials can give one of four unique exchanges: AC if they are on the IARU Administrative Council, or R1, R2 or R3 for the ITU Region that official serves. For example, since Tim Ellam, VE6SH, is IARU President, he would give "AC" as part of his exchange.

According to Kutzko, numerous IARU Member-Society stations will be on the air this year, including Germany's Deutscher Amateur Radio Club (DA0HQ), France's REF-Union (TM0HQ), the Kuwait Amateur Radio Society (9K9HQ), the Nigerian Amateur Radio Society (5N0OCH and others), the Japan Amateur Radio League (8N1HQ, 8N2HQ, 8N3HQ, 8N4HQ and 8N8HQ), the Radio Amateur Society of Thailand (HS0AC), the Namibian Amateur Radio League (V51NAM), the Radio Amateurs of Lebanon (OD5RAL), as well as dozens of other Member-Society stations from around the world. "It is always special to see so many nations represented on the air by their national organization," Kutzko said. "It reinforces the global nature of Amateur Radio and the common bonds that all amateurs have."

The IARU HF World Championship begins at 1200 UTC Saturday, July 11 and goes until 1200 UTC Sunday, July 12. Complete rules may be found on the ARRL Contest Web page <http://www.arrl.org/contests/rules/2009/iaru.html>. Logs may be submitted via e-mail <iaruhf@iaru.org>; paper logs should be mailed to IARU International Secretariat, Box 310905, Newington, CT 06111-0905

USA. All logs must be e-mailed or postmarked no later than 1200 UTC August 11, 2009.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment covers the month of June.

ARRL's legislative relations consultant Chwat & Co has received 786 letters to 278 different Members of Congress (267 House, 11 Senate) supporting HR 2160 <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>. The bill -- The Amateur Radio Emergency Communications Enhancement Act of 2009 -- gained two new Congressional co-sponsors in June <http://www.arrl.org/?artid=8989>.

The ARRL filed a petition with the US Court of Appeals for the District of Columbia Circuit asking the Court to order the Federal Communications Commission to comply with the Court's 2008 decision that remanded the FCC's ruling on Access BPL for further action <http://www.arrl.org/news/stories/2009/06/26/10915/?nc=1>.

ARRL President Joel Harrison, W5ZN, appointed Southern Florida Assistant Section Manager Jeff Beals, WA4AW, as Vice Director in the Southeastern Division, effective June 1 <http://www.arrl.org/news/stories/2009/06/04/10865/?nc=1>. He also appointed Jim Tiemstra, K6JAT, as Pacific Division Vice Director <http://www.arrl.org/news/stories/2009/06/16/10889/?nc=1>.

ARRL Technical Relations Specialist Jon Siverling, WB3ERA, was on the United States Delegation to the Inter-American Telecommunications Commission (CITEL) PCC.II meeting in Ottawa, Canada June 1-5. ARRL Technical Relations Manger Brennan Price, N4QX, attended Study Group 5 meetings in Geneva, where ARRL Chief Technology Officer Paul Rinaldo, W4RI, chaired his final meetings of Working Group 5A-1 that handles amateur and amateur-satellite issues.

ARRL Field Day was in the spotlight in both New York City's Times Square and Las Vegas <http://www.arrl.org/news/stories/2009/06/23/10904/?nc=1>. More than 1600 Field Day sites registered their locations this year with the ARRL Field Day Locator. W1AW was on the air with the help of League staffers <http://www.arrl.org/blog/2009%20Field%20Day>.

ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME, and ARRL Teachers Institute Instructor Miguel Enriquez, KD7RPP, led the second and third 2009 sessions of the ARRL Teachers Institutes on Wireless Technology <http://www.arrl.org/news/stories/2009/06/18/10894/?nc=1>.

ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, forwarded reports to the FCC regarding a well-known 75 meter frequency and IARU Region 3 forwarded a number of monthly Intruder Watch monitoring reports

to Skolaut.

The ARRL Contest Branch announced that the ARRL Sweepstakes log submission deadline will be reduced from 30 days to 15 days, allowing for results from both the CW and Phone portions of the contest to be posted to the ARRL Web site within 60 days of the deadline <http://www.arrl.org/news/stories/2009/06/10/10873/>.

ARRL Laboratory Engineer Mike Gruber, W1MG, investigated a power line noise case in Northglenn, Colorado where he was able to locate two noise sources associated with the interference.

Section Manager Election ballots and candidate statements for the South Texas and Los Angeles elections were mailed to members of those sections ahead of schedule. ARRL members have until August 14 to return filled-in ballots.

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, attended Ham Radio 2009 -- Europe's largest Amateur Radio convention -- in Friedrichshafen, Germany, where he provided DXCC card-checking services to ARRL's international members <http://www.hamradio-friedrichshafen.de/html/en/>.

Along with a group of volunteers, ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R, promoted Amateur Radio to the 70,000 people who attended Maker Faire, the world's largest do-it-yourself (DIY) festival in San Mateo, California <http://www.arrl.org/news/stories/2009/05/26/10835/?nc=1>. Inderbitzen also represented ARRL in Germany at Ham Radio 2009.

The July issue of QST and the July/August issues of NCJ <http://www.arrl.org/news/stories/2009/06/18/10893/?nc=1> and QEX <http://www.arrl.org/news/stories/2009/06/09/10871/?nc=1> were mailed.

The ARRL released the second edition of VoIP: Internet Linking for Radio Amateurs. <http://www.arrl.org/catalog/?item=1431>.

Three new products -- a hat, a reflective jacket and a maroon polo shirt -- have been added to the ARES(r) apparel line and are available from Barker Specialty <http://www.barkerstores.com/arrl>.

ARRL DXCC Manager Bill Moore, NC1L, announced that the HZ1EA operation in Saudi Arabia has been approved for DXCC credit <http://www.arrl.org/?artid=8983>.

==> FRESH AIR, FRIENDS, FOOD AND FUN ABOUND FOR 2009 ARRL FIELD DAY

It's an event that some groups take very seriously, planning all year long for. Still, others just use the date to get together, make a few contacts and enjoy each other's company. No matter how you view it, ARRL Field Day <http://www.arrl.org/fieldday> is fun!
According to ARRL Field Day Manager Dan Henderson, N1ND, the Field Day Site Locator <http://www.arrl.org/contests/announcements/fd/locator.php> was a big hit this year. "We had 1602 groups listed -- 98 more sites

than were listed in 2008," he said. "We had all 50 states, Puerto Rico and nine Canadian provinces registered on the Locator this year."

Henderson said he was aware of at least one Field Day contact with the International Space Station <http://www.arrl.org/news/stories/2009/06/25/10910/?nc=1>, as well as several site visits by Members of Congress and local officials to various Field Day sites around the country.

ARRL Media and Public Relations Manager Allen Pitts, W1AGP, agreed that it was a great Field Day. "Despite some propagation issues in the atmosphere," he said, "the PR propagation in the media has been more than I have seen before in prior Field Days." Pitts said that the emphasis on Field Day promotions began long before June -- the ARRL released media kits, fill-in-the-blank proclamations, news releases and tip sheets. Along with the introduction of the PR-101 course <http://www.arrl.org/news/stories/2009/05/15/10817/?nc=1>, Field Day was also the presentation theme at the 2009 ARRL National Convention at the Dayton Hamvention.

"The preparation appears to have paid off well," Pitts said. "Hundreds of hits have been relayed in by Google's news monitoring, plus more from PR Newswire and spotting by ARRL Public Information Officers around the country. Both of the video Field Day PSAs <http://www.arrl.org/news/stories/2009/03/28/10728/?nc=1> have seen good play on TV and cable. Field Day even got some play in New York City's Times Square" <http://www.arrl.org/news/stories/2009/06/23/10904/?nc=1>.

Pitts said that many city and county officials -- as well as 28 states -- issued Field Day proclamations praising Amateur Radio: "Proclamations from the governors of Alabama, Arizona, Arkansas, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Washington and Wyoming, as well as Delaware's State Senate, are not just recognitions of the past, but keys for future political actions such as PRB-1 and legislative issues." These state proclamations range from Ohio declaring June 27 as Amateur Radio Day, to Florida, Delaware, Illinois, New Hampshire and Pennsylvania pronouncing June as Amateur Radio Month in those states, while other states have designated Amateur Radio Week in their states <http://www.arrl.org/news/stories/2009/06/24/10905/?nc=1>.

Individuals and groups who participated in Field Day are invited to submit their pictures and stories to the Field Day Online Soapbox <http://www.arrl.org/contests/soapbox/?con_id=176>. "Just a few days after Field Day, we've had almost 70 entries on the Soapbox," Henderson said. "It really is a thrill to read these stories and see all the pictures showing what a good time people had this year."

Henderson encouraged Field Day participants to submit their entries via the Field Day Web Submission Applet

<http://www.b4h.net/cabforms/fielddayentry.php>. "You can also submit your entries via e-mail <fieldday@arrl.org> or by postal mail," he said. If submitting via postal mail, entries should be sent to Field Day Entries, ARRL, 225 Main St, Newington, CT 06111. Entries must be postmarked, e-mailed or submitted by July 28, 2009. Late entries cannot be accepted.

It's not too early to begin preparing for next year's Field Day -- go ahead and mark your calendars now for June 26-27, 2010.

==>WHAT'S NEW AT DAYTON 2009 -- THE UNABRIDGED VERSION

The July 2009 issue of QST had a one page overview of some of the major pieces of equipment introduced at the Dayton Hamvention. There is no way a single person can track down everything on display that's new in the time available, but QST Technical Editor Joel Hallas, W1ZR, did find quite a bit more -- much more than can be squeezed into the available QST page.

"We reported on many other categories of interest, including new VHF and antenna-related equipment, as well as many categories of accessories," he said. "When you click on the link, you'll find a description of the rest of the new items I tracked down during a very busy three days at Dayton."

Check it out on the ARRL Web site <http://www.arrl.org/files/qst-binaries/QS0709NewatDayton.pdf>.

==>SOLAR UPDATE

Tad "A summer's Sun is worth the having" Cook, K7RA, this week reports: It was a perfect Field Day weekend from where I stood. The weather was warm, skies clear, the space weather was calm and there was enough propagation to make a domestic contest interesting. I had no plans, so on Saturday I went to the ARRL Field Day Station Locator to find a Field Day site. The one I landed at -- W7AUX -- listed a contact number, a cell phone at the site. I inquired if they needed a CW op, was told, "We could use any operators," so I drove up to the site north of Seattle. I had a lot of fun on 20 meter CW. Sporadic-E even helped out, and the 6 meter station made a number of contacts with other Field Day stations in the Western US. You can get a taste of what happened at Field Day stations around the country via the Contest Soapbox <http://www.arrl.org/contests/soapbox/?con_id=176>. A shorter version with a photo is on page one of the 2009 Field Day Soapbox. Just search for KB6NU. Sunspot numbers for June 25-1 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 68, 66.8, 67, 67, 68.5, 68.2 and 67.5 with a mean of 67.6. The estimated planetary A indices were 7, 3, 3, 11, 10, 5 and 4 with a mean of 6.1. The estimated mid-latitude A indices were 6, 2, 4, 8, 7, 5 and 3 with a mean of 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's

Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by an ancient French proverb <http://www.egreenway.com/months/summer.htm>.

==>IN BRIEF:

* This Week on the Radio: This week, the Digital Pentathlon is July 3. Check out the Venezuelan Independence Day Contest, the WLOTA Contest, the DL-DX RTTY Contest, the Original QRP Contest, the PODXS 070 Club 40 Meter Firecracker Sprint (local time) Michigan QRP July 4th CW Sprint on July 4-5. The ARS Spartan Sprint is July 7. Next week is the IARU HF World Championships on July 11-12. The NCCC Sprint Ladder is July 10. The FISTS Summer Sprint and the Feld Hell Sprint are July 11. The SKCC Weekend Sprint and the ARCI Summer Homebrew Sprint are both July 12. The NAQCC Straight Key/Bug Sprint is July 16. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration remains open through Sunday, July 26, 2009, for these online course sessions beginning on Friday, August 7, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL to Close in Observance of Fourth of July: ARRL Headquarters will be closed in observance of Independence Day on Friday, July 3. There will be no ARRL Audio News, W1AW bulletin or code practice transmissions that day. The ARRL Letter will be posted a day early on Thursday, July 2. League Headquarters will reopen Monday, July 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

* Michigan Ham Dies in Tower Accident: A tower accident during Field Day preparations around 11 AM EDT on Saturday, June 27 claimed the life of Larry Prelog, KE4PM, of Niles, Michigan. Prelog, a member of the Blossomland Amateur Radio Association (BARA) <http://www.blossomlandara.org/>, was airlifted from Watervliet to a Kalamazoo hospital where he passed away early Sunday morning. He was 57. BARA Public Information Officer Matt Severin, N8MS, told the ARRL that Prelog "...was very passionate about Amateur Radio and was very involved in club activities. He was the driving force behind the first high altitude balloon launch for our club. Larry was the kind of guy who would give you the shirt off his back even if he didn't have another one for himself. He will be dearly missed."

* Larry E. Price, W4RA, Honored at Ham Radio 2009 Convention in Germany: Larry E. Price, W4RA, was honored at an evening reception following the first full day of Ham Radio 2009 convention activities in Friedrichshafen, Germany <http://www.hamradio-friedrichshafen.de/html/de/> on Friday, June 26. The reception was hosted by the convention sponsor, the Deutscher Amateur Radio Club (DARC), and was attended by officials and guests from dozens of IARU Member-Societies. In a presentation made by IARU Vice President Ole Garpestad, LA2RR -- who had served as President of the Norwegian Radio Relay League (NRRL) from 2000-2002 -- Price was honored with the highest NRRL award, the Knight of the Order of the Golden Key. The award was given for Price's many years of service to the IARU, the ARRL and Amateur Radio in general. IARU President Tim Ellam, VE6SH, then conferred the title of IARU President Emeritus upon Price. Price served as ARRL President from 1984-1992 and as IARU President from 1999-May 2009. For more on the convention, see the Friedrichshafen blog on the ARRL Web site <http://www.arrl.org/blog/Friedrichshafen%202009>.

* John Miller, K6MM, Wins June QST Cover Plaque Award: The winner of the QST Cover Plaque Award for July is John Miller, K6MM, for his article "A No Excuses 160 Meter Vertical Antenna." Congratulations, John! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the July issue by Friday, July 31.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast"

compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Amateur Radio Newsline(tm) Report 1664 - July 3 2009

Amateur Radio Newsline report number 1664 with a release date of Friday, July 3rd, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC starts its long scheduled rules review and ham radios Part 97 is included. Also, hams in Poland go on flood watch alert, Europe may put emission standards on ham radio a very cold DXpedition on Amateur Radio Newsline(tm) report number 1664 coming your way right now.

(Billboard Cart Here)

**

REGULATORY: FCC SEEKS COMMENTS ON REVISING OR ELIMINATING CERTAIN RULES

The Part 97 Amateur Service rules are among those to be reviewed by the FCC or their relevance, modification and continuation for the next several years. Bruce Tennant, K6PZW, is here with the rest of the story:

--

Pursuant to the Regulatory Flexibility Act in section 610 of the United States Code, the FCC is publishing a plan for the review of rules adopted by the agency in calendar year 1998. Rules which have, or might have, a significant economic impact on a substantial number of small entities.

The actual purpose of the review is to determine whether such rules should be continued without change, or should be amended or rescinded. This, to minimize any significant economic impact of such rules on the previously mentioned substantial number of small entities.

In addition to Amateur Radio in Part 97 of the FCC regulations, other services to have their rules reviewed are the Part 20 Mobile Service, the Part 22 Cellular Telephone Service, Part 73 Broadcast Services, the Part 95 Citizens Radio Services to mention only a few.

The FCC rules review notice is designated as CB Docket No. 09-102. It was issued on June 24th and carries a 60 day commentary period.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles. -- You can download and read the entire document detailing this regulatory review at the U-R-L found at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-1307A1.doc)

(FCC, CGC)

**

RADIO POLITICS: NEW FCC CHAIRMAN SWORN IN

The FCC has a new Chairman. On Monday, June 29th, US Supreme Court Justice David Souter swore in Julius Genachowski as the new Chairman of the Federal Communications Commission.

President Obama had nominated Julius Genachowski to lead the Commission on March 3rd. The Senate confirmed him as the new Chairman of the FCC on June 25th. At the same time it also reconfirmed current FCC Commissioner Robert McDowell for his first full term.

President Obama has also nominated South Carolina Democrat Mignon Clyburn and Republican Meredith Attwell Baker for the last two vacant Commissioner seats. If confirmed by the Senate, Clyburn and Baker would bring the FCC to its full complement of five Commissioners. (ARRL and various published news reports)

**

RESCUE RADIO: POLISH HAMS ON FLOOD ALERT

Ham radio is on emergency stand-by in Poland. This, following flooding that has hit the South-Western part of that European nation.

Greg Mossop, G0DUB, is the IARU Region 1 Emergency Communications Coordinator. He relays word that following the recent flooding and a continuing flood threat to the region, the DASR Polish emergency group is saying that 3.760 MHz may be used for emergency communication.

If this activation takes place, Polish radio amateurs will be requesting that hams in other parts of the world to keep this frequency clear if you hear any ongoing emergency traffic. G0RUB adds that further updates will be posted as they are received. (Southgate)

**

TECHNOLOGY: EUROPE MAY REQUIRE HAM GEAR TO MEET EMMISSION STANDARDS

Future amateur radio gear may sold in Europe need to meet very specific emissions standards. The Radio Society of Great Britain reports that the European Telecommunications Standards Institute is moving towards requiring commercially produced, ready to use amateur radio equipment to conform to international standards for emissions. As of now, the proposals will not affect kits or homebrew equipment. If such rules were enacted it would likely lead to a price increase in commercially made gear sold in that market. (GB2RS News, others)

**

ON THE AIR: HAMS COMMEMORATE THE APOLLO 11 MOON LANDING

Ham radio operators around the world spent the weekend of June 27th and 28th bouncing radio conversations off the surface of the Moon. This to help commemorate Apollo 11 Moon landing 40 years ago.

Organized in Australia and the United States, the on-the-air event brought together hundreds of amateur radio operators from around the world, some armed with their own radio dishes. It was timed to coincide with the 40th anniversary next month of the Apollo 11 landing that took place on July 20, 1969.

The earlier date was chosen for two reasons. First is that the Moon does not orbit directly around the Earth's equator, this was the nearest weekend organizers could arrange for practical reasons. Secondly, the date chosen happened to coincide with the 2009 ARRL Field Day operating event. This meant that there would be lots of hams on the air on every mode including Moonbounce.

At airtime its not known how many Apollo anniversary contacts were made, but those hams trying had to be patient. It takes about 2.5 seconds for a radio signal to reach the Moon and bounce back to another part of the Earth. As such any two way contact meant waiting about 5 seconds to get a reply. (N6ZXJ, WB9QZB from published reports)

**

EMERGING TECHNOLOGY: MIT ANNOUNCES NEW COGNITIVE RADIO CHIP

Engineers at the Massachusetts Institute of Technology have built a fast, ultra-broadband, low-power radio integrated circuit chip. One modeled on the human inner ear that that could have applications in cognitive radios.

Researchers say that the new RF cochlea is embedded on a silicon chip measuring 1.5 mm by 3 mm and works as an analog spectrum analyzer by detecting the composition of any electromagnetic waves within its perception range. They say that the new chip could enable wireless devices capable of receiving cell phone, Internet, radio, television and other signals using a single device.

For those not aware, the term cognitive radio is a paradigm for wireless communication in which either a network or a wireless node that changes its transmission or reception parameters to communicate efficiently avoiding interference with other spectrum users. More about the new radio chip is on-line at www.sciencedaily.com/releases/2009/06/090603131441.htm (Science Daily, others)

**

ENFORCEMENT: CHINESE MADE HT'S MAY BE ILLEGAL TO IMPORT TO THE USA

Some deals are too good to be true or legal. That's the story with some rather inexpensive HT's being sold on-line. Bill Pasternak, WA6ITF, is in our newsroom with more:

--

Inexpensive VHF and UHF transceivers made in China that transmit and receive on the 2 meter and 70 centimeter bands appear to be illegal for hams to buy from overseas dealers and have shipped into the United States. This is because the radios have not passed the FCC certification procedure nor can they as they are designed to transmit on frequencies outside of the United States amateur radio allocations right out of the box.

The radios in question bear names like Puxing, FDC, Wouxon, and numerous others. They are being mainly sold on Bay and similar on-line auction sites world-wide at prices ranging from $30 to $80 plus shipping. Most of the ads originate from dealers in Taiwan or Hong Kong though some have come from other Pacific Rim nations as well.

According to postings on various chat websites, the radios themselves are not all that bad quality. Not great, but not to shabby. Almost all of them feature a back-lit LCD display, up to 100 memory channels, programmable repeater offsets, and even a built-in CTCSS tone encoder.

Output power on the VHF units approaches 5 watts while the UHF models average around 2 watts out. Hams using them report that the transmit audio quality ranges from a bit muffled to good depending on the model and manufacturer of the set.

With retail prices far below that of similar radios from Alinco, Icom, Kenwood and Yaesu, hams on this side of the Pacific might find these Chinese built transceivers hard to resist. But as pointed out in on-line postings, the biggest problem aside from it being illegal to import is where to get one fixed if its dropped or stops operating? Also, replacement battery packs might be very hard to find if the one that comes with the radio goes flat and cannot be revived.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

With all of this taken into account the radios may not be that great of a bargain, after all. Or in the words of the old sage: Caveat Emptor. Buyer beware. (ARNewsline(tm))

**

ENFORCEMENT: PA SKI RESORT FINED $5000 FOR UNLICENSED RADIO OPERATIONS

A ski resort in Pennsylvania has been ordered to auntie up $5000 by the FCC. This after the regulatory agency found that the Bear Creek Mountain Resort has been using a variety of 460 MHz land-mobile frequencies without a license.

The story goes back to 2008 when the FCC's Philadelphia Field Office received a complaint that the Bear Creek Mountain Resort in Macungie was operating radio communications equipment on several frequencies without a license. An agent was dispatched who observed and recorded several transmissions on 461.3500 MHz, 462.5000 MHz, 464.4250 MHz, and 467.7625 MHz.. On 462.500 MHz, the agent heard an individual request assistance bringing a girl with a broken wrist down the mountain.

On June 10th of 2008 the FCC issued the resort a $10,000 Notice of Apparent Liability for its unlicensed radio operation. The resort countered that the fine should be cancelled because it did not knowingly violate the Commission's Rules. But the FCC countered that it found the violations to be deliberate and that the resort must be penalized. However, it would take mitigating circumstances into account and reduce the fine to $5000.

The order affirming the $5000 fine was issued on June 24th. The Bear Creek Mountain Resort was given the customary 30 days to pay or to file a further appeal. (FCC)

**

ENFORCEMENT: LIST OF POTENTIALLY STOLEN EQUIPMENT IN THE BONDY CASE PUBLISHED ON LINE

A follow-up to our report in the case of Kevin Bondy, who now faces a $24,000 fine for jamming the radio system in a Southern California shopping mall. A police search of his residence has turned up what's being described as an extraordinary amount of potentially stolen radio gear.

The Ventura County Sheriff's Department has prepared a list of what was found on the premises and is asking the public's help in identifying any rightful owners. The equipment can be viewed on-line. Items 120 to 123 involve FM broadcast equipment. The rest is land-mobile gear including repeaters with a few miscellaneous items such as computers, CB and amateur radio gear mixed in.

There are two URL's you need to know. The first takes you to the list of equipment. The second shows pictures of the FM broadcast equipment and gives contact information for the Ventura County Sheriff. The URL's with this information are:

Equipment list: http://earthsignals.com/add_CGC/Oaks_Mall_09-5771.pdf
Photographs of the FM broadcast equipment:
http://earthsignals.com/add_CGC/Letters/Stolen%20Equipment.htm
Background information on Kevin Bondy:
http://www.fcc.gov/eb/FieldNotices/2003/DOC-290813A1.html) (CGC)

**

ENFORCEMENT: FCC REFUSES TO ACT ON ELT MODIFICATION CASE

The FCC has turned away a strange complaint regarding an Emergency Beacon Locator device purchased from an unnamed vendor in the United Kingdom by a resident of France. Don Wilbanks, AE5DW, has the details:

--

In a letter dated October 24, 2008, Jean Pierre de Lutz of La Garde Freinet. France submitted a complaint regarding ACR Electronics, Inc. which is located in Great Britain. In his letter, Lutz stated that ACR duplicated the hexadecimal code for his 406 MHz Emergency Position Indicating Radiobeacon and that this duplication caused him and his crew to be placed in life-threatening storm conditions at sea unnecessarily.

According to Lutz complaint, he purchased the device in 2002 and immediately registered it with the United States National Oceanographic and Atmospheric Administration. In 2007 he activated the beacon when his vessel encountered storm conditions during an Atlantic crossing. But in the intervening years another beacon manufactured with the same code was also sold and when it was registered with NOAA it overwrote the entry for Lutz unit. As a result Lutz claims that the duplication of the code between his emergency beacon and that of another vessel resulted in a potentially disastrous delay in the dispatch of Coast Guard personnel to rescue him and his crew.

But the FCC disagrees. In its findings, the agency says that ACR is not at fault. It says that the two ACR beacons in question had unique hexadecimal codes until Lutz beacon was altered by the vendor. The FCC added that while it is concerned that this situation occurred, it finds no basis to conclude that ACR violated any rules.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, near New Orleans..

--

The FCC did advise Lutz that any complaint regarding the vendor's alteration of the hexadecimal code should be referred to United Kingdom authorities. In addition, comments regarding emergency beacon registration procedures in the United States should be addressed to NOAA. It says that NOAA has changed the registration procedures to ensure that similar duplications do not go undetected, and that the correct user registration information is retained. (FCC)

**

RADIO LAW: FCC TO INVESTIGATE CELLPHONE EXCLUSIVITY DEALS

Federal telecommunications regulators are going to investigate whether exclusive cell phone deals, such as the one that locks the Apple iPhone to AT&T, are good for consumers. Michael Copps, the then acting

chairman of the Federal Communications Commission announced on June 16th he had instructed the agency's staff to open a review of exclusivity arrangements. (FCC)

**

NEW BOOKS: THE NIFTY E-Z GUIDE TO D-STASR OPERATION

>From the bookshelf comes word of a new work especially for users of D-Star. Titled the Nifty E-Z Guide to D-Star Operation, it was authored by Bernie Lafreniere, N6FN, the book covers every aspect of D-Star operation from the most basic to the more advanced aspects of this emerging digital voice mode.

In his tome N6FN utilizes easy to understand explanations and lots of illustrations to explain such things as radio programming procedures needed to route calls, the operation using local and remote repeaters and reflectors and much more.

The Nifty E-Z Guide to S-Star operation is 104 pages long and is being published by Nifty Ham Accessories. Suggested list price is about $14 from wherever books of this nature are sold. (WB9QZB)

**

NAMES IN THE NEWS: W0YK APPOINTED AS NCDXF ADVISOR

Some names in the news. First up is Ed Muns, W0YK, who has been appointed as an Advisor to the Northern California DX Foundation Board of Directors.

Muns comes to the position with experience as a part of the 1994 YK0A team. He has also operated as 6Y0A and 6Y4A as well as holding the 7J1ACJ call sign. His primary duty will be working with the foundations website along with Doug Bender, WW6D. (NCDXF)

**

NAMES IN THE NEWS: SOUTH AFRICA'S HONOREES

South Africa's Garth Milne Technology Award has been jointly presented to Andrew Roos, ZS6AA, and Hannes Coetzee, ZS6BPZ. This, in recognition of their design and development of the Amateur Payload on SumbandilaSat. This is a ham radio which is due to be launched on 21 August on a Soyuz Rocket from Baikonur.

Also, that nations NSN Amateur Radio Community Service Award was presented to Francois Botha, ZS6BUU. He was honored for his dedication as National HAMNET Director, to the development of amateur radio as a support communication service during emergencies and disasters.

Lastly, the annual South African construction competition sponsored by Multisource was won by Carson McAfee. He is a second year university student who built the Quadra Helix Antenna. (SARL)

**

THE SOCIAL SCENE: THE TIDELANDS HAMFEST JULY 11th IN TEXAS

Turning to the ham radio social scene, the Tidelands Amateur Radio Society Hamfest will be held on July 11th at the Doyle Convention Center, in Texas City. The event will feature major radio and associated equipment vendors, hourly and unscheduled prizes, a hidden transmitter hunt and much more. More information on this fun event is on-line at www.tidelands.org. (Press Release)

**

THE SOCIAL SCENE

And the 14th IARU Region 3 Conference takes place Christchurch, New Zealand. This, from October 12th to the 16th. Lots of events are planned. More is on line at www.christchurch.org.nz (NZART)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: VK FOUNDATION CALLSIGN CONFUSION

There seems to be confusion in ham radio circles worldwide concerning the Australian 4-letter suffix callsigns. Calls such as VK4FABC or VK7FXYZ and such.

These 4-letter suffixes are issued by Australia to its entry level Foundation-class amateurs. All Foundation class suffixes begin with the letter 'F' followed by 3 more letters.

These are legitimate calls issued by the Australian government. If you contact someone with one, be aware that he or she is a relatively new ham and be sure to welcome them to the hobby. (OPDX)

**

EMERGING TECHNOLOGY: SOLAR POWERED AIRPLANE UNVEILED

Swiss adventurer Bertrand Piccard has unveiled a prototype of the solar-powered airplane. One that he hopes eventually to fly around the world.

The aircraft has a wing span of 61 meters and weighs in at only 1,500kg. It will have four small battery powered engines driving propellers. A large solar array atop the high wing structure will be

used as a solar collector to power the aircraft in daylight as well as to charge the batteries for nighttime flights.

Before any voyage is undertaken the craft will undergo trials to prove it can fly through the night. The final version of the plane will attempt its to cross the Atlantic on a test flight in 2012.

Dr. Piccard, who made history in 1999 by circling the globe non-stop in a balloon, says he wants to demonstrate the potential of renewable energies. (Southgate)

**

EMERGING TECHNOLOGY: 4 GHZ LED DEVELOPED

Researchers have constructed a light-emitting transistor that has set a new record with a signal-processing modulation speed of 4.3 Gigahertz. In a pair of papers published in the June 15th issue of Applied Physics Letters, researchers at the University of Illinois and Quantum Electro Opto Systems in Malaysia, report the development and successful testing of the new high-speed light-emitting transistor and new "tilted-charge" light-emitting diode.

The modulation speed of either a light-emitting diode or a light-emitting transistor is limited by the rate at which electrons and holes recombine. This recombination lifetime is important in determining device overall speed. These new devices break the previous record of 1.7 Gigahertz held by a light-emitting diode some time ago. (Science OnLine)

**

RADIO IN SPACE: HIUBBLE RADIOS BACK NEW PLANETS

Earth seems to have its first photos of planets outside our solar system. This, in images captured by two teams of astro researchers using the Hubble Space telescope which radioed the images back to Earth.

Astronomer Bruce Macintosh is with the Lawrence Livermore National Lab. He says that the photos show four likely planets that appear as specks of white that are all but invisible to all but the most eagle-eyed experts.

The tiny planets are trillions of miles away. Three of them are orbiting the same star, and the fourth circling a different star. None of the four giant gaseous planets are remotely but they do raise the possibility of others more hospitable planets do exist. (Space)

**

INTRUDER WATCH: NORTH KOREA EMBASSY ON 20 METERS

Another intruder into the ham bands. The IARU Region 1 monitoring service reports that the North Korean embassy in Tripoli is again using

14.328430MHz. This, for traffic with the Ministry of Foreign Affairs in Pyongyang. Monitors report hearing an ARQ burst system at 600 Baud and 600Hz shift, operating on two different frequencies at about 16:30UTC daily. One frequency is in the amateur radio band, the other one out of it. (Southgate)

**

INTRUDER WATCH: CODAR RADAR IN THE 24 MHz BAND

Slightly better news with word that the Codar HF Radar from Naples on the 24MHz band has disappeared. This, after a complaint from IK8OZZ.

Unfortunately, a few days later another Codar system was found on 24.850 to 24.950kHz. Bearings taken by the German PTT indicated the source was on Pag Island, Croatia. The German department of Post and Telecommunications has reportedly filed an official complaint to their Croatian counterpart. (Southgate)

**

ON THE AIR: CELEBRATING 100 YEARS OF FLIGHT IN THE NETHERLANDS

A reminder that members of a Netherlands based experimental radio group will be active as PH100EL through July 12th. This, to celebrate the 100th anniversary of aviation in Holland by pioneer Count Charles de Lambert. A special 100 Years of Aviation award with mode endorsements will be available. QSL via PD0PVQ. (Via e-mail)

**

THE CONTEST CORNER: ARRL UHF CONTEST CERTIFICATES ON THEIR WAY

Turning to contest news. Sean Kutzko, KX9X, the Contest Branch Manager for the ARRL says that certificates for the 2008 ARRL August UHF Contest and the 10 GHz and Up Cumulative Contest have been processed. Shipment began late last week. Kutzko says that winners should start to see them arrive in their mailbox any day. (ARRL)

**

DX

In DX, the long awaited 2009 Glorioso operation as FT5GA still seems to be on track. Its currently scheduled to begin on July 9th and be on the air through the 28th. More information on this one as soon as we hear that they are on the air.

word that I3LDP, will be active from Mauritius between through July 11th. His activity will be on the HF bands and 6 meters using CW and SSB. His equipment will be an IC-7000, a vertical for 40 through 10meters and a vertical dipole for 6. QSL via his home callsign.

DL7JAN and DL2IX will be active portable CT8 from Faial Island in the Azores from August 21st to the 31st. Their operation will be on 80

through 6 meters using CW, SSB and RTTY. QSL via their home call, either via the bureau or direct.

F2JD will be in the Philippines for the next five months and hopes to get his DU1G0SHN license extended. He plans to activate some I-O-T-A locations during his stay. QSL direct or via the REF Bureau to F6AJA.

I2MOV will depart for Sardinia on July 20th, and will be active for about two months portable I-S-Zero. His QTH will be Dolianova which is 2 0km north from Cagliari. QSL via his home callsign, either direct or via the bureau.

Lastly, GM0IIO, will be active portable SV5 from the Island of Rhodes through July 8th . Listen for him on 20 meters on CW and SSB running 100 watts into a 20 meter ends fed antenna.. QSL via GM0IIO.

(Above from various DX news sources)

**

THAT FINAL ITEM: A VICARIOUS WAY TO DX FROM DOWN UNDER

And finally this week, news of a very interesting low power DXpedition to a very rare spot down-under. Its in Australia and so is Graham Kemp, VK4BB

--

Several Victorian amateurs are preparing portable gear and cross-country ski kit in readiness for their annual back country trip into the Bogong High Plains.

The group will be lead once more by VK3GT, VK3SN and VK3HFI along with several others as they take ultra-light solar powered gear in to the snowy wonderland of the Australian Alps from 6 to 10 August this year.

And VK3SN is going from, well might say the sublime to the ridiculous, you see just prior to hitting the slopes, he'll be heading a DXpedition to the tropical wonderland called Tonga.

Listen out for the portable QRP station in the snow calling on bands from 160 through to 20 meters each afternoon and evening. Have a chat and hear about winter conditions on the roof of Australia.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, reporting from Brisbane.

--

In previous years this group of hearty DX'ers have operated from tents, snow caves, igloos and remote mountain huts. Nobody knows what they'll get to stay in this year. That said, they say that the southern hemisphere winter snow looks great and you can share in the fun by catching them on the air. (WIA News)

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

As a libertarian, I think that radio frequecies should be free for the taking. I think the FCC should be abolished, and technical standards set by the free market.

In my opinion, the very existence of a Federal Communications Commission is illegal and violates the Bill of Rights, particularly the First and Tenth Amendments. The First Amendment states,

"Congress shall make no law respecting the establishment of religion or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or of the right of the people to peaceably assemble, and to petition the government for a redress of grievances."

and the Tenth Amendement plainly says,

"The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

We have seen in other parts of the world, where dissident groups are not allowed to control television or radio broadcasts. We have seen even in the United States, where Sarah Palin jokes about having NBC's license revoked. In fact, the most disturbing example of FCC abuse of power exists in the pages of broadcasting history.

Once upon a time, all radio broadcasts used amplitude-modulation, or AM, technology. Sound quality left something to be desired. So a brilliant inventor named Edwin Armstrong found a way to make radio sound better; he invented frequency-modulation technology. The big broadcasters of the time did not like that; so they convinced the FCC to give them control of the frequencies Mr. Armstrong was using. Armstrong's radio equipment was rendered useless; Mr. Armstrong was ruined. He later killed himself.

Says Wikipedia:

"RCA began to lobby for a change in the law or FCC regulations that would prevent FM radios from becoming dominant. By June 1945, the RCA had pushed the FCC hard on the allocation of electromagnetic frequencies for the fledgling television industry. Although they denied wrongdoing, David Sarnoff and RCA managed to get the FCC to move the FM radio spectrum from (42-50 MHz), to (88-108 MHz), while getting new television channels allocated in the 40 MHz range.

"This single FCC action rendered all Armstrong-era FM receivers useless overnight, and protected RCA's AM-radio stronghold. Armstrong's radio network did not survive the frequency shift up into the high frequencies;

most experts believe that FM technology was set back decades by the FCC decision. This change was strongly supported by AT&T, because loss of FM relaying stations forced radio stations to buy wired links from AT&T."

The Ohio/Penn DX PacketCluster
DX Bulletin No. 915
BID: $OPDX.915
July 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, W3BTX, WA4PGM, K5XK, K5LBU, K8YSE, W0MM, CX3AL, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EI7CC, F5NQL & UFT, G4IRN, I1BUP, I1JQJ/IK1ADH & 425 DX News, LZ1ZF, OH2BH, OH2BN,Pete's-DX-Newsdesk, RSGB IOTA Web Site, S50U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and YO3APJ for the following DX information.

*** SPECIAL NOTE FROM EDITOR: Sorry for the delay in sending out the bulletin. I had a great holiday weekend with my daughter in Murfreesboro, TN. Thanks for the understanding... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th-June, through Sunday, 5th-July there were 206 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V8, VE, VK, VP2V, VP9, VQ9, VR, VU, XE, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

13 COLONIES INDEPENDENCE SPECIAL EVENT ANNOUNCEMENT. Ken Villone, KU2US, Award Manager, has announced that "All operators that needed 'K2D' on HF

for their last station of a 'CLEAN SWEEP', will be given credit on their certificate, due to an unfortunate situation.... Thank you for understanding and your participation." For more details, go to:
http://www.qrz.com/db/KU2US
-or-
http://home.comcast.net/~dzabawa/ThirteenColonies.htm

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX that based on the crew that activated Chesterfield Island as TX9 some years back, Hawa, DK9KX, as team leader, has formed a new crew which will operate from Conway Reef during the period of October 1-10th, 2009, plus/minus due to weather conditions. Hans, DL6JGN, the leader of 3D2CR crew, who operated from the island 20 years ago, will also join Hawa's team. As of press time, the team consists of the following: Norbert/DJ7JC, Jan/DJ8NK, Dieter/DJ9ON, Heye/DJ9RR, Hawa/DK9KX, Hans/DL6JGN and Ron/PA3EWP. The callsign will be announced at the starting date. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL Manager is DJ8NK QSL direct or by the Bureau. PLEASE NOTE: New IRCs are "OK", but old IRCs with expiration date December 31st, 2009, are not "OK", because QSL cards most likely will be sent out in January 2010. A Web page will be active soon at: http://www.conwayreef2009.de

4W, TIMOR-LESTE. Chris, 4W6FR, works for the Australian Armed Forces and is stationed in Timor-Leste periodically. He has finally been given permission to operate and has his license in hand now. He has begun operating but only operates as time permits outside of his work hours. It seems he really likes working PSK, especially on 20 and 17 meters. There has been some QSNs reported on 20 meters SSB. Most of his activity takes place between 0900-1300z. QSL via VK4FW, direct or the OQRS at: http://www.odxg.org

5V, TOGO. Franco, I1FQH, will be active as 5V7PRF from Kpalime between July 22-30th. This will be a very light DXpedition with activity on 80-10 meters using mostly CW and some SSB (no Digital modes or 6m). He will use 100 watts into a Spiderbeam for 20/17/15m as well as a vertical and wire dipoles for the other bands. QSL via I1FQH, LoTW, eQSL or Bureau. Look for updates on QRZ.com or http://twitter.com/i1fqh

5Z, KENYA. Bob, K4UEE, will be here between July 10-17th, doing a short term mission work. (See: http://www.410bridge.org) He informs OPDX that he will be in the Kwambekenya village located about 3-4 hours north of Nairobi. He is involved in several different projects including a video project and demonstrating amateur radio in the local high school. He hopes to be active for some DXing in the late evenings and early mornings local time. He has an IC-706 MKII, a "Beam in a Bag" and a dipole for 30/40m. This is definitely not a DXpedition and operating time is limited.

7P, LESOTHO (Update). A group of international operators will be operating from Lesotho starting July 29th through August 13th. They will be operating with the equipment supplied by African DX Safari in Johannesburg. The following operators will be on the air: Dr. Gasper "Pista" Istvan/HA5AO (7P8AO), Ben Pyfer/DJ0YI (7P8YI), Laurent Thomin/W0MM (7P8MM), John

Plenderleith/9M6XRO (7P8OK) and Charles "Frosty" Frost/K5LBU (7P8CF). They will have 2 stations on most of the time and might have a 3rd for PSK and RTTY. Activity will be on all bands and they hope to work as many of you on 160/80 meters. They will have a 70 foot vertical which works great on those bands. For 40, they will have a 4 sq. dipole setup on one of the towers. Two trailers with towers will have Tennadayne T8 LogP antennas at about 55 feet. For 30 meters a sloper off one tower will be used. Also, a M2 6 meter beam will be up as well. QSL via each operator's own home callsign except for 9M6XRO/7P8OK who is via M0URX in the UK. ADDED NOTE: Operators from the 4M5DX group were not able to join up with the African DX Safari group due to things beyond their control. The African DX Safari group wished that they could but things did not work out for them.

8N, JAPAN. The JARL will activate 9 HQ stations from various regions in Japan during the 2009 IARU HF Championship this weekend. Each station listed below may be active on other bands other than specified as below outside the contest before the contest weekend. All QSOs will be QSLed automatically via the Bureau. Look for the following 9 HQ stations:

Callsign	Band/Mode during the Contest	Location
8N1HQ	15m-CW	Kimitsu City, Chiba
8N1HQ	160m-CW, 10m-CW	Minato Ku, Tokyo
8N1HQ	80m-Phone	Minami-Ashigara City, Kanagawa
8N2HQ	10m-Phone	Nakatsugawa City, Gifu
8N3HQ	15m-Phone	Nara City, Nara
8N3HQ	40m-CW	Kobe City, Hyogo
8N3HQ	20m-CW	Miki City, Hyogo
8N4HQ	80m-CW, 40m-Phone	Okayama City, Okayama
8N8HQ	20m-Phone	Iwamizawa City, Hokkaido

9A, CROATICA. Zik, VE3ZIK (DO7ZZ), will once again be active as 9A/VE3ZIK from Bilice between July 2nd and August 3rd. Activity will be on the HF bands using CW, SSB and digital modes. He will also participate in the RSGB IOTA Contest from IOTA group EU-170. QSL via DO7ZZ, direct or by the bureau (E-mail requests for Bureau QSL cards can be sent to Zik via zibert@t-online.de). Logs will be uploaded to eQSL and LoTW.

CX, URUGUAY. The members of the "RADIO CLUB URUGUAYO" will be active as CX1AA during the upcoming IARU CONTEST activity, from 1200z Saturday, July 11th until 1200z Sunday, July 12th. Activity will be on 160-10 meters using CW and SSB with two stations on each band, one station on CW and the another on SSB. QSL Manager for this activity is W3HNK.

DX SUMMIT (SOON READY FOR 2-WAY COMMUNICATION WITH OVER 110,000 MONTHLY USERS -- http://www.dxsummit.fi/dxspots.aspx): The OH8X Team reports: "The Radio Arcala DX Summit portal is celebrating the milestone of one million monthly hits over a course of several months and more than 110,000 people spending an average of 35 minutes on the site daily. The top five nations using the service are as follows:

USA (28.5%) followed by Germany, United Kingdom, Italy and Japan. In total, users from 170 DXCC countries have entered the service portal. With new visits approaching 19% during the month of May, an increase of users is quite evident.

In the process of making the DX Summit service more focused on younger user segments and non-amateur radio population, two features have been added recently.

Each spotting and spotted callsign is automatically linked to QRZ.COM, providing a more human link to the personal profiles of people and to their pictures. Just click the callsigns and you will automatically enter the relevant QRZ.COM page. Additionally, each line carries the name of the DXCC country spotted.

In a few months time, custom selected filters will be provided to the public allowing users to receive personalized spots that they would like to receive. While initially the selected spots will be sent to your personal email address, the ultimate aim is to offer an SMS (short message service) option to DX Summit users.

This service is a non-profit exercise for Radio Arcala, OH8X but we are pleased to recognize Yasme Foundation and Nokia Corporation for their support of further development and defrayment of operating expenses of the portal. As the servers are in the hands of a professional service provider in the United States, some interruptions are recorded and changing the service provider is in process.

Also, a Help Desk for regular users and for S/W developers is being set up. Here it is suggested that DX Summit open a channel for accepting voluntary donations to keep the Help Desk operational. On a trial basis, through PayPal, DX Summit accepts donations and, additionally, following a donation of 10 USD or 10 EUR, Radio Arcala will send you a full-color Radio Arcala wall calendar postpaid. This option is valid only for the months of July and August. http://www.dxsummit.fi/donate.aspx

We thank you for your support of and interest in Radio Arcala DX Summit."

G & GM, ENGLAND AND SCOTLAND. The RSGB will be represented in the IARU HF Championship by GB7HQ from two separate DXCC entities this year (G,GM). The contest runs July 11-12th. G3LZQ is handling special certificates for those working GB7HQ:
* Bronze award - contact GB7HQ on three band/modes
* Silver award - contact GB7HQ on six band/modes
* Gold award - contact GB7HQ on nine band/modes
* Platinum award - contact GB7HQ on all twelve band/modes
Further details of the award can be found at:
http://www.gb7hq.com/Award-Info.html
When you contact one operator, he can give you the frequency of the next GB7HQ station to work to assist in making contacts for the awards. QSL are being handled by G3TXF: direct, bureau, or LoTW. Full details of the station hosts, locations, operators, WAB squares and grid locators can be found at: http://www.gb7hq.com/2009/2009-Ops-List.html

IOTA NEWS.....
EU-047. Andy, DL7AT, will be active as DL7AT/M from Norderney Island (N-05 for the German Islands award), July 17-24th. He will also activate the Norderney lighthouse (ARLHS FED-025, GLHA #39, WLH DL-021, WLOTA 1621). QSL via his home callsign, direct or by the bureau.

EU-090. A group of Slovenian operators will be active as 9A8ZRS from Vela Palagruza Island (ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284, ARLHS CRO-012, CLH-100, WHL 9A-046, WLOTA 0057) between July 20-31st. Activity will be on 80/40/20/15/10/6/2 meters using CW, SSB, PSK-31 and possibly other digital modes. Their operations will include an entry in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X. QSL via the operator's instructions.

EU-121. Members of the Dalkey Island Contest Group plan to activate Clare Island for the upcoming RSGB IOTA Contest which takes place on July 25-26th. The callsign EJ1DD will be used in a "100 watt DXpedition" entry. QSL information is via EI7CC. Operators will be EI2CA, EI5DI, EI6EW, EI7CC, EI7CD, EI8BP and EI8CE. Look for activity also from the individual operators using the EJ prefix between July 23-27th.

EU-135. Anders, SM5EFX, will be active as SM5EFX/2 from Ledskar Island, July 19-31st. Activity will be on all HF bands/modes. He will also participate in the RSGB IOTA Contest (July 25-26th) using the special callsign SF2X. QSL both callsigns to SM5EFX, direct or by the bureau.

EU-146. Operators Frans/PA5CA, Jan/PA0JED, Arend/PA2AWU, Dervin/PD9DX and Marcel/PA9M will be active as PA6Z from Schouwen Duiveland during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/ Single-Transmitter entry. QSL via PA9M, direct or by the bureau.

EU-165. Joe, IS0MKX, will lead a team of 15 operators to activate Asinara Island (SS-061, for Italian Island Award) between July 22-26th. Activity will include the RSGB IOTA Contest (July 25-26th). The callsign will be IM0M. QSL via IS0MKX. For more info, please visit: http://digilander.libero.it/assoradiomarinai/asinara/home.htm

EU-175. Operators Luis/CT1EEQ, Arlindo/CT1EGW, Hermann/CT3FN/HB9CRV, Antonio/CU8AS, Jurgen/DJ2VO and Ruedi/HB9CQL will be active as CR2F from the Island of Faial (DIP AZ-007) between July 18-31st. Activity will be from the Ribeirinha Lighthouse (DFP FAZ-17, ARLHS AZO-020, WLH CU-007, WLOTA 1830, WW Loc. HM58QO), located at Cedros. They plan to be on 80-6 meters using CW, SSB and RTTY. They plan to be active around 50.113 MHz with CR2W as callsign. The team will also participate in the RSGB IOTA Contest (July 25-26th), using the callsign CR2W as a Multi-Single/Expedition entry. QSL via CT1GFK, bureau OK; via

E-mail requests to: cu8at@sapo.pt . For more information,
please visit: http://www.to-mk.com/neu/
Online logs will be available at: http://algarvedx.com/logonline

NA-140. Operators Steve/W3RFA and Bob/KB3NYX will be active as W3RFA
from Smith Island (USI MD-003S, Somerset County, Maryland)
for the RSGB IOTA Contest (July 25-26th). This is a "Micro-
DXpedition". They are getting to the island by sea kayak. All
gear will weigh less than 100 lbs ea. They will use 100 watts
into a wire antenna. QSL via their home callsigns.

SA-047. Operators Alexandre/PY5BH, Vagner/PY5DC, Fleck/PY5DJ, Fernando/
PY5FO and Goncalves/PY5IN will be active as PR5D from Ilha do
Mel (DIB PR-01, also count for WLOTA LH-1435) during the RSGB
IOTA Contest (July 25-26th). QSL via PY5DC. Visit their Web
site at: http://www.alcad.com.br/radio

MOBILE TOUR (Europe). Jurij, MM0DFV, has started his 7000 km mobile tour
on July 7th. He reports, "I am taking my mobile HF gear, and will try
to be active from various places as much as possible. The route is:
GM - Scotland (MM0DFV/m) - G England (M0DFV/m) - F France (F/MM0DFV/m) -
ON - Belgium (ON/MM0DFV/m) - DL Germany (DL/MM0DFV/m) - SP Poland
(SP/MM0DFV/m) - EU Belarus (call sign is unknown yet) - UA Russia (RZ3??
= call plus various slashes, will get the license on arrival) - UN Kazakh-
stan (UN/RN3FX hopefully)... and inversely. My radio will be a Yaesu
FT-897D, Mobile Whips, Doublet and ATU MFJ-993 for portable stops, etc.
Main attention is to PSK. I will print different QSL-cards for each new
place I stop. On 10th August 2009 I plan to be back home. Please watch
me in case I am lost :)) All the best to all, and have a nice summer!"

OH0, ALAND ISLAND (CHALLENGING THE HIGH WINDS). Martti, OH2BH, reports:
"Sailing out on Thursday morning under command of captain Jaakko, OH1TX,
the group of Toshi/JA8BMK, Aki/OH1ZE and Martti/OH2BH will be setting the
sail from the coast of Finland toward waters of Aland Islands in spite of
a poor weather prediction. You can expect their activity starting late
Thursday around 1400 UTC. QSL via JA8BMK."

P4, ARUBA (Special Event & Contest). Operators Bob/W3BTX (P49T) and Roy/W3TEF
(P4/W3TEF) will once again activate P41USA this year over the anniversary
date of the USA attacks on September 11th, 2001. Look for P41USA to be active
on all bands between September 8-17th. Activity will include the September VHF
Contest. All QSLs go to W3TEF.

PX8, BRAZIL (Rare State). Alex, PY2WAS, will be activating Amapa State
(one of the 27 Brazilian States, the rarest one) after 12 years without
any DX ham activity. Amapa is located in the estuary of the Amazona River
in the Amazonic Region. Callsign will be PX8W and activity will take place
between August 1-2nd. Activity will be on 80/40/30/20/17/15/12/10 meters
using CW and SSB. QSL cards must be sent via PY2WAS, directly or by the
Bureau. Please, check QRZ.com for more details.

QSL INFO AND NEWS.....
5Z4/RW1AU NOW QRT. Valery, 5Z4/RW1AU, is now QRT from Nairobi, and is back home in St.Petersburg. His work assignment spanned almost one year, from August 2008 through June 2009. During that period Val used the 5Z4RS Club Station in Nairobi as time allowed between work responsibilities to make almost 12,000 QSOs on 40-10m, using both CW and SSB modes. QSL info Update: Direct QSLs are now OK to Valery's home address below, but cards to RW1AU will also be responded-to via the bureau. Valery's address is: Valery Baisha, P.O.Box 16, St.Petersburg, 195426 RUSSIA. QSLs are also "OK" via K5XK. See QRZ.com for RW1AU for more details.

QSLS VIA LOTW: 3D2YA, 5N0OCH, A7/M0FGA, K5D, PY1OTO/PY0T, SV5/G0TSM, SV9CVY and WP2B

QSLS RECEIVED VIA MAIL: 5N0OCH, 5V7PM, 9J2YO, BW9/DL2JRM/P, CX7CO, DU3NXE, EA6AZ, EA9CF, EX8AB, HV0A, J88DR, K5D, PA4VHF, SV8/DL8MCA, TI7KK, UN6G, VK9LA and YJ0SS

QSLS RECEIVED VIA THE BUREAU: 9G5MM, UA6AN and TM2RWC

RARE STATE/GRIDS ON THE BIRDS. OPDX Webmaster John, K8YSE, will be active from Delaware, FM29, and possibly other Delaware grids between July 9-12th. Operations will be limited to the FM birds AO27, SO50 and AO51. He will look for a location that can see the western horizon and hopes to work those that did not work ND9M/P a few weeks ago. Equipment is a Kenwood TM-V7A mobile and an Arrow 146/437-10. QSL via K8YSE.
ADDED NOTE: John's son, Doug, KD8CAO, was active from EN86, Drummond Island, MI, during the past few days. He worked 17 stations on a AO51 pass at 2240z, July 7th. He was also active from EN86 on July 8th, which is a very rare grid. Doug should be active on Thursday, July 9th, from EN76. Doug is using his TH-D7AG and the Arrow antenna on the FM birds and a TS2000 with doppler control for the SSB birds.

S50, SLOVENIA. The Radio Amateur Association of Slovenia, Zveza Radioamaterjev Slovenije (ZRS), will be active as S50HQ in the IARU HF World Championship Contest as a Multi-Op/IARU HQ station entry. Look for the Multi-Op stations on the following bands and modes:

Contest
Call Band Mode Operators
----- ----- ---- ---------
S50HQ 10 SSB S53XX
S50HQ 10 CW S58A
S50HQ 15 SSB S52ZW,S57UN,S52EZ
S50HQ 15 CW S50U
S50HQ 20 SSB S50K
S50HQ 20 CW S57DX
S50HQ 40 SSB S51ZO,S51FB,S55HH
S50HQ 40 CW S52AW,S53F

VK9N, NORFOLK ISLANDS (Update). Tommy, VK2IR, team leader of the upcoming VK9NI operation (See OPDX.914), will operate as VK9IR while setting up before the team arrives on the island for 3 days between July 19-22nd. QSL via VK2IR.

VP9, BERMUDA. Kyle, WA4PGM, will once again be traveling to Bermuda between July 10-20th. He plans to be active in the IARU, NAQP RTTY, and CQ VHF Contest. Callsign was not mentioned, but possibly VP9/WA4PGM or a special callsign for the contests. QSL direct to WA4PGM, please use PO Box address.

WWF ACTIVITIES. According to an official/authorized representative of WFF program in England, Charlie, M0OXO, plans to organize a series of WFF expeditions in Britain during July as follows:
July 10-13th - Holy Island (GFF-013); callsign GB1HI
July 21-22nd - Pembrokeshire Coast (GFF-015); callsign MW0OXO/p
July 23-27th - Ramsey Island (GWFF-072), Wales; callsigns MC0SHL/p and MW9W
For more info on the "World Flora Fauna" (WFF) award, please visit:
http://www.wff44.com/en

YC0, INDONESIA. Hotang, YC0IEM, will be active as YC0IEM/9 from Bali (OC-022) between now and July 27th. Bands and modes of activity were not provided. QSL via IZ8CCW.

YR0, ROMANIA (Award Available). The YR0HQ team has announced that they will participate in the 2009 IARU World Wide Championship. They also announced that an award will be issued, free of charge, to all radio amateurs who will contact YR0HQ during the contest period. The YR0HQ award could be printed in different format sizes and colors in accordance with the applied class, depending of how many contacts have been made, as follows: Extra Class - 12 QSOs
1st Class - 9 QSOs
2nd Class - 6 QSOs
3rd Class - 3 QSOs
They are still designing the awards for the different classes. However, only one award will be given no matter how many contacts have been made. Send the application, along with the log extract, to one of the following addresses:
By mail to: FRR, YR0HQ AWARD, BOX 22-50, RO-014780 BUCURESTI 22 ROMANIA

the problem with libertarians, and many conservatives, is that so far
they have been successful in eluding the butterfly net.
further deregulation will either lead to more concentration, or
complete chaos. the 10th amendment is but a joke. it states that
states do have some rights, they are those the federal government does
not have at the moment. but the supremacy clause states the the
constitution shall reign supreme. so the fcc is a federal regulation,
that no state law can usurp.
and we know that you cannot shout fire in a crowed theater either, so
there is some regulation of speech. you need permits to assemble, etc.
and the airwaves are owned by the american people, so its a
nationwide law, a federal law. and the constitution shall reign
supreme.

THE SUPREMACY CLAUSE
Article. VI.
This Constitution, and the Laws of the United States which shall be
made in Pursuance thereof; and all Treaties made, or which shall be
made, under the Authority of the United States, shall be the supreme
Law of the Land; and the Judges in every State shall be bound thereby,
any Thing in the Constitution or Laws of any State to the Contrary
notwithstanding.

The preemption doctrine derives from the Supremacy Clause of the
Constitution which states that the "Constitution and the laws of the
United States...shall be the supreme law of the land...anything in the
constitutions or laws of any State to the contrary notwithstanding."
This means of course, that any federal law--even a regulation of a
federal agency--trumps any conflicting state law.

So the feds could pass a law declaring commercial slavery legal. It did
this for prisoner and military slavery in the 13th A.

it could never pass constitutional muster today. that was a silly
response. read the constitution, its really simple and easy to
understand.

Yes it is.

You're the one who says "...that any federal law--even a regulation of a
federal agency--trumps any conflicting state law". I offered a
possibility.

Amendment XIII [Proposed 1865; Ratified 1865]

Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Section 2. Congress shall have power to enforce this article by appropriate legislation.

If it's not called slavery, voluntary servitude is constitutional.
It's a matter of semantics.

what a crock. its not me that says it, its the constitution. every
crank i argue with on this point will not acknowledge the supremacy
clause, its in the constitution, read it. besides, congress has the
right to legislate, its in the very first article of the constitution,
and if the supreme court rules its constitutional, such as limiting
free speech, then its legal.

You don't get it. The Bill of Rights is the highest law of the land, and any violation against the Bill of Rights at the federal or state level is illegal. So the "Supremacy Clause" does not apply.

So let's look at the First Amendment again:

"Congress shall make no law regarding the establishment of religion or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people to peaceably assemble, and to petition the government for a redress of grievances."

And the Tenth Amendment:

"The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

Now, how can anyone think the the existence of the Federal Communications Commission is legal?

Ok, so you start off with an unsupported personal attack, not
exactly a
surprise but let's give you the benefit of the doubt, you might just
be irritated
this morning.

> further deregulation will either lead to more concentration, or
> complete chaos.

And you follow up with an unsupported claim about the future. Why
would
allowing anyone to broadcast concentrate ownership? The current
concentration
happened in a regime of intense regulation where any industry player
had to
please the government. Why would the opposite cause concentration of
ownership?

> the 10th amendment is but a joke. it states that
> states do have some rights, they are those the federal government does
> not have at the moment. but the supremacy clause states the the
> constitution shall reign supreme.

Which means that the 10th amendment rules supreme and the powers
reserved to the states cannot be usurped.

> so the fcc is a federal regulation,

Amateur Radio Newsline(tm) Report 1665 - July 10 2009

Amateur Radio Newsline report number 1665 with a release date of
Friday, July 10th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. IARU Region 3 cancels its 2009 Amateur Radio
Direction Finding championship games, AMSAT says that SuitSat-2 has
lost its suit but will still fly, transportation problems cause another
delay for the Glorioso Island DXpedition, Germany's Ham Radio show
likely now matches Dayton in attendance and a contest for D-Star users
is announced. Yes, we said a contest for D-Star users and you can find
out the details on Amateur Radio Newsline(tm) report number 1665 coming
your way right now.

(Billboard Cart Here)

**

RADIOSPORTS: IARU REGION 3 ARDF GAMES CANCELLED DUE TO SAFETY CONCERNS

Political unrest in Thailand has lead to the cancellation of a ham
radio direction finding event. Joe Moell, K0OV, reports:

--

Things haven't gone well in IARU Region 3, which encompasses most of
Asia and the Pacific islands. Thailand, also known as the Land of
Smiles, was scheduled to host those regional championships from October
29 through November 3 near Bangkok.

Two of USA's best radio-orienteers were planning to attend. But now
there's no smiling among the organizers, who reluctantly decided to
cancel the event due to increasing political unrest there. In the
streets, the Yellow Shirts, supporters of the present government, are
taking on the Red Shirts, who are loyal to the former Prime Minister.

The Radio Amateur Society of Thailand was concerned about safety of
competitors and spectators, so the championships were cancelled. There
is no time to schedule the Region 3 championships in another country.
However, IARU Region 1, which includes Europe and Africa, is still
planning to hold its ARDF championships from September 16 through 21 on
the Black Sea coast of Bulgaria. That will be immediately after the
Eighth World High Speed Telegraphy Championship at the same location.

For Amateur Radio Newsline, this is Joe Moell K0OV.

--

This announcement of the cancellation was made on Friday, June 26th by JA1HQG. He is the chairman of the IARU Region 3 ARDF Committee. In his statement JA1HQG said that there was insufficient time to make alternate arrangements to hold the championships in another Region 3 country this year. (K0OV, Southgate)

RADIO POLITICS: SECURITY MANDATES OPERATIONS CUTBACK AT 4U1ITU

A famed ham radio station at the literal heart of telecommunications is cutting back its operations due in part to security issues. The DX Newsletter says that International Telecommunications headquarters station 4U1ITU will be on the air a lot less in coming days.

The restricted activities are the result of a decision of the general assembly of the International Amateur Radio Club's decision made in May. Spokesman Gerald Lander, HB9AJU, says that there were several reasons led to this decision. This includes the increased levels of security at the ITU headquarters and a changed recognition of amateur radio in international communication. Lander did not say what this changed recognition or security issues are but he did add that another reason for the cutback in operation was 4U1ITU is no longer among the most wanted countries anymore.

Lander's statement says that the International Amateur Radio Clubs has now decided to focus its activities on special modes or conference delegates. Also that it will limit all overnight and weekend activities as much as possible. More about 4U1ITU is on line at http://life.itu.int/radioclub/ (DXNL)

HAM RADIO IN SPACE: SUITSAT-2 LOOSES THE SUIT PART BUT WILL STILL FLY

The SuitSat-2 ham radio in space transponder will not be in a space suit but the package will likely still fly in space. Due to storage considerations on the International Space Station, the two surplus Russian space suits in storage were discarded via the Progress Cargo Vessel. One of these suits was to be used to house the electronics for the upcoming SuitSat-2 mission.

But all is not lost. ARISS International has been informed that there is still space available for shipment of the SuitSat-2 electronics on a cargo flight to the I-S-S in January 2010. Also, a space-walk scheduled for April 2010 still has a 'SuitSat-2' deployment scheduled to be a part of it. As a result the AMSAT team developing the SuitSat-2 electronics on is focusing on completing the project in anticipation that deployment will still take place in Spring 2010, but using a different structure to house the flight package.

The discarding of the surplus space suits from ISS also removes the 'Suit' component of this ham radio in space deployment. AMSAT says that at some point a new project name will be used to reflect the

change in flight hardware configuration. (AMSAT)

**

HAM RADIO IN SPACE: SUITSAT-2 TEAM TO MEET - BUILD - AND TWITTER

And speaking of SuitSat 2, or what was to be called SuitSat-2, many members of the integration team were scheduled to meet in Phoenix, Arizona during the weekend of July 10th to the 12th. In a press release the team says that it expects to put all of the hardware modules together that have been developed in many parts of the country.

The Project Manager is Gould WA4SXM. He says that it is great to be at the point that they can start testing system operations with the hardware and software. You can keep up with the integration activities next weekend using Twitter at twitter (dot) com (slash) ggolulssmith. (ANS)

RESTRUCTURING: BELARUS HAMS GET NEW 40 AND 160 METER SEGMENTS

The 40 meter expansion continues around the world. Jeramy Boot, G4NJH, is in Nottingham in the UK with more:

--

Amateurs in Belarus has gained access to the extended 40 meter band. In the 7.1 to 7.2 MHz frequency range. Hams in that nation will be permitted to use SSB and CW with 500 watts out under normal operating conditions and up to a full kilowatt in contests with special authorization from that nations telecommunications regulatory authority the Belarus State Commission for Radio Frequencies.

In the same decision of the 160m band has also been extended for Belarus amateurs. The frequencies accessible are now 1,810 to 2,000kHz.

For the Amateur Radio Newsline, I'm Jeramy Boot, G4NJG in Nottingham.

--

The effective date on these changes for Belarus hams was the middle of this past May but have only now been made public. (GB2RS)

**

RESTRUCTURING: FRANCE TO EXPAND 40 METER SEGMENT

The French telecommunications regulator ARCEP announced on Saturday, June 27th, that 7.1 to 7.2 MHz will soon be available to the amateur service in that nation. Its reported that only one more signature is needed before official publication and implementation. (GB2RS)

**

BREAKING DX NEWS: GLORIOSO DXPEDITION DELAYED AGAIN

Some breaking news in the world of DX. Word that the long awaited Glorioso Island 2009 DXpedition has once again been postponed. This time because of flight problems.

According to several DX news sources, the runway at the airport on Grande Glorieuse Island suffers from stability problems. These have to be solved to allow the safe landing of larger aircraft.

Organizers think that the DXpedition could begin at the end of August, but have not yet released a new date. We will have more DX related information near the end of this weeks newscast. (OPDX, others)

RESCUE RADIO: 3.760 NO LONGER BEING PROTECTED FOR POLISH FLOODING

A follow-up to the use of 3 point 760 MHz in Poland following massive flooding in that nation. You may recall that hams around the world were being asked to keep that frequency as clear as possible in case it was needed for disaster relief communications.

Now, Greg Mossop, G0DUB, the IARU Region 1 Emergency Communications Co-Ordinator says that there is no longer any need to protect 3 point 760 MHz. He says that while there is still a risk of flooding in the South West of Poland, the Public Communications systems are all now operating normally. That said, if you happen to hear any station passing emergency traffic, then please leave the frequency clear and avoid causing QRM.

By the way, while not widely known outside of Europe, Polish stations make use of a slash D suffix on their callsign to indicate that they are working an emergency. This says G0DUB should help in case of any language difficulties. (Southgate)

**

RADIO LAW: NEW OREGON MOBILE CELLPHONE LAW EXEMPTS HAMS ABD CB OPERATORS

Oregon drivers soon will have to hang up their cellphones and texting devices under a new law that will ban the use of hand-held communications devices while driving, but mobile ham radio operations will not be affected. Bruce Tennant, K6PZW, explains whose in Oregon is covered by it and who is not:

--

Oregon House Bill 2377 prohibits driving while talking or texting on a hand-held cell phone. Once in force, drivers who violate the law could be fined up to $90.

Like a similar law in California, the Oregon measure permits adult drivers the option of using a cellphone with a hands free system. Also like California the Oregon law will forbid anyone to receive or transmit a text message while in motion. It also forbids drivers under the age of 18 from using any form of cellphone or texting device from a car in motion.

Oregon radio amateurs were aware of the measure early on and began a political drive to insure an exemption for mobile ham radio operations. In the version of the measure passed by both houses of the Oregon legislature their work was rewarded.

In addition to hams, also exempt are those operating a motor vehicle while acting in the scope of employment as a public safety officer and people operating a motor vehicle while providing public safety services or emergency services as a volunteer. Also exempt are those using 11 meter Citizens Radio or UHF Family Radio Service two-way radio gear.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

A spokeswoman for Governor Ted Kulongoski said he will sign House Bill 2377 into law. The effective date will be January 1st, 2010. (OregonLive, Oregon Legislative Website)

RADIO SAFETY: MICHIGAM HAM DIES IN FIELD DAY TOWER COLLAPSE

A Michigan ham has died following a tower collapse during antenna set-up on Field Day.

According to news reports, Larry Prelog, KE4PM, of Niles was helping to erect a thirty-foot high tower for the Blossomland Amateur Radio Association on Saturday, June 27th. He had climbed the tower when it collapsed under him and throwing him to the ground. He was airlifted to the Borgess Medical Center in Kalamazoo where he succumb to his injuries the following day.

A professional radio technician by trade, Larry Perlog was most recently employed as a telecommunications specialist for Lakeland Regional Health Care System. Throughout his career performed many tower climbs and was considered as being one of the most safety conscious climbers in the business. A family member described him as being very meticulous about being safe.

The Blossomland Amateur Radio Association is accepting donations to help the family. Its address is PO Box 175, St. Joe, Michigan 49085.

Larry Perlog, KE4PM, was age 57. (South Bend Tribune, others)

**

RADIO LAW: FCC AND LICENSEE AGREE ON LICENSE CLERICAL ERROR FIX

The FCC has modified the Amateur Radio Service license of Howard A. Schmidt by replacing Amateur Extra Class operator privileges with Technician Class operator privileges. This, after being notified of a clerical error by a VEC who had inadvertently filed an upgrade for him. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Back this past April 28th, the W5YI Volunteer Examiner Coordinator sent an electronic data file to the Commission requesting that Howard Schmidt's operator license for amateur Station WB7NUV be modified to upgrade from Technician Class to Amateur Extra and requesting a new sequential call sign. Based on this application, the Commission granted an Amateur Extra Class amateur service operator license on April 28th and assigned him the call AD7ZS.

Then on June 16th, W5YI VEC notified the Commission that it had made an error in the April 28th data file and that Schmidt had not qualified for an Amateur Extra Class operator license. The W5YI VEC asked the FCC to modify Schmidt's license to correct the operator privileges authorized. As a result of this information the regulatory agency proposed to modify the license to show Technician Class operator privileges, and to replace call sign AD7ZS with call sign WB7NUV.

The Order Proposing Modification was released on June 25th. Schmidt was given time to comment and appeal. On June 30th Schmidt informed the Commission that he did not object to modifying his license to show Technician Class operator privileges, but wished to retain his subsequently assigned call sign W7HAS.

On July 7th the FCC did just that. It modified Schmidt's license for station W7HAS by replacing Amateur Extra Class operator privileges with Technician Class operator privileges but permitted the Issaquah, Washington ham to keep the W7HAS vanity call.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, for the amateur Radio Newsline.

--

And as they say in the nations capital, this matter is now closed. (FCC)

** RADIO PRODUCTS: K9EID RELEASES AFFORDABLE PR-20 UTILITY VERSION MIC

If you have always wanted to try Bob Heil's famed PR-20 microphone in your hamshack but its high price was beyond your means, well now you can afford to own one. This is because the PR-20 has now been made a lot more affordable thanks to K9EID and his company Heil Sound Limited.

What Bob has done is to keep the PR-20 as it is. Just the way he developed it several years ago to be one of the best sounding vocal, announce and music pick-up microphones ever. So this PR-20 called the U T or utility model is no different than any other PR-20 except for the accessories and packaging.

In this case you get the PR-20 mic with a stainless steel grille, a foam windscreen and a matching microphone clip all in a zippered vinyl pouch. Not included with the U T model are the interchangeable gold, silver and black screw-on grill screens, nor the plush padded carrying case.

By leaving these items out Bob was able to lower the price of the PR-20 into the very affordable under a hundred dollar range. That's far less than some vendors charge for the mics that supposedly match the look of certain radio gear bit leave a lot to be desired in the area of on the air sound quality.

You can read the specs as well as see and hear the Heil PR-20 UT on line. Just take your web browser to http://heilsound.com/pro/products/pr20ut/ (PAR, ARNewsline(tm))

NAMES IN THE NEWS: MISSOURI SKYWARN MEMBER HONORED

Some names in the news. First up is MoKan Skywarn member Dwayne Beaver, N0SZP, of Carthage, Missouri,. HE has been presented with the National Oceanic and Atmospheric Administration award in honor of his 15 years as a cooperative observer for the National Weather Service.

Beaver runs the Carthage weather station that happens to be located in his own home. The Carthage Missouri weather station was first established on March 1, 1940, by the Congressional Statutes enacted by Congress in 1890. For years was located out at the Carthage animal shelter. Only after Beaver began weather observer duties on May 25, 1994, did it move to his home QTH.

Beaver's weather data collecting gear includes an eight-inch rain gauge, a wind gauge, various thermometers and anemometers. Most of this is top of the line weather gathering instrumentation that was provided to him. Beaver also has television cameras installed on the roof of his house looking south for any sign of menacing storm clouds.

The N0SZP weather station in Carthage is one of 96 such stations in 37 counties in Missouri and Kansas. There are about 10,000 such stations nationwide. (Carthage Press)

**

NAMES IN THE NEWS: VO1DTM NEW RAC VP FOR FIELD SERVICES

Radio Amateurs of Canada has a new Vice President for Field Services. He is Doug Mercer, VO1DTM, who replaces Sue Cooke VE3SUH, who was appointed by the RAC Board of Directors. This, to temporarily fill the

position when former Vice President for Field Services Bob Cooke, VE3BDB. He resigned that post to accept appointment as president of Radio Amateurs of Canada on February 24th. Mercer's appointment became effective on July 1st and will continue until December 31st which is the end of the current executive term. He may be contacted by email at vo1dtm (at) hotmail (dot) com. (RAC)

**

NAMES IN THE NEWS: ALBERTA CANADA GETS NEW CSM

Also from up North word that the Alberta Section of Radio Amateurs of Canada has a new Section Manager. This, in the person of Garry Jacobs, VE6CIA.

Jacobs ran unopposed and therefore no balloted election was necessary. He began a two-year term on July 1st succeeding Tom Martens, VE6TRM. (RAC)

**

NAMES IN THE NEWS: ZL2AMJ AWARDED RUTHERFORD THRPHY

Fred Johnson, ZL2AMJ, has won The New Zealand Institute of Physics Rutherford Trophy for 2008. This, for his work in developing the radio wave demonstration kits for schools.

The Rutherford Trophy was established in 1973 by the Mathematics and Physics section of the Radio Society of New Zealand's Christchurch Branch. Its purpose is to stimulate the development and improvement of simple lecture and laboratory demonstrations.

As 2009 winner, Johnson will receive a check for $200 New Zealand dollars. Development of his educational kit was supported by The NZART Radioscience Education Trust. Fred's kits and documentation are shown at http://www.nzart.org.nz/waves/radiowaves.html (NZART)

WORLDBEAT: DAYTON OR FRIEDRICHSHAFEN - WHICH IS BIGGER

Is the Ham Radio convention in Friedrichshafen, Germany, about to match or even replace Dayton as the worlds most attended amateur radio show? According to several sources this years Ham Radio had an official gate

of 17,400 visitors. That's up by 300 from 2008. Also, some 195 exhibitors and radio associations from 30 nations represented at the show.

So far, Dayton has not made public its official attendance figure, but many who regularly attend the Hamvention have speculated that 2009 saw about the same number of attendees as 2008 or maybe a few more. If that's the case then it would likely put Dayton and Friedrichshafen at least neck to neck. We will have to await the folks in Dayton making public their attendance figures to know for sure.

Meantime, you can make a note of the dates of the 35th Ham Radio will be from June 25th to the 27th in 2010 in Friedrichshafen, Germany. Hamvention 2010 will take place May 14th to the 16th 2010 at its usual home at the Hara Arena in Dayton, Ohio. (KH6VP, DJ0QN, others)

**

WORLDBEAT: SCOTISH D-STAT REPEATER SET UP WITH LOTTERY GRANT FUNDS

Scotland's Dundee Amateur Radio Club was recently awarded a grant of nearly 3,000 Pounds by the National Lottery Awards for all Scheme. This monies have been used to purchase the equipment required to provide a D Star digital UHF repeater to serve the ham radio community from Dundee, Angus and North Fife. Full information and coverage of this new D-Star Repeater can be found at the D-Star Scotland website at www.dstarinfo.org. (Icom Japan, Southgate)

ON THE AIR: CELEBRATING THE J. ROBERTO LEVY RADIO CLUB

On the air, listen out for 4C50C which is an unusual Mexican callsign that will be showing up on the satellites between now and August 31st. Its part of the Work All Colima special event currently taking place in the central Mexican state of Colima.

This event also commemorates the 50th anniversary of the creation of the J. Roberto Levy radio club in that state. To help in the celebration, XE1AO, XE1ATZ, XE1AY, and XE1J have been authorized by the Mexican telecommunications regulator to use 4C50C for satellite QSO's as part of this event.

XE50C will be the call used for terrestrial contacts during the event. For hams outside Mexico, the QSL manager for the both special calls is XE1J. The Mexican QSL bureau will take care of QSL requests from XE hams. (AMSAT, XE1AO)

**

ON THE AIR: HONG KONG, SPECIAL EVENT STATION

The 5th East Asian Games will take place on Hong Kong from Dec 5th to the 13th. Starting on July 1st the special commemorative callsign VR2009EAG has been on the air using SSB, RTTY, PSK31 and SSTV on 40 through 6 meters until the end of the year. QSL only direct via VR2XMT. (Southgate)

**

THE CONTEST CORNER: FIRST EVER D-STAR WORLD CONTEST JULY 25 - 31

On the radiosports scene, Icom Japan has announced that it will be sponsoring the first ever worldwide D-Star Contest. The event will run from July 25th to the 31st and there are several categories of entries including repeater and simplex. Multiple entry into different categories will be allowed.

10 winners will be selected from those participating and will receive either an IC-E80D or IC-80AD D-Star handheld as a prize. The results being announced on the Icom booth at the Tokyo Ham Fair 2009.

For more details and a list of contest rules, please visit the Icom Japan website. Its on-line at http://www.icom.co.jp/world/d-contest. A copy of the contest flyer can be downloaded at http://www.icomuk.co.uk/getFile.asp?categoryID508&cCID377&fFID$ 4) (Icom Japan)

**

DX

In DX, word that T32TV is a new operator on the air from Kiritimati. He has been heard on 20 meter SSB after 06:00 UTC. Please be patient

with him so as he is not only new to ham radio but news to pile-ups as well. QSL as directed on the air.

CR57FAP is a special call now on the air to celebrate the 57 years that the Portuguese airforce has existed. This station will be active though months end using SSB and some digital modes on 80 through 10 meters. The QSL manager is CT1REP.

W5KDJ, will be active from Madagascar through July 17th He is using CW and RTTY on 160 through 6 meters signing 5R8KD from the shack of 5R8FU. QSL as the operator instructs.

The Friuli-Venezia Giulia Region Group as IV3YNB is active from Grado Island. The operation ends on July 22nd. QSL this one also as directed on the air.

The Venezuelan 4M5DX Group says that it is planning a DXpedition to Lesotho sometime in July. Their callsign will be 7P8YV and the QSLs will be handled by IT9DAA. An exact date or other information was not available as we go to air.

6 meter enthusiasts listen up. HB9QQ, is now active from the Maldives as 8Q7QQ. In addition to his transceiver he has a linear amplifier and is on 50.183 operating the digital JT65A mode. Listen out for him around his moonrise and moonset in search of Sporadic E and EME contacts. QSL via HB9QQ. He will be there through July 11th.

Lastly, 3B8FQ has received approval and will activate St. Brandon Island as 3B7FQ in August. He will be departing Mauritius on August 10th, and returning from St. Brandon on August 30th. Operation will be CW and SSB on 40 through 10 meters. QSL 3B7FQ and via K5XK per the information found on QRZ.com. And you might want to go out of your way to work him. 3B8FQ believes this may be the last trip to St. Brandon for the next five years.

(Above from various DX news sources)

**

THAT FINAL ITEM: FIELD DAY COMES TO TV IN KC

And finally this week, if its not the best TV news coverage of Field Day it comes real close. We are talking about the 10 minutes spread across the news on Kansas City's Fox 4 that looked at every aspect of the Field Day operation by the K0GQ group in Raytown, Missouri.:

--

Audio: Reporter introduces ham radio. Hear it in the audio version of this weeks newscast available for download at www.arnewsline.org.

--

That's reporter Kim Byrns who hosted the coverage in a live remote broadcast from the Field Day site. Her guide was Rayton Amateur Radio

Club president Barb Rich, KGï¿½UT who began by explaining the role of ham radio in community service:

--

Audio: KG0UT explains role of hams in emergencies. Hear it in the audio version of this weeks newscast available for download at www.arnewsline.org.

--

Also interviewed was club member John Zimmerman who brought out some of his vintage gear to show. It was quickly evident that for him Field Day is a passion:

--

Audio: Zimmerman tells of his love of Field Day. Hear it in the audio version of this weeks newscast available for download at www.arnewsline.org.

--

You can see and hear the whole report posted to YouTube dot com. That's where we got the audio you just heard. Heres a link to it at http://www.youtube.com/watch?v=y3gRWG-EUGU (NF9L, QRZ.com, YouTube, others)

Yabut ... the Constitution itself says the federal government has no
powers other than those the Constitution delegates it; and the
Constitution does not delegate to the federal government the power to
regulate airwaves. So if the constitution reigns supreme, then there
shouldn't be any federal law regulating airwaves, right?

> THE SUPREMACY CLAUSE

> This means of course, that any federal law--even a regulation of a
> federal agency--trumps any conflicting state law.

But only if it's a constitutional law or regulation -- one delegated
to the federal government by the Constitution.

==> ARRL BOARD OF DIRECTORS, STANDING COMMITTEES TO MEET IN CONNECTICUT NEXT WEEK

The ARRL Board of Directors holds its second meeting of 2009 July 17-18 in Windsor, Connecticut, with Directors, Vice Directors and ARRL Board officers in attendance. The meeting will be preceded on Thursday, July 16 with meetings of the Administration and Finance Committee and the Programs and Services Committee.

The Administration and Finance Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee will review the

League's financial performance for the first half of the year and will receive the report of the outside auditors.

The Programs and Services Committee, headed by Midwest Division Director Bruce Frahm, K0BJ, studies, advises and makes recommendations for all programs and services provided by the League, including operating activities and the Field Organization. "All three Advisory Committees -- DX, Contest and VHF/UHF Contest -- have been busy since the last board meeting," Frahm said. "The PSC appreciates their deliberations on behalf of their stakeholders. Through a number of annual ARRL award programs, we have the pleasure of presenting motions to the board to recognize hams for their superior instruction, technical excellence, outstanding publicity and other achievements. The Emergency Preparedness and Response program, and EmComm issues in general, are taking more of the committee's time as we work to ensure maximum effectiveness of staff and volunteer efforts to work with served agencies. The PSC is excited about the upcoming release of the Advanced ARECC EmComm course (replacing Levels II and III) <http://www.arrl.org/cce/courses.html> with a new syllabus and some innovative presentation methods. We also look forward to the availability of a couple more awards via Logbook of the World (LoTW) <http://www.arrl.org/lotw/>. This online QSO confirmation tool is ever more popular. These are some of the interesting and challenging issues the committee will discuss."

The second day of the meeting will be devoted to a review and updating of the ARRL Strategic Plan. Per the Articles of Association <http://www.arrl.org/aabl.html>, the ARRL Board of Directors meets twice a year, in January and July.

==> ARRL TEACHERS INSTITUTE: "IT IS ELEMENTARY, IT IS ADVANCED, IT IS SOMETHING FOR EVERYONE"

Four sessions of the ARRL's Teachers Institute on Wireless Technology wrapped up in June <http://www.arrl.org/FandES/tbp/ti.html>. These sessions -- in Tucson, Arizona; Rocklin, California; Viera, Florida, and Berrien Springs, Michigan -- saw 52 educators complete the four day course. The California and Arizona sessions were held simultaneously, marking the first time that the ARRL has offered simultaneous sessions of the popular summer program for teachers. According to Education and Technology Program Coordinator Mark Spencer, WA8SME, the addition of two new TI instructors made it possible to hold two sessions at the same time. "With Miguel Enriquez, KD7RPP, and Nathan McCray, K9CPO, on board," Spencer said, "we are able to hold more sessions, and in turn, involve more teachers in the process of bringing wireless technology into their classrooms."

Tucson, Arizona -- June 15-18
At Pueblo Magnet High School in Tucson, Enriquez led a group of 16 local teachers through the four day curriculum that includes basic electronics, the science of radio, space in the classroom, microcontroller programming and basic robotics. The class included nine math teachers from Pueblo, three special education teachers from Pueblo,

one 4th grade teacher from a feeder elementary school to Pueblo, two graduate students/teaching assistants in fields involving electronics from University Medical Center (University of Arizona teaching hospital) and one University of Arizona employee commissioned to work with area schools and recruit high school students into space, science and mathematics programs at the University of Arizona.

"The majority of the participants had expressed an interest in learning electronics," Enriquez said. "In the coming year, I plan on following up the introduction they received at the TI by teaching electronics as part of a professional development program."

Enriquez said that each of the teachers will refer students whom they believe will be interested in ham radio to his "Radio, Space and Wireless Technologies" class he will begin teaching this fall: "Several teachers who have that period as their planning period also stated they would drop by to see the students in action and perhaps even help teach!"

Enriquez said that there are 16 "really excited teachers in Tucson right now. I intend to do everything I can to get them all involved in the application of the knowledge and procedures they learned this week. The only way we can really make the Teachers Institutes ultra successful is to coordinate a cadre of teachers who understand and apply the knowledge and tools the Teachers Institutes provides. Teacher collaboration is essential toward this endeavor."

Rocklin, California -- June 15-18
Spencer conducted the Teachers Institute held at the Parallax facility in Rocklin. "This group is more geographically diverse than the Tucson group," he said, "with teachers from nine states from coast to coast."

Since the Tucson and Rocklin sessions were held at the same time, Spencer said "we tried to connect the teachers in the Tucson session with the teachers in the California session via an AO-27 contact; satellites are part of the space in the classroom unit. Unfortunately, this was not successful due to unforeseen complications with accessing the satellite; however, a later attempt to demonstrate ham radio space technology was successful."

Viera, Florida -- June 23-26
Fourteen educators took part in the Teachers Institute in Florida, also led by Spencer. "This group was predominantly from the Southeastern US, but a few participants joined the group from Missouri and Virginia," he said. "The class was evenly split between male and female teachers. All grade levels were represented and six participants were either old-time hams or recently licensed in preparation for the Teachers Institute."

Spencer said to make the AO-27 satellite contact, they used call sign W1AW/4. "The weather even cooperated, and though hot and humid, the fox hunt outdoor activity went off without a hitch -- including a tornado warning that occurred the morning of the outdoor activities," he said.

"Thanks for everything. It was elementary it was advanced, it is something for everyone," one educator told Spencer. "I know I will be incorporating many of your topics into the classroom."

One of the participants summarized the experience simply: "This was the best in-service course that we have ever attended -- and we have attended a lot!"

Berrien Springs, Michigan -- June 29-July 2
McCray led 10 educators through the Teachers Institute at the Berrien Regional Education Service in Michigan. "I had a class that was half men and half women," he said. "Most were from the Midwest, but we did have two from New York State, one from California and one from South Carolina. We had representatives from all walks of the education world: Two elementary teachers, five junior high teachers, two high school teachers and one college professor. Only four were hams and two of them have expired licenses. The electronics knowledge level was low, but they were motivated and proved to be a joy to teach all week."

McCray said that the highlights of the week included a successful AO-27 contact and multiple contacts on 2 meters with local children who were attending a camp. "The work with the VOMs, protoboard and building the boe-bots were also big hits," he said. "We also went quite deep with the 'What's a Microcontroller?' unit."

One of the teachers told McCray that the Teachers Institute has changed the way she will present her curriculum. "I have been inspired to pursue my Technician license and to add more hands-on electronics activities into my 9th grade physical science class," the teacher said. "I would also like to set up a ham station in my school."

Another teacher called the Teachers Institute a "most rewarding experience. There is so much I learned about robotics, weather and ham radio operation. I have so much information to take back to the classroom and share with my students and fellow staff members. Thank you for this opportunity!"

A session of the ARRL Teachers Institute wrapped up Thursday, July 9 in Dayton, Ohio. The last session will take place at ARRL Headquarters on July 27-30.

==> AUGUST QST ON THE WAY TO YOUR MAILBOX

The August issue of QST is jam-packed with the news and information that today's Amateur Radio operator needs. From product reviews to experiments to contesting, the upcoming issue of QST has something for just about everyone. This issue also features the 2008 DXCC Honor Roll.

Allen Baker, KG4JJH, doesn't let the lack of sunspot activity get in the way of chasing DX. Find out his solution in his article "A 10 Meter Moxon Beam." Larry Cicchinelli, K3PTO, shows a compact way to power your equipment in his article "Four Output Bench Supply." If you like to operate from your car, you won't want to miss "The Ignition Switch" by Wayne Mahnker, WA5LUY.

Is your Amateur Radio club looking to get for publicity for your events? Check out "Putting Ham Radio in the Cable Spotlight" by ARRL Chief Operating Officer Harold Kramer, WJ1B, for some tips. In August, QST goes to new heights with two articles featuring high altitudes: "QRP from the Top of the Maritimes" by Mark Volstad, AI4BJ, and "Ham Radio in the Air" by Eskil van Loosdrecht, AB6BC/SM5SRR.

In his monthly column "This Month in Contesting," ARRL Contest Branch Manager Sean Kutzko, KX9X, discusses club participation in contests: "There are several reasons to join a contesting club," he tells readers. "Making new friends, meeting people to operate contests with and maybe even finding a little extra muscle when it's time to put up your tower are just a few. Contest clubs also combine their members' individual scores and enter many events in the Club Competition, hoping to win a commemorative gavel for their efforts." The results of the 2009 ARRL International DX CW Contest are also in the August issue. Find out about upcoming contests in this month's Contest Corral.

QST Editor Steve Ford, WB8IMY, reviews the Alinco DJ-175T 2 meter FM handheld transceiver. Ford said that the "Alinco DJ-T175T is a compact handheld with more than enough power (and features) to satisfy the needs of most hams. At around $99, it's a standout among low-cost handhelds." QST Product Review Editor Mark Wilson, K1RO, reviews four switching power supplies, saying "all of these supplies effortlessly deliver high current for your transceiver and accessories and include voltage and current metering and protection circuits. Although all of them have low conducted emissions (which can cause interference to your receiver) in the amateur bands, there are some significant differences at low frequencies."

Of course, there are the columns you know and expect in the August QST: Hints & Kinks, The Doctor Is IN, Amateur Radio World, How's DX, Vintage Radio, Hamspeak and more. Look for your August issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <http://www.arrl.org/join>.

==> IARU MEMBER-SOCIETIES ON-THE-AIR FOR IARU HF WORLD CHAMPIONSHIP

In this weekend's IARU HF World Championship Contest <http://www.arrl.org/news/stories/2009/07/02/10934/?nc=1>, IARU Member-Societies from all around the globe will be active and operating with special call signs. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, many of these call signs end in HQ, designating a national headquarters station; these can be worked as special multipliers in the contest. Kutzko said that IARU Administrative Council members will also be on and can also be worked for special multiplier credit: "If you hear a station giving R1, R2, R3 or AC as their contest exchange, that station represents part of the IARU Administrative Council or regional Executive Committee."

The Daily DX <http://www.dailydx.com/> has compiled a chart listing all of the known IARU Member Society call signs that are scheduled to be on-the-air for the contest:

With HQ stations from each continent on-the-air for the contest, this would be a great time to get your Worked All Continents Award <http://www.arrl.org/news/stories/2008/09/20/10346/?nc=1>.

Some stations have provided QSL information <http://www.arrl.org/news/stories/2009/07/06/10947/?nc=1>. The IARU HF World Championship runs from 1200 UTC Saturday, July 11 to 1200 UTC Sunday, July 12. For complete rules and forms, you can visit the IARU Contest Web page <http://www.iaru.org/contest.html> or the ARRL Contest

Web page <http://www.arrl.org/contests>.

==> 500 KHZ EXPERIMENTERS IN NORTH AMERICA, EUROPE GET ACTIVE

In the 500 kHz Experiment <http://www.500kc.com/> quarterly report for the period ending May 2009, Experiment Coordinator Fritz Raab, W1FR, reported that 21 stations are currently active. The FCC's Office of Engineering and Technology granted the WD2XSH experimental license to the ARRL in September 2006. In this quarter, the FCC only issued one new experimental license for 500 kHz, WF2XAU to Roy Croston, AB4OM. The FCC renewed WD2XGI to Mike Reid, WE0H.

In the spring of 2009, hams in the WD2XSH experimental group made one contact, bringing the total number of contacts to 336. Almost 500 reports were made to the 500 kHz Experiment's Web site, documenting 1051 hours of activity. Raab said more than 34,000 hours of activity has been logged on the Web site since the experiment's inception. Stations do not have to be members of the experimental team to post reception reports.

Raab said that due to increasing noise levels, activity has slowed some on the band, but "propagation conditions have remained generally good with a number of long distance receptions." He said that most of the quarter's activity came from WD2XSH/6, run by Pat Hamel, W5THT, of Long Beach, Mississippi, and WD2XSH/12, run by Mike Mussler, AI8Z, of Nederland, Colorado.

Individuals in nine other countries hold licenses to experiment in the 500 kHz band: Sweden, Germany, Czech Republic, United Kingdom, Belgium, Canada, Norway, Romania and Denmark.

To celebrate International Marconi Day on April 25, a Marconi official station using Marconi equipment completed a radio contact that was similar to those Marconi himself achieved many years ago. GB4FPR was operated from the Fort Perch Rock Marine Radio Museum near Liverpool <http://www.gb4imd.org.uk/fortperch.htm>. The operators used Marconi marine equipment and CW, receiving a 539 report from VO1MRC in St John's, Newfoundland <http://www.ucs.mun.ca/%7Ejcraig/mrcn.html>. GB4FPR was transmitting 1 W ERP on 502 kHz and receiving the Canadian station on 3566 kHz in this transatlantic crossband QSO.

On June 18, Norwegian coastal station LGQ in Rogaland and LM500LGN in Bergen made a QSO on 500 kHz. LM500LGN is a special heritage license arranged by the NRRL, Norway's IARU Member-Society, and Norkram. According to Raab, this is the first issuance of a license specifically for heritage operations.

Find out more information on the ARRL's 500 kHz Experiment in the July/August 2007 issue of QEX <http://www.arrl.org/qex/2007/07/raab.pdf>.

==> NEW SECTION MANAGER APPOINTED IN OHIO

Frank Piper, KI8GW, of Pickerington, has been appointed Section Manager of the ARRL Ohio Section. He will serve the balance of the term of Joe Phillips, K8QOE; Phillips passed away on June 20 <http://www.arrl.org/news/stories/2009/06/22/10901/?nc=1>.

Piper has moved up the ranks in ARES leadership positions by first serving as Emergency Coordinator from 2002-2003 and then as District Emergency Coordinator from 2003-2006. He was promoted to Section Emergency Coordinator, serving in that position until 2008. Piper has also served as an Official Emergency Station in the ARRL Field Organization since 1997.

According to the Rules and Regulations of the Field Organization, when a vacancy in the office of Section Manager occurs between elections, the position is filled by appointment. Membership and Volunteer Programs Manager Dave Patton, NN1N, in consultation with Great Lakes Division Director Jim Weaver, K8JE, made the appointment effective July 7. His term of appointment continues through September 30, 2010.

==>SOLAR UPDATE

Tad "If it happens the Sun is shining bright" Cook, K7RA, this week reports: Finally, some sunspot activity to report -- and not one of those phantom spots that appear one day and vanish the next. Sunspot group 1024 first emerged a week ago on July 3 with a daily sunspot number of 17 and the magnetic signature of a new Solar Cycle 24 spot. Over the next few days, it grew more rapidly and became larger than any sunspot group in the past two years. Today, July 10, it should pass over the Sun's western limb and disappear. Sunspot numbers for July 2-8 were 0, 17, 24, 26, 23, 21 and 18 with a mean of 18.4. The 10.7 cm flux was 66.5, 67.3, 71, 71.6, 68.9, 71.3 and 70.8 with a mean of 69.6. The estimated planetary A indices were 3, 5, 3, 6, 4, 5 and 6 with a mean of 4.6. The estimated mid-latitude A indices were 2, 3, 2, 4, 3, 3 and 3 with a mean of 2.9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by T.S. Eliot's "The Song of the Jellicles" <http://poetry.poetryx.com/poems/789/>.

==>IN BRIEF:

* This Week on the Radio: This week, the IARU HF World Championship is July 11-12. The NCCC Sprint Ladder is July 10. The FISTS Summer Sprint and the Feld Hell Sprint are July 11. The SKCC Weekend Sprint and the ARCI Summer Homebrew Sprint are both July 12. The NAQCC Straight Key/Bug Sprint is July 16. Next week is another NCCC Sprint Ladder on July 17. The North American QSO Party (RTTY), the DMC RTTY Contest and the CQ Worldwide VHF Contest are July 18-19. The CQC Great Colorado Gold Rush is July 19. The Run for the Bacon QRP Contest is July 20 and the SKCC

Sprint is July 22. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration remains open through Sunday, July 26, 2009, for these online course sessions beginning on Friday, August 7, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* Six New Co-sponsors Pledge Support for HR 2160: Earlier this week, HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 -- gained six new Congressional co-sponsors, bringing the total number to 14: W. Todd Akin (MO-2), Michael Arcuri (NY-24), Michael Honda (CA-15), Thaddeus McCotter (MI-11), Charlie Melancon (LA-3) and Peter Welch (VT). Originally sponsored by Representative Sheila Jackson-Lee (TX-18), HR 2160 is also sponsored by Roscoe Bartlett (MD-6), Madeleine Bordallo (Guam), Bart Gordon (TN-6), Brett Guthrie (KY-2), Mary Jo Kilroy (OH-15), Zoe Lofgren (CA-16), Blaine Luetkemeyer (MO-9) and Bennie Thompson (MS-2). Check the ARRL Web site <http://www.arrl.org/news/stories/2009/05/12/10818> for information on how to encourage your Congressional representative to sponsor HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>.

* Tenth Annual "Night of Nights" On the Air July 12: The Maritime Radio Historical Society's 10th annual CW-only Night of Nights <http://www.radiomarine.org/non10.html>, commemorating the history of maritime radio, is scheduled for Sunday, July 12 at 1701 PDT (Monday, July 13 at 0001 UTC). Years ago, the maritime mobile bands were populated edge-to-edge with powerful coast stations that operated from virtually every country on every continent. The ships of world trade and

the great passenger liners filled the air with their radiograms, as well as their calls for help when in danger on the sea. Now those bands are largely silent. But once a year, the MRHS returns stations KPH, KSM and KFS to the air. Other stations, including WLO, KLB, NMC, NOJ and NMN, often join in. Calls from ships at sea make the event seem like the golden age of maritime radio has returned. The MRHS's club station, K6KPH, will be on-the-air on several frequencies, receiving signal reports from other amateur stations. The K6KPH operators are seasoned commercial operators with years of experience "sitting the circuit" and will give amateur stations the experience of what it was like to work a real coast station. More information regarding the event, including suggested frequencies, is available on the Night of Nights Web page <http://www.radiomarine.org/index.html>.

* NTS Official Jim Leist, KB5W (SK): Jim Leist, KB5W, a longtime leader of the ARRL National Traffic System (NTS) <http://www.emergency-radio.org/what_nts.pdf>, passed away after a long illness on June 22. He was 74. Leist, who lived in Gautier, Mississippi, was Chair of the NTS Central Area Staff, as well as a longtime ARRL Net Manager; he also served as the Mississippi Section Traffic Manager (STM) from 1987 to 1998. "Jim was an elite CW op and Manager of Region Net 5, Cycle 4, for most of the last 20 years and probably longer," said Phil Sager, WB4FDT, Manager of the NTS Third Region Net, Cycle 4. "I worked him several times each week for the six years I lived in Louisiana, and have enjoyed working him again the past five or so years on my Alpha TCC sked." A US Marine, Leist served in the Korean and Vietnam Wars; he was awarded the Silver Star for gallantry in action during the Vietnam War. "He led reconnaissance missions during the Vietnam War, and he never lost a man," Sam Sitton, W5CU, told the ARRL. "Jim won the Star by single handedly taking out a machine gun nest while his patrol was occupied elsewhere. He was a true American hero." Leist was interred in the National Cemetery at the Quantico Marine Corps Base in Virginia with full military honors.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from ARRL HQ. To subscribe, unsubscribe or change your address for
e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. (Check "Temporarily disable all
automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You
must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

its why i consider you a crank. the concentration happened after
further deregulation of the media in the mid 1990's.

and article one of the constitution clearly states that we have a
legislation, that can legislate laws, regulations, and treaties. the
constitution also clearly states that the federal government has the
right to regulate the states, and commerce.

and the
> Constitution does not delegate to the federal government the power to
> regulate airwaves.

it sure does. read the supremacy clause that is part of the
constitution, that clearly states that any law, regulation, or treaty
that the federal government legislates, is the supreme law of the
land, and any federal law, regulation, or treaty trumps state law.

So if the constitution reigns supreme, then there
> shouldn't be any federal law regulating airwaves, right?
>

are you that dense? are you impervious to facts, logic, and reason?
if the constitution reigns supreme, which means federal law, then its
the law of the land.

2097. [MsgID 100180] Help needed with a Cobra CIR2000a Internet Radio receiver

Newsgroup: rec.radio.amateur.misc
Date: 2009-07-11 12:54:23 UTC
From: Theodoros Tsioupros <tsioupros@gmail.com>
Message-ID: <h3a2t6$3tu$15@mouse.otenet.gr>
Source record: 6561

Dear friends,

I am quite a novice Usenet user, so please be a bit patient with my
writing and compliance to the rules. I promise to improve later on.
I am writing from Greece to request your precious help with an Internet
Radio receiver and CD player I am planning to purchase.
It is manufactured by Cobra Electronics Ltd and its exact name is
"Cobra CIR2000a". I consider it to be almost perfect, as it satisfies
all my demands.
The problem is that unfortunately I haven't yet noticed any local
dealers of Cobra Electronics here in Greece, or even in any other
European country, so I would be grateful if you could tell me if there
are really any. For example the radio is available on amazon.com and
some other e-shops in the United States, but it can't be found in any
European e-shop.
If there aren't any European dealers of this product, it means that it
will need to be imported from the United States, but in this case its
price is going to be very expensive. This is due to the high customs tax
rates which are enforced by the authorities when importing products from
countries outside the EU.
If the Cobra CIR2000a can't be purchased from anywhere in Europe, then
please let me know of other similar products that combine a
traditional FM radio together with a Reciva compatible Internet radio
receiver and a CD player.

*** Earnest Request ***

If it 's possible, please forward a copy of your answers to
tsioupros@gmail.com as well, because I don't have permanent Internet
access and as a result it 's a bit difficult to scan the Usenet for answers.

Thank you very much for your attention and patience,
Best and warmest regards to you all,
Th. Tsioupros (tsioupros@gmail.com)

Don't be a retard. You're throwing 'supremacy clause' around as if
putting it into a word salad somehow validates your argument.

Don't you realize the context of the supremacy clause? If you can't
answer the question as to what context the supremacy clause is in,
then you are a fucking retard and should get off of my internet.

THE SUPREMACY CLAUSE
Article. VI.
This Constitution, and the Laws of the United States which shall be
made in Pursuance thereof; and all Treaties made, or which shall be
made, under the Authority of the United States, shall be the supreme
Law of the Land; and the Judges in every State shall be bound thereby,
any Thing in the Constitution or Laws of any State to the Contrary

notwithstanding.

The preemption doctrine derives from the Supremacy Clause of the Constitution which states that the "Constitution and the laws of the United States...shall be the supreme law of the land...anything in the constitutions or laws of any State to the contrary notwithstanding." This means of course, that any federal law--even a regulation of a federal agency--trumps any conflicting state law.

are you that dense to. you just soiled yourself in public. you would think even a idiot that can just barely cling to life, would not have posted what you just did. the supremacy clause gives the federal government its authority stupid. other wise the states would simply ignore the federal government, its laws, regulations, its treaties.

2100. Ohio/Penn DX Bulletin #916

The Ohio/Penn DX PacketCluster
DX Bulletin No. 916
BID: $OPDX.916
July 13, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NJ1Q, N3TL, NG3K, WY3H, N4AA & QRZ DX, KH6BZF, N7OU, K8YSE, W0SD, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA5RM, F5NQL & UFT, F5PFP, F6DWQ, HA0HW, I1JQJ/IK1ADH & 425 DX News, IA5K team, IZ2LSC, JI6KVR IOTA-JA News, PA1AW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3LYC and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-July, through Sunday, 12th-July there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV/A, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND (Ops Needed). Frosty, K5LBU, is once again looking to put together a team of operators to do the CQWW DX SSB Contest in October 2010 from Swaziland. This would be a 10 or 15 day operation with the contest in the middle. It would be possible to do a Multi-2 set up, but he doesn't think they could do a Multi-Multi operation. He would like to hear from anyone that might like to go. He plans to

use one callsign for the contest and the rest of the time you can operate with your own 3DA0 callsign. His E-mail address is: frosty1@pdq.net

4U_ITU, ITU HQ. Gerald Lander, HB9AJU, reports (edited) "that the callsign 4U1ITU will be put on the air only very seldom in the upcoming future. The restricted activities are the result of a general assembly of the International Amateur Radio Clubs (IARC) in May. Several reasons led to this decision including increased security levels at the ITU headquarters, a changed recognition of amateur radio in international communication and last but not least, 4U1ITU does not belonging to the most wanted countries list anymore. The IARC decided to focus their activities on special modes or conference delegates and to limit all overnight and weekend activities as much as possible. Finally the new antennas were installed on top of the Varembe building." You can see them at: http://public.fotki.com/sparky73/any/ham_radio/4u1itu-2009-antenna/

5R, MADAGASCAR (IOTA Op). Eric, F6ICX, will be active as 5R8IC from Saint Marie Island (AF-090) between November 17th and December 15th. Activity will be on 80-10 meters. QSL via his home callsign.

A4, OMAN (IOTA Op). Members of the Royal Omani Amateur Radio Society will be activating Suwadi Island (AS-112) as A43SI during the RSGB IOTA Contest (July 25-26th). QSL only direct to A47RS: P.O. BOX 981, PC 113 Muscat, OMAN.

ANTARCTIC/ARCTIC UPDATED SCORES POSTED. Michel/F6DWQ and Mehdi/F5PFP from the "French Polar Team" announced that the Antarctic and Arctic Challenge scores/results have been posted on the following Web pages:
Antarctic Challenge scores:
http://www.french-polar-team.fr/Antarctic_Challenge_results.php
Arctic Challenge scores:
http://www.french-polar-team.fr/Arctic_Challenge_results.php
Polar Challenge (Ant + Arct) scores:
http://www.french-polar-team.fr/Polar_Trophy.php

CP, BOLIVIA. Toni, EA5RM, is expected to be working in Bolivia during the month of August. He informs that he expects to be on the air during his spare time as CP1XRM.

CS28, PORTUGAL. Operators Jose/CT1EHX, Joao/CT1FNT, Antonio/CT1GFK, Al/CT1GPQ, Miguel/CT1IUA and Rui/CT2IHP will be active as CS28MCF during the 28th International Motard Meeting of Faro between July 13-19th. All operators are members of the Algarve STAR DX Team. Their activity will be on 80-6 meters using CW, SSB and RTTY. QSL via CT1EHX.

EG, SPAIN (Special Event). Look for special event station EG1SMP to be on the air between July 24th and August 7th, especial during the ham gathering in San Miguel de Pedroso between July 25-26th. Activity is by the UREBU (URE section of Burgos). Reference numbers: Los Restos del Antiguo Monasterio de San Miguel (MVBU-1259) and (DME-09048). QSL via EA2BT, by the Bureau.

FP, ST. PIERRE AND MIQUELON. Operators Tim/M0TDG and Martin/G3ZAY will be active as FP/homecall from Miquelon (NA-032), September 24-27th. Activity will be on the low bands using CW and SSB, depending on equipment availability (and airline baggage limits). QSL via their home callsigns. ADDED NOTE: Martin will also try to activate McNutt's Island (NA-126) a Canadian island on September 29th.

FH/TO7, MAYOTTE. Willi, DJ7RJ, has received the callsign TO7RJ to be used for the period between September 22nd and October 21st, 2009. He will be using the callsign FH/DJ7RJ from October 21st until he leaves the island on October 25th. Activity will be on 160-10 meters, possibly 6m, using CW and SSB. QSL via his CBA.

IOTA NEWS.....
AF-004. Operators Federico/EA8DN, Maria/EA8BJJ, Rosa/EC3AJW and Ricardo/EA4YK will be active as AO8Y from the Island of La Palma (DIE S-012, WLOTA L 1648) during the RSGB IOTA Contest (July 25-26th). QSL via EA4YK, direct or by the Bureau. Visit their Web site at: http://www.madrono.net

AS-040. Operators JA6VDB and JE6AQP will be active as homecall/6 from Nozaki Island, Ojika Island and Goto Island in the Nagasaki Prefecture, between August 8-12th. Activity will be on 40-15 meters using CW and SSB. QSL via their home callsign, direct or by the Bureau.

AS-107. Members of the HSDXA (Thailand DX Association) will activate Si Chang Island as HS0AC/p during the RSGB IOTA Contest (July 25-26th) between 1100z, July 25th and 1100z, July 26th. QSL via HS0ZFZ. Operators mentioned are: Cy/HS0GBI, Winit/HS1CKC, Son/HS6NDK, Choon/E20HHK, Supote/E20NTS, Manfred/HS0ZEU, Swen/HS0ZFZ, Nathan/HS0ZHG, Mike/HS0ZHS, Paul/HS0ZIN, Juthathip/HS3SAD, Supaporn/HS7ZVC, and possibly others.

AS-185. VERY RARE (#2).. A group of operators will be active as 3W6C from Con Co Island, Vietnam, between April 10-18th, 2010. Operators mentioned as of today: Team Leader Hans-Peter/HB9BXE, Jan/DJ8NK, Hansruedi/HB9BHW, Rene/HB9BQI, Christine/HB9BQW, Hansjurg/HB9DKZ, Paul/HB9DST/AA1MI, Friedhelm/HB9JBI, Matthias/HB9JCI, Peter/HB9PJT, Rolf/HB9TVR, Casimir/HB9WBU, Eddy/XV1X and Michal/XV9DX. The team is looking for sponsors. Complete details are available at: http://www.3w6c.qrv.ch

EU-008. William, GM4UBJ, will be active as homecall/p from the Isle of Skye (IOSA NH07, SCOTIA CN14, WLOTA 1626) between July 19-31st. His activity will be holiday style, but he plans to participate in the RSGB IOTA Contest (July 25-26th). QSL via his home callsign, direct, by the Bureau, e-QSL and LoTW.

EU-016. Gert, OE3ZK, will be active as 9A/OE3ZK from the Island of Korcula (ACIA IC-767, CIA-19, IOCA CI-041, MIA MC-163, WLOTA 1315), July 21-30th. Activity will be on all bands using SSB, CW and RTTY. Check the IOTA frequencies. QSL via his home

callsign, direct or by the Bureau.

EU-024. Giacomo "Jack", IZ3DBA, will be active from Sardinia (IIA SD-001, MIA MIS-035, WLOTA 1608), August 1-10th. Activity will be on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-028. Members of the "IA5K team" will be active from Elba Island (IIA LI-020, MIA MI-022, WLOTA 0609) during the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Max/IZ5BTC, Stefano/IZ5MMN/KI6RVQ, Gabriele/IZ5FDD/KI6RVR and possibly other SWLs. QSL Manager is IZ5BTC.

EU-028. Paolo, IK2MLS, will be active from the Elba Island (IIA LI-001, MIA MI-022, WLOTA 0609), August 3-10th. Activity will be holiday style on all HF bands, plus VHF operation. QSL via his home callsign, direct or by the Bureau.

EU-032. Ed, GW3SQX, will be active using the special callsign TM7O from the Island of Oleron (DIFM AT-025, WLOTA 1369), July 25-27th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th) with operations on all HF bands, mostly CW. QSL direct to GW3SQX.

EU-036. Chris, OE9ICI, will be active as LA/OE9ICI from Kvenvaer, Hitra Island (WW Loc. JP43EM) between July 19th and August 1st. Activity will be on all HF bands. QSL via his home callsign, direct or by the bureau (No eQSL!).

EU-041. Giacomo "Jack", IZ3DBA, will be active as IM0/IZ3DBA from Maddalena Island (IIA OT-008, MIA MIS-013) between July 28th and August 1st. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://www.iz3dba.it

EU-055. Operators Henk/PA3FMC and Ruud/PE1BTV and Hans/PH0V will be active as LA/homecall from Utvaer island (WLOTA 2373, WW Loc. JP21GA), August 10-18th. Look for LA/PE1BTV and LA/PH0V to be active on VHF-MS from JP21GA and LA/PA3FMC on HF. QSL via their home callsigns, direct or by the Bureau.

EU-067. Nick, SV1CEI, will be active as homecall/8 from Kea Island in the Kyklades (Cyclades) IOTA group until August 25th. QSL via his homecall, direct or by the bureau.

EU-077. Luis, EA1NT, will be active as AO1I from the Island of Lobeira Grande (DIE O-133, WLOTA L 4092), July 24-26th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operations will be on all HF bands. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://www.urlc.net/Lobeira2009.html

EU-088. Operators Ole/OZ2TF, Klaus/OZ7KDJ and Erik/OZ9V will be active as OZ8MW/p from Anholt Island (DIA NK-001) between July 22-27th. Activity will be on 80/40/20/15/10 meters before the IOTA Contest. They will be in the IOTA Contest. Also, look for activity on 6 meters using a FT-920, 5 element beam at 15 meters. QSL via OZ8MW, direct or bureau.

EU-120. Members of the Medway Reynet and operators Chris/M0DOL, Morris/ M0MAO and Gary/M0NNH will activate special event station GB100SS from Isle of Sheppey (WAB TR15, LOC. JO01kj) on all bands between July 25-27th. Activity is to celebrate the 100th anniversary on the fly machines in that country. Read about the details at: http://www.qrz.com/db/GB100SS

EU-125. Axel, DL7VEA, will be active as OZ7VEA from Romo Island [aka Roemoe] (DIA NS-001), August 2-21st. Activity will be on all HF bands and modes. QSL via his home callsign, direct or by the bureau.

EU-157. Stephane, F8CFE, will be active as homecall/p from the Ile Agot (DIFM MA-009) during the RSGB IOTA Contest (July 25-26th). No bands/modes of activity or entry category was provided. QSL via his home callsign, direct or by the Bureau.

EU-170. A Hungarian group will take part in the RSGB IOTA Contest (July 25-26th) again this year. Activity will be from Pasman Island (IOCA-085, JN73QW), Croatia, between July 20-29th. Before and after the contest you can find them on all HF bands and 6 meters using CW, SSB and the Digital modes. The operators mentioned are: Laci/HA6NL, Zsolt/HA6PS, Al/HA7JJS and Laci/HA7PL. All operators will sign 9A/homecall except Laci/HA6NL; he will sign 9A6NL. QSL via HA Bureau or direct by the operators home addresses on QRZ.com. For direct requests, please enclose SAE and 1 (valid, new) IRC or 2 USDs. Without this, the QSL will go via the bureau.

EU-174. Gabi, HA1YA, will be active as J48YA from Thasos [aka Thassos] Island (GIOTA NAS-037, MIA MG-124, WLOTA 4186, WW Loc. KN20HS) between August 25th and September 8th. Activity will be on the HF bands, 4m, 6m and 2m. QSL via his home callsign.

NA-067. Operators Frances/AJ4JQ and Jonathan/KJ4IZB hope to be active as AJ4JQ from Hatteras [aka Pea] Island (USI NC-005S, WLOTA 3913) between July 12-18th. Frances reports "This is just a vacation, so I can not guarantee that I or my Dad, KJ4IZB, will be on the air from any particular place at any particular time, but I know we will visit Hatteras and Roanoke islands, so I will try to bring the gear along. QSL via home call (QRZ.com).

NA-067. Members of the North Carolina Contesters Club (NR3X) will be active as N4A from Core Banks (USI NC-033S, WLOTA 0596, Pamlico County, North Carolina), July 22-27th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operators

mentioned are: Nate/N4YDU, Keith/W4KAZ, Barry/K4CZ, Dan/N3ND
and Jack/W0UCE. They will use 100 watts into wire antennas
and expect to be on or near the usual island/IOTA frequencies.
QSL direct to N4YDU (QRZ.com).

NA-137. Members of the Long Island DX Society (N1LI) will be active
from Long Island (USI ME-083S, Cumberland County, Maine) during
the RSGB IOTA Contest (July 25-26th). QSL via K1DG: Doug Grant,
PO Box 301, Long Island, ME 04050 USA (SASE would be appreciated).

NA-139. Stan, N2US, will be active as homecall/p from Assateague
Island (USI VA-024S, Accomack County, Virginia), and the
lighthouse (ARLHS USA-021, WLOTA 4206) during the RSGB IOTA
Contest (July 25-26th) as a Single-Op/12 Hour/Low-Power entry.
QSL via his home callsign (QRZ.com).

NA-143. Bill, N5LYG, will be active from Galveston Island (USI TX-001S,
Galveston County, Texas) during the RSGB IOTA Contest as a
Single-Op/Mixed-Mode entry. QSL via his home callsign (QRZ.com).
Visit his Web site at: http://www.n5lyg.org

NA-230. Cezar, VE3LYC, will attempt his most difficult operation to
date: activating for the first time the Ottawa Islands (IOTA
NA-230) group in Hudson Bay. Name of the specific island and
exact dates are not available at this time, but they will be
announced a few days in advance of the operation. Cezar seeks
to be on the air for 3 full days during the period July 25th
to August 10th using the callsign VY0O. Ottawa Islands are
12-14 hours away from shore and transportation requires a large
boat. This is not a leisure trip. Traditionally, unstable
weather patterns, unknown local landing conditions, high seas,
the presence of ice chunks in the Bay, potential presence of
polar bears (since islands are cooled by cold winds in summer),
and other logistical aspects make this trip extremely challenging.
Cezar will work towards a successful attempt but wants to convey
to the island chasers that this operation may be aborted as
safety comes first. At this time Cezar seeks group and individual
donors who understand and appreciate the difficult and expensive
task ahead and are willing to be part of this effort. All
those who will contribute financially will be acknowledged. He
mentions that past support from EU stations has been dis-
proportionate with their QSO demand (45% of QSOs but only
25% support for VY0A), but hopes that this situation will
improve. Direct and bureau QSL instructions will be announced
in due course. He requests, "I am desperately trying to find
support for this operation. Any help will be so much appreciated."

IS0, SARDINIA (EU-024). Operators Rastislav/OM3BH, Jozef/OM3GI, Jozef/OM3NA
and Tibor/OM3RM will be active as IS0/OM8A during the RSGB IOTA Contest
(July 25-26th) as a Single-Op(???)/All-Band/High-Power/DXpedition entry.
QSL via OM2VL.

J6, ST. LUCIA. Howard, WB6WXE, is now active as J6/WB4WXE until July 20th. He was spotted on 6 meters this past weekend using a 6 element beam and 350 watts and operating from a site which is at 2,000 feet ASL. Howard is expected to be active on other bands when 6m is quiet, especially on 17 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For July 13-19th).....
13 AN SOLAR REFERENCE
14 AN ---------------
15 AN AN - Above Normal/Geomagnetic Level is QUIET
16 AN HN - High Normal/Geomagnetic Level is UNSETTLED
17 AN GEOMAGNETIC REFERENCE
18 AN ---------------------
19 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
SPECIAL ADDED NOTES (by editor KB8NW): CONGRATULATIONS to my good friend, "BIG" Cleveland Indians fan and propagation guru Lee Wical (KH6BZF) and Sandra Merrick on their marriage in January of this year. Your editor (and XYL) attended a special gathering this past weekend where both Lee and Sandy renewed their vows amongst family, friends and their classmates during a "1952 Mentor Class Reunion" on a ranch in Leroy Township, Ohio. Everyone had a great time with plenty of eats and congratulated/wished Lee and Sandy the best. Your editor has been communicating with Lee for many years via the InterNet, and this was the first time I got to meet him. It was a real pleasure to meet him and his new wife. Lee is an Ohio native and was lucky as a young boy to be picked as a runner-up batboy during the 1948 World Series (which was last time the Cleveland Indians were World Champions). Lee plans to live in Hawaii during the winter and in Ohio on Sandy's ranch during the summer. He is currently active as KH6BZF/8. Also, look for Lee to be active very soon from Manitoulin Island (CISA ON-001), in Ontario, Canada.

KL7DX 2008 DXPEDITION DVD AVAILABLE. A DVD on the July 2008 Russian Robinson Club operation to Clevelenad Volcano on Chuginadak Island, is now available at: http://nsiradio1.stores.yahoo.net/kl20dxdvd.html It is on sale now for 19.99 USDs.

KP4, PUERTO RICO. Joachim, KP4EE, will be active as KP4KE during the CQ WW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via OK1DOT.

N3, UNITED STATES (Special Event). Operators Tom/WY3H and his son Ethan/ W3IRS, and also John/K3WWP will operate N3AQC (NAQCC and FISTS Club Sation) as a special event station on August 13th from the USS Requin (Submarine) which is dry docked in the Alleghney River in Pittsburgh, Pa. Their operating times will be roughly between 10 a.m. to 2 p.m. (+/- a few minutes) EST (1400-1800z). A special QSL card will be sent to all contacts. Operation will be on 20 and 40 meters only in the CW portion of the bands or course.

NH0, MARIANA ISLANDS. Koji, JL3RDC, will be active as NH0DX during the CQ WW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Band entry. QSL via JL3RDC direct ONLY (no Bureau).

PACIFIC TOUR. Bill, N7OU, informs OPDX that he will be making two stops in the Pacific starting mid-September and during October. His schedule is as follows:
September 18-30th - Bill will be making a lightweight, solo DXpedition to Chatham Island, signing ZL7/N7OU. Activity will be on 80-10 meters, CW only, using 100w into a vertical. QSL via N7OU.
October 5-30th - Bill will be on Rarotonga Island (OC-013), in the South Cooks, doing volunteer work again and signing E51NOU during his spare time. Activity will be on 80-10 meters, CW only, using 100w into a vertical. QSL via N7OU.

QSL INFO AND NEWS.....
AT1HQ via VU2PTT and LoTW. Special ARSI callsign for the IARU Contest.

CR5HQ via CT1REP (see QRZ.COM). Bureau cards can be requested at: rep@rep.pt (no need to send a card via bureau!)

Log and pictures are available from the CR6A activity from the Fuzeta Est Mole Lighthouse: Pictures at: http://algarvedx.com
Log at: http://algarvedx.com/logonline

DA0HQ via the Bureau.

PA6HQ via PA3CAL. A special PA6HQ Award is available for stations working PA6HQ on six (6) bands, 10/15/20/40/80/160 meter, in any mode you want. More info at: http://pa6hq.veron.nl

SX0HQ via LoTW or by the Bureau. Activity by the RAAG (Radio Amateur Association of Greece).

TM0HQ via the REF-Union bureau to manager F8CRH

TZ6EI LOGS. Ed, W0SD, reports that the logs for TZ6EI (six meters only) are online thanks to Chris, DL5NAM. You can link-up to them at: http://www.w0sd.com/mali/mali.htm
There were 546 unique six meter contacts made. 22 QSOs with NA. He states, "Hopefully we can get the HF logs online in a week or so."
The TZ6WI Web page has posted DXpedition statistics, distances, pictures etc... as well as the link to the online logs. QSL via W7XU.

VY0A QSL STATUS. Cezar, VE3LYC, reports that he has mailed all the direct QSL requests for the VY0A NA-186 operation. More information is available on the QRZ.com Web page.

ZW5HQ via PY5CA, direct or by the bureau, please indicate via PY5CA.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3D2YA, 4L1FX, 4O3A, 5V7PM, BS7H, D44TD, DP1POL, ER5GB, ET3JA, J75KG, L21D, R1ANR, S21DX, S04R, TG9AHM, V8AQM, YA5T and YN2BQ

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SPECIAL EVENTS (Moon Landing Celebration!).....
In celebration of the 40th anniversary of the first manned moon landing, the special event callsign VE3MOON will be operating from July 14-27th. They will be operating satellites from the Canada Museum of Science and Technology during much of this period, usually between 1400-2000z. They will also be working HF from various locations throughout the duration of the event. Currently, they do not have a set schedule, but they do have multiple radios and operators. Popular satellites among their operators are AO-51, SO-50, VO-52, FO-29, and the ISS. There will be a QSL card for this special call. QSL management is through VE3OIJ.

Look for the special callsign K5E to be active on AO-7 at 1332z, July 16th, and will remain active on the FM and CW/SSB satellites, NO-44 (if operational) and the ISS in packet or voice (if either system is active) through 1650z on July 24th. Those dates and times coincide with the duration of the Apollo 11 mission to the moon which began 40 years ago next Thursday, July 16th. K5E seemed the perfect choice for a special event callsign to celebrate the 40th anniversary of "one small step for man .... one giant leap for mankind."
K - the 11th letter of the alphabet.
5 - the call district of Houston, location of Apollo 11 Mission Control.
E - Eagle, the Apollo 11 lunar module.
During the satellite passes, the operator will use the special callsign and will ID as "Kilo 5 Eagle". Glade Schroeter, WA3MVQ, is donating high-quality full-color QSL cards which will be used to confirm all contacts with K5E. Stations wishing to confirm will send their request to Tim, N3TL, with an SASE. The card will be standard QSL size and a picture of the QSL card is expected to be posted on QRZ.com. Work K5E one time to claim a special QSL card. There will be no endorsements of any kind, and only one QSL will be issued per valid amateur callsign.

TK5, CORSICA. Laurent, F5MUX, will be active as TK5UX between July 12-26th. QSLs are preferred via eQSL <http://e.qsl.cc>. Visit his Web page at: http://www.f5mux.com

TO2, ST. PIERRE AND MIQUELON. A team of Brazilian operators will be active as TO2FH between May 19-23rd, 2010. Operators mentioned so far are: Fabio/ PY2AAZ/AC2AC, Anderson/PY2TNT, Fred/PY2XB and Alex/PY2WAS. More details are forthcoming.

TO2, MAYOTTE. A team of Brazilian operators will be active as TO2FH between September 3-15th, 2010. Operators mentioned so far are: Fabio/ PY2AAZ/AC2AC, Anderson/PY2TNT, Fred/PY2XB and Alex/PY2WAS. More details are forthcoming.

VIDEO AVAILABLE ON THE WEB. Andrea, IZ2LSC, informs OPDX that a short video clip regarding the activation of HV5PUL done in June 2009 is

available on Web at: http://www.youtube.com/watch?v=wuRbBc4GyP0

ZP15, PARAGUAY (Special Event). Look for special event station ZP15MWC
to be on the air July 13-19th. Activity is to celebrate the 15th Mennonite
World Conference held in Asuncion, Paraguay. Activity will be on 40, 20,
15, 10 meters SSB during the hours of 1300-2200z. Suggested frequencies
are: 7080, 14290, 21350 and 28450 kHz (+/- QRM and conditions permitting).
The single station will be operated by: Rudolph/ZP5RL, Ernst/ZP1BD and
Helmich/PA0HEL. QSL via PA0HEL.

FEDERAL COMMUNICATIONS COMMISSION

ENFORCEMENT BUREAU

SOUTH CENTRAL REGION

Miami Office

P.O. Box 520617

Miami, FL 33152

June 29, 2009

Scott Hidnert

Miami, FL

NOTICE OF UNAUTHORIZED OPERATION AND

INTERFERENCE TO LICENSED RADIO STATIONS

Case Number: EB-09-MA-0101

Document Number: W200932600058

On June 15, 2009, the Miami Office received a complaint from the Miami-Dade County Police Department ("MDPD") regarding interference to a frequency used by MDPD police officers. Agents from the Miami Office confirmed by direction finding techniques that radio signals on 867.0625 MHz were emanating from 720 NW 103rd St. Miami, FL. The agents from this office confirmed that these radio signals emanating from a cell phone jamming device were interfering with MDPD communications. During the inspection of the equipment, you admitted to owning and operating the cell phone jamming device. Upon completion of the inspection, you voluntarily relinquished the equipment to the MDPD officers.

Persons operating or using radio transmitters must be licensed or authorized by the FCC, pursuant to Section 301 of the Communications Act of 1934, as amended. In addition, radio transmitting equipment must comply with FCC rules. Section 333 of the Act prohibits willful or malicious interference with any radio communications of any station licensed or authorized by or under the Act or operated by the United States Government. In addition, Section 302(b) of the Act, and Section 2.803(a) of the Commission's rules, prohibit the manufacture, importation, marketing, sale or operation of devices deliberately designed to jam or disrupt wireless communications. The Commission has issued two Public Notices specifically stating that the sale and use of transmitters designed to prevent, jam or interfere with the operation of cellular and personal communications service ("PCS") telephones is unlawful. Section 303(n) of the Act also authorizes agents of the Commission to inspect all radio installations to determine compliance with Commission rules.

The operation of the device utilized by you constitutes a violation of Sections 333, 302(b), and 301 of the Act, as described above. Such operation may subject you to substantial monetary forfeitures, in rem arrest action against the offending radio equipment, and criminal sanctions including imprisonment. Because unauthorized operation

creates a
danger of interference to important radio communications services,
and may
subject the operator to severe penalties, this notice emphasizes
the
importance of complying strictly with these legal requirements.

UNAUTHORIZED OPERATION OF THIS RADIO STATION MUST NOT RESUME.

You may respond with any information you believe relevant to this
warning
within (10) days from the date of this warning. Your response
should be
sent to the address in the letterhead and reference the listed case
number. Under the Privacy Act of 1974, we are informing you that
the
Commission's staff will use all relevant material information
before it to
determine what, if any, enforcement action is required to ensure
your
compliance with FCC Rules. This will include any information that
you
disclose in your reply.

You may contact this office if you have any questions.

Michael Mattern

Resident Agent

Miami Office

The tragedy of Darfur is not over.

Africa must break its cycle of poverty.

Africa needs a better transportation infrastructure.

London businessman Saifee Durbar plans to build a railway from Cameroon, on Africa’s west coast, to Sudan, on the east coast.

The railway will go through the Central African Republic.

Saif Durbar says this project will complete the vision of the Suez Canal.

You can find project updates:

>
It happened after certain regulations specifically limiting
concentration of ownership were abandoned, but as I stated the
industry was still highly regulated. The concentration did indeed
happen in a regime of intense regulation where any industry player had
to please the government. Indeed with the government able to grant
(or deny) expansion that highly profitable due to economies of scale
pleasing the government became even more important.

>
You have no idea what you're talking about. The supremacy clause
doesn't nullify the 10th amendment nor could it. Otherwise the
constitution would be inactive. It's an AMENDMENT, that means it
overrides the previous sections of the constitution.
>
> > > so the fcc is a federal regulation,

>
> you can read correct? are you impervious to facts logic, and reason.

I can read and you've not presented any logic or reason and present
facts
that are irrelevant. The 10th is an AMENDMENT.

Amateur Radio Newsline(tm) Report 1666 - July 17 2009

Amateur Radio Newsline report number 1666 with a release date of Friday, July 17th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia will launch all student made ham-sat, the United States Senate wants a complete inventory of the entire electromagnetic spectrum, 40 meter expansion is delayed in some nations and we announce this years Amateur Radio Newsline Young Ham of the Year. Find out who it is on Amateur Radio Newsline(tm) report number 1666 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: VK TO LAUNCH BLUESAT - A DIGITAL HAM SATELLITE

A new ham radio digital satellite is being designed and built down-under solely by students at Australia's University of New South Wales. Its called BLUEsat and Frank Lusa, VK2FJL has its story.

--

The satellite is a small cube measuring approximately 260mm on each side, excluding antennae, and weighs around 14kg.

Powered by fixed solar panels on each face, it will carry a flight computer, radio transmitters and receivers, a power-control system, battery packs for when its orbit places it in the Earth's shadow, magnets to passively stabilize the satellite and align it with the Earth's magnetic field, and will be controlled via a dedicated communications ground station at UNSW.

BLUEsat will be placed in an approximately circular orbit at an altitude of around 750km that will take it over the poles. At this altitude, the satellite will travel around the Earth at a rate of around once every 90 minutes.

What Will BLUEsat Do? Once in orbit BLUEsat will be a digital amateur radio satellite, which means that voice and data files can be uploaded to it by any amateur radio operator in the world over which the satellite passes. These same files can be retrieved by other operators in either real time, provided that the sender and receiver both have line-of-sight contact with the satellite, or at some other time when the satellite has travelled around to a different part of the world. This allows voice and data communication to and from remote areas

without internet access.

Success for BLUEsat is not measured solely by the payloads they aim to place in space. Overarching objectives are to show that a group of volunteer students can build satellite; to show that Australia can make a significant contribution to space hardware engineering; to provide students in Australia with hands-on space engineering and project management experience and to provide an extension to the worldwide digital amateur radio service.

--

As far as anyone is aware, BLUEsat is believed to be the only university satellite project in the world with an entirely volunteer student team. There are no full-time members and no direct academic supervision. (WIA News)

**

RADIO LAW: US SENATE WANTS TO KNOW WHAT SPECTRUM IS IN USE

The United States Senate Commerce Committee wants Congress to get an inventory of how the nation's spectrum is being used and managed. To accomplish this the committee has passed a measure backed by Communications Subcommittee Chairman to have the Federal Communications Commission and the National Telecommunications and Information Administration report to Congress how much spectrum is used in each band and how. This includes what portions require a license for use and what portions allow unlicensed use.

The measure has now been sent to the full Senate though it's unclear if or 166-law-spectrum-congress when it would get on the calendar for a vote. According to several news sources the administration supports the measure as officials consider the lack of available wireless airwaves a barrier to widespread mobile Internet access which is a priority for President Barack Obama. A companion bill was introduced in the House of Representatives two weeks ago as well. (Published news reports)

**

RADIO LAW: RSGB TELLS OFCOM TO STOP LISTING LICENSE DATA ON THE WWW

The Radio Society of Great Britain is not only saying no to publishing a government database of hams on the Internet, its telling telecommunications regulator Ofcom to stop. Jeramy Boot, G4NJH, is in Nottingham in the U-K with more:

--

The RSGB has written to Ofcom raising concern at the release, in full, of the detailed amateur radio database on their web site.

This, Ofcom says, follows a number of requests from radio amateurs for the details to be released under the Freedom of Information Act.

After consultation with the Information Commissioners office, the RSGB has learned that Ofcom could be in breach of the Data Protection Act in releasing these personal details, which include the name and address of each individual radio amateur in electronic form, on their website and hence to the wider community.

The RSGB's main concern is the security of the details, which can now be downloaded by any individual, radio amateur or not.

Im Jeramy Boot, G4NJH.

--

But it may be a little to late to put the proverbial genie back in its bottle. Ian Able, G3ZHI, says that has already received a license from Ofcom allowing him to publish the UK Amateur Radio Callbook data. He already has it on line for download at his website. Its in cyberspace at http://www.qsl.net/g3zhi/cb1.html (GB2RS, G3ZHI)

**

RESTRUCTURING: 40 METER EXPANSION DELAYED IN SOME AREAS

Dozens of countries in International Amateur Radio Union Regions 1 and 3 have yet to adopt the 40 meter extension of 7.1 to 7.2MHz in their domestic regulations. In IARU Region 3 only Australia, China, Japan, Korea and New Zealand report having finalised the band extension for their radio amateurs. A similar story of progress is evident in IARU Region 1, with Belarus, France and South Africa being the latest to gain the band extension.

Some are already question if the slow progress sending a wrong message to errant broadcasters? While the vast majority of shortwave broadcasting community have left the band, some have not. Among those persisting is the recently returned Laos National Radio with Cambodian, English, French, Thai and Vietnamese language broadcasts on 7.145 MHz. Its 10kW transmitter has been heard on the west coast of the USA and also into Europe. (Amateur Radio Victoria)

**

RADIO POLITICS: ARRL BOD MEETS IN CONNECTICUT

As we go to air, the ARRL Board of Directors is holding its second meeting of 2009. The location is Windsor, Connecticut, with ARRL divisional Directors, Vice Directors and Board officers in attendance. The meeting was preceded on Thursday, July 16 with meetings of the Administration and Finance Committee and the Programs and Services Committee. More on the outcome of these meetings on next weeks Amateur Radio Newsline report. (ARRL)

**

RESCUE RADIO: HAM RADIO HELPS AVOID FIREWORKS ACCIDENT

Swift action by some northern Indiana hams may have saved lives and prevented serious injuries during a public fire works display. Jack Parker W8ISH has the story.

--

A joint training exercise between LaPorte and Porter counties in northwest Indiana ended with a bang last week. According to Ken Osborne-N9ZIP, members of the two RACES groups set up a command post to help pass health and welfare information during the festival and fireworks display in Michigan City. The all day event went smoothly as RACES members relayed information about lost children and minor medical needs to the Incident Command Unit near the park..

That routine day blew up in their faces when the fireworks show started. Gun shots were fired in the large crowd, directly in front of one of the RACES information stations. RACES immediately called in a report of gun shots to the Incident Command post. Park police quickly responded to the area. .

Officials said the crowd of over 10-thousand people began panic as they ran from the gun shots. During the mass confusion, several fights broke out. RACES members immediately relayed the fight locations to Incident Command. As the stampede rushed from the area one pregnant woman fell and was trampled by the crowds. She went into labor. Again, one of the Amateur Radio operators rushed to her aid and called for medical assistance. At last report the expectant mother was doing OK.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH.

--

Local officials commended the Porter and LaPorte hams on their quick action and on the professional manner in handling multiple incidents. (W8ISH)

**

RESCUE RADIO: HAM RADIO HELPS AVOID RAILWAY ACCIDENT

Ham radio may have helped to avoid a railway accident. One involving a group of Illinois youngsters who decided to try to joy ride on a commuter train.

Paul Streeter, AB9PS, had been attending a meeting of the National Railway Historical Society in Downers Grove, on Friday night, July 10th. As his train home departed the station, his son David, N9JFE, and two other club members who had waited with him noticed that a couple kids had jumped onto the engine. Sensing the urgency in the situation, N9JFE used the emergency provision of the FCC's Amateur Service rules. He tuned his HT to the railroad's frequency to notify the engineer that he had some unwanted kids clinging to the locomotive.

The engineer brought the train to an emergency stop. As soon as the train came to a halt, the crew jumped out when it chased the kids away.

Now here's the kicker. Apparently the kids took refuge right in front of the Downers Grove Police Department after they jumped off the engine. In fact, they were seen sitting on the agency's steps. The engineer then asked the dispatcher to notify the police of what had transpired and of the youngsters where-abouts.

AB9PS says that in his opinion that the situation was definitely life-threatening. He says that the train could have reached 60 mph even though it was a local. At that speed the kids would not have been able to hang on. (KC9RP)

ARNEWSLINE ANNOUNCES 2009 YHOTY WINNER: ANDREW KOENIG, KE5GDB

A 15 year old from Houston, Texas, has been selected as the 2009 Amateur Radio Newsline Young Ham of the Year. This, based on his dedication to public service as well as working to bring kids, teens and adults into the hobby. Amateur Radio Newsline's Mark Abramovich, NT3V, happens to chair the committee that made the decision and has the story of Andrew Koenig, KE5GDB:

--

NT3V: "Andrew, you are the 2009 Young Ham of the Year."

KE5GDB: "You, you, you, you're serious?"

NT3V: "I'm very serious."

KE5GDB: "Wow! Oh, my God. All my friends here at Seabase are going to be really impressed. Oh, my God!"

And, that's how it sounded when we caught up with Andrew Koenig at the Boy Scouts of America Florida Seabase where he had just arrived with members of Troop 848 from Houston for a week of scuba diving adventures.

The Life Scout, who is just shy of his 16th birthday, is working to earn the Eagle rank and was ecstatic to learn he had been chosen for special recognition by Newsline.

Before telling him he had been selected as the Young Ham of the Year, I asked Andrew how he might feel if he were to receive such an award. He said it would be a nice honor to share with his mentors, including his chief Elmer and award nominator - Nick Lance, KC5KBO, who has helped several NASA astronauts earn their ham tickets.

"Young Ham of the Year would probably go in the book of things that I've done in ham radio that they are really impressed with," Andrew said. "It would just mean a lot to me.

"Nick Lance, he hasn't really been pushing me to do anything. A lot of the stuff I discover on my own. But, he's one of the big roles, one of the key aspects in ham radio and it would give him a really good feeling to know that one of his students went on to get youth ham of the year."

Andrew holds a General class license and passed the test for his first ticket back in 2005 while a sixth-grader at the Westbrook Intermediate School in Houston where Lance - who is retiring in August from the Johnson Space Center - teaches an amateur radio license class.

He is the son of Joe and Lauri Koenig of Houston. Joe is KE5JQA and got licensed as a result of Andrew's interest. Andrew also has a younger brother, Kyle.

Among the achievements Andrew has accomplished is helping with an Amateur Radio on the International Space Station contact at the Westbrook Intermediate School.

"I actually helped test a lot of the equipment for the contact, since it was a telebridge contact," Andrew recalled. "The station that was actually contacting the ISS was in California, I believe.

"And, we were in Clear Lake, Texas. So, for some reason the phone patch wasn't working properly. So, I had to actually go into one of the school phones and test that - I think about 15 minutes worth of testing before the contact started. And, finally right on time, we got it going again and everything was working just fine."

The contact with Astronaut Clay Anderson, KD5PLA, was a success - thanks to Andrew.

He also helped facilitate a terrestrial contact between Astronaut Chris Hadfield KC5RNJ/VA3OOG and students at two Canadian schools using an IRLP node he had built and placed in his bedroom closet.

Andrew, who enjoys VHF and UHF operations, tried and tried and was finally successful in making his own contact with the space station using his handheld radios and portable Yagi.

Here is an edited portion of his QSO with Astronaut Mike Fincke, KE5AIT aboard the space station:

KE5GDB: "Kilo Echo 5 Golf Delta Bravo."

NA1SS (KE5AIT): "Kilo Echo 5, this is NA1SS, go."

KE5GDB: "NA1SS, KE5GDB, I'm Echo Lima 29. I'm actually about three miles away from the Johnson Space Center. And, it's pretty cool to talk to you."

NA1SS (KE5AIT): "Wow, we know where the Johnson Space Center is. Yeah, Sandy and I work, live right nearby and then he's visited there often. He's waving right now. And, we hear the weather in Houston is pretty good, over."

KE5GDB: "It's about 60 degrees out right now and I'm outside in my back yard with two handheld radios and I'm having a good time."

Andrew also has participated in training astronauts at the Johnson Space Center on ARISS contacts with schools, conducting simulated QSOs with them playing the role of the school students.

Andrew also has been active with public service events through the Clear Lake Amateur Radio Club in suburban Houston where he is immediate past vice president.

Among his achievements, creating his own bicycle mobile setup.

"I had tried putting a handi-talkie on my bike and I wasn't impressed with the results because the rubber duck just didn't get out out as far as I wanted to," Andrew recalled. "A couple months before, I had ordered my first mobile rig the FT-7800.

"And, actually a couple weeks before I decided to put it altogether on the bike. I had bought a brand new gel cell battery. So, I thought, you know, hey I've got this remote that came free with the radio, I've got the battery, I've got an antenna, I got everything I need to make it happen. So, I just mounted it all on the bike with zip ties and I had 50 watts mobile on a bike for VHF and UHF."

That attracted some attention from CQ Magazine which was looking for photo ideas for its 2008 calendar. The magazine dispatched CQ photographer Larry Mulvehill WB2ZPI to Houston and Andrew's bicycle mobile became the calendar photo for September 2008.

Andrew is going into his sophomore year at Clear Lake High School where he is a member of the school's marching band. He is also a member of the Seabrook Citizen's Emergency Response Team. Andrew really is into computers and creating websites and he maintains his own website started when he was in middle school. Check out www.thathamkid.com.

It offers kid-friendly information about ham radio, along with a jokes page and a lot more about Andrew's activities in amateur radio - including his working satellites.

His Elmer and nominator for this award, Nick Lance, KC5KBO, summed it up best when he said: "Andrew has truly been an outstanding student of amateur radio.....He is an inspiration both to his fellow students and to hams of all ages."

We here at Amateur Radio Newsline agree and we're proud to have selected Andrew as our 2009 Young Ham of the Year.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Andrew Koenig, KE5GDB, will receive his award at the 2009 Huntsville Hamfest slated for the weekend of August 15th and 16th at the Von Braun Center in Huntsville, Alabama. We hope to see many of you there. (ARNewsline(tm))

NAMES IN THE NEWS: HAMVENTION 2010 ANNOUNCES LEADERSHIP

Lee Boeckerman, W8LFB, has been named General Chairman for the 2010 Dayton Hamvention with Mike Kalter, W8CI, to serve as assistant general chairman. Both have extensive Dayton Hamvention experience. Boeckerman served as assistant general chairman in 2009 and Kalter was on the administrative staff and handled spokesperson duties. Both also have a variety of experience with previous Hamvention's.

Boeckerman is reportedly now assembling his team of Chairmen for the various committees needed to plan and execute next years outing. Many experienced volunteers from 2009 are returning for another year. Hamvention 2010 scheduled for May 14th to the 16th at Hara Arena in the Dayton suburb of Trotwood, Ohio. (Dayton Hamvention¿½)

**

NAMES IN THE NEWS: NEW SECTION MANAGER APPOINTED IN OHIO

Frank Piper, KI8GW, has been appointed Section Manager of the ARRL Ohio Section. Before being selected as the new S-M, Piper held a number of ARES leadership positions including that of Emergency Coordinator from 2002 to 2003 and then as District Emergency Coordinator from 2003 to 2006. He was promoted to Section Emergency Coordinator, serving in that position until 2008. Piper has also served as an Official Emergency Station in the ARRL Field Organization since 1997. He will serve the balance of the term of the late Joe Phillips, K8QOE, who passed away on June 20th. (ARRL)

**

NAMES IN THE NEWS: VK HAM MAKES QUEENS BIRTHDAY HONORS LIST

Syd Griffith VK2AHF has been recognized in the Queen's Birthday honors list. Griffith was awarded the Public Service medal for his outstanding public service, particularly in innovative and sustained contribution to the enhancement and improvement of the technical capabilities of New South Wales Police. He will be presented with his medal by the Governor General later in the year. (WIA News)

**

NAMES IN THE NEWS: DX'ER K4UEE IN KENYA ON HUMANITERIAN MISSION

Bob Allphin, K4UEE, spent the past week in Kenya doing a short term mission work that included ham radio. Before his departure Alperin told the Ohio Penn DX Newsletter that he was traveling to a village located about 3 to 4 hours north of Nairobi where he would be involved in several different projects including production of a video and demonstrating amateur radio in the local high school.

By way of background, Bob Allphin, K4UEE, has visited ninety-five DXCC entities and operated from fifty-two. He has participated in twenty eight DXpeditions, including seven from "top 10" DXCC entities. Alperin is also an active contester and has participated in thirty-three contest DXpeditions. Six of these efforts resulted in new World Records.

While Bob had some gear with him on this trip, his main emphasis was the humanitarian service projects he traveled half way around the world to assist in. See: http://www.410bridge.org for more information. (OPDX)

THE CHANGING OF THE GUARD: HRK SAN DIEGO MANAGER TOM MCDUFFIE KM6K - S.K.

Tom McDuffie, KM6K, the manager of Ham Radio Outlet's San Diego store became a Silent Key on Monday, July 13th. This, according to Chip Margelli, K7JA, who also passed along a bulletin posted to the San Diego Amateur Repeater Association by Tom's wife Susan.

In her note she said that her husband took ill on Sunday the 12th while driving on State Route 52. He was able to pull to the side of the road before he lost consciousness. The California Highway Patrol found him in his locked vehicle a few hours later. They had to break a window to enter and get Tom out and transport him to Sharp Hospital in San Diego. He was diagnosed as having suffered a stroke and succumb the following morning.

At airtime memorial services for Tom McDuffie, KM6K, have not been announced. (K7JA)

**

EMERGING TECHNOLOGY: LAPTOPS AND NOTEBOOKS REPLACING DESK PC'S

The age of the desktop PC appears to be over. This as its more portable cousins, the laptop and notebook surge ahead with consumers clamoring for light-weight computers in funky designs for use at home, in cafes and on the heir to work.

Not a single desktop model figured on online shopping portal Amazon.com's top 10 selling PC and hardware list the weekend before Christmas 2008. However seven laptop models made the list.

Those who watch trends in the computer industry say that this is yet another sign that the former dominance of desktop PCs is fading. The reason being that advances in wireless technology and lower prices make laptops and notebooks the preferred option for millions of PC users around the world. (Science OnLine)

**

WORLDBEAT: CROSS EUROPE HAM TREK

MM0DFV has started out on a 7000km mobile journey from Scotland through France, Belgium, Germany, Poland, Belarus, Russian, Kazakhstan and back. He has his HF gear with him and operating as he goes. His main mode of operation will be PSK and he plans to have different QSL cards for each new stop. The trip should last until August 10th. QSL as directed by MM0DFV. (GB2RS)

**

HAM RADIO IN SPACE: SUITSAT-2 ENGINEERING CONFERENCE A SUCCESS

A follow up to last weekends meeting in Phoeniix, Arizona, to work on the engineering aspects of the SuitSat-2 or whatever the project will be renamed now that the space suit aspect of SuitSat-2 is gone.

According to System Engineer, Gould Smith, WA4SXM, progress was occurring on several fronts. Smitth says that the command receiver boards were assembled and ready for testing and were integrated for the first time. The team was able to report that the receiver is now providing good input to the transponder and as a result the transponder became operational and produced CW, FM and BPSK signals.

Also at the meeting issues regarding housing SuitSat-2 have began being addressed. This, to replace the spacesuit jettisoned into space from the International Space Station that was supposed to carry SuitSat-2. One that cab survive the deep cold of space. (ANS)

**

RADIO IN SPACE: TWITTEREING THE ISS VISIBLE PASSES

Two Dutch journalists have built a established a Twitter page to let people know when a visible ISS pass is coming. To use it, go to twitter.com/twisst. To which we will add that it appears that Twitter is becoming an all but indispensable tool to anyone involved in ham radio in space. (ANS)

**

HAM RADIO IN SPACE: COMMEMORATING THE FIRST MANNED LUNAR LANDING

AMSAT-North America will mark the 40th anniversary of the first manned lunar landing with a special event on the AO-51 ham satellite. On Monday, July 20th and into early July 21st UTC, AO-51 will transmit a special message commemorating the event during evening passes. The message will be transmitted on the 435.300 MHz FM downlink. A special AO-51 QSL will be available to ground stations who copy the message on the downlink.

Also, use of the call VE3MOON has approved by Industry Canada for use in celebration of the 40th anniversary of the first moon landing. It through the 27 of July. QSL requests go too VE3OIJ, direct, via the bureau or using eQSL. (ANS)

**

ON THE AIR: RAMSEY ISLAND WHERE THE BIRDS ARE

On the air, members of Great Britain's Strumblehead DX and Contest Group have now obtained permission from the Royal Society for the Protection of Birds to activate Ramsey Island. Its located off the West Wales coast and the group will be active from 1800 UTD on July 24th through 1400UTC on July 27th using the club callsign MC0SHL. Their activity will be on all bands from 80 to 10 meters operating only on SSB. (OPDX)

**

ON THE AIR: 13 COLONIES SE-HUGE SUCCESS!

And word that the recent 13 Original Colonies event has been deemed a major success. This, with over10,000 QSO's made and every continent contacted.

Ken Villone, KU2US is the 13 Original Colonies Awards Manager. He says that a large amount of interest in this event was generated in the United Kingdom. As a result the 2010 outing will include two U K stations representing the "Mother Country". This will open up all of the Europe to the on the air celebration.

More information about the 13 Original Colonies events is at the KU2US listing on QRZ.com (E-mail)

**

DX

In DX, JA7QVI needs your help to complete a rather ambitious ham radio project. Tak says that he will be calling CQ on the 50 MHz, 6 meter band for the rest of July from 2200 to 0000 UTC Monday through Friday and 2200 to 0200 UTC on Saturday and Sunday. This in the hope of becoming the first mainland Japan station to achieve the ARRL's Worked All States award. Tak adds he really needs to make contact with hams

in New Jersey and Louisiana to qualify. Please listen out for him and help him to achieve this long sought after goal.

F5LMJ, will be in Liechtenstein through July 24th operating portable HB0. His modes will be CW and digital during his evening and early morning hours. QSL via F5LMJ via the bureau or electronically via Logbook to the World.

VE3ZIK will once again be active portable as 9A from Bilice, Croatia through August 3rd. Listen for him on the HF bands using CW, SSB and some digital modes. QSL via DO7ZZ, direct or by the bureau. Logs will be uploaded to eQSL and Logbook to the World.

SV1EJD will be on the air portable SV8 from Lesvos in the North Aegean Islands through the 22nd of July. QSL via his home call, either direct or via the bureau.

YC0IEM, will be active from Bali through July 27th. QSL via IZ8CCW.

Lastly, MM0DFV has started out on a 7000km mobile journey from Scotland through France, Belgium, Germany, Poland, Belarus, Russian, Kazakhstan and back. He has his HF gear with him and operating as he goes. His main mode of operation will be PSK and he plans to have different QSL cards for each new stop. The trip should last until August 10th. QSL as directed by MM0DFV.

(Above from various DX news sources)

THAT FINAL ITEM: THE BOSTON T-HUNT

And finally this week, an on-foot hidden transmitter hunt in Boston has drawn competitors from around the world. Newsline's Joe Moell, K0OV, has the outcome:

--

Every odd-numbered year, the three regions of the International Amateur Radio Union, the IARU, plan world-class on-foot hidden transmitter hunts and they invite the hams of the world to attend. Region 2, which encompasses all of North and South America, had its championships in Boston on the first weekend of June. It was combined with USA's annual national championships and was hosted by Vadim Afonkin KB1RLI. He is one of USA's best at the sport, which is also called radio-orienteering and ARDF.

With help from the New England Orienteering Club, Vadim set out two challenging courses in the 7000-acre Blue Hills Reservation south of Boston, one course on two-meters and the other on 80 meters. These transmitter hunts drew hams from all over the USA plus eight other nations. Some of those countries, such as Ukraine and Russia, have training programs that have developed the world's best radio-orienteers over the years, so it's no surprise that the best performances were

from those nations.

But the stateside competitors, 44 per cent of whom were first-timers, did very well themselves. For example, in the three categories for women, USA captured all but one of the gold medals. Dick Arnett WB4SUV and Bob Cooley KF6VSE took gold in the category for men over age 60. And former Newsline Young Ham of the Year Jay Thompson W6JAY was best in the USA on two meters in the category for men in their 20s and 30s.

For complete results and photos of the championships in Boston, point your Web browser to homingin.com. That's homingin -- as one word -- homingin.com. USA's best on-foot foxhunters not only received medals, but they are on track to be part of our country's team for the World Championships in Croatia next year.

For Amateur Radio Newsline, this is Joe Moell K0OV.

--

Needless to say, a good time was had by all. (K0OV)

but you have not refuted the supremacy clause, which clearly states
that federal law, trumps state law. could i have expected anything
less out of a person who has a low performing brain. its not out of
context, its the law.

> > > > constitution shall reign supreme.
>
> > >   Which means that the 10th amendment rules supreme and the powers
> > > reserved to the states cannot be usurped.
>
> > nope, if it was not for the supremacy clause, no state would
> > recognize the rights of other states. you are a crank.
>
>   You have no idea what you're talking about. The supremacy clause
> doesn't nullify the 10th amendment nor could it. Otherwise the
> constitution would be inactive. It's an AMENDMENT, that means it
> overrides the previous sections of the constitution.
>
>

ROTFLOL!!!!!!!! you do not even understand what the supremacy clause
is do you. you just admitted it. without the supremacy clause, the
10th amendment would be ignored by all of the states. the supremacy
clause states that the constitution, and all laws, regulations, and
treaties are the supreme law of the land idiot.
the 10th amendment says states have some rights, but, if a state law
conflicts with a federal law, federal law trumps state law.
you simply are ignoring facts, facts that do not fit into your low
brow world.

>
>
>
> > > > so the fcc is a federal regulation,
> > > > that no state law can usurp.
> > > > and we know that you cannot shout fire in a crowed theater either, so
> > > > there is some regulation of speech. you need permits to assemble, etc.
> > > > and the airwaves are owned by the american people, so its a
> > > > nationwide law, a federal law. and the constitution shall reign
> > > > supreme.
>
> > > > THE SUPREMACY CLAUSE
> > > > Article. VI.
> > > > This Constitution, and the Laws of the United States which shall be

> > > > made in Pursuance thereof; and all Treaties made, or which shall be
> > > > made, under the Authority of the United States, shall be the supreme
> > > > Law of the Land; and the Judges in every State shall be bound thereby,
> > > > any Thing in the Constitution or Laws of any State to the Contrary
> > > > notwithstanding.
>
> > > > The preemption doctrine derives from the Supremacy Clause of the
> > > > Constitution which states that the "Constitution and the laws of the
> > > > United States...shall be the supreme law of the land...anything in the
> > > > constitutions or laws of any State to the contrary notwithstanding."
> > > > This means of course, that any federal law--even a regulation of a
> > > > federal agency--trumps any conflicting state law.
>
> > you can read correct? are you impervious to facts logic, and reason.
>
> I can read and you've not presented any logic or reason and present
> facts
> that are irrelevant. The 10th is an AMENDMENT.

yes it is. but, federal law trumps state law, clearly stated in the
constitution. other wise we would have 50 different countries, and we
do not idiot.

==> NEW VICE DIRECTORS VISIT HQ IN ADVANCE OF BOARD MEETING

Just prior to the ARRL Board of Directors 2009 Second Meeting
<http://www.arrl.org/announce/board.html>, three newly appointed Vice
Directors made their way to Newington for a day of orientation. Pacific
Division Vice Director Jim Tiemstra, K6JAT, Southeastern Division Vice
Director Jeff Beals, WA4AW, and West Gulf Division Vice Director John
Thomason, WB5SYT, came to learn the "ins and outs" of the ARRL Board and ARRL
Headquarters operation. The 2009 Second Meeting is scheduled for July 17-18
in Windsor, Connecticut.

According to ARRL Chief Operating Officer Harold Kramer, WJ1B, "The new Board members came to Newington to learn not only how the Board functions, but to see what each department does and how it interacts with and serves both Amateur Radio and ARRL members, through our five pillars: Public Service, Advocacy, Education, Technology and Membership. I am pleased they came to see how we support Amateur Radio each and every day here at ARRL HQ."

One of the highlights of the group's visit to Headquarters was a tour of the Membership and Volunteer Programs Department. Dave Patton, NN1N, explained the function of the department and its staff. "We showed them how we support Amateur Radio and our members through our Field Organization, Ham Aid Program, emergency communications support, operating events and awards," Patton said.

Beals, the former Southern Florida Assistant Section Manager, was appointed Vice Director upon the death of then-Vice Director Sandy Donahue, W4RU <http://www.arrl.org/news/stories/2009/06/04/10865/?nc=1>. "I haven't been to Headquarters in about 15 years -- I'm just amazed at how much things have changed," he said. "It never ceases to amaze me how much we give our members for their membership dollars. What's available to them, the services, the functions we perform for the members, it's just incredible. I think if more hams out there could see what we do here, we'd double our membership in about 5 minutes."

Thomason, the former Oklahoma Section Manager, was appointed Vice Director <http://www.arrl.org/news/stories/2009/01/24/10586/?nc=1> when then-Director Coy Day, N5OK, resigned and David Woolweaver, K5RAV, moved up to Director from Vice Director <http://www.arrl.org/news/stories/2009/01/20/10574/?nc=1>. "It's been quite a day -- it's been long, but it's been good," he said. "We have had the good fortune to see so many wonderful League staffers and to get together to help plan for the future. Departments here at Headquarters were able to share some of the things they have done on behalf of our members. It has definitely been a good day and it will only get better."

Tiemstra, the former Section Emergency Coordinator in the East Bay Section, was appointed to his position in June after then-Vice Director Andy Oppel, N6AJO, submitted his resignation <http://www.arrl.org/news/stories/2009/06/16/10889/?nc=1>. "When we got to Headquarters, we found that we had a full day planned," he said. "We saw all aspects of the Headquarters operation and it is quite an impressive operation -- much larger and much more complicated than I expected. I am really looking forward to the Board meeting on Friday. I am so fascinated by all the things that the League is doing these days. I think that it will be a tremendous learning experience and something I will probably never forget."

A report on the July meeting of the ARRL Board of Directors will be available on the ARRL Web site and in The ARRL Letter.

==> HR 2160 GAINS MORE SUPPORT IN CONGRESS

This week, four more Congressmen -- John Boozman (R-AR-3), Bob Filner (D-CA-51), Dennis Moore (D-KS-3) and David Wu (D-OR-1) -- pledged their support for HR 2160, The Amateur Radio Emergency Communications Enhancement

Act of 2009 <http://thomas.loc.gov/cgi-bin/query/z?c111:H.R.2160:>. This brings the total number of cosponsors to 18.

Introduced by Representative Sheila Jackson-Lee (D-TX-18) in April <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>, if passed, HR 2160 would "promote and encourage the valuable public service, disaster relief, and emergency communications provided on a volunteer basis by licensees of the Federal Communications Commission in the Amateur Radio Service, by undertaking a study of the uses of Amateur Radio for emergency and disaster relief communications, by identifying unnecessary or unreasonable impediments to the deployment of Amateur Radio emergency and disaster relief communications, and by making recommendations for relief of such unreasonable restrictions so as to expand the uses of Amateur Radio communications in Homeland Security planning and response." The bill has been referred to the House Committee on Energy and Commerce.

If enacted into law, HR 2160, would instruct the Secretary of Homeland Security to undertake a study and report its findings to Congress within 180 days. The study would spell out uses and capabilities of Amateur Radio communications in emergencies and disaster relief. The study shall:

* Include recommendations for enhancements in the voluntary deployment of Amateur Radio licensees in disaster and emergency communications and disaster relief efforts.
* Include recommendations for improved integration of Amateur Radio operators in planning and in furtherance of the Department of Homeland Security initiatives.
* Identify unreasonable or unnecessary impediments to enhanced Amateur Radio communications -- such as the effects of private land use regulations on residential antenna installations -- and make recommendations regarding such impediments.
* Include an evaluation of Section 207 of the Telecommunications Act of 1996 (Public Law 104-104, 110 Stat 56 [1996]).
* Recommend whether Section 207 should be modified to prevent unreasonable private land use restrictions that impair the ability of amateurs to conduct, or prepare to conduct, emergency communications by means of effective outdoor antennas and support structures at reasonable heights and dimensions for the purpose in residential areas.

The Secretary of Homeland Security shall utilize the expertise of the ARRL and shall seek information from private and public sectors for the study.

"HR 2160 presents the Amateur Radio Service with a unique opportunity -- but also carries with it the important responsibility of making your voice heard," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "HR 2160 stands as the first step in trying to address the long standing problem of extending the protections afforded Amateur Radio operators under PRB-1 <http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf>to deed restrictions and covenants. To be clear, passing HR 2160 is not going to achieve that goal right away. But it will help lay the ground work by assessing the impact such restrictions have on our ability to train for and respond to disasters and other emergencies."

HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), Madeleine Bordallo (D-Guam), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-2), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Charlie Melancon (D-LA-3), Bennie Thompson (D-MS-2) and Peter Welch (D-VT).

Check the ARRL Web site <http://www.arrl.org/news/stories/2009/05/12/10818> for information on how to encourage your Congressional representative to sponsor HR 2160.

==> WRC-11 IS NOW WRC-12

The ITU Council, the 46-nation administrative oversight body of the International Telecommunication Union (ITU), has agreed to move the next World Radiocommunication Conference (WRC) to 2012. Originally scheduled for October 24-November 18, 2011 in Geneva, Switzerland, the Council has proposed January 23-February 17 as the new dates <http://www.itu.int/dms_pub/itu-r/oth/0C/04/R0C040000030001PDFE.pdf>.

According to ARRL Technical Relations Manager Brennan Price, N4QX, the full ITU membership is now being consulted on the dates; responses are due by August 3. "The ITU Council had previously proposed dates for fall 2011, but various scheduling conflicts and the lack of available facilities during some weeks made this schedule impractical," he said.

Held approximately every three years, these periodic conferences of the Member States of the ITU consider allocations to the various radio services -- including the Amateur Radio Service -- and evaluate what new technologies and applications should be addressed by future conferences.

The agenda for WRC-12, developed by the delegates at the last WRC in Geneva in 2007 (WRC-07), was formally adopted by the ITU Council in 2008. There are 25 agenda items addressing potential new or revised spectrum allocations to existing services. Of most interest to amateurs is agenda item 1.23, "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services."

"This agenda item is the highest item on my long term priority list," said Price. "We are fortunate that this upcoming WRC presents an opportunity for a new secondary allocation in the medium waves. While the outcome is far from certain, our experience in other bands -- most notably 30 meters -- indicates Amateur Radio's compatibility with certain other services as a secondary user."

Price said that some WRCs have posed great challenges for Amateur Radio, with blocks of spectrum potentially at risk. "This was the case at WRC-03 and WRC-07, which posed a very real potential reallocation of portions of the 40 meter band in Region 2 to HF broadcasting," he said. "The agenda for WRC-12 does not pose any threats to Amateur Radio as clear or as overt as those faced in prior years." Price and ARRL Technical Relations Specialist Jon Siverling, WB3ERA, are monitoring developments on a number of other agenda items that could affect Amateur Radio if they take unanticipated turns,

including:

* Agenda item 1.14, considering requirements for and implementation of the radiolocation service (radar) between 30-300 MHz.
* Agenda item 1.15, considering possible allocations between 3-50 MHz for oceanographic radar applications.
* Agenda item 1.19, considering regulatory measures to enable software-defined and cognitive radio systems.
* Agenda item 1.22, examining the effect of emissions from short-range devices.

"Oceanographic radar is perhaps our biggest defensive issue," Price said. "Fortunately, its proponents have acknowledged that sharing with Amateur Radio would be problematic."

==> COMPANION BILL TO SENATE RADIO SPECTRUM INVENTORY ACT INTRODUCED IN HOUSE

In March, Senator John Kerry (D-MA) introduced the Radio Spectrum Inventory Act (S 649) <http://thomas.loc.gov/cgi-bin/query/z?c111:S.649:> in the Senate <http://www.arrl.org/news/stories/2009/03/25/10725/>. Earlier this month, that bill passed the Senate Commerce, Science and Transportation Committee. Last week, Representative Henry Waxman (CA-30) introduced a companion bill -- HR 3125 -- in the House of Representatives <http://thomas.loc.gov/cgi-bin/query/z?c111:H.R.3125.IH:>; the bill has been referred to the House Committee on Energy and Commerce. The bills, if passed, would mandate an inventory of radio spectrum bands managed by the National Telecommunications and Information Administration (NTIA) and the Federal Communications Commission. The Senate version calls for an inventory of frequencies between 300 MHz-3.5 GHz managed by the two agencies, while the House bill would mandate an inventory of 225 MHz-10 GHz.

S 649
Senate Bill 649 states that the NTIA and the FCC would be required to inventory the spectrum no later than 180 days after the bill becomes law; after the initial survey, follow-ups would be required every two years. Both agencies would need to prepare a report listing the licenses or government user assigned in the band, the total spectrum allocation, by band, of each licensee or government user (in percentage terms and in sum) and the number of intentional radiators and end-user intentional radiators that have been deployed in the band with each license or government user.

Additionally, if the information is applicable, the report would be required to show the type of intentional radiators operating in the band, the type of unlicensed intentional radiators authorized to operate in the band, contour maps that illustrate signal coverage and strength and the approximate geo-location of base stations or fixed transmitters. The report would then be sent to the Senate Committee on Commerce, Science and Transportation and to the House Committee on Energy and Commerce.

The bill also mandates that both agencies create a centralized portal or Web site that lists each agency's band inventories. This information would then be made available to the public via an Internet-accessible Web site. Both

agencies would also be required to make all necessary efforts to maintain and update the inventory information "in near real-time fashion and whenever there is a transfer or auction of licenses or change in allocation or assignment."

"Our public airwaves belong to the American people, and we need to make certain we are putting them to good use in the best interests of those citizens," Senator Kerry said when he introduced the bill in March. "Last year's 700 MHz auction resulted in $20 billion for the treasury and will create greater opportunity and choice for consumers and businesses that need broadband service. We also took a great step forward when the FCC established a way for unlicensed devices to operate in white spaces. These two initiatives are evidence of how valuable spectrum is and how it serves as fertile grounds for innovation. We need to make sure we're making as much of it available to innovators and consumers as possible."

HR 3125
Like S 649, HR 3125 calls for the NTIA and the FCC to issue a report on the inventory of spectrum no later than 180 days after the bill becomes law; after the initial survey, follow-ups would be required every two years. The House bill goes a bit further than S 634, however, calling for the two agencies to work with the Office of Science and Technology Policy (OSTP) <http://www.ostp.gov/>; this office advises the President on the effects of science and technology on domestic and international affairs.

The agency reports called for in HR 3125 would include the same information called for in the Senate version. Like the Senate bill, the House bill calls for the reports to be made available on the Internet and update the reports as needed. Both bills include an exemption for licensees or users if they can demonstrate that disclosure would be harmful to national security.

"The [bill] represents a significant step in making available more spectrum for commercial and wireless services. The more efficient use of our nation's airwaves will increase innovation for wireless products and services and improve the connectivity of the American people," said bill cosponsor Representative Rick Boucher (D-VA-9). "As more people use wireless devices and as advanced applications require higher data rates over time, additional spectrum will be needed to accommodate growth. Wireless technologies can also play a critical role in bringing broadband to more consumers, particularly in rural areas."

S 649 is co-sponsored by Kay Bailey Hutchison (R-TX), Amy Klobuchar (D-MN), Bill Nelson (D-FL), Mark Pryor (D-AR), Olympia Snowe (R-ME), John Thune (R-SD), Mark Warner (D-VA) and Roger Wicker (R-MS).

HR 3125 already has 17 cosponsors: Joe Barton (R-TX-6), Rick Boucher (D-VA-9), Steve Buyer (R-IN-4), Kathy Castor (D-FL-11), John Dingell (D-MI-15), Michael Doyle (D-PA-14), Anna Eshoo (D-CA-14), Bart Gordon (D-TN-6), Jay Inslee (D-WA-1), Edward Markey (D-MA-7), Doris Matsui (D-CA-5), Jerry McNerney (D-CA-11), Zachary Space (D-OH 18), Cliff Stearns (R-FL-6), Bart Stupak (D-MI-1), Fred Upton (R-MI-6) and Peter Welch (D-VT). Gordon and Welch are also cosponsors of HR 2160, The Amateur Radio Emergency

Communications Enhancement Act of 2009
<http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>.

==> SPACE SHUTTLE ENDEAVOUR ON ITS WAY TO ISS WITH HAMS ON BOARD

After lightning strikes and thunderstorms delayed the launch of the space shuttle Endeavour (STS 127) this past weekend, the spacecraft launched into space at 6:03 PM on Wednesday, July 15. Endeavour's 16 day mission to the International Space Station (ISS)
<http://www.nasa.gov/mission_pages/station/main/index.html> will feature five planned spacewalks and complete the construction of the Japan Aerospace Exploration Agency's Kibo laboratory. Astronauts will attach a platform to the outside of the Japanese module that will allow experiments to be exposed to space
<http://www.nasa.gov/pdf/362898main_STS127%20Mission%20Summary%20v4.pdf>.

Endeavour carries a crew of seven: Mark Polansky is commander and Douglas Hurley is the pilot. Mission specialists are Christopher Cassidy, Thomas Marshburn, KE5HOC, David Wolf, KC5VPF, and Julie Payette, a Canadian Space Agency astronaut. The mission will deliver Timothy Kopra, KE5UDN, to the ISS as a flight engineer and science officer and return Japanese astronaut Koichi Wakata, KC5ZTA, to Earth. Hurley, Cassidy, Marshburn and Kopra will be making their first trips to space.

When Kopra arrives, there will six astronauts on board the ISS -- all but one are licensed radio amateurs: Commander Gennady Padalka, RN3DT; Flight Engineer Michael Barratt, KD5MIJ; Flight Engineer Frank DeWinne, ON1DWN; Flight Engineer Robert Thirsk, VA3CSA, and Flight Engineer Roman Romanenko.

While on the ISS, Kopra will help conduct scientific experiments on human physiology. "We're going to look at all the different components that correspond to the human body and the effect that microgravity has on [astronauts]," he said in a NASA pre-flight interview
<http://www.nasa.gov/mission_pages/station/expeditions/expedition20/kopra_interview.html>. "It's very critical because, if we're going to spend time on the moon, which has less gravity than the Earth, or transporting to Mars, which could be a very long trip and then time on Mars, we need to understand with a lot of detail what those effects will be. So we'll be looking at the cardiovascular system, neurological system, vestibular system and we'll also be looking at some of the behavioral aspects of living in space. What happens to your sleep, for example: Can you sleep soundly, because over time you definitely need to have sound sleep to be an effective crew member? Those are some of the examples of the things we'
ll be looking at that correspond to the human physiology side."

Kopra said he expects to "have a lot of fun" while on board the ISS: "I just spoke with the [current ISS] crew members on board recently, and after they had only been there for a couple weeks, you could tell that they're just real excited about all the work that they do on board. It's just like you talk to a kid about what they would like to do on space station, they might tell you, 'Hey, I want to float around, I want to look out the window.' You know, I

intend to do a lot of both of those just as my crew members like to do."

Kopra, a 1985 graduate of West Point and a colonel in the US Army, was assigned to NASA at the Johnson Space Center in September 1998 as a vehicle integration test engineer. In this position, he primarily served as an engineering liaison for space shuttle launch operations and ISS hardware testing. He was actively involved in the contractor tests of the Extravehicular Activity (EVA) interfaces for each of the space station truss segments.

Selected as an astronaut in July 2000, Kopra began his initial training the following month. He completed two years of intensive space shuttle, space station and T-38 flight training. He then served in the Space Station Branch of the Astronaut Office where his primary focus involved the testing of crew interfaces for two ISS pressurized modules, as well as the implementation of support computers and operational Local Area Network on ISS. After completing a Russian language immersion course in Moscow, Kopra began training for a long duration space flight mission in July 2005. Since then, he has completed training at each of the international partner training sites and served as a backup crewmember to Expeditions 16 and 17.

Kopra will return to Earth on space shuttle Discovery (STS 128), due to launch this August. That mission will bring mission specialist Nicole Stott, KE5GJN, to the ISS. Discovery will carry the Leonardo Multi-Purpose Logistics Module containing life support racks and science racks, as well as the Lightweight Multi-Purpose Experiment Support Structure Carrier.ï¿½ -- Information provided by NASA

==> ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update (a bi-weekly contest newsletter), the ARES E-Letter (sent monthly, containing public service and emergency communications news), the ARRL Club News and the ARRL Instructor/Teacher E-Letter and the VE Newsletter.

You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service to members, letting them know when their membership and license are due to expire.

Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==>SOLAR UPDATE

Tad "Glorious with the Sun's returning march" Cook, K7RA, this week reports: We saw a nice run of eight days with a large sunspot, but none have emerged in the six days since. Unlike other recent spots, this one did not appear just for one or two days and then vanish. Sunspot numbers for July 9-15 were

15, 13, 0, 0, 0, 0 and 0 with a mean of 4. The 10.7 cm flux was 69.1, 67.8, 68.2, 68, 67.2, 66.6 and 66.5 with a mean of 67.6. The estimated planetary A indices were 6, 7, 4, 5, 10, 8 and 5 with a mean of 6.4. The estimated mid-latitude A indices were 6, 7, 2, 4, 5, 6 and 3 with a mean of 4.7. Geophysical Institute Prague predicts quiet conditions for July 17-20, unsettled July 21, quiet to unsettled July 22 and back to quiet on July 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation B ulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Henry Wadsworth Longfellow's "Sunrise on the Hills" <http://www.readbookonline.net/readOnLine/3237/>.

==>IN BRIEF:

* This Week on the Radio: This week, an NCCC Sprint Ladder is on July 17. The North American QSO Party (RTTY), theï¿½ DMC RTTY Contest and the CQ Worldwide VHF Contest are July 18-19. The CQC Great Colorado Gold Rush is July 19. The Run for the Bacon QRP Contest is July 20 and the SKCC Sprint is July 22. Next week, another NCCC Sprint Ladder is on July 245 and the RSGB IOTA Contest is July 25-26. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration remains open through Sunday, July 26, 2009, for these online course sessions beginning on Friday, August 7, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feed
back. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* W1AW to Add New Digital Modes to Transmission Schedule: Effective August 17, W1AW, the Hiram Percy Maxim Memorial Station, will replace its AMTOR and

ASCII transmissions with PSK31 and MFSK16, respectively. RTTY (Baudot) will continue to be the first digital mode used in the transmission schedule. The frequencies used by W1AW for all its digital transmissions will remain the same. "All regular 6 PM and 9 PM (Eastern Time) digital transmissions will begin with RTTY," said W1AW Station Manager Joe Carcia, NJ1Q. "PSK31 and MFSK16 will be sent as time allows. The Tuesday and Friday Keplerian data bulletins will be sent using RTTY and PSK31." The W1AW operating schedule -- complete with times and frequencies -- can be found on the ARRL Web site <http://www.arrl.org/w1aw.html#w1awsked>.

* AMSAT to Mark First Lunar Landing: AMSAT-NA <http://www.amsat.org> will mark the 40th anniversary of the first manned lunar landing with a special event on AO-51 <http://www.amsat.org/amsat-new/echo/>. AO-51 will transmit a message commemorating the event Monday, July 20 during evening passes in the US and Europe. The message will be transmitted on the 435.300 MHz FM downlink and will contain a Robot 36 SSTV image as well as a voice message. A special AO-51 QSL will be available to those who copy the downlink. Send QSL requests marked "Apollo 11" with a self-addressed, stamped envelope to AMSAT, 850 Sligo Ave, Ste 600, Silver Spring, MD 20910.

* Jim Mullin, W8KKK (SK): Jim Mullin, W8KKK, of Concord Township, Ohio, fell to his death from atop his 100 foot tower on June 6, reports Frank "Fritz" Hemrich, K8WLF, also of Concord Township. According to a post Hemrich made on QRZ.com, Mullin, 69, was in the process of dismantling his tower and antennas when his safety belt "parted at one of the seams and just let go." Hemrich recounted that Mullin had already been up on the tower twice that day: "It appears as if he was on his third trip up to re-position his gin pole to start taking apart and down the tower sections. His ground assistant had just finished taking some pictures of the tower and was putting his camera back in his car. As he turned away from the car he heard Jim hit the ground." A service for Mullin was held June 11.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

AMATEUR RADIO NEWSLINE SPECIAL BULLETIN - WALTER CRONKITE, KB2GSD - S.K.

Shortly after our current newscast #1666 went to air we learned of the passing of broadcast and ham radio legend, Walter Cronkite, KB2GSD. We have prepared a special 14 minute audio only tribute to Walter Cronkite hosted by Mark Abramowicz, NT3V, that you can download and play from our website at www.arnewsline.org. Simply scroll down to "Special Reports" and click on the word "HERE" on the line that reads "Click HERE to download our 14 minute tribute to broadcast legend Walter Cronkite, KB2GSD." It is an MP3 file and will play in most media players.

Thank you, Amateur Radio Newsline

What has that ridiculous claim got to do with what I said? The
media was highly regulated in ways that tended to concentrated
ownership, specifically the government granting of exclusive
licenses. I pointed that out. You tried to claim that deregulation
that allowed anyone to set up a radio station would concentrate
ownership by pointing to an entirely different form of
"deregulation".

The tenth amendment overrides the supremacy clause because it's an
AMENDMENT, which means it AMENDS the previous consitution and
therefore overrides it. Why would the states ignore a provision that
specifically gives them powers and prevents the Feds from infringing
them? You obviously have no idea what the tenth is or does.

> the supremacy clause states that the constitution, and all laws, regulations, and
> treaties are the supreme law of the land idiot.

> the 10th amendment says states have some rights, but, if a state law
> conflicts with a federal law, federal law trumps state law.

No it says nothing of the kind. Try reading it some time.

> you simply are ignoring facts, facts that do not fit into your low
> brow world.
>
And yet you're the one claiming that an amendment that says nothing
about the Feds being supreme (and in fact says the exact opposite)
establishes such a thing. You're the one ignoring facts.
>

The Center for Family Development is Western New York's only attachment center specializing in the treatment of adopted and foster families with trauma and attachment disorder. Our professionals have the knowledge, skills, personal experiences, and professional training to help adoptive and foster families with attachment concerns. The Center for family Development has focused much of its efforts on helping adoptive and foster families. The needs of adoptive families are unique and very few professionals understand these families and their special problems. The Center for Family Development was founded by Dr. Arthur Becker-Weidman to provide answers to questions, solutions to problems, and the expert support necessary for families to thrive in these turbulent times.

Dr. Arthur Becker-Weidman and his associates are dedicated to helping adoptive families achieve their potential. All members of the Center For Family Development are licensed, skilled, and highly trained professionals with at least twenty years experience helping families. Arthur Becker-Weidman, CSW-R, PhD. DABPS received his doctorate in Human Development from the University of Maryland, Institute for Child Study. He achieved Diplomate status from the American Board of Psychological Specialties in Child Psychology and Forensic Psychology. He is a member of the American College of Forensic Examiners. Dr. Becker-Weidman has received extensive training in Dyadic Developmental Psychotherapy, an attachment-based therapy, including with Daniel Hughes, Ph.D., author of Building the Bonds of Attachment and Facilitating Developmental Attachment.

At the Center For Family Development we only begin working with families after completing a thorough assessment. We carefully evaluate the child and the family. Our success rate is now over 95%. Success means that the child has developed the capacity to love and be loved and is functioning at least at about 80% of the level you'd expect for a child that age. See our Research page for the results of our follow-up study.

Dyadic Developmental Psychotherapy, an attachment-based therapy is an evidence-based treatment for children with Trauma-Attachment Disorders, Reactive Attachment Disorder, and other disorders of attachment that are complicated by severe trauma or histories of maltreatment. Other forms of treatment such as play therapy are ineffective with children who have disorders of attachment and complex post-traumatic-stress-disorder because all these therapies require a trusting relationship between the therapist and child. See our follow-up study in Child and Adolescent Social Work Journal, a professional

peer-reviewed journal. This demonstrates that Dyadic Developmental Psychotherapy is an evidence-based effective treatment for children with Reactive Attachment Disorder. Please see our Informed Consent document for more information.

Parents of attachment disordered children experience a high level of stress and need support and understanding in order to help their children and survive as a family. The Center for Family Development offers a support group which is intended as an opportunity for parents to share parenting strategies, learn about approaches that work, support others, find support, and develop cooperative respite arrangements. This is not a treatment group or therapy.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-July, through Sunday, 19th-July, there were 199 countries active. Countries available: 3A, 3B8, 3D2, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S5, SM, SP, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TN, TY, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4C12, MEXICO (Special Event/Satellite Op). Members of the Radio Club Queretaro announce to look for special event station 4C12SG to be active between July 20-27th. Activity is to celebrate the 12th anniversary of the operation from the "Sierra Gorda Queretana". Operations will take place from "Sotano del Barro", one of the deepest places in the world.

Also, look for 4C12SG to be active on the satellites (Grid EL01), and if conditions permit, also on 6 meters. QSL via XE1RCQ. Log will be uploaded to LoTW after the event.

4W, TIMOR-LESTE. AL, CT1GPQ, will be active from here between August 3rd and October 3rd. Currently CT1GPQ doesn't know what his callsign will be, but his license issues are being arranged. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. His station setup will be an Icom IC-706 MK2g, a dipole for 40 and 30 meters and square loops for 20 and 17 meters. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@algarvedx.com
Activity logs will be online (possibly daily) on: http://algarvedx.com
All information will be sent first via the Algarve STAR DX Team Mailing List. Subscriptions are available on team's WEB site. PLEASE NOTE: This is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time.

9G, GHANA. Operators Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, and Donato/IZ2CHO will be active from Busua Beach in the Ghana Western Region between November 13-27th. Their activity will also include an IOTA trip to Abokwa Island (AF-084). They will use two different callsigns for their activities. Operations on the mainland will use the callsign 9G5TT, while operations on AF-084 will use 9G5XX. Activity will be on all HF bands (80-10 meters) and modes. Silvano/I2YSB informs OPDX that they do not have a licence for 160 meters, 60 meters and 6 meters. On AF-84 there will be one station on 20 meters only. The time of the operation on the island will be on a day to day bases, and will be depended on the sea condition and weather forecast. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

BX5, TAIWAN (AS-020 - RARE CONTEST IOTA). Jimmy, BX5AA, will be active during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via BX5AA.

C3, ANDORRA. Vini, IK2CIO, will be active as C31/IK2CIO between August 6-12th. Activity will be holiday style on 160-6 meters using CW and SSB. QSL via IK2CIO, by the Bureau or direct.

CO8, CUBA. Raul, CO8ZZ, informs that he will be active during RSGB IOTA Contest (July 25-26th) from the main island (NA-015, FL10mw) in the CW only category. QSL via DK1WI.

CR2, AZORES (IOTA Contest/LH Op). Members of Algarves STAR DX Team (a multi-national team) will activate Faial Island in the Azores using the callsigns CR2F, CR2N and CR2W, between July 18-31st. Operators mentioned are: CT1EEQ, CT1EGW, CT3FN/HB9CRV, CU8AS, DJ2VO and HB9CQL. Callsigns will be used for:
CR2F - For the Farol da Ribeirinha Lighthouse (WLOTA 1830) operation between July 18ï¿½24th and July 27-August 1st.
CR2W - For the RSGB IOTA Contest (July 25-26th).

Activity from Caldeira do Faial Natural Reserve
CR2N - For the "Caldeira do Faial Natural Reserve" activity between July 29-30th. Reference numbers: DPRN FF-212 and WFF CTFF-46. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL all callsigns via CT1GFK, direct, by the Bureau or E-mail Bureau requests. Check QRZ.com for more info. Official Web site is: http://www.to-mk.com/neu Logs online will be at: http://algarvedx.com/logonline

CR3, MADEIRA ISLANDS (IOTA/LH Op). A groups of CT1/CT3 operators (from the Madeira Contest Team and G.I.R.A.) will be active as CR3D and CR3R from Chao Islet in the Desertas Islands group (AF-046) between July 24-26th. Activity will be on the HF and VHF bands using CW, SSB and the Digital modes. They will also be active in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Barros/CT3BD, Luis/CT3DL, Luis/CT3EE, Duarte/CT3EN, Duarte/CT3KY, Jose/CT3MD, Joao/CT3NY, Jorge/CT1BOL, Jose/CT1CJJ, Paulo/CT1EFS, Filipe/CT1ILT and Firmino/CT1IZW. For further information about this Project, please visit the CR3D QRZ.com page at: http://www.qrz.com/db/CR3D

EA9, CEUTA AND MELILLA. Yasuyuki, DJ1AIB/JR1AIB, will be active as EA9/DJ1AIB from Melilla between July 22-26th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via JR1AIB.

EG, SPAIN (Special Event). Look for special event station EG5LB to be active during the follwing dates: July 26th, August 2-9th, August 16th, August 23rd, August 29th and September 6-7th. Activity is to celebrate the 200th anniversary of the birth of the illustrious Louis Braille, inventor of the tifloescritura system for the blind, and with the 30th anniversary of ARMIC, Association for Visually Handicapped Radio of Catalonia. QSL via EA3RKR, direct or by the Bureau. For more details, see QRZ.com or visit: http://www.gratisweb.com/ea3rkr/esp/index2.html

EH, SPAIN (Special Event). Look for special event station EH1SC to be active until July 24th. Activity is taking place during the "Celebrations of Santiago de Compostela". Operations will be on all the bands. QSL via: Radio-Noticias, Apartado 368, 15780 Santiago de Compostela (Spain). For more information, visit: http://www.radionoticias.com

EM360, UKRAINE (Special Event). Members of Ternopil Amateur Radio Club will use special callsign EM360B between August 14-18th, to mark the 360th anniversary of historical battle near the city of Zboriv. QSL via UY5BC.

GJ, JERSEY. Members of the Bristol Contest Group will be active as GJ6YB during the RSGB IOTA Contest (July 25-26th) from Jersey (EU-013, WLOTA L-0818) as a Multi-Op/Island-DXpedition entry. Operators mentioned are: EI3JE, EI7FJ, G3TKF, G3XSV, G3YHV, G3ZVW, G4CLA, G4FKA, G4NKT, G7TWC, M0MAT and M1EBV. QSL via G3SWH, direct or by the Bureau.

IOTA NEWS.....
AS-060. Members of the Korean Contest Club and possibly others will be active as D93I (and also their homecall/4) from Pigum Island (KDN H32) between July 25-27th. Operators mentioned are:

Han/DS2GOO, Yang/DS4CDA, Ryou/DS4NYE, Rocky/HL1VAU and a few other guest OP's.. They will have two complete HF stations with a dozen of vertical antennas nearby saltwater. Continuous activity is planned on 80-10 meters using CW/SSB/Digital. If the propagation allows, they will try some 6m openings to various directions also. During the IOTA contest, they will operate as a Multi-Op/Island-Expedition entry as D93I. QSLs for D93I are via DS4NYE and all others via their homecall.

EU-005. Members of the SANDS Contest Group (M0SCG), based in Morecambe, Lancashire, will be active as G1T from Sunderland Point, near Lancaster during the RSGB IOTA Contest (July 25-26th) as a Multi-Single entry. Reference numbers are: WAB Square SD45 and Grid LOC. IO84NB.

EU-006. Members of the South Dublin Radio Club and the City of Belfast Radio Amateur Society will travel to the Aran Islands off the coast of Galway hoping to build upon the successes of recent years, and be active as EJ0GI from Inis Oirr during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/DXpedition/High-Power entry. Some team members may be active under their home callsigns outside of the contest between July 23-27th. QSL via EI2SDR (information available on QRZ.com).

EU-006. David, EJ3GKB, will be active from Inis Oirr, July 23-27th. Activity will be on 80-6 meters before and after the RSGB IOTA Contest. Look for updates and pictures via Twitter (DavidGi8SKN), depending on time and signal reception.

EU-008. Members of the Cockenzie and Port Seton Amateur Radio Club (CPSARC) will once again operate from the Isle of Tiree (IOSA NH04, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA (Islands on the Air) Contest which runs from 1200z, July 25th to 1200z, July 26th, using the club's special contest callsign GM2T. Look for pre-contest activity by the members signing as MM0CPS/P. CPSARC heavily supports newcomers to their wonderful hobby and has a large number of newly licensed members who are actively encouraged to participate in their contest effort, whether experienced or not. This way not only does their hobby benefit from new operators, but contesting benefits as they invariably become bitten by the contest bug. This year's team consists of: Cambell/MM0DXC, Bob/GM4UYZ, John/ MM0JXI, Brian/M0RNR, Gary/MM0FZV, Moe/MM0MRM, Geoff/MM5AHO, David/MM0XDG, Ellis/GM4GZW, Bob/GM4IKT, Jim/G3VOU, Brian/ G4UJE, Jonno/M5FUN, Malcolm MM0YMG, Duncan/MM0GZZ and Steve/ MM3YPN. QSL GM2T via the Bureau, or their QSL Manager GM4UYZ, by the Bureau or direct. Details are available at:
http://www.qrz.com/gm2t
For details about CPSARC, visit their revamped Web site at:
http://www.cpsarc.com

ADDED NOTE: This is the club's 11th anniversary on the island, and the team would like to express their gratitude to all the islanders who have looked after them over the years, but in particular to Elaine Hutchinson of Elephants End Restaurant (www.elephantsend.com) for her unrivalled support and hospitality over the last 11 years.

EU-011. Members of the Cray Valley ARC will again be active on the Scilly Isles between July 23-28th, on all bands, using the callsign G3RCV/P. They will also be taking part in the IOTA contest next weekend.

EU-031. Operators Alessandro/IW8EHK, Alfredo/IY7NGM, Catello/IZ8LLW and Francesco/IZ8OFJ will be active as IC8/IW8EHK during the RSGB IOTA Contest (July 25-26th). Other reference numbers: Punta Carena WAIL CA-008, ARLHS ITA-124 and WLOTA L-2466. QSL Manager: IK7JWX.

EU-036. Chris, OE9ICI, will be active as LA/OE9ICI from Kvenver, Hitra Island (WW Loc. JP43EM), between now and August 1st. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau. NO eQSL!

EU-048. Jean-Marc, F5SGI, will be active from Belle Ile (DIFM AT-015, WLOTA 0872, Grid IN87) between now and July 31st. Activity will be on 80-6 meters using CW, and an entry in the RSGB IOTA Contest (July 25-26th). QSL via his home callsign, direct or by the Bureau.

EU-059. (UPDATE) Col, MM0NDX, will be active as GM5A and MM0NDX/P from St. Kilda (WAB NF19, SCOTIA D123, Grid Loc. IO75RT), Scotland, between July 24-27th. This will be a family holiday-style operation from the campsite in Village Bay. St. Kilda is one of only two-dozen global locations to be awarded "World Heritage Status" for both natural and cultural significance. Col will participate in the 2009 RSGB IOTA Contest (July 25-26th) as GM5A. Outside of the contest he will sign MM0NDX/P and possibly be active on 80 and 40 meters. QSL GM5A via GM4FDM and MM0NDX/P via M0URX. A Web site is now active for this activity at: http://eu059.wordpress.com/

EU-067. Operators Cliff/SV1JG and George/SV1RP will be active as SX8M from Kyklades (Cyclades) Milos Island, Greece, during the RSGB IOTA Contest between July 24-27th. QSL via SV1JG, direct or by the Bureau.

EU-075. Steffen, DM3CW, will be active as J48AL from the Island of Aigina (GIOTA SAS-045, MIA MG-007, WLOTA L-4088) between July 21st and August 3rd. Activity will be holiday style and operating CW only using 100 watts into wire antennas. QSL via DM3CW, bureau preferred.

EU-122. Operators Sean/EI4GK, Pete/EI4GZB, Declan/EI9HQ, Pete/GI4VIV and Joe/EI7GY will once again be active from Rathlin Island as GI0MPG for this year's RSGB IOTA Contest (July 25-26th). Operations will be from the Rathlin East Lighthouse (ARLHS NTI-011), the same QTH as last year. QSL direct or by the Bureau to GI0MPG.

EU-124. Members of the Barry Amateur Radio Society (BARS) will activate Flatholm Island again for five days this year between Thursday, July 23rd and Tuesday, July 28th. During the RSGB IOTA Contest (July 25-26th), they will use the callsign GW8K. They will use the callsign GB5FI for activity before and after the contest. QSL via GW0ANA, direct or by the Bureau.

EU-124. (UPDATE) The Strumblehead DX and Contest group have now sealed the final permission to activate Ramsey Island (EU-124), off the West Wales coast, from the "Royal Society for the Protection of Birds" an organization who own the island. They will be active from 1800z, July 24th through to 1400z, July 27th taking in the IOTA contest. They will be active using the club call MC0SHL for the whole duration of the operation, and using MW9W in the contest. They will be on all bands from 80-10 meters SSB. There is also some 30 meters RTTY planned by G1VDP if the other guys allow him, with participation in the last 80m Club Championships DATA section. They will be operational using generators as power. Radios used will consist of 2 K3's and a Yaesu FT1000MP MkV and amplifiers. Antennas will consist of a Hexbeam, a windom and dipoles. Most of the activation is for the WAB award scheme as the square is semi rare and has not been activated for some time. They will be looking for JA and Asia during their mornings and evening on all bands. The team will be on from the farm for a few days before and after using the GB0WFF for the World Flora and Fauna award see http://www.wff44.com for award details, and using the MC0SHL club call and erecting a tower for Rob, MW0RLJ. The island will not only count for the WAB award but will also count for the WFF award. A special QSL card printed for both club callsigns. Full details are on the group's Web site <http://www.mc0shl.com>. QSL via the groups manager M0URX.

EU-125. Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be active as OZ0FR from Romo Island (NS-001 for the Danish Islands Award) between July 23-27th, including the IOTA Contest (July 25-26th). Activity will be high power on CW and SSB into a yagi antenna for 20-10 meters, a SteppIR vertical (BigIR) for 40-10 meters and dipoles for 80 and 40 meters. This activity will also count for the World Flora and Fauna Award (WFF - for OZFF-004). QSL OZ0FR via DL2VFR (also via the DL Bureau, do not send QSLs via OZ Bureau). More details at: http://www.iota-expedition.de

EU-135. Anders, SM5EFX, will be active as SM5EFX/2 from Ledskar Island between now and July 31st. Activity will be on all HF bands

and modes. He will also participate in the RSGB IOTA Contest (July 25-26th) using the special callsign SF2X. QSL both calls to SM5EFX, direct or by the Bureau.

NA-057. Ray, WQ7R, will be active as HQ9R from Roatan Island (Grid EK66) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via K5WW.

NA-154. Operators Dana/VE1VOX and Don/VE1AOE will be active as VC1W from Welsh Island (new CISA), August 22-25th. They plan to have two stations on the air and possibly more operators to join their operation as the date approaches. This is a remote island and weather may affect the actual dates. QSL Manager is VE3EXY.

EU-171. Operators Rene/DL2JRM and Netti/DO6XX will be active as OZ/homecall/p from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between now and August 1st. Activity will include the RSGB IOTA Contest (July 25-26th). Operations will be on 80-10 meters CW using 100 watts into a dipole/GP. QSL via their home callsigns, direct or by the Bureau.

EU-174. Tomas, HA0NAR, will once again be active as SX8R from Thassos Island (MIA MG-124, GIOTA NAS-037, WLOTA LH-4186, QRA KN20hs), Greece, July 22-31st. Activity will be on 80-6 meters using CW and SSB. He will also be an entry in the RSGB IOTA Contest (July 25-26th). He will use 100 watts and monoband antennas (Inverted Vee for 80m, verticals on a Spider pole and fishing rods for the other bands). QSL via HA0NAR, by the Bureau or direct.

EU-180. A Ukrainian and Moldavian team will be active as homecall/p from Tuzla Island between July 23-27th. Activity will be on CW and SSB. Operators mentioned are US0KW, US0ZZ, UT2XQ, UT4ZG, UT7UT, UU0JM, UU1AZ, UU4JDD, UU4JMG, UY6IM, UT/ER1DA, UT/ER3DW, UT/ER3DX and UT/ER3ZZ. QSL via their home callsigns. They will the "Black Sea Contest Club" callsign UU7J/P during the RSGB IOTA Contest (July 25-26th). QSL via UU0JM.

EU-181. Operators Gabriele/LZ/IK3GES, Boyan/LZ1BJ/1 and Lyuben/LZ1ZC/1 will be active from Sveta Anastasiya Island (WLOTA L-0035) between July 24-27th. They plan to use 100 watts into a 10 element log-periodic on 20/17/15/12/10 meters. Some activity on 40/30/6 meters is also possible. QSL via the QSL Bureau to their home callsigns.

NA-081. Operators Ken/W8ND, Butch/N8CHS and Kelly/K8MCN will be active as W8ND/VE1 from Big Tancook island (CISA NS012, WW Loc. FN74WL, Lunenburg County, Nova Scotia), July 23-26th. Activity will include the RSGB IOTA Contest (July 25-26th). QSL via K8MCN, direct or by the Bureau.

OC-148. Arif, YC9MDX, will be on the air from Kupang, Timor Island (WLOTA 0019) during the RSGB IOTA Contest (July 25-26th).

Activity will be on 40/15/10 meters SSB only. QSL via B7DX,
direct only (QRZ.com).

SA-023. Operators PY6AWV, PY6HD and PY6RT will be active as ZZ6Z between
July 24-26th. Activity will include the RSGB IOTA Contest. Their
operations will be on 80/40/20/17/15/10 meters SSB only. QSL
direct or bureau to PY6HD or LoTW. No E-QSL.

SA-023. Operators Orlando/PT2OP and Marcelo/PY6KW will be active as
PV6I between July 24-27th. Activity will include the RSGB IOTA
Contest (July 25-26th). QSL via PT2OP.

LUNAR EVENT ON AO-51. On "July 20th, AMSAT-NA will mark the 40th anniversary
of the first manned lunar landing with a special event on AO-51. AO-51 will
transmit a message commemorating the event Monday, July 20th, during evening
passes in the U.S. and Europe. The message will be transmitted on the
435.300
MHz FM downlink and will contain a Robot 36 SSTV image as well as a voice
message.

KH6BZF PROPAGATION FORECAST/REPORT (For July 20-26th).............
20 AN SOLAR REFERENCE
21 AN ---------------
22 AN AN - Above Normal/Geomagnetic Level is QUIET
23 AN HN - High Normal/Geomagnetic Level is UNSETTLED
24 AN GEOMAGNETIC REFERENCE
25 AN ---------------------
26 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
SPECIAL NOTE: By the time you read this, Lee should be active from
Gore Bay, Manitoulin Island (CISA ON-001), in Ontario, Canada. He will
be there through July 29th, using an Icom-706MKIIG into a TarHeel II
antenna or wire/dipole antenna.

LIGHTHOUSE ACTIVITY.....................
The Old Barney ARC will be operating as N2OB from the Barnegat Lighthouse
(USA-039) on Long Beach Island, NJ (IOTA NA-111), on August 1st from
about 1300-2100z. There will be two stations set up with activity
primarily on 20 and 40 meters SSB. QSL via N2OB.

The Old Barney ARC <http://www.obarc.org> will be operating as W2T
from the Tucker's Island Lighthouse (USA-911) in the Tuckerton Seaport
<http://www.tuckertonseaport.org>, August 15-16th from about 1300-2100z
each day. There will be two stations set up with activity primarily on
20 and 40 meters SSB. QSL via N2OO.

MJ0, JERSEY (EU-013). Mat, F5SHQ, will be active as MJ0ASP during the
RSGB IOTA Contest (July 25-26th) as a Single-Op/Low-Power entry. QSL
via MJ0ASP.

OH0, ALAND ISLAND (EU-002). Operators Juha/OH6XX and Timo/OH6GLE will be active as OH0Z during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/ Island entry. QSL via W0MM.

PACIFIC TOUR #1. Operators Claudia/K2LEO/PA3LEO and Andrea/IK1PMR are currently planning a Pacific trip for November and December. Preliminary planning includes DX activity from Western Samoa (5W), Tonga (A3) and possibly Rarotonga in the South Cook Islands (E51). They are inviting DXers (with or without DXpedition experience) to join their operations, even for a single destination (A3 being the main DX stopover). If you are interested in joining Claudia and Andreaï¿½s Pacific DX tour, visit their Web page (still under construction) for more details and how to contact them at: http://www.ik1pmr.com/plans/a3

PACIFIC TOUR #2. Chris, DO7AG, will be flying to the South Pacific with his family between November and January. He plans to be active as 5W1QX from Western Samoa and A31CE from Tonga. Activity will only be on 40 and 20 meters (this is due to the type of license he has). Complete dates of activation are to be determined. ADDED NOTE: Chris realizes that another operation from A3 and 5W will be going on at the same time (see above), and he hopes to meet Claudia and Andrea.

QSL INFO AND NEWS.....
5C2 QSLS STATUS. Alfredo, IK7JWX (5C2J), informs OPDX that he has received the QSLs from the printer and expects to start sending out QSL, for all the confirmations this week of all the 5C2 team's QSOs from Morocco (Essaouira & Lh. MOR-019).

CS28MCF LOG ONLINE. The Algarve S.T.A.R. DX Team reports that the CS28MCF log is now available online at: http://algarvedx.com
Last update was 17th, July, 2359z. Attention: 400 QSOs are missing and will be added next Monday. Some pictures will be uploaded today. CS28MCF - 5000 QSOs in log now. Operations stopped at 19th,July, 2259z.

QSL EA6/HA5GY/qrp via his home callsign. Activity on July 15th, was from a lighthouse (BAL-005), QRA is JM19EN.

Nilay Mine AYDOGMUS, TA3YJ (XYL), transferred all her duties and rights concerning the management (TA3YJ QSL Service) to her husband Berkin AYDOGMUS, TA3J, because of the "severe sanitary conditions" of her parents. The new QSL Manager is now Berkin AYDOGMUS, TA3J (TA3J QSL Service). He is the QSL Manager of the following: HA/TA3J, LZ1/TA3J, LZ2/TA3J, LZ2/TA3YJ, OE/TA3J, OK/TA3J, SV1/TA3J, SV1/TA3YJ, SV4/TA3J, TA3CEH, TA3J, TA3J/0 (IOTA-AS099), TA3J/0 (IOTA-AS115), TA3J/1, TA3J/3, TA3J/3 LH (ARLHS#TUR006), TA3J/4, TA3J/4 LH (ARLHS#TUR065), TA3J/7, TA3J/60, TA3PI, TA3YJ, TA3YJ/0 (IOTA-AS099), TA3YJ/3, TA3YJ/3 LH (ARLHS#TUR006), TA3YJ/4, TA3YJ/4 LH (ARLHS#TUR065), TA3YNO, TA3YPI, TA7KI (ARI2009), TC2K4J, YM125ATA, YM125ATA/4, YM1907FB, YM21TA, YM3ATA, YM3BU, YM3LZ (WAE2000SSB), YM3LZ (WPX2000SSB), YM3SV and YM75TA.
His Home page is: http://www.aydogmus.gen.tr/ta3j/qslservice.htm
His E-mail address is: ta3j@aydogmus.gen.tr

NOT THE QSL MANAGER. John, ZB2EO, reports that RW6HS is NOT and has never been his QSL Manager, and that all QSLs for ZB2EO and ZG2EO, should be sent DIRECT to address as per QRZ.com.

QSLS VIA LOTW: 3D2YA, 4O3A, 4U1UN, 5N0OCH, 9Z4FZ, EU7SA, IU9T, PY0FF, R1ANL, SM5IMO and ZC4LI

QSLS RECEIVED VIA MAIL: 4S7NE, A73A, CE4WJK, CT1HZE, DP1POL, EA6BH, HB0/DJ1AIB, J88DR, JT1AGO, JT1ZP, JW5LJA, KH7Y, LA6YEA, MJ/DL7AFS, MJ/DJ7ZG, R1ANB, R1ANC, VK9LA, VY0A, YV4AB and ZK3MW

QSLS RECEIVED VIA THE BUREAU: 5B/DF9TM, 6V7J, 6V7K, 6W1RW, 6W7RV, 9A0CI, EA8AH, EB5KB/P, EE5GG, EH5K, EK3GM, ER10KDR, ER5DX, GB1SRI, HA8IE, HG0HQ, I1ZHH, IF9A, II8ANT, II8IPY, IK5CAC/7, IK6CAC, IQ0FR/6, IQ5PJ, IW9FRA, J20MM, OD5WPX, OG5M, OH2/DL5ME, OJ0/SM0LQB, RA2FBC, SM3PZG, TK/IK1YED, TM5B, UA6UDV, US0LW, VE3MIS, VE3XD and ZY7C

SU8, EGYPT (LH Activity). Operators Greiss/SU1GS, Mohamed/SU1AO and Said/SU1SK received permission from the NTRA (Egyptian's National Telecom Regulatory Authority) to use the callsign SU8LH during the first activity from an Egyptian lighthouse on Ras El-Bar Island (Not IOTA), 250km north of Cairo, between August 1-9th. Look for SU8LH to participate in the International Lighthouse/LightShip Weekend (ILLW). Activity will be on CW and SSB, 6 meters and the HF bands. They will be running 100 watts into wires antennas. For a brief detail about the event and location, go to: http://www.qsl.net/su1sk/Links.html
QSL via SU1SK. For info on the ILLW, go to: http://illw.net/2009_list.htm

SV5, DODECANESE. Tom, OK2PTZ, will be active as SV5/OK6Y from Kos Island (EU-001) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/Mixed-Mode entry. He states, "I will be on the island Saturday 25th. I hope I will be ready for 2nd part of the contest." QSL via OK2PTZ.

TC21, TURKEY (Special Event). Members of the Turkish group called SWAT (Special Wireless Activity Team) will be active as TC21BSR from Istanbul between July 14-20th, during the 21st Bosphorus Race. It is the only event which starts from one continent (Asia) and ends at a different continent (Europe). See the following for details at:
http://www.turkishnoc.org/tr/Faaliyet/bgz/2009/Bgz2009.htm
Activity will be mainly on the HF bands using SSB and SSTV, and the VHF-UHF on FM. More information is available on QRZ.com the TCSWAT Web page at: http://www.tcswat.org

TP60, FRANCE (IOTA Contest/Special Event). Francis, F6FQK, reports that members of the "Council of Europe Radio Amateur Club" (CERAC) will be active as TP60CE to celebrate the 60th anniversary of the "Council of Europe", as well as be an entry in the RSGB IOTA Contest. Look for them between July 24-26th. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

V73, MARSHALL ISLANDS. JA operators Fuminor/JA2DSQ and Yuji/JH2BNL will be active from Majuro (OC-029) between August 24-29th. JA2DSQ will be signing as V73NF on the lower band using CW. JH2BNL will be signing as either V7XX or V73J operating 80-10 meters using SSB and RTTY. QSL via

their home callsigns.

VK9N, NORFOLK ISLANDS. Just a reminder that the members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9NI between July 22-29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. QSL via W3HNK. More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VK9X, CHRISTMAS ISLAND (OC-002). Operators Harry/DM5TI, Rene/DL2JRM and Thomas/DL2RMC will be active from here between November 21st and December 5th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. They plan to use verticals and beams, and also be an entry in the CQWW DX CW Contest (November 28-29th). QSL via DL1RTL, by the Bureau or direct.

VP2V, BRITISH VIRGIN ISLANDS. Curt, W3HQ, will be active as VP2V/W3HQ from Virgin Gorda between December 4-16th. Activity will be CW only. Bands will be mainly 160 and 10 meters on weekends, and 30/17/12 meters during the week. QSL via W3HQ. Skeds are welcomed (2 way QRP skeds are preferred). His E-mail address is: w3hq@live.com

VY1, CANADA (Yukon on 160 Meters!). Operators John/KL7JR, Claire/WL7MY and KL7BO will be active as VY1RST during and after the ARRL November SS Phone Contest from near Beaver Creek, Yukon, between November 20-26th. Emphasis will be on 160/80 meters SSB (using a 160m Inverted L) with a 2nd station on for 40-10 meters (vertical) SSB and PSK-31. QSL Manager is KL7JR. E-mail skeds are welcome at: John.ReisenauerJr@alyeska-pipeline.com

XV, VIETNAM (IOTA Op). Sigi, DL7DF, will lead a crew of operators to be active from the Island of Phu Quoc (AS-128) between November 4-17th. Their callsign has not been announced yet, but it is expected to be the XV prefix. Activity will be on 160-10 meters using CW and SSB with several stations on the air. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. Their equipment consists of 3 transceivers (two K2 and one IC7000) with three kW linears into two 18m lowband verticals, a 2 element vertical for 40m, a 2 element vertical for 30m, two Spiderbeam for 20/17/15/12/10m, and some beverage antennas. Operators mentioned are: Manfred/DK1BT, Wolf/DL4WK, Andy/DL5CW, Sigi/DL7DF and Frank/DL7UFR. Pilot station for this DXpedition is Bernd, DF3CB. QSL via DL7DF, by the German QSL Bureau or direct to: Sigi Presch, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. PLEASE NOTE: If you prefer a direct QSL, please send a SASE and 1 IRC or 3 USDs for outside of Europe and 1 IRC or 2 USDs for mail within Europe. If you do not provide the right return postage or a self addressed envelope, they will reply via the bureau. Please only one callsign per letter! If more than one, all additional cards go via the bureau. For complete details, visit: http://www.dl7df.com/xv/index.html

see, that's why i am able to call you a idiot. the supremacy clause
is in the constitution, and its why the federal government is the
supreme law of the land. i cut and pasted the supremacy clause right
out of the constitution.

nope, concentration soared after deregulation in the 1990's. its a
matter of public record.

 You tried to claim that deregulation
> that allowed anyone to set up a radio station would concentrate
> ownership by pointing to an entirely different form of
> "deregulation".
>
>

never said anyone could set up a station. deregulation simply allowed
a few huge corporations to buy concentration.

>
>
>

>

the 10th amendment cannot override the supremacy clause. the
supremacy clause is called the supremacy clause because it means
federal law, federal regulation, and treaties are the supreme law of
the land.
break federal law, then tell a judge it was state rights. there are
those that stupid, they are in jail now.

> > the supremacy clause states that the constitution, and all laws, regulations, and
> > treaties are the supreme law of the land idiot.
> > the 10th amendment says states have some rights, but, if a state law

>

i did. all judges are subject to the supremacy clause, local, state
or federal.

> > you simply are ignoring facts, facts that do not fit into your low
> > brow world.
>
>   And yet you're the one claiming that an amendment that says nothing
> about the Feds being supreme (and in fact says the exact opposite)
> establishes such a thing. You're the one ignoring facts.
>

you are impervious to facts, logic and reason, its why you are a
idiot.

THE SUPREMACY CLAUSE
Article. VI.
This Constitution, and the Laws of the United States which shall be
made in Pursuance thereof; and all Treaties made, or which shall be

made, under the Authority of the United States, shall be the supreme
Law of the Land; and the Judges in every State shall be bound thereby,
any Thing in the Constitution or Laws of any State to the Contrary
notwithstanding.

The preemption doctrine derives from the Supremacy Clause of the
Constitution which states that the "Constitution and the laws of the
United States...shall be the supreme law of the land...anything in the
constitutions or laws of any State to the contrary notwithstanding."
This means of course, that any federal law--even a regulation of a
federal agency--trumps any conflicting state law.

>
>
>

Concentration soared after changes to regulation which retained
exactly
the sort of regulations that I said led to concentration. The idea
that because
one type of regulation leads to slightly less concentration all
regulation lowers
concentration is moronic.

> > You tried to claim that deregulation that allowed anyone to set up a radio

You made a claim about what I was proposing, and what I was
proposing was
that anyone be allowed to set up a radio station. You claimed that it

would lead
to greater concentration, to support this you stated that a completely
different type
of regulatory change led to increased concentration. So it did but so
what?

Yes amendments override what they amend. Otherwise they'd just be
waffle.

You obviously didn't read it right. What you describe is an
amendment with no
effect, which is absurd both legally and in commonsense terms.

Not if the state has the power to make that type of law.

> waffle.

You are right, that is what the amendments do.... You can't cut anything from the constitution. You have to add an amendment that strikes down any part of that you want and then replace it.

We only need to look at

AMENDMENT XVIII

Passed by Congress December 18, 1917. Ratified January 16, 1919.
Repealed by amendment 21.
Section 1.

After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.
Section 2.

The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.
Section 3.

This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XXI

Passed by Congress February 20, 1933. Ratified December 5, 1933.
Section 1.

The eighteenth article of amendment to the Constitution of the United States is *hereby repealed* .
Section 2.

The transportation or importation into any State, Territory, or Possession of the United States for delivery or use therein of

intoxicating liquors, in violation of the laws thereof, is hereby prohibited.
Section 3.

This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

> > > different type
> > > of regulatory change led to increased concentration. So it did but so
> > > what?
> >>>>>>>> the 10th amendment is but a joke. it states that
> >>>>>>>> states do have some rights, they are those the federal government does
> >>>>>>>> not have at the moment. but the supremacy clause states the the
> >>>>>>>> constitution shall reign supreme.
> >>>>>>> Which means that the 10th amendment rules supreme and the powers
> >>>>>>> reserved to the states cannot be usurped.
> >>>>>> nope, if it was not for the supremacy clause, no state would
> >>>>>> recognize the rights of other states. you are a crank.
> >>>>> You have no idea what you're talking about. The supremacy clause
> >>>>> doesn't nullify the 10th amendment nor could it. Otherwise the
> >>>>> constitution would be inactive. It's an AMENDMENT, that means it
> >>>>> overrides the previous sections of the constitution.

> >>>> ROTFLOL!!!!!!!! you do not even understand what the supremacy clause
> >>>> is do you. you just admitted it. without the supremacy clause, the
> >>>> 10th amendment would be ignored by all of the states.
> >>>   The tenth amendment overrides the supremacy clause because it's an
> >>> AMENDMENT, which means it AMENDS the previous consitution and
> >>> therefore overrides it. Why would the states ignore a provision that
> >>> specifically gives them powers and prevents the Feds from infringing
> >>> them? You obviously have no idea what the tenth is or does.
> >> the 10th amendment cannot override the supremacy clause. the
> >> supremacy clause is called the supremacy clause because it means
> >> federal law, federal regulation, and treaties are the supreme law of
> >> the land.
>
> >   Yes amendments override what they amend. Otherwise they'd just be
> > waffle.
>
> You are right, that is what the amendments do.... You can't cut anything
> from the constitution. You have to add an amendment that strikes down
> any part of that you want and then replace it.
>
> We only need to look at
>
> AMENDMENT XVIII
>
> Passed by Congress December 18, 1917. Ratified January 16, 1919.
> Repealed by amendment 21.
> Section 1.
>
> After one year from the ratification of this article the manufacture,
> sale, or transportation of intoxicating liquors within, the importation
> thereof into, or the exportation thereof from the United States and all
> territory subject to the jurisdiction thereof for beverage purposes is
> hereby prohibited.
> Section 2.
>
> The Congress and the several States shall have concurrent power to
> enforce this article by appropriate legislation.
> Section 3.
>
> This article shall be inoperative unless it shall have been ratified as
> an amendment to the Constitution by the legislatures of the several
> States, as provided in the Constitution, within seven years from the
> date of the submission hereof to the States by the Congress.
>
> AMENDMENT XXI
>
> Passed by Congress February 20, 1933. Ratified December 5, 1933.
> Section 1.
>
> The eighteenth article of amendment to the Constitution of the United

> States is *hereby repealed* .
> Section 2.
>
> The transportation or importation into any State, Territory, or
> Possession of the United States for delivery or use therein of
> intoxicating liquors, in violation of the laws thereof, is hereby
> prohibited.
> Section 3.
>
> This article shall be inoperative unless it shall have been ratified as
> an amendment to the Constitution by conventions in the several States,
> as provided in the Constitution, within seven years from the date of the
> submission hereof to the States by the Congress.
>
> --

ROTFLOL!!!!!!!!!! except, that the supremacy clause WAS THE REASON
BOTH AMENDMENTS WERE RECOGNIZED BY THE STATES. you are impervious to
facts, logic, and reason. the tenth amendment did not over turn the
supremacy clause. the supremacy clause is the sole reason that the
constitution is enforced in all 50 states and territories.
break federal law, then tell the judge it was states rights, go
ahead, there are those who have, and are sitting in a nice federal
cell. some are in padded cells, and rightly so.

2118. Amateur Radio Newsline(tm) Report 1667 - July 24 2009

Amateur Radio Newsline(tm) Report 1667 - July 24 2009

Ladies and gentlemen, with some words of thank you to our listeners, heres our Support Fund Administrator Andy Jarema, N6TCQ:

--

In the month of August last year we heard from regular contributors Benton Bonney, W4PE of Orlando; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; William Walters, WA2IBM in San Jose; Stephen Perluss and the South Orange Amateur Radio Association in Mission Viejo.

Also the Albemarle ARC in Earlysville, VA; the Seqouia Amateur Radio Group, N6KRV in Lake Isabella, CA; Leo Halog, KR6EG in San Francisco; The Calveras Amateur Radio Society, N6FRG in Angels Camp; John Rice, KE6YFV in San Pedro and our good friends David, W6AQ & Alice Bell W6QLT in LA.

Via PayPal there was Greg Danes of Alexandria, VA and the 147.590 Echolink Mills Computer & Electronics- W3YNI in Irwin, PA. Also, Warren Anderson- Plymouth, MN; Jim Sellars- Springfield, MO and the SW Missouri Regional Skywarn Spotters; Andrew Hansis- K7FED in Henderson, NV; Tom Stanley- KB7VOO in Bonney Lake, WA; Douglas Gilbert- WA6LXB of West Hills, CA.

It costs almost $1000 a month to gather the news and put these newscasts on the air. Please do what you can to keep these newscasts coming by logging onto our website and going to our PayPal secure contribution link, or contacting us at our Arcadia support fund address given at the end of this newscast. If you choose the easy PayPal route, be sure to include your callsign in the Notes section, so that we can say it on the air.

For now, I'm Andy Jarema, N6TCQ, and thank you.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1667 with a release date of Friday, July 24th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio says goodbye to a great American legend as Walter Cronkite, KB2GSD, passes from the scene. Also, the World Administrative Radio Conference is delayed until 2012, the ARRL meets in Connecticut, DX goes to Twitter and RF ID tags hit the London subway. Find out the details on Amateur Radio Newsline(tm) report number 1667 coming your way right now.

(Billboard Cart Here)

**

CHANGING OF THE GUARD: WALTER CRONKITE KB2GSD - SK

The man credited with setting the "gold standard" in broadcast journalism has passed away. CBS newsman Walter Cronkite, KB2GSD, who once held the title of ''Most Trusted Man in America,'' has passed away. Cronkite died with his family at his bedside on Friday, July 17 after at age 92.

Walter Cronkite became a ham for a slightly different reason than most of us. He was a sailor and loved to be on the water in the boat that he owned. He was also very safety conscious and when some of his colleagues at CBS suggested that he put ham radio gear on board his vessel, he thought it would be a good idea. Only he needed a ham ticket to go with it. Enter two then CBS hams, Rich Moseson, W2VU and Steve Mendelson, W2ML. Back then they were N2BFG and WA2DHF respectively. Rich Moseson tells us how he got drafted as one of the two volunteer examiners that would give Walter Cronkite for his Novice exam:

--

Rich Moseson, W2VU: "I remember my boss at the time, Joel Heller, WA2FFI, who was an Executive Producer at CBS News calling me into his office one day. Steve Mendelsohn and Walter Cronkite were sitting there and he (Heller) said that Mr. Cronkite has decided to get his ham license and wants to take his test. Steve's going to do (supervise) the written test for the Novice and would you be willing to give him the code test. And of coarse I said "yes."" --

Walter Cronkite was soon KB2GSD and while he was rarely on the air, he was keenly aware of the hobby and its importance. And on two occasion when approached by film maker Dave Bell, W6AQ, he gladly lent his voice and image to a pair of ham radio video's. The second of these was made in 2005 and was called "The ARRL Goes To Washington." It was inspired by then ARRL President Jim Haynie, W5JBP, who wanted something to rally ham radio to the danger of Broadband Over Powerline or BPL internet access and the devastating effect it would have on ham radio High Frequency operations. Haynie turned to Dave Bell and his ham radio production team for assistance. Bell once again approached KB2GSD to host the presentation. And with a script written by the late Alan Kaul, W6RCL, Walter Cronkite lent his voice and his image to the fight to restrain BPL

--

Walter Cronkite, KB2GSD, audio from The ARRL Goes To Washington: "The Federal Communications Commission is the agency that issues ham radio licenses and regulates amateur radio. Congress created the FCC an like a mindful parent it occasionally overrules the agency, a fact of which Jim Haynie is well aware. Thats important because at this exact moment

the FCC is pushing a controversial Internet access scheme caulked Broadband Over Powerline or BPL."

--

According to Dave Bell, having Walter Cronkite as host of the ARRL Goes To Washington is what made the video the effective anti BPL tool that it was:

--

Dave Bell, W6AQ: "Getting Walter to host a film about BPL gave it weight that no other person in the entire country could give it. When a Congressman or an executive in Washington of any kind gets a DVD and it says '&narrated by Walter Cronkite' that means its true. And I do not think that film would have been nearly as effective with anybody else narrating it."

--

There have been many accolades written and voiced with the passing of Walter Cronkite. One of the most poignant are the words of FCC Commissioner Michael Copps. He said and we quote:

"One of my fondest memories during my time at the FCC will always be the opportunity I had to get to know the legendary Walter Cronkite. I was privileged to visit with Walter on several occasions and to imbibe some of the unmatchable feel he had for journalism and its crucial role in sustaining a healthy and vibrant democratic dialogue.

On one occasion, in 2007, we shared a platform at a Columbia University forum on the future of the media. By then, Walter had been speaking out for a number of years about excessive media consolidation and the declining resources that were going into journalismparticularly investigative journalism. He ended his remarks this way:

""America is the most prosperous and powerful nation in perhaps the history of the world. We can certainly afford to sustain a media system of which we can be proud.""

I will miss this good and wise man. And the country will miss his sage counsel as we finally begin to grapple with the crisis in journalism that he saw coming long ago. We will best honor Walter Cronkite's memory by tackling this issue with the urgency it deserves.

To which we will add that we too will all miss the man the country came to know as Uncle Walter and ham radio operators came to know as KB2GSD. He was truly an American treasure and we in ham radio were lucky to have him as one of us.

As an aside, Amateur Radio Newsline has prepared a 14 minute audio tribute to Walter Cronkite hosted by Mark Abramowicz, NT3V. Its at our website under Special Reports. Simply scroll down the page and left click to download and save it to your computer. Its our small way of

saying farewell to the man America trusted the most and who hams knew by the call letters KB2GSD. (ARNewsaline")

**

THE BPL FIGHT: FCC ISSUES NEW NPRM ON BPL

Speaking about BPL, the Federal Communications Commission of the United States has finally issued new proposed regulation for Broadband over Powerline Internet access. In its Notice of Proposed Rulemaking the FCC is seeking comment on the power levels that should be permitted for BPL systems so they don't cause interference with other services.

The new proposal is the result of litigation won by the ARRL last year regarding new requirements and measurement guidelines for Access Broadband over Power Line Systems. So far the ARRL is yet to make known its response to the new proposal. (Southgate)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WC8OH repeater serving Kettering, Ohio.

(5 sec pause here)

**

RADIO POLITICS: WRC 11 BECOMES WRC 12

WRC-11 Is Now WRC-12. This, as the 46-nation ITU Council which is the administrative oversight body of the International Telecommunication Union agrees to move the next World Radiocommunication Conference to 2012.

Originally scheduled for October 24th to November 18th, 2011 in Geneva, Switzerland, the Council has proposed January 23rd to February 17th as the new dates. According to ARRL Technical Relations Manager Brennan Price, N4QX, the full ITU membership is now being consulted on the change and responses are due by August 3.

According to Price, the ITU Council had previously proposed dates for fall 2011, but various scheduling conflicts and the lack of available facilities during some weeks made this schedule impractical. (ITU)

**

WITH THE ARRL: BOARD MEETING RESULTS IN BRIEF

The ARRL Board of Directors held its Second Meeting of 2009 in Windsor, Connecticut on July 17th and 18th. According to the League, most of Saturday was devoted to reviewing and revising the ARRL Strategic Plan that was adopted in October 2006.

During the two day gathering the Board considered and acted on a number of organizational, regulatory and operating issues, including the formation of an ad hoc committee to study and prepare guidelines to identify inappropriate use of Amateur Radio. Also looked at was updating of the terms of reference of the Volunteer Consulting Engineer Program; establishing of an Emergency Liaison Station appointment at the national level to link ARRL Headquarters to affected areas during disasters; the formation of a study committee to conduct research and consider developing a plan for narrow-band channel spacing in the VHF and UHF bands.

Several other items were also acted upon. These include the creation of the George Hart Distinguished Service Award to be given for exemplary service in the ARRL Field Organization, and updating the terms of reference for the Bill Leonard, W2SKE, Professional Media Award. The Board also conferred several awards on deserving nominees. (ARRL)

**

WITH THE ARRL: W1AW BULLETINS TO ADD DIGITAL

Still with news from the League, word that its W1AW bulletin station will add new digital modes to its transmitting schedule in mid-August. This following a survey of listeners who say that they want the digital transmissions.

On August 17th W1AW will replace its AMTOR and ASCII transmissions with PSK31 and MFSK16, respectively. RTTY will continue to be the first digital mode used in the transmission schedule. The frequencies used by W1AW for all its digital transmissions will remain the same.

The W1AW operating schedule complete with times and frequencies can be found on the ARRLWeb page . at http://www.arrl.org/w1aw.html#w1awsked. (ARRL)

**

RESCUE RADIO: THALES INTRODUCES SDR LMR PORTABLE

The US Department of Homeland Security has picked 14 groups from across the country to pilot an ambitious Multi-Band Radio project. This in an attempt to permit all responding units to talk with one another and with incident command no matter what frequency or mode of communication they use. Amateur Radio Newslines's Jeff Clark, K8JAC, tells us about the radio that they will be testing:

--

Currently radios only operate within a specific frequency band. As a result responders are often unable to communicate with other agencies and their support units that operate in different radio frequencies. Having a fully interoperable portable that is comparable to today's single band sets was the reason that the Department of Homeland Security Science and Technology Directorate in 2008 awarded a $6.2

million contract to Thales Communications. Its job was to develop and demonstrate the first-ever portable radio prototype that lets emergency responders-police, firefighters, emergency medical personnel and others-communicate with partner agencies, regardless of the radio band they operate on.

The result of that investment by the government is the Thales Liberty software defined multiband mobile radio which received FCC certification in April. The prototype is capable of operating in the primary public safety bands between 136-174 MHz, 380-520 MHz as well as in the 700 MHz and 800 MHz bands. And because it is software defined it can be reconfigured to operate in emerging spectrum that will be dedicated to emergency communications as well.

--

The Liberty radio is made in the U.S. and is the first multiband portable designed specifically for government agencies and first responders. And while it can be programmed to operate across the 2 meter ham band, don't look for very many of them to show up on your local repeater. They are priced at priced at a hefty $4,000 to $6,000, each. (Press release)

**

RADIO EDUCATION: HAMTESTS INTERNATIONAL TO LAUNCH IN THE USA

After successfully running the UK-only Hamtests.co.uk for just over 3 years, HamTests International is launching world-wide starting here in the US with the Technician, General and Amateur Extra license levels. Each randomly generated test will have the same question pools as real tests. 35 Questions in Technician and General practice tests. 50 in Amateur Extra practice tests.

HamTests International will also feature its 10 questions in 10 minutes technique. This is a quick practice designed for when you don't have the time to take a full practice test. It tests your ability to answer questions quickly and thoroughly so that you can ace the real exam on test day.

Yet another feature will allow the questions pools for US tests to be downloaded as a specially formatted PDF files for Sony eBook Readers, but can also be viewed in other ebook readers with PDF reading capability, or on a P C with any standard PDF reader.

To get an idea as to what to expect when the new HamTests Internation website is up and running you can visit Hamtests.co.uk and take a peek. (Southgate)

**

COMMUNICATIONS SAFETY: THE STORY OF THE TEXTING TEEN

Communications can be hazardous to your health. Especially when one is not watching where they are walking because they are text messaging and wind up falling down a manhole.

According to news reports that's exactly what happened as a New York City teenager while she was sending a text message on her cell phone. On June 12th Alexa Longueira was about to send a text to a friend when she fell down the open manhole on Staten Island. The girls suffered only mild cuts and bruises.

Longeueria mother said workers told her they left the manhole uncovered and unattended for only seconds while they went to get cones from their truck. The city's Department of Environmental Protection said it was investigating the incident.

The girl's family said they are planning to file a lawsuit against the city. (Published news reports)

**

HAM HAPPENINGS: INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

Turning to the ham radio social scene, entries in the 2009 International Lighthouse/Lightship Weekend, have reached 262. Organizers say that this is well on schedule to equal or better last year's total of 406.

Australia currently leads the list with 42 entries, followed by Germany with 40. Some of the more exotic places taking part include light houses or light ships in Egypt, Panama, Gibraltar, Isle of Man, Sardinia, Iceland and Namibia.

International Lighthouse/Lightship Weekend, which this year begins on August 15th is fast becoming the most popular international event on the ham radio calendar. More information is on-line at illw.net (VK2CE)

**

THE SOCIAL SCENE: NORTH QUEENSLAND AUSTRALIA IN SEPTEMBER

Australia's North Queensland Amateur Radio Convention will be taking place in the garrison city of Townsville from Friday September 18th to Sunday 20th. Daytime events will be happening at James Cook University Douglas Campus with night time events centered on one of the better bistros and convention rooms in the city. The registration deadline for Convention services is Friday August 28th. For an electronic copy of the Venue and Events notes and a Registration Form either surf to the TARC website at www dot tarc dot org dot au or by e-mail to vk4wit (at) wia (dot) org (dot) au (VK4ZZ)

**

NAMES IN THE NEWS: HAM RADIO HONORS TO W4RA

Some names in the news. First up is former ARRL and IARU president Larry Price, W4RA. He was honored at "Ham Radio 2009" in Germany. This in a presentation made by IARU Vice President Ole Garpestad, LA2RR. Price was honored with the highest Norwegian Radio Relay League award called the Knight of the Order of the Golden Key. The award was given for W4RA many years of service to the IARU, the ARRL and Amateur Radio in general. But that's not all. IARU President Tim Ellam, VE6SH, then conferred the title of IARU President Emeritus upon Price. Price served as ARRL President from 1984-1992 and as IARU President from 1999-May 2009. (Southgate)

**

NAMES IN THE NEWS: FRANK BOLDEN JR., EX-KE4IQB TO HEAD NASA

Charles Frank Bolden, Jr., the former KE4IQB, has been confirmed by the Senate as the twelfth administrator of the National Aeronautics and Space Administration. Bolden commanded Shuttle missions STS-45 and STS-60 and was an active participant in the Space Amateur Radio Experiment or SAREX program.

Bolden's confirmation marks the beginning of his second stint with NASA. His 34-year career with the Marine Corps included 14 years as a member of NASA's Astronaut Office. After joining the office in 1980, he traveled to orbit four times aboard the space shuttle between 1986 and 1994, commanding two of the missions. (NASA)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: K5LBU SAYS SWAZILAND DXPEDITION NEEDS YOU

Charles Frost, K5LBU, better known on the air as Frosty is looking to put together a team of operators to do the CQWW DX SSB Contest in October 2010 from Swaziland. According to Frosty, this would be a 10 or 15 day operation with the contest in the middle. He plans to use one callsign for the contest and the rest of the time you can operate with your own 3DA0 callsign. If you would be interested in going on this operation please contact K5LBU by e-mail to frosty1 (at) pdq (dot)net

**

EMERGING TECHNOLOGY: DX GOES TO TWITTER

DX is going to Twitter. Ast least one DX news source is. Bill Pasternak, WA6ITF, has the details:

--

GB7MBC, one of Europe's busiest DX Clusters, is now on the Twitter social networking system. Postings provide such things as DX news, contests news and solar information. To follow GB7MBC on Twitter, just go to twitter.com/GB7MBC and add it to your list of 'tweets' you follow.

With the growing popularity of ham radio on Twitter its very likely that lots of other activities like radio club bulletins and the like will be soon showing up there as tweets as well. Maybe even a synopses of important Newsline stories will show up sometime soon. We are already looking for a volunteer who is willing to do that.

I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

More information on Twitter is at www dot twitter dot com. (G0YLM)

**

STATISTICS: 1.5 MILLION NOT WATCHING TV

You might find this one hard to believe, but more than a month after the nationwide switch to all digital television, the AC Nielsen company says that some 1.5 million United States households with television receivers in them remain unready for DTV. The good news is thats down 200,000 households from the 1.7 million households that weren't ready two weeks before the June 12th changeover took place.

The A.C. Neilsen Company is a survey organization that specializes in television viewership statistics. It defines as unready any homes that rely on over-the-air TV and don't have a digital TV set or a DTV-to-analog set-top converter hooked up. It was Nielsen's statistic last January that 5 million homes not prepared for DTV that lead Congress to delay the DTV move to June. Put another way, about 1.5 million people who used to watch TV in the USA are not doing so right now. (MultiChammel OnLine)

RADIO FROM SPACEL LUNAR ORBITER PHOTOGRAPHS APOLLO LANDING DITES

NASA has released new photos recently taken by the Lunar Reconnaissance Orbiter showing the Apollo moon landing sites. The pictures, radioed back to Earth, show the Apollo missions lunar module descent stages sitting on the moon's surface This, as long shadows from a low sun angle make the modules descent locations very evident.

The Lunar Reconnaissance Orbiter reached lunar orbit June 23rd and captured the Apollo sites between July 11th and the 15th. Though it had been expected that orbiter would be able to resolve the remnants of the Apollo mission, these first images came even before the spacecraft reached its final mapping orbit.

The Lunar Reconnaissance Orbiter Camera was able to image five of the six Apollo sites, with the remaining Apollo 12 site expected to be photographed in the coming weeks. Future images from these sites are expected to have two to three times greater resolution. You can see the pictures at:
http://www.nasa.gov/mission_pages/LRO/multimedia/lroimages/apollosites.html (NASA)

**

RADIO IN SPACE: THE COLDEST OF THE COLD

Talk about the cold of space. On July 2nd the flight detectors of Planck' spacecraft's High Frequency Instrument reached the amazingly low operating temperature of -273ï¿½C and did it by radio.

The cool-down took place as the spacecraft has just entered its final orbit around the second LaGrange point of the Sun-Earth system. Planck is equipped with a passive cooling system that brings its temperature down to about -230ï¿½C by radiating heat into space. Three active coolers were ordered to take over from there to bring the temperature down further to an amazing low of -273.05ï¿½C. That's only 0.1ï¿½C above absolute zero which is the coldest temperature theoretically possible in our universe.

Such low temperatures are necessary for Planck's detectors to study the Cosmic Microwave Background of space. That's the so-called first light released by the universe only 380000 years after the Big Bang that many researchers gave birth to it. It does so by measuring its temperature across the solar sky. (Space)

**

HAM RADIO IN SPACE: OSCAR 5 IN SAT MAGAZINE

The aging Oscar 5 satellite built by Australian radio amateurs at the end of the 1960's is mentioned in the latest issue of SatMagazine. The July through August issue covers the Australian space program and mentions the work of the hams who built Oscar 5 which was launched on January 23, 1970. The article includes a picture of bird which carried transmitters on 29.450 MHz and 144.050 MHz. The July/Aug 2009 issue of SatMagazine is at http://www.satmagazine.com/2009/SatMag_JulAug09.pdf) (WIA)

**

ON THE AIR: CELEBRATING 90 YEARS OF BTHE LATVIAN AIRFORCE

The Latvian callsign YL90AIR stands for 90 years airforce in that nation. The commemorative operation will remain on the air through years end. QSL it via bureau or eQSL. (Southgate)

**

ON THE AIR: CELEBRATING SPAIN'S SAN MIGUEL DE PEDROSO HAM GATHERING

On the air, listen out for Spanish special event station EG1SMP to be on the air between July 24th and August 7th, especial during the ham radio gathering in San Miguel de Pedroso between July 25th to the 26th. QSL via the bureau to EA2BT. (Via e-mail)

**

DX

In DX, word that F6ICX, will be active as 5R8IC from Saint Marie Island between November 17th and December 15th. His operation will be on 80-10 meters. QSL via his home callsign.

EA5RM, is expected to be working in Bolivia during the month of August. He says that he expects to be on the air during his spare time as CP1XRM. QSL as directed on the air.

M0TDG and G3ZAY will be active portable FP from Miquelon from September 24th to the 27th. Their activity will be on the low bands using CW and SSB. QSL via their home callsigns.

I1FQH, will be active as 5V7PRF from Kpalime, Togo, through July 30th. This will be a very light DXpedition with activity on 80 through 10 meters using mostly CW and some SSB. He will use 100 watts into a Spiderbeam for 20, 17 and 15m as well as a vertical and wire dipoles for the other bands. QSL to I1FQH via LoTW, eQSL or bureau.

A group of international operators will be operating from Lesotho starting July 29th and continuing through August 13th. Activity will be on all bands with some emphasis on 16o and 80 meters with two stations on most of the time using CW and SSB. There is the possibility of a 3rd station for PSK and RTTY. Calls to listen out for include 7P8AO, 7P8YI, 7P8MM and several others. QSL as directed on the air.

Lastly, DJ7RJ, has received the callsign TO7RJ to be used from Mayotte September 22nd and October 21st. He will then use his call portable FH from October 23rd until he leaves the island on October 25th. Listen out for him on 160 through 10 meters and possibly 6 meters using CW and SSB. QSL via his Callbook address.

(Above from various DX news sources)

**

THAT FINAL ITEM: RFID TAGS BEING USED ON LONDON SUBWAY

And finally this week, R F Identification tags that some hams believe could become another serious souce of interference are now being used to assist in maintaining the London subway system. John Williams, VK5BUI, has the details:

--

Confidex, a company with expertise in RFID design, manufacturing and engineering, has supplied more than 10,000 of its Ironside UHF Gen2

hard tags to the London Underground.

The tags are being used to improve escalator maintenance.

The underground escalators carry more than three million passengers every day. Most commuters and tourists don't give the travelling metal staircases a second thought; a fact that is a testament to the reliability of the system and the care taken over the maintenance.

The steps that make up these escalators are subject to constant wear from the feet of passengers and from the mechanical movement on the escalator track.

To address the need for faster, more accurate and more cost-efficient maintenance, RFID technology was chosen. A decision was made to use RFID tags.

The 'step tracking system' uses a PDA with RFID reader mounted on a cradle beside the escalator and application software to read and write information on the tag.

--

So far there have been no reports from the London VHF and UHF ham community of any interference problems being caused by the adoption of the RFID tag system. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's" only official website located at www.arnewsline.org. The Ohio/Penn DX PacketCluster
DX Bulletin No. 918
BID: $OPDX.918
July 27, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K2JXW, NG3K, K4UEE,, N4AA & QRZ DX, KH6BZF, AA7JV, K8YSE, Algarve STAR DX Team, C31CT, DD1MAT, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2YSB, IK7JWX, LZ1ZF, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SM0BYD, SV1DPI, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 17th-July, through Friday, 24th-July there were 200 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PY, PY0F, PZ, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V6, V7, V8, VE, VK, VK9N, VP2M, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Terence, G4MKP, will be active as 5B/G4MKP from Tsada village near Pafos between August 14-25th. Activity will be mainly CW on 80-10 meters. QSL via M0URX.

7P, LESOTHO. Just a reminder that a group of operators will be active from here between July 29th to August 13th. They plan to have two stations active at all times with a third station to possibly be on for PSK and RTTY. Activity will be on all bands, but with a special effort on 160/80 meters. Operators are: Pista/HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/ W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK via M0URX, others via their home callsigns. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net

8Q, MALDIVES. Andrew, G7COD, will once again be active as 8Q7AK from Embudu Village, Embudu Island (AS-013, WLOTA L-3911), between October 12-25th. Activity will be on 80-12 meters including 30/17/12m using CW and SSB. Operating schedule (everyday) is as follows: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14147, 18133, 21253 and 24953 kHz
QSL via his home callsign, direct or by the bureau. Look for complete details at QRZ.com under 8Q7AK.

9G, GHANA (Update/Change). Silvano/I2YSB informs OPDX that there has been an update to their activity in Ghana between November 13-27th. Their activity will also include an IOTA trip to Abokwa Island (AF-084). They will use two different callsigns for their activities. Operations on the mainland will use the callsign 9G5TT, while operations on AF-084 will use 9G5XX. Activity will be on all HF bands (160-10 meters) and modes. Silvano states that they do not have a licence for 60 meters and 6 meters. On AF-84 there will be one station on 20 meters only. The time of the operation on the island will be on a day to day basis and will depend on the sea condition and weather forecast. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

C3, ANDORRA. Last week we reported that Vini, IK2CIO, would be active as C31/IK2CIO between August 6-12th. We have been informed by several sources that "the Andorran Radioamateurs Union (URA) reminds that the local administration has not implemented the CEPT Recommendation T/R 61-01; therefore, any C3/homecall activity should be regarded as illegal." An up-to-date list of licensed amateurs can be found at: http://www.ura.ad

CR3, MADEIRA ISLANDS. Operators Carlos/CT3CD, Carlos/CT3FQ and Ricardo/ CT3KN will be active as CR3T from Madeira (AF-014) during the RSGB IOTA Contest (July 25-26th) as a Multi-Single entry. QSL via LoTW or direct to CT3KN.

DP3, GERMANY (Special Event). Members of the Waldkirchen Radio Club will activate special event station DP3SSKW on CW and SSB through December 31st. Activity is to celebrate the 3rd Shito-ryu Shukokai Karate 2009 Worldcup being held in Waldkirchen. QSL via the Bureau; direct QSLs only via DK7FK. Skeds for 40 and 80 meters are possible via E-mail to DK7FK: b.barth@pension-monika.de

EF8, CANARY ISLANDS. Juan, EA8CAC, will be active as EF8R from Gran Canaria Island (AF-004) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, in the RSGB IOTA Contest (July 25-26th) as a Single-Op/Low-Power entry. QSL direct only.

AS-158. Members of the Wangjing HAM DX Club of Beijing, China, have received approval and will be active from Liaoning East Group Island (38'40 - 39'50N 121'10 - 124'10E) in the RSGB IOTA Contest between July 24ï¿½26th. The following operators will participate in this IOTA contest: BG1WUM, BG1TEM, BG1UXS, BG1MFE, BH1BRF, BH1INL and BD1HFP. The operation callsign will be the operator's callsign/2. Operation will be SSB on 40-10 meters. The RIG is IC-756Pro and TS-2000. The antennas are GP+SG230 and dipole. QSL via the info on QRZ.cn or QRZ.com with an IRC or 1 USD for the reply postage.

EU-005. Steve, G0UIH, will be active as as G0UIH/m from the Isle of Walney (WLOTA L-1871, WAB SD26), Cumbria, between July 24-27th. Activity will be holiday style, but he will be in the RSGB IOTA Contest. QSL via his home callsign, direct or by the bureau.

EU-005. Steve, G0UIH, will also be active as homecall/p from Piel Island (CU-005 for English Islands) between August 14-16th. This island is the "Jewel in the Crown" of the Islands of Furness. The Island has a history going back to the 11th Century. Expect activity on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-008. David, MM3RDP, will be active as MM3RDP/p from Skye Island (IOSA NH-07), and will also activating Neist Point Skye Light-house(SCO-147) between July 24-27th. His activity will include the RSGB IOTA Contest (July 25-26th). Activity will be on 40-10 meters SSB, but mainly 20 meters. QSL via his home callsign, direct or by the Bureau.

EU-010. Dave, M0GGK, will be active as MM0GGK/P from the Isle of Lewis between August 1-8th. He will use his K1 into a loop and a long wire, and expects to be on between 2100-0000z every night.

EU-015. Members of the Radio Amateur Society of Crete (RASC) were denied by Greek authorities to activate Chrissi Island (EU-187), so the Cretan DX team (R.A.S.C DX division) will operate as J49A from the same location as last year - Cape Sidiro which is located in northeast Crete. The new ultra-beam 2 elements yagi will be tested on this expedition during the RSGB IOTA Contest. QSL direct or via LoTW. For more info, visit at: http://www.rasc.gr

http://j49a.blogspot.com

EU-031. Alfredo, IK7JWX, will be active as IC8/IY7NGM from Capri Island (I.I.A. NA-006, WLOTA L-2466, WAIL CA-008, ARLHS ITA-124, possibly some D.C.I. castles), July 24-26th. Activity will be on SSB and also possible operations on 6 and 2 meters. The WW.Loc. is JN70cm. QSL via IK7JWX, by the Bureau or QRZ.com (NO eQSL).

EU-032. Martin, F4UKP, will be active as homecall/p from the Island of Re (DIFM AT-022, WLOTA L-1407) between August 15-22nd. Activity will be on all HF bands, CW and SSB, using a K2 and a 20m triple leg vertical. QSL via his home callsign, direct or by the bureau.

EU-090. Slovenian operators Jane/S57L, Goran/S52P, Vinko/S53F and Brane/S56UGB are now active as 9A8ZRS from Palagruza Island until July 31st. Most of the activity (as this was being written) was on 40m (CW/SSB) and 30m (CW). QSL via S57L.

EU-113. Operators Kostas/SV1DPI, Nikos/SV3BSF, Dimitris/SV1CIB and Vasilis/SV1DPJ will go to Kythira Island from late afternoon of July 22nd through July 26th. During the RSGB IOTA Contest (July 25-26th) they will use the callsign SX8Z. Before the contest the operators will be active signing homecall/8. QSLs for the operators are via the bureau or direct. QSLs for SX8Z are via SV1DPI, direct or LoTW.

EU-142. Operators Chris/EA3NT, Pablo/EA4TX, George/EC2ADN, Oscar/EA1DR, Niko/DD1MAT, Kepa/EA2DCF, Julen/EB2BXL and Rick/EA4ZK will be active as AM1M from Mouro Island during the RSGB IOTA Contest (July 25-26th). Reference numbers are: WLOTA 2720, DIE N-016, FARO D-1554, ARLHS SPA-153, DME 39075 and TPEA S. QSL via EA1DR.

EU-146. Operators Will/PE1OPM (SSB) and Jeroen/PD5CW (CW) will be active from from Schouwen Duiveland during the RSGB IOTA Contest (July 25-26th). Activity will be on 80-10 meters. QSL via their home callsigns, direct or by the bureau.

EU-165. Joe, IS0MKX, will lead a team of 15 operators to activate Asinara Island (SS-061, for Italian Island Award) between July 22-26th. Activity will include the RSGB IOTA Contest (July 25-26th). The callsign will be IM0M. QSL via IS0MKX. For more info, please visit: http://digilander.libero.it/assoradiomarinai/asinara/home.htm

EU-172. Fred, ON6QR, will be active as OZ/ON6QR from Aro Island, west of Jylland, Denmark, during the RSGB IOTA Contest (July 25-26th). His activity will be QRP using dipoles antennas. Listen carefully for him.

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press

release number 5 dated July 22nd (edited): "The K4M team has passed a very important milestone with the shipment this week of 2 tons of radios, linears, antennas (20 of them), radios (6), computers and interfaces, thousands of feet of coax and stubs, and various connectors, switches, wattmeters, and all the supplies you would expect from an operation on a remote island. At the following Web page is a picture of a portion of the freight: http://www.midway2009.com/kh4news.html
The gear will be stored in Hawaii until the supply ship leaves in 3 weeks to Midway. Our charter flight to the island is confirmed. The team is assembled. Fundraising continues on our website, www.midway2009.com . If you haven't visited it in a while stop by and help support our effort. All pre-expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXPedition. This month we are highlighting three more team members. You can read all their history at: http://www.midway2009.com/meettheops4.html "

KH6BZF PROPAGATION FORECAST/REPORT (For July 27th-August 2nd).....

KL7, ALASKA (New IOTA). Operators Merle/N6PYN and Brad/KA5CDJ plan to activate the Seal Islands (NA-239, new one) as N6PYN/KL7. They hope to be active 24/7 in late July (possibly early August) for at least two days. Their exact start date is not known but will not be earlier than July 29th. QSL Manager will be N7RO. They will operate SSB and CW on 20, 30 and 40 meters with 100 watts and a vertical dipole.

KP1, NAVASSA (Rumor). It was reported to OPDX by Bob Allphin, K4UEE, that the following rumor "a permit has been issued to the group that did Desecheo recently. An operation will take place next year. Info from Dave K4SSU, one of the ops" -- "IS NOT TRUE".

LIGHTHOUSE ACTIVITY/NEWS.....
Just a reminder that the International Lighthouse-Lightship Weekend (ILLW) is scheduled for August 1-9th. A new Yaesu FT-857D will be given as the prize in a RANDOM DRAWING of submitted logs. Pre-registration is required. The winner is NOT based on score. Everyone that submits a valid log has an equal opportunity of winning the Yaesu. Registration deadline is July 31st. For complete details, rules, and logging require-ments, visit the ILLW Web site at: http://illw.org

Members of the Portuguese Navy Hamradio Club (NRA, NUCLEO DE RADIO-AMADORES DA ARMADA) will activate for the first time the Lajes Lighthouse (ARLHS AZO 010), on Azores, between 0800-1900z, on August 1st. The

callsign will be CR2NRA. Activity will be on 80/40/20/15/10 meters
using CW and SSB. Operators mentioned are CU3DI, CU3CY, CU3AU, CU3CC
and CU3HQ. QSL via the info on QRZ.com.

Orlando/PT2OP (ZW6LH) and Marcelo/PY6KW (PR6S) will be active from
several lighthouses in the state of BAHIA between July 31st and August
3rd. Activity will include participation in the International Light-
house Lightship Weekend (ILLW). Both stations are valid for ARLHS,
DFB (Brazilian Lighthouses Awards) and the South American Lighthouses
Award. QSL via their home callsign.

Members of the "Sodertorns Radioamatorer" (SK0QO) will once again be
active as 7S0SFJ from the Museum Lightship No. 25 Finngrundet (ILLW
SE-0013, SWE-043), in Stockholm, Sweden, during the ILLW activity
August 15-16th. The LS Finngrundet was built in 1903 and decommissioned
in 1969 and since 1970 is a museum vessel. Club SK0QO has been operating
7S0SFJ every year since 1996. The club will put their double dipoles
up for 80/40m and 30/17m as well as their dipole for 20m up Friday
evening, August 14th, and will be active until Sunday, early afternoon.
Rigs: FT-2000, TS-680, IC-706. Activity will be on SSB and CW (Hans,
SM0BYD, mainly on 30/17m). QSL by the Bureau and SM0BYD. SWL reports
are also welcome. For more details and pictures, see:
http://www.qrz.com/callsign/7s0sfj
(The Lightship FINNGRUNDET is managed by SMM (Statens Maritima Museer),
The Swedish National Maritime Museums.)

LZ01, BULGARIA (WFF Op). Operators Gosho/LZ1ZF, Boris/LZ2JR and Rumen/LZ2RS
will activate the special WFF callsign LZ01WFF from the Sokolski Monastery
<http://www.bulgarianmonastery.com/sokolski_monastery.html> in the natural
park "Bulgarka" (LZFF-022, QTH Loc.: KN22QT) between July 24-26th. For
details on the Central Balkan National Park, see the following Web page:
http://www.visitcentralbalkan.net/index.php?l=1&s=1&c&&o
05
Activity will be on all HF bands using CW and SSB, plus operations during
the IOTA Contest. All QSOs will be confirmed via the Bureau. QSL via LZ1ZF.

OY, FAROE ISLANDS. Carsten, OY1CT, will be active from Streymoy (EU-018)
during the RSGB IOTA Contest (July 25-26th) as a Single-Op/CW/24-HRs/
High-Power entry. QSL via OY1CT.

OY, FAROE ISLANDS. Thomas, OZ1AA, will be active as OY/OZ1AA from
Streymoy (EU-018) during the RSGB IOTA Contest (July 25-26th) as a
Single-Op/Mix/24-HRs/Low-Power entry. QSL via OZ1ACB. Visit his Web
page at: http://www.oz1aa.com

OY, FAROE ISLANDS (Also TF). Maurizio, IW4BLZ will be active as OY/homecall
from Faroe Islands (EU-018) between July 27-29th. He will also be active
as as TF/homecall from Iceland (TF, EU-021) between July 31st and August
11th. Activity will be on all bands from 80-6 meters. QSLs via his home
callsign, direct or by the bureau.

P29, PAPUA NEW GUINEA. Andy, P29CS, on Lihir Island (OC-069), will be active during the RSGB IOTA Contest (July 25-26th). QSL via P29CS.

QSL INFO AND NEWS.....
CS28MCF LOG. The Algarve S.T.A.R. DX Team reports that CS28MCF is now QRT. Last QSO was at 2259z, July 19th. They made 6491 QSOs and the Log is online at: http://algarvedx.com

QSLS VIA LOTW: A7/M0FGA, OH0Z, PV8AA, RA3UT, VK7WI, W1AW/KL7 and YL4HQ

QSLS RECEIVED VIA MAIL: 3B9/SP2JMB, 4L8A, 4T6I, 9Y4D, AI5P/6Y5, AM8IL, EI6S, GM3MOU, JD1BLY, TS7C, VE3DZ/VP9, VY0A, YS1G and ZW8BBC

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY will be active as TX3A between November 23rd and December 6th. The TX3A license is valid for 14 days only between the dates listed above. Because these dates could change (due to weather and other things), they "may" have to operate as FK/AA7JV or FK/HA7RY before and after this period. These are the same operators that activated VK9GMW from Mellish Reef, and they plan to make this another simple low-band DXpedition. Their priorities will be 160, 80 and 40 meters, in that order. They will be active on the higher bands the rest of the time. The operators will use the same antenna that they used on Mellish Reef, but they have developed a new RX antenna, which they hope will improve their RX capabilities. QSL via HA7RY:
* Mailing direct -Please include 2 USDs with every direct QSL request for up to three cards per envelope. If you send International Reply Coupons (IRC), please make sure that it is not expired or is not about to expire. DO NOT SEND IRCs that are valid only until end of 2009! Cards are likely to be posted only early 2010. Mailing address: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY

* The preferred way is using the "Online QSL Request Service" (OQRS) on their Web site which they will launch once the DXpedition is over. You can use that form to request your direct QSL and cover the costs of sending the QSL card to you direct by using PayPal. They request a minimum of 5 USDs or 4 EUROs for this service.

* LoTW and eQSL: The log will be placed onto the LoTW and eQSL systems.

* Bureau: They will launch an "Online QSL Request Service" (OQRS) on their Web site as soon as the expedition is over. If you want to receive your QSL via the bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the bureau. This method will allow them faster processing, helps them protect the environment and you will receive your TX3A card faster. If you request your bureau card online, please do NOT request a direct card and do NOT send us your QSL card.

More detailed information is available on their new Web page at: http://www.TX3A.com

VK9N, NORFOLK ISLANDS (Update/QSL Manager Change). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) continue to be active as VK9NI until July 29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. PLEASE NOTE: QSL via VK3HR (NOT W3HNK as first announced -- Joe states that he was asked to step aside!). More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VY1, CANADA (Yukon RTTY Activity Planned). Steve, N6QEK, is making plans a little early for the 2010 RTTY Roundup. He is all set to operate during the 2010 running of the RTTY Roundup from the Yukon Territory. His callsign will be VY1/N6QEK. The dates of operation will be during the contest and a day or so before and after. QSL via his home callsign, direct or by the Bureau. He has a Web site up and running for this operation at: http://www.n6qek.com

ZD8, ASCENSION ISLAND (AF-003). Jim, N6TJ, will once again be active from here as ZD8Z between July 30th and August 7th. Activity will be on all bands CW/SSB. QSL via his new manager AI4U, direct or by the Bureau.

The following stations are expected to be active in the
RSGB IOTA Contest (July 25-26th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/iota2009.html

A friend of mine is looking for a working Kenwood AT-940
tuner. This is the tuner that goes inside a Kenwood TS-940S
radio, making it a TS-940 SAT. No other tuners will be considered!
Please contact Chris at ww308@yahoo.com if you have one
for sale.

==> BOARD DISCUSSES INAPPROPRIATE USE OF AMATEUR RADIO, STRATEGIC PLANNING, OTHER ISSUES AT SECOND 2009 MEETING

The ARRL Board of Directors held its Second Meeting of 2009 July 17-18 in Windsor, Connecticut, under the chairmanship of President Joel Harrison, W5ZN. On Friday, the Board considered and acted on a number of recommendations from committees as well as motions by Directors. Saturday was devoted to reviewing and revising the ARRL Strategic Plan that was adopted in October 2006 <http://www.arrl.org/members-only/stratplan/ARRL_Strategic_Plan_October_2006.pdf>.

Inappropriate Use of Amateur Radio: The Board authorized the President to appoint an ad hoc committee to prepare guidelines for use by the

amateur community and others to identify inappropriate uses of Amateur Radio, while preserving our role of providing communications during times of disasters and for public service events. The Board asked the committee to present its findings to the Executive Committee within 30 days.

Emergency Communications Advisory Committee: The Board considered, but ultimately declined to adopt a motion to establish an Emergency Communications Advisory Committee.

Amateur Auxiliary/Official Observer Program: Programs and Services Committee Chairman Bruce Frahm, K0BJ, announced the creation of an ad hoc subcommittee to study the Amateur Auxiliary/Official Observer program and recommend any desirable changes to the Board.

Emergency Liaison Station: The Board established a national-level appointment of Emergency Liaison Station to tie ARRL Headquarters to affected areas during disasters via Voice over Internet Protocol (VoIP) to HF or VHF linking.

Narrowband Channel Spacing: The Board directed the President to appoint a study committee for the purpose of research and to consider developing a plan to move the US amateur community to narrowband channel spacing in the VHF/UHF bands.

Volunteer Consulting Engineer Program: The Board extended the Volunteer Consulting Engineer program to registered professional engineers in addition to structural, civil and mechanical engineers.

Annual Audit: Acting on the recommendation of the Administration and Finance Committee as presented by Chairman Jim Fenstermaker, K9JF, the Board formally accepted the financial statements, including the auditors' opinion letter, for the year ending December 31, 2008.

ARRLWeb Redesign: A group from Fathom, a contractor based in Hartford, presented an update of the redesign of the ARRL's Web site.

IARU: The Board voted to appoint Rod Stafford, W6ROD, as IARU Secretary effective October 1, 2009. Stafford is retiring from full-time employment as of that date and will be available to serve as a volunteer in this capacity. The Board also directed the ARRL Secretary to cast a vote in favor of IARU Proposal No 245, concerning the admission of Union des Radioamateurs du Congo (URAC) to IARU membership.

Strategic Planning
The Board devoted a full day to reviewing and updating the three year old ARRL Strategic Plan. Last year, the Board invited ARRL members to comment on the League's future direction <http://www.arrl.org/members-only/stratplan/>. These comments were read and considered by the Board. Before turning the comments over to the Executive Committee, they added some thoughts of their own. The Executive Committee started drafting ideas for the new Strategic Plan at its March 2009 meeting.

The review process at the 2009 Second Meeting included breakout sessions to develop possible strategies to address each of six goals that will guide the ARRL for the next three to five years; the results of the breakout sessions were then reported back to the full Board. The complete output of the planning session will be reported back to the participants for e-mail discussion and then considered by the Executive Committee at its next meeting in October. The Executive Committee will refine the document.

Awards
The Board established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. Selection criteria for this award may include an operating record with the National Traffic System (NTS), participation in ARES or station appointments and/or leadership positions held in the Field Organization. Nominations may be made by anyone, and the nominees should have a minimum of 15 years of service. Nominations will be considered by the Board at its Annual Meetings in January.

The Board made some changes to the Bill Leonard, W2SKE, Professional Media Award, establishing separate categories for audio formats, visual formats and print/text formats and redirecting the cash awards from the winners to an IRS 501(c)(3) non-profit organization of the recipient's choice.

Hiram Percy Maxim Award: The Board selected Jason Hatfield, KD8FDD, of Grafton, West Virginia, as the recipient of the 2008 Hiram Percy Maxim Award.

Technical Excellence Award: For the second year in a row the Board chose John Stanley, K4ERO, Georgia, as the recipient of the 2008 Doug DeMaw, W1FB Technical Excellence Award.

Technical Service Award: The 2009 ARRL Technical Service Award went to Geoffrey Haines, N1GY, of Bradenton, Florida for his prolific and clear writing.

Technical Innovation Award: Dan Smith, KK7DS, of Hillsboro, Oregon received the 2009 ARRL Technical Innovation Award for his programming contributions to digital communications.

Instructor of the Year Award: The Board selected Brian Short, KC0BS, of Olathe, Kansas, as the recipient of the 2009 Herb S. Brier Instructor of the Year Award.

McGan Memorial Silver Antenna Award: The Board selected Nate Brightman, K6OSC, of Long Beach, California, as the winner of the 2009 Philip J. McGan Memorial Silver Antenna Award for excellence in public relations.

Joe Knight Distinguished Service Award: The Board conferred ARRL Joe Knight Distinguished Service Awards on two long-time volunteers this year: former Western New York Section Manager Bill Thompson, W2MTA, of Newark Valley, New York, and Georgia Section Manager Susan Swiderski,

AF4FO, of Norcross, Georgia.

Guests
International Amateur Radio Union (IARU) President Tim Ellam, VE6SH, and Radio Amateurs of Canada (RAC) Vice President International Affairs Daniel Lamoureux, VE2KA, were guests of the Board.

The complete Minutes of the 2009 Second Meeting of the ARRL Board of Directors will be available soon on the ARRLWeb.

The next meeting of the ARRL Board of Directors is scheduled for January 15-16, 2010.

==> FCC CONTINUES BPL DEBATE

On July 17, the FCC issued a "Request for Further Comment and Further Notice of Proposed Rulemaking" ("FNPRM") <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-09-60A1.pdf>, addressing the issues remanded to them by the US Court of Appeals. In October 2007, the ARRL took the Commission to court concerning the Commission's Orders adopting rules governing broadband over power line (BPL) systems <http://www.arrl.org/news/stories/2007/10/25/102/?nc=1>. In April 2008, the Court agreed with the ARRL on two major points and remanded the rules to the Commission <http://www.arrl.org/news/stories/2008/04/25/10064/?nc=1>. Writing for the three-judge panel of Circuit Judges Rogers, Tatel and Kavanaugh, Judge Rogers summarized: "The Commission failed to satisfy the notice and comment requirements of the Administrative Procedure Act ('APA') by redacting studies on which it relied in promulgating the rule and failed to provide a reasoned explanation for its choice of the extrapolation factor for measuring Access BPL emissions."

* New Information?

The Court found, among other things, that the FCC not only withheld the internal studies until it was too late to comment, but had yet to release portions of studies that may not support its own conclusions regarding BPL. The FCC claimed that the studies were "internal communications" that it did not rely upon in reaching its decision to adopt the BPL rules. In its April 2008 ruling, the Court ordered the FCC to release the studies. In March 2009, when the FCC still had not released the redacted portions of the studies as ordered by the court, the ARRL filed a Freedom of Information Act request for the studies. Six weeks later, the FCC released the redacted portions of the studies <http://www.arrl.org/news/stories/2009/05/08/10811/?nc=1>.

To contend with the Court's ruling, the Commission is now requesting comment on the information in those studies as it pertains the FCC's BPL decisions. The Commission is "also placing into the record certain additional materials that contain preliminary staff research and educational information" that was not previously made available. It is these records that concern ARRL Laboratory Manager and BPL expert Ed Hare, W1RFI.

"At the same time the FCC released the new 'FNPRM,' it also released 800 MB of previously unseen FCC internal staff reports and video on BPL," Hare said <http://www.arrl.org/tis/info/HTML/plc/BPL_FOIA.html>. "Although the FCC tries to downplay the work of their own staff by saying that these reports are only the opinion of one FCC staffer, these conclusions about BPL from the FCC Lab were made by FCC technical people with strong experience in measurement techniques and interference assessment. This is generally good engineering, with a clear objective of providing the Commission with accurate technical information about BPL."

According to Hare's preliminary review of the "FNPRM," the FCC's own technical findings clearly spell out that BPL operating at the FCC limits has a very strong potential to cause interference to licensed radio users: "These reports show that BPL causes interference to a number of licensed services for significant distances from BPL noise sources and that the noise from BPL at antennas that are about 100 feet from wires carrying BPL operating at the FCC limits will represent an increase in noise of about 30 dB in most cases."

Hare said that other slides show that radiated noise from overhead power lines increases significantly above the noise at ground level. "Based on these internal FCC technical analyses, the present rules and test methods -- when coupled with inappropriate distance extrapolation -- simply do not protect licensed users from interference," he said. "The Commission was well aware of the content of these presentations when it issued a BPL "Report and Order" that discounted ARRL when the League made many of the same technical points in its filings."

* Extrapolation Factor: FCC Looking for Compromise?

One of the major points of difference between ARRL and the FCC has been the measurement extrapolation factor below 30 MHz that is applied to measurements made at distances from power lines or other radiating sources to determine what the value of that measurement would be at a distance of 30 meters. This is the distance in the FCC rules for which maximum permitted emission are specified. The FCC believes that this factor should be 40 dB/distance decade.

Hare explained why this is incorrect: "The FCC's test method measures BPL emissions at ground level, using a loop antenna located 1 meter off the ground. Amateurs know that a low horizontal antenna radiates more energy upward than it does toward the horizon, and that a measurement made of a radiating power line at 1 meter off the ground is not a good indicator of the noise levels that will be present at angles upward from that same power line, where HF antennas are most apt to be located. The 40 dB extrapolation factor and the lack of any correction for height result in a BPL system that will significantly exceed the FCC emission limits at the very point where most Amateur HF antennas are located."

In response to its remand of a portion of BPL measurement procedure, the FCC is "also providing an explanation of our reasons for selecting 40 dB per decade as the extrapolation factor for frequencies below 30 MHz. We

further explain why we believe the studies and technical proposal submitted earlier by the ARRL do not provide convincing information that we should use an extrapolation factor that is different from that which we adopted," noting the existence of "more recent studies" that prove their point.

In the "FNPRM," the FCC states that they are "re-examining the current extrapolation factor in light of the recently issued technical studies addressing the attenuation of BPL emissions with distance and efforts by the IEEE to develop BPL measurement standards." Using these studies and older ones, the FCC said that "there can be considerable variability in the attenuation of emissions from BPL systems across individual measurement sites that is not captured in the fixed 40 dB per decade standard."

Based upon this "considerable variability," the FCC has opened a 30 day comment period, asking if they should change their rules to "adjust the extrapolation factor downward to 30 dB or some other fixed value and, as an alternative, also allow use of a special procedure for determining site-specific BPL extrapolation values using in situ measurements."

Hare notes that the "FNRPM" is creating a complex way to look for a simple solution to a complex problem. "It's ironic that the FNPRM discusses the 'considerable variability' in attenuation at BPL sites, then proposes that a measurement of a mere four points within that variability can determine the supposedly actual extrapolation. The NTIA Phase II study that is the 'newer study' that the FCC is relying on for part of its justification for 40 dB/decade shows an environment extremely more complicated than that. Trying to apply any measurement of extrapolation to this complex environment is a recipe for failure -- and possible 'cherrypicking' of results that will allow those making measurements of BPL systems to provide any value of extrapolation they want, in either direction. I serve on the IEEE committee that developed the draft for this extrapolation-measurement method and I did not stand alone in not supporting the approach that the P1775 Working Group has sent to ballot. At this point, the working group is in the process of resolving and rebutting the numerous comments received in the still-unresolved IEEE ballot."

Even though the FCC is inviting comments, they state that they "do not believe that the studies and technical proposal submitted earlier by the ARRL provide convincing information that we should use an extrapolation factor that is different from (and, specifically, less than) 40 dB. We believe that [other] studies [we have relied on] further validate the use of 40 dB as the extrapolation factor. In addition, the sufficiency of our rules for ensuring compliance is further validated by the fact that we have not had any new complaints of interference for more than two years."

Hare has worked extensively with the BPL industry to help it address interference. "If the FCC thinks that the falling off in BPL complaints is due to the sufficiency of its rules, it is mistaken," he said. "In

response to ARRL's input and offers of help, the industry has essentially stopped using the amateur bands in US deployments. The FCC's own video documentation of interference from BPL that is operating under the rules the FCC put forward should be more than sufficient to show that the rules as written are not good ones. The industry has reduced the interference from BPL by doing more than the rules require. By not using the amateur bands and by improving the filtering of BPL systems well beyond the inadequate requirements of the present rules, the industry and ARRL have shown that it is possible to operate BPL systems without widespread interference problems to Amateur Radio."

Hare said that what is needed now "are good rules and industry standards that reflect this successful model. That is not seen in this FNPRM. Rules that reflect the industry practice of not using the amateur bands and that specify state-of-the-art filtering could protect the Amateur Radio Service and support this still-nascent BPL industry."

==> WALTER CRONKITE, KB2GSD (SK)

Legendary CBS newsman Walter Cronkite, KB2GSD, who held the title of "Most Trusted Man in America," passed away Friday, July 17 after a long illness. He was 92. The avuncular Cronkite anchored the CBS Evening News for 19 years until 1981 when he retired. During that time, he reported on such subjects as the Kennedy assassinations, the Civil Rights movement, the Apollo 11 lunar landing, Vietnam and the Vietnam-era protests, the Arab-Israeli Six Day War, Watergate and the Begin-Sadat peace accords.

Cronkite, an ARRL member, narrated the 6 minute video "Amateur Radio Today" <http://www.arrl.org/ARToday/>. Produced by the ARRL in 2003, the video tells Amateur Radio's public service story to non-hams, focusing on ham radio's part in helping various agencies respond to wildfires in the Western US during 2002, ham radio in space and the role Amateur Radio plays in emergency communications. "Dozens of radio amateurs helped the police and fire departments and other emergency services maintain communications in New York, Pennsylvania and Washington, DC," narrator Cronkite intoned in reference to ham radio's response on September 11, 2001. "Their country asked, and they responded without reservation."

In 1963, it was Cronkite who broke into the soap opera "As the World Turns" to announce that the president had been shot -- and later to declare that he had been killed. CBS called it a "defining moment for Cronkite, and for the country. His presence -- in shirtsleeves, slowly removing his glasses to check the time and blink back tears -- captured both the sense of shock, and the struggle for composure, that would consume America and the world over the next four days."

Steve Mendelsohn, W2ML, was Cronkite's radio engineer at CBS for many years. "I had many chances to discuss my favorite hobby, ham radio, with 'the world's most trusted anchor man,'" he told the ARRL. "Gradually, his interest increased, but on finding that he had to pass a Morse code

test, he balked, saying it was too hard for him; however, he told me he had purchased a receiver and listened to the Novice bands every night for a few minutes. At the CBS Radio Network, Walter would arrive 10 minutes before we went on the air to read his script aloud, make corrections for his style of grammar and just 'get in the mood' to do the show. In those days Rich Moseson, W2VU, was the producer of a show called "In the News," a 3 minute television show for children voiced by CBS Correspondent Christopher Glenn. On this day, Rich was at the Broadcast Center to record Chris' voice for his show and had dropped by my control room to discuss some upcoming ARRL issues." At the time, Mendelsohn was the ARRL Hudson Division Director.

"When Walter walked into the studio, I started to set the show up at the behest of our director, Dick Muller, WA2DOS," Mendelsohn recalled. "In setting up the tape recorders, I had to send tone to them and make sure they were all at proper level. Having some time, I grabbed "The New York Times" and started sending code with the tone key on the audio console. For 10 minutes I sent code and noticed Walter had turned his script over and was copying it. We went to air, as we did every day, at 4:50 PM and after we were off, Walter brought his script into the control room. Neatly printed on the back was the text I had sent with the tone key. Rich and I looked at the copy, he nodded, and I told Walter that he had just passed the code test. He laughed and asked when the formal test was, but I reminded him that it took two General class licensees to validate the test and he had just passed the code. Several weeks later he passed the written test and the FCC issued him KB2GSD."

Mendelsohn helped Cronkite make his first Amateur Radio contact: "Having passed the licensing test, Walter was now ready to get on the air. His first QSO was on 10 meters about 28.390 MHz. He was nervous and I called him on the phone to talk him through his first experience. As we talked on the air, a ham from the Midwest come on and called me. Acknowledging him, I asked the usual questions about where he was from, wanting to give Walter a bit of flavor of what the hobby was about. I turned it over to Walter, and following his introduction, the gentleman in the Midwest said, 'That's the worst Walter Cronkite imitation I've ever heard!' I suggested that maybe it was Walter and the man replied, 'Walter Cronkite is not even a ham, and if he was, he certainly wouldn't be here on 10 meters.' Walter and I laughed for weeks at that one."

In 2007, ARRL Hudson Division Director Frank Fallon, N2FF, presented Cronkite with the ARRL President's Award. This award, created in 2003 by the ARRL Board of Directors, recognizes an ARRL member or members who "have shown long-term dedication to the goals and objectives of ARRL and Amateur Radio" and who have gone the extra mile to support individual League programs and goals. Cronkite was selected to receive the award in April 2005 in recognition of his outstanding support of the ARRL and Amateur Radio by narrating the videos "Amateur Radio Today" and "The ARRL Goes to Washington" <http://www.arrl.org/pio/VTS-video.wmv>. "It was quite a thrill to make this presentation to Cronkite," Fallon said. "He has long been recognized as the 'most trusted man in America,' so

lining our causes to his face, name and voice has been a great help."

A private memorial service was held July 23 in New York City. Cronkite will be cremated and his remains buried in Missouri next to his wife Betsy, who passed away in 2005. A public memorial service will be held within the next month at Avery Fisher Hall at the Lincoln Center for the Performing Arts. In lieu of flowers, the family is requesting donations to the Walter and Betsy Cronkite Foundation through the Austin Community Foundation <http://www.austincommunityfoundation.org/>, which will distribute contributions to various charities the couple supported.

==> THE DOCTOR IS IN THE ARRL LETTER

This week, ARRL Letter readers are in luck! The ARRL's very own Doctor, author of the popular QST column "The Doctor Is IN," answers a question from his mailbag:

Question -- Jeff Freedman, K7JF, of Gig Harbor, Washington, asks: I am setting up my beam antenna for the first time. I understand there is a true north and a magnetic north (or south for the Southern Hemisphere). What is the difference between true and magnetic? For which of the two should my beam be initially calibrated? If magnetic north, how do I know where to set the beam?

The Doctor Answers -- Magnetic north is the direction a compass needle points to, while true north is the direction to the Earth's northerly rotational axis point. They are indeed different in most places, and the difference is different for each spot on Earth. It also changes over time. The difference is referred to as magnetic variation on nautical charts and as magnetic declination in some other venues.

NOAA's National Geophysical Data Center provides information on the nature of this phenomenon as well as maps showing the correction <http://www.ngdc.noaa.gov/geomag/declination.shtml>. For example, at my station location in Connecticut, in 1981 the magnetic variation was 13 degrees west with an annual increase of 4 minutes. That means in 2009, it should be a bit less than 16 degrees. If you look at the US map on the above Web site you will see that they have it near the -15 degrees line.

In addition to the Web site, you can find your variation on any nautical chart of a location near your station, on any coast and geodetic survey map or call your town engineer. To convert magnetic north readings from your compass to true north, subtract if the variation is westerly (negative on the NOAA map), add if easterly.

Conceptually, either a true or magnetic reference could be used, as long as you keep track and convert everything to the same basis. All propagation programs that I am aware of give bearings with respect to true north, so I would suggest using true bearings on your rotator controller.

Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org>; or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST, the official journal of the ARRL.

==> HAM RADIO HELPS OUT WITH MOUNTAIN RESCUE

It was a quiet afternoon on July 11 and Rich Lippucci, KI6RRQ, of Vista, California, was monitoring the Catalina Amateur Radio Association (CARA) repeater on his base station. "I heard someone come over the repeater, calling, 'Is there anybody listening?' I responded and the caller said he was on his handheld transceiver hiking around the Mt Baldy area. He was about 2.5 miles off road and resting at the wilderness San Antonio Ski Hut <http://angeles.sierraclub.org/lodges/sanantonioskihut.html>. A few hikers had arrived from farther in the backcountry -- one of their friends had broken an ankle and was a mile or more up the trail and they needed help." Mt Baldy is the highest peak in the San Gabriel Mountains and the highest point in Los Angeles County.

Lippucci asked the caller for his call sign and name. "He told me he was Kirk Gustafson, KE6MTF," he told the ARRL. "I asked Kirk if he had a cell phone, but he told me there was no cell service where they were. I told him I would coordinate emergency services over my landline and asked for his exact location. He did an excellent job; he had a good idea of where he was and wasn't sure which county he was in, but he did have GPS coordinates."

Using his landline, Lippucci called 911 and was transferred three times until he was connected to Chelsea in the San Bernardino County Sheriff's dispatch center. "Chelsea coordinated the rescue with the San Bernardino Fire Department who sent a foot patrol to the area," he said. "The Sherriff's office dispatched a helicopter to meet someone at the ski hut to take them to where the hiker was down. It took a little less than an hour for emergency services to get above the location in a helicopter, but they were not able to land the helicopter due to the rocky terrain at the ski lift." Lippucci said that while the foot patrol and helicopter were on their way, the group of hikers had brought the injured woman down the trail to the ski hut, stabilized her leg and determined it was probably not broken. They still did not feel they could carry her out as the trail down from the wilderness ski lift was so steep." The ski hut can only be reached via a steep three mile hike and 2200 feet elevation gain.

The dispatcher told Lippucci that the helicopter would perform a skid rescue where a crew member suspends a bed basket from the helicopter; the victim is secured and pulled back up to the helicopter. The dispatchers asked Lippucci to relay back to Gustafson, asking if the group needed anything, such as food or water. Gustafson relayed back that they didn't need anything. "After about 15 minutes from arriving on site, the helicopter and its crew got the victim airlifted out successfully without further complications," Lippucci said. Gustafson took a video of the rescue with his cell phone <http://marlene.zimage.com/ke6mtf/hike/rescue/iPhone/IMG_0408.MOV>.

Gustafson and Lippucci -- both ARRL members -- have been in contact since that Saturday afternoon. "Since the incident, Kirk informed me that the injured lady was around 40 years old and that there were up to 15 hikers hanging around the ski hut, some of which were search and rescue volunteers on vacation," he told the ARRL. "They had some kind of radios with them, but their batteries where dead. Kirk said when he got out of his car to start his hike, he grabbed his handheld transceiver radio and GPS. His friends told him 'That's just extra weight -- you won't need that.' He told them, 'I go nowhere without my radio. If I need to call for help, the only way I would be able to let them know where I am is with GPS. I'm bringing them.' I don't think they will say that next time! Kirk said that one of them decided they need to look into getting a ticket and radio and that the search and rescue folks said they were going to look into getting ham radio licenses."

Lippucci said that ham radio saved the day: "A handheld radio, hitting a local wide-area repeater, was what was needed when cell and landline phones were not available. Many thanks to the CARA club for their awesome reach in Southern California on 2 meters. Thanks also to those on the air that where very gracious to respect the traffic and keep communications open during the rescue. This is such an excellent example of the benefits of ham radio. If people had to hike out of the wilderness, get to their cars and find a cell signal, they might have been pushing up against the loss of daylight hours. Any rescue would have been significantly more difficult in the dark."

Lippucci told the ARRL that 911 and the Sherriff's office in San Bernardino accepted the ham radio call without hesitation. "They used a ham radio operator to relay questions to Kirk through me, to gain all the information they wanted and needed to put assets on the emergency," he said. "It was as if I was calling about something in my own backyard, even though the problem was several counties away in the mountains, with people I didn't know. I am proud to have had the opportunity to use my license in service of an emergency situation. As a CERT member <http://www.citizencorps.gov/cert/>, this was the very reason I got my ham radio license in the first place!" -- Information provided by Rich Lippucci, KI6RRQ

==> SPECIAL BONUS SECTION ADDED TO "ARRL HAM RADIO LICENSING MANUAL"

The most common question asked by new radio amateurs is "Now that I have my license, what kind of radio should I get?" The ARRL, in an attempt to help newcomers to Amateur Radio answer that very question, has added a bonus supplement to the ARRL Ham Radio License Manual <http://www.arrl.org/catalog/?item=9639>. "Choosing a Ham Radio: Your Guide to Selecting the Right Equipment" is aimed at the new Technician licensee ready to acquire a first radio, a licensee recently upgraded to General class and wanting to explore HF or someone getting back into Amateur Radio after a period of inactivity.

The guide features two main sections -- one covering gear for the VHF and UHF bands, and one for HF band equipment, including a VHF/UHF and an HF glossary of terms you will encounter. The guide also urges you to

discover just what you want to do with Amateur Radio and where you want to do it from. Do you want to be a "big gun" HF contester? Do you want to ragchew on your local repeater system? Maybe you want to join your local ARES unit and help provide communications support in times of emergency. This guide will help you select the right rig for what you want to do.

"Choosing a Ham Radio: Your Guide to Selecting the Right Equipment" isn't a traditional "buyer's guide" with feature lists and prices for many radios. Manufacturer's Web sites and catalogs from radio stores have plenty of information on the latest models and features. As such, you won't find operating instructions or technical specifications here, but many manufacturers' Web sites will let you download brochures and manuals directly.

Second only to "What kind of radio should I get?" "What kind of antenna do I need?" is the most common question asked by the new amateur. Don't worry! "Choosing a Ham Radio: Your Guide to Selecting the Right Equipment" talks about all kinds of antennas -- from "rubber duckies" to verticals to dipoles to Yagis; it even explains rotators and antenna gain.

An explanation of power, filters and digital signal processing (DSP), as well as special features commonly found on VHF/UHF and HF radios are also included in the guide. ARRL members who are logged on to the ARRL Web site can view the guide online <http://www.arrl.org/members-only/choosingaradio/>.

==>SOLAR UPDATE

Tad "The Sun himself has sent me like a ray" Cook, K7RA, this week reports: No new sunspots yet, but a big surprise this week with aurora and a geomagnetic storm: Sunspot activity peaked around 0300-0900 UTC on Wednesday July 22, with K index as high as 6. The planetary A index for the day was 24. One nice result was aurora propagation on 6 meters. A week ago there wasn't any indicator of increased activity. There is a new sunspot trying to emerge today (July 24), but it looks to be from Solar Cycle 23. Sunspot numbers for July 16-22 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 66.7, 66.2, 67, 67.6, 68.2, 67.7 and 67.8 with a mean of 67.3. The estimated planetary A indices were 4, 2, 3, 2, 6, 4 and 24 with a mean of 6.4. The estimated mid-latitude A indices were 2, 0, 1, 1, 3, 3 and 18 with a mean of 4. Geophysical Institute Prague predicts quiet geomagnetic conditions July 24-25, quiet to unsettled July 26 and back to quiet for July 27-30. The US Air Force and NOAA Space Weather Prediction Center calls for planetary A index of 5 for July 24-25, 8 on July 26, 7 on July 27 and back to 5 though the end of the month. They predict solar flux on July 24-26 at 68, 69 and 70, remaining at 70 through August 7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin

page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by George Gordon, Lord Byron's "Don Juan" <http://en.wikisource.org/wiki/Don_Juan_(Byron)>.

==>IN BRIEF:

* This Week on the Radio: This week, look for an NCCC Sprint Ladder on July 24. The RSGB IOTA Contest is July 25-26. Next week, the ARRL UHF Contest, the 10-10 Summer QSO Party and the North American QSO Party (CW) are August 1-2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration remains open through Sunday, July 26, 2009, for these online course sessions beginning on Friday, August 7, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* "Passport to World Band Radio" in "Limbo": The publisher of "Passport to World Band Radio" <http://www.passband.com/> told readers that the future of the seminal SWL guide is in "limbo." Acknowledging on the Passport's Web site <http://www.passband.com/passport-to-world-band-radio%C2%AE-in-limbo/> that "solid content" is essential to the success of a publication, publisher Larry Magne cited "other considerations" as the impetus behind the decision to possibly cease publication. While Magne gave no exact reason for the decision, it reflects the decline in popularity of shortwave listening, as well as the availability of shortwave schedules on the Internet. Magne said that "Passport to World Band Radio," which just released its 25th edition this year, will continue "to maintain the

WorldScan database and uphold all proprietary material. Among other things, this should help allow for an orderly return to production...should conditions allow. For Passport readers and our small team alike, this is a seminal moment. After all, 'Passport to World Band Radio' goes back a quarter century and has had something like a million readers worldwide. But the future has its own rhythm that confounds prognostication. There may yet be more chapters to this story. Stay tuned." "Passport to World Band Radio" is available from the ARRL Online Store <http://www.arrl.org/catalog/?item=0339>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org
==>ARRL News on the Web: <http://www.arrl.org>

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective.

(NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Radio News Bulletin
Sunday 26th July 2009

Silent Key

Walter Kronkite, KB2GSD

The well-known, former US TV news anchor Walter Cronkite has died after a long illness. He was 92.

He Narrated the "Amateur Radio Today" production by the ARRL. The ARRL has presented him with many awards.

His love of Space science and the NASA Moon missions won our admiration. His coverage of those showed his interest in technology. May he rest in peace.

ComReg Consultation on the 2300 to 2400 MHz Band

ComReg has published a consultation paper on the release of spectrum in the 2300 to 2400 MHz band. The paper is Document 09/49 of 15 June and is available in the Publications section of the ComReg website at www.comreg.ie This band is an amateur secondary allocation.

The IRTS will in due course prepare a response to this consultation paper and we would encourage interested individuals and radio clubs to do so as well. Licensees who have views which they wish to have reflected in the IRTS response should communicate by e-mail to ei7cd /at/ gofree.indigo.ie Responses to the consultation paper must be submitted before 5 p.m. on 29 July next.

AO-51 Apollo 11 40th Anniversary Special Event

Congratulations to any ground stations that received AO-51 during the limited passes during the special event period.

These stations ware treated to a replay of the Apollo 11 Eagle communications, commerating the 40th

anniversary. Stations which ware SSTV ready ware also treated to a Robot 36 SSTV Image.

Using AO-51 & special event there are some uploads of activity on youtube.com from stations receiving the pass.For anyone to take a look and listen to what they have missed.

Send QSL requests marked "Apollo 11" with SASE to the AMSAT office at 850 Sligo Ave. Suite 600, Silver Spring, MD 20910 U.S.A

NASA test new 'space internet' protocols on ISS

The University of Colorado at Boulder is working with NASA to develop a new communications technology now being tested on the International Space Station (ISS), which will extend Earth's Internet into outer space and across the solar system.

Called Disruption Tolerant Networking, or DTN, the new technology will enable NASA and other space agencies around the world to better communicate with international fleets of spacecraft that will be used to explore the moon and Mars in the future.

Rallies

C.R.C. Rally 2009

The Cork Radio Club is holding their Rally in the Montenotte Hotel in Cork on the 13th of September. Special rates for those who wish to stay overnight just mention Cork radio Club.

Food all day, plenty of parking & doors open at 11am. All the usual traders will be there.

Mayo Rally

The 2009 Mayo Rally will be held on Sunday November 22nd in Castlebar. The venue is The Welcome Inn Hotel, Where the 2008 rally was held at short notice, and doors open at 11.00am.

Rally Director, Padraic Baynes, EI9JA, is now taking bookings for stands at the Rally. He can be contacted on 087 6957154. The hotel will be offering a Rally special deal for accommodation. Full details will be available soon.

Dxpedition to Clare Island

Members of the Dalkey Island Contest Group plan to activate Clare Island for the IOTA Contest this weekend. The callsign EJ1DD will be used in a '100 watt DXpedition' entry and the IOTA reference is EU-121. QSL information is via EI7CC.

Operators will be EI2CA, EI5DI, EI6EW, EI7CC, EI7CD, EI8BP AND EI8CE. Look for activity also from the individual operators using the EJ prefix between 23-27 July.

IOTA Rathlin Isl

Sean EI4GK, Pete EI4GZB, Declan EI9HQ, Pete GI4VIV and Joe EI7GY are back on Rathlin Island again for this year's IOTA contest. They will be based in the East Lighthouse, the same QTH as last year. The call sign for the contest will be GI0MPG.

IOTA South Dublin Radio Club and the City of Belfast Radio Amateur Society

EJ0GI are participating in the IOTA Contest (DXpedition - multi-op, HP section) from Inis Oirr, EU-006. The combined team from South Dublin Radio Club and the City of Belfast Radio Amateur Society have travelled to the Aran Islands off the coast of Galway, hoping to build upon the successes of recent years.

Some team members may be active under their home calls outside of the Contest between 23 - 27 July. QSL via EI2SDR (information available on QRZ.com).

South Eastern Amateur Radio Group

The next general meeting of South Eastern Amateur Radio Group will take place on Monday the 27th of July at 8.30 p.m. in the Roanmore Centre, Cleaboy Road, Waterford.

At the meeting, John Ronan (EI7IG) will give a talk about AREN / Emergency radio operating procedure. Please note that this is not just for AREN members but is open to anyone who would like to know more about operating procedure.

All are welcome.

DXCluster now on Twitter

GB7MBC, one of Europe's busiest DXClusters, is now
on Twitter.

It provides such things as DX news, IOTA, Contests and
Solar information.

If you wish to follow it on Twitter, just go to this
URL and add it to your list of 'tweets' you follow.
http://twitter.com/GB7MBC

DX News

XE1/EI7GK.

Paddy EI7GK will be QRV from his daughter's house in
Mexico during July. Listen out for XE1/EI7GK on 14.268
MHz SSB + or - QRM.

Past experience shows the best time for propagation
between EI and XE is early morning 06.00 to 08.00.
Irish time. Remember that Mexico is 6 hours behind EI.
Paddy will be delighted to work EI and GI stations.

Swaziland

A DXpedition will operate from Swaziland between 30th
July and 11th August 2009. The purpose of this
expedition is to provide an amateur radio station at an
International Scout Camp near Manzini.

Using the callsign 3DA0SS and also a station at Hawane
Resort near Mbabane where previous DXpeditions to
Swaziland have operated from. The Hawane station will
operate under the individual callsigns of the
expedition team.

Team members are David GI4FUM 3DA0DJ Tony G4LDL
3DA0TB Gerry M0VAA 3DA0VA Malcolm GM3TAL 3DA0MH Mike
NC4MM 3DA0MM Yuri UT5EL 3DA0EL

There is an established HF antenna farm at the Hawane
site and we will operate 2 HF stations around the clock
depending on propagation and band openings. We plan to
operate on or near to scout frequencies.

Requests for skeds should be sent to GI4FUM /at/ 3da0ss.net

QSLs for this DXpedition should be sent via GI4FUM

Further details and photographs are available at
http://www.gi4fum.co.uk

This week in History

1897 Marconi registers the "Wireless Telegraph and Signal Company".

1899 Royal Navy successfully trials Marconi sets during exercises.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to charlie dot Carolan at gmail dot com Or by phone to 087-6265418 News can also be submitted via e-mail to newsteam at irts dot ie for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sundays bulletin.

DX Special Bulletin No. 918.1
BID: $OPDX.918.1
July 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network, K8YSE and TA1HZ following DX information.

This bulletin is just a reminder that "two" lighthouse activities will
be taking place starting this weekend. Lighthouse activities have become
very popular over the last several years, especially in August. Be prepared
to have all kinds of reference numbers tossed at you when working these
stations (ARLHS, ILLW, Member#...etc.). Some may think this is not DX,
but you are wrong. It is fun and a challenge to work as many lighthouses
as it is working many DXCC entities. Remember, there are awards and prizes (see
the following societies' Web pages for details). Enjoy the next few weeks
in working the many LH stations (between the two ILLW events - over 600
participants are listed). The scheduled events in August are as follows:

August 1-9th: The International Lighthouse-Lightship Week and QSO Party
Contest. This highly popular annual event, now in its 15th
year, has been extended to a full week! This activity also
takes place during the "National Lighthouse Day", as
proclaimed by the U.S. Congress (see
<http://www.lighthousefoundation.org/museum/natllighthouseday_info.htm>.
Complete details on the "ILLW Special Event" and the "ILLW
QSO Party Contest" can be found on the following Web pages:
http://ialhp.org
http://www.illw.org
For a list of ILLW participants: http://illw.org/9-list.html

August 15-16th: The International Lighthouse/Lightship Weekend is held
every third full weekend in August starting at 0001z on
Saturday and finishing at 2359z on Sunday. It also now
coincides on the Sunday with the "International Lighthouse
Day" which is an event organized by the "International
Association of Lighthouse Keepers" whereby as many world
lighthouses will be open to the public for the day." The
ILLW event is organized and controlled solely by the "Ayr

Amateur Radio Group" of Scotland. The basic objective of
the event is to promote public awareness of lighthouses and
lightships and their need for preservation and restoration,
to promote amateur radio and to foster international
goodwill. The event is NOT a contest. There are no prizes,
certificates or other enticements to participate and
therefore, participation is free. Each station's operators
decide how they will operate their station regards modes
and bands. For complete details on the "ILLW Event", go
to: http://illw.net
For a list of ILLW participants: http://illw.net/2009_list.htm

---
Some late ILLW announcements:

Operators Doug/KD8CAO and John/K8YSE will activate Little Point Sable
(USA-443), the Grand Haven South Pierhead Inner (USA-1077) and Grand
Haven South Pierhead Outer (USA-1078) Michigan lighthouses for the
International Lighthouse-Lightship Week, August 1-9th. Operation from
Little Point Sable LH will be on August 1st. On August 2nd, they will
activate the Grand Haven South Pierhead LH, Inner and Outer. Look for
them on all HF bands. Satellite operations on AO-51, SO-50 and AO-27 are
a possibility. QSL via K8YSE.

Members of the Turkish group called SWAT (Special Wireless Activity Team
- TCSWAT) is proud to announce new TC activities in collaboration with
the Directorate General of Coastal Safety (Web page was provided --
<http://www.kiyiemniyeti.gov.tr/default.asp?id=0&lng=en>). It has been
ten years since the big earthquake of August 17, 1999, hit the Marmara
area of Turkey: http://en.wikipedia.org/wiki/1999_%C4%B0zmit_earthquake
TCSWAT will be on the air to remember those who lost their lives in this
natural disaster. There will be two stations; one from Yalova - TC99Y
and one from Kocaeli- TC99K. Since the anniversary coincides with the
International Lighthouse-Lightship Weekend, stations will be located in
the lighthouses on the coast of Marmara Sea. TC99Y will be active from
Bozburun Lighthouse in Yalova (KN40JM) and TC99K from Yelkenkaya
Lighthouse (TUR-054) in Kocaeli (KN40QS). TC1LHW, a TCSWAT classic,
will also be on the air from Karaburun Lighthouse (TUR-036) on the
Black Sea coast. Activity will be mainly on HF SSB, VHF-UHF FM. Detailed
information about the stations and operators will be at QRZ.com and
<http://www.tcswat.org>. There will be a special award for those who
contact both TC99 stations on more than one band. Details will be
announced later on TCSWAT Web site.

Amateur Radio Newsline(tm) Report 1668 - July 31 2009

Amateur Radio Newsline report number 1668 with a release date of
Friday, July 31st, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. California hams assist in a mountain rescue.
We have the sound from the scene. Also, a new radio telemetry system
could be a big challenge to BPL for power grid control, another
petition to ban closed and private repeaters is filed with the FCC and
Johannes Kepler is honored with his own spaceship. Who was Johannes
Kepler you ask? Find out on Amateur Radio Newsline(tm) report number
1668 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: CALIFORNIA HAMS HELP WITH MOUNTAIN RESCUE

A pair of Southern California hams have helped to coordinate a mountain
rescue. This after one received a report from the other over a 2 meter
repeater that a hiker had been injured on one of the highest peaks in
the San Gabriel Mountain range.

Rich Lippucci, KI6RRQ, was monitoring the Catalina Amateur Radio
Association repeater from his home in the city of Vista on Saturday,
July 11th . That's when he heard a station ask if there was anyone
monitoring. He responded and learned that the caller, Kirk Gustafson,
KE6MTF, was on his handheld transceiver hiking around the Mt Baldy
area. He was about 2.5 miles off road at the San Antonio Ski Hut when
other hikers informed him that a woman was hurt up the trail in the
backcountry. They suspected she might have a broken ankle but were not
sure. They also had no cellphone service:

--

Rescue audio. Hear it in the audio version of this newscast
downloadable at www.arnewsline.org

--

Using his wireline telephone, Lippucci called the local 911 emergency
number and was eventually connected to the San Bernardino County
Sheriff's dispatch center. He then worked with an operator only
identified as Chelsea and coordinated the rescue with the San
Bernardino Fire Department who sent a foot patrol to the area:

--

Rescue audio. Hear it in the audio version of this newscast
downloadable at www.arnewsline.org

--

Meantime, the local sheriff's office dispatched a helicopter to meet someone at the ski hut to take them to where the hiker was down. Unfortunately, the chopper could not land in the rugged terrain.

In the meantime, the group of hikers had transported the injured woman down the trail to the ski hut, stabilized her leg and determined it was probably not broken. But they also realized that they could not carry her out of the area due to the steepness of the trail. The dispatcher told Lippucci that the helicopter would perform a skid rescue. That's where a crew member suspends a basket from the helicopter the victim is strapped in and pulled back up. It was not long before the helicopter was getting ready:

--

Rescue audio. Hear it in the audio version of this newscast
downloadable at www.arnewsline.org

--

At that point Gustafson relayed back that the rescue would likely happen momentarily.

--

Rescue audio. Hear it in the audio version of this newscast
downloadable at www.arnewsline.org

--

After about 15 minutes from arriving on scene the helicopter crew got the victim airlifted out and on her way to treatment.

According to Lippucci both the 911 emergency dispatch and the Sheriff's office accepted the ham radio emergency call without hesitation. The San Bernardino Sheriff's office has had a long and very positive relationship working with that county's radio amateurs. In fact, Lippucci says that they used a ham radio operator to relay questions to through him to Gustafson. This, in order to gain all the information they wanted and needed to put assets on the emergency.

The rescue was truly a success for ham radio. Lippucci says that as a CERT member, this was the very reason that got his radio license for, in the first place. (KR6AL)

**

RESCUE RADIO: KY HAMS TO TAKE PART IN INFLUENZA PREPAREDNESS DRILL

Still with rescue radio news, word that the Kentucky Division of Emergency Management and its Department of Military Affairs has invited the states organized emergency communications groups to take part in a statewide pandemic influenza exercise. One that is planned for August 3rd to the 7th.

According to the planners, the communications portion of the exercise will begin each day at 8:00 A.M. and run until approximately 8:00 P.M. Monday through Thursday and will end at 2:00 P.M. on Friday. One of the goals is to use pre-identified 2 meter and 80 meter frequencies to facilitate contact with all 120 counties in the Commonwealth. Some UHF repeaters and Echolink equipped stations will also take part.

Planners say that to some degree the ham radio aspect of the exercise will be like operating a week long net with a station in the Commonwealth Emergency Operations Center used to pass traffic and log check-ins. More information on this massive Kentucky emergency planning exercise can be found at www.kyham.net/kyem2009.html. (KG4KBU via QRZ.com)

**

EMERGING TECHNOLOGY: RADIO COULD CHALLENGE BPL FOR ELECTRICAL SYSTEM MONITORING

FM subcarriers on broadcast stations also called SCA channels could challenge BPL in the area of power grid monitoring. Jerry Gaul, KE7GGV, has the details:

--

B-P-L watch out. Here comes S-C-A. This, as e-Radio and Direct Energy announce that they are partnering with manufacturers of smart grid devices such as thermostats, in-home displays, load controls and appliances to use broadcast RF as a way to monitor power consumption needs.

Using FM subcarriers leased from radio stations, e-Radio transmits the notifications to the home-based receivers across a municipality or utility service area that results in significantly reduced peak energy demand. The technology can also intervene on the consumer's behalf, cycling off appliances for set periods of time during peak periods.

E-Radio and Direct Energy say that their Utility Message Channel allows utilities, energy retailers or government agencies to send alerts, messages and commands to smart grid-enabled devices and consumer appliances. This is information that tells them to lower their energy consumption and operate more efficiently.

The two partnering companies have conducted pilot tests in California, Texas and Ontario, Canada. In Texas, Direct Energy's affiliate, CPL Retail Energy, has launched a demand-response and energy efficiency pilot program for residential customers. The pilot uses e-Radio-enabled thermostats to achieve and measure peak period reductions.

For the Amateur Radio Newsline, I'm Gerry Gaule, KE7GGV, in Albany, Oregon.

--

Direct Energy has an agreement with e-Radio, which operates wireless communications networks and makes FM receiver modules for "smart grid" devices to partner in this energy saving project. (RW)

RADIO LAW: YET ANOTHER ANTI PRIVATE REPEATER PETITION FILED

Ham radio history is once again repeating itself. This as a Washington D.C. area ham becomes the latest to say its time to outlaw all closed and private repeaters and has asked the FCC for a rules change to outlaw these type of systems. And in a recent interview with Hap Holly, KC9RP, of the Rain Report, Murry Green, K3BEQ, of Cheverly, Maryland, explained what he is asking the regulatory agency to do:

--

Green: "I've asked the FCC to change the rules to prohibit limiting the use of frequencies used by closed repeaters directly or indirectly except where a user blatantly violates the Commissions rules."

Green told Holly that he's taking this action because he believes that the spectrum used by repeaters really belongs to all radio amateurs and that the claim by closed repeaters that limiting access helps share the financial burden has little merit:

--

Green: "Closed repeaters and its regulated frequency should be open to all amateurs having the proper class of licensee and not on a pay for use basis. Voluntary contributions work for the large majority of open repeaters throughout the United States. It can work for closed repeaters provided users are given that opportunity."

--

Green also appears to see closed and private repeaters as both discriminatory and a violation of the FCC's rules:

--

Green: "Its not a closed society. Its not an elitist group. You simply can't discriminate. And also it violates the FCC rules which state that frequencies are to be regulated effectively and used effectively. If you have an elitist group that's discriminating on who can come in, its wrong. It's simply wrong. Its not amateur radio."

--

Green is not the first ham to file a rules change request asking the FCC to outlaw closed and private repeaters. Since Newsline began in 1977 we have reported on at least 6 similar petitions, and maybe more. All of these were denied for the same reasons. First is that the FCC does not recognize the terms open, closed and private in regard to repeaters. To the FCC, a repeater is a repeater and the words open, closed and private are nothing more than ham radio terms that you will not find in the rules.

Also, as recently as last May's Dayton Hamvention FCC Forum, the agency's rules man, Bill Cross, W3TN, reiterated the FCC long standing position that is not in any way discriminatory for a repeater owner operator to be selective in whom he or she chooses to repeat:

--

Bill Cross, W3TN: "One of the common misunderstandings is that amateur radio repeaters are not common carrier systems. There is no duty to serve on a non-discriminatory basis.

"If you want to limit it (access to a repeater) to people in a DX club, that's fine. If you want to limit it rush hour messages that are going to be traffic related or mobiles get priority, that's fine.

"You put the repeater up. Its yours to run and (its) your obligation to control it and limiting it is allowed."

--

At airtime, its not known if the FCC will assign a Rule Making designation to the K3BEQ rules change request or simply dismiss it as being non relevant based on past proceedings. After all, if the regulatory agency does not even recognize the existence of closed and private repeaters as separate and distinct entities, how can it act to make a rule to make them go away. (ARNewsline(tm) with audio provided by RAIN)

**

ENFORCEMENT: REPEATER PROBLEMS CONTINUE IN THE UK

Malicious interference and other firms of on the air abuse are still plaguing repeaters in London, England. Because of this at least one system is considering some drastic action with support of government regulators. Jeramy Boot, G4NJH, reports:

--

Repeater users in the London area will be aware that abuse continues to mar the network with a minority making it unpleasant for those who simply wish to enjoy the hobby. The East London 2m repeater, GB3EL, has been suffering from abuse recently and the Keeper has instigated a curfew between the 6pm and 6am to reduce the instances of abuse.

This action has proven effective in the past and the RSGB Emerging Technologies Committee and Ofcom support the Keeper's actions. The ETCC encourages proactive measures by all Keepers to manage their repeaters in accordance with the terms of their NoVs. Users are especially asked to consider their own actions and not to react when abuse is heard, as this is just what abusers are hoping will happen.

Im Jeramy Boot and you are listening to the Amateur Radio Newsline.

--

The Term NOV used in that report stands for Notice of Variation to a UK ham license that permits one to put up a repeater. Unlike the United States where anyone install a temporary repeater to replace one that's gone dark to fight user abuse, in the UK it's the national society that holds all of the repeater operators licenses. An individual who decides to put one up without it being licensed could wind up doing some serious time in the old gray bar hotel. (RSGB)

**

NAMES IN THE NEWS: SENATE CONFIRMS CLYBURN AND BAKER AS FCC COMMISSIONERS

The U.S. Senate has confirmed President Obama's nominations of Democrat Mignon Clyburn, and Republican Meredith Attwell Baker, to the remaining two seats on the Federal Communications Commission. Clyburn is the daughter of House majority whip James Clyburn, and the former publisher and editor of the Charleston weekly newspaper, the Coastal Times. She currently serves on the South Carolina Public Service Commission. Baker, the daughter of former Senate Majority Leader Howard Baker, is a former Commerce Department official who oversaw the $40 coupon program for converter boxes during the digital television transition. Both were approved on Friday, July 24th (FCC) **

ELECTRONIC SAFETY: SMOKE DETECTOR RECALL

A product warning from the Consumer Products Safety Council. It says that About 94,000 Kidde model PI2000 dual sensor smoke alarms, have been recalled. This, because the agency says that an electrostatic discharge can damage the unit, causing it not to warn consumers of a fire. The recall includes the date codes 2008 Aug. 01 through 2009 May 04. The products were sold at retail, department, and hardware stores and through electrical distributors nationwide from August 2008 through May 2009. Details by Web at www.kidde.com or http://www.cpsc.gov. (CPSC Release)

**

RADIO EDUCATION: CALIFORNIA TEACHER TURNING OUR SCHOOL AGE HAMS

Amateur radio is finding a receptive young audience among some California school age youngsters. This, according to an article in the Los Angeles Times by writer Bob Poole who says that teenagers in one Los Angeles suburban middle school have been discovering shortwave radio and getting their ham radio licenses

Thanks to science teacher Karl Beutel, KE6MAO, some 75 teenagers in have already become licensed amateur radio operators and more will likely become hams in the coming years. This as the course will continued to be offered at the school.

Buetel said he was motivated to become a ham radio operator by the 1994 Northridge earthquake. You can read the LA Times story at www.latimes.com/news/local/la-me-teen-radio25-2009jul25,0,1740751.story ?trac k=rss (ARNewsline(tm))

**

RADIO PUBLICATIONS: PASSPORT TO WORLD BAND RADIO IN LIMBO

The publisher of Passport to World Band Radio has told readers that the future of the famed SWL guide is in "limbo." Acknowledging on the Passport's Web site that "solid content" is essential to the success of a publication, publisher Larry Magne cited what he termed as other considerations as the reason behind the decision to possibly cease publication.

According to the ARRL, Magne gave no exact reason for the decision, but indicated that it reflects the decline in popularity of shortwave listening, as well as the availability of shortwave schedules on the Internet.

Magne noted that Passport to World Band Radio, which just released its 25th edition this year, will continue to maintain the WorldScan database and uphold all of its proprietary material. He says that this should help allow for an orderly return to production, should conditions allow. (ARRL)

**

HAM HAPPENINGS: CELEBRATING THE 2010 SUMMER E SEASON

The Oklahoma City DX club recently celebrated the peak summer 6 and 10 meter Sporadic E Season DX season by operating with the call W5E. Its is now looking to expand the celebration in 2010 by asking clubs in other call districts to reserve a W prefix and E suffix call for next June.

Club spokesman Graham Welch, WE5I, says that the W5E call has already been reserved by him for July 2nd to the 11th of 2010. He is now looking for clubs or individuals in each of the 1 to 4 and 6 through 0 call areas who are interested in reserving one of the remaining nine such calls in a joint celebration of the 2010 peak of sporadic E

season. Graham says to contact him by e-mail to we5I (at)cox (dot) net if your club or group is interested in taking part. (Oklahoma DX Club)

**

ON THE AIR: MISSOURI SCOUTS ON HF SEEKING RADIO MERIT BADGES

A group of scouts from Blue Springs Missouri Troop 58 are operating a High Frequency station at the H. Roe Bartle Scout Reservation located in Camp Osceola. The scouts will be on the air in pursuit of their Radio Merit Badge through August 4th on 3.940 and 7.280 MHz using the special call N-Zero-Z. They will also be looking to exchange QSL cards via their Scoutmaster Michael Pratt, KB0EPY, whose address is good in the callbook or on QRZ dot com. (KB0EPY)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: SPACE JAM 3 IN ILLINOIS

Take one part scouting. Add to it a high altitude ham radio balloon launch and a contact with the International Space Station. Mix it all together and you wind up with an event called Space Jam 3. Jack Parker, W8ISH, has the details:

--

While the world was watching replays of the history making moon walk last week, dozens of Illinois Boy Scouts were taking their first steps toward space technology.

Space Jam 3 got off the ground last week with a high altitude balloon launch in Rantoul, Illinois. Space Jam is sponsored by DePauw University. It's purpose is to get Scouts into technology.

With assistance from the Vermillion County Amateur Radio Association, they were able to launch a helium filled balloon and use the cross band repeater for amateur radio contacts across the Midwest.

The longest radio contact occurred when the balloon reached the 99-thousand foot level. Two stations, one in Walbridge, Ohio the other in Mexico, Missouri, completed a 470 mile QSO.

On the ground, Dave Cline KB9ZMF, said he thought 200 Boy Scouts were on the radios throughout the Space Jam. They also worked on high tech

merit badges in Space Exploration, ,Aviation, Radio & Electronics and on Nuclear Science Composite Materials

Talking with Astronaut Robert Thirsk, VA3CSA, onboard the International Space Station, topped the weekend Space Jam activities.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH.

--

Space Jam Four is already being planned for August of 2010. (W8ISH)

**

HAM RADIO IN SPACE: AMSAT-UK ANNOUNCES FUNCUBE

AMSAT-UK has announced a new amateur satellite project called FUNcube. This is an educational single cubesat project with the goal of educating young people about radio, space, physics and electronics.

FUNcube will support the educational science, technology, engineering, and math curricula and at the same time provide an additional resource for the Radio Society of Great Britain's GB4FUN Mobile Communications Center.

The target audience consists of primary and secondary school pupils and FUNcube will have a high power 145 MHz telemetry beacon that will provide a strong signal for the pupils to easily receive. It will also carry a UHF to VHF linear transponder that will have up to 1 watt and which can be used by radio amateurs worldwide for SSB and CW communications.

The FUNcube project has already received initial funding from the United Kingdom based Radio Communications Foundation and is expected be developed in collaboration with ISIS-Innovative Solutions in Space. (ANS)

**

HAM RADIO NEAR SPACE: BACAR SET TO LAUNCH ON SATURDAY AUGUST 8

The long awaited South African Balloon Carrying Amateur Radio or BACAR flight will take place on Saturday, August 8th. The lighter than air craft will lift off Africa between 08:00 and 08:15 and with a multi-payload which should be of interest to radio amateurs and shortwave listeners around the globe.

The payload includes an APRS system operating on 144.800 MHz which will be switched on 2 minutes before launch and allow APRS stations to follow the flight. A 40 meter beacon will be operating on 7.022 MHz transmitting telemetry information every one minute. The data will include the inside and outside temperature and the pressure in millibars.

The callsign of the APRS transmitter will be ZS6SAT. A full commentary of the launch activity to be broadcast on 7.082 MHz and streaming via EchoLink and on the world wide web. Please visit www.amsatsa.org.za for more information on the flight. (Southgate)

**

WORLDBEAT: CHINA NOW AT 90000 HAMS

Ham radio is growing in China. According to the Chinese Radio Sports Association which oversees licensing for hobbyists in the world's most populous country, some 90,000 of the worlds radio amateurs live in are in that nation and the number has been steadily growing in recent years. This, despite mobile phones and the Internet becoming commonplace in nearly all of the country. (Published news report)

**

WORLDBEAT: UK CELEBRATES WW2 RADIO SERVICES

Meantime, the famed museum at London's Bletchley Park will be celebrating the essential contribution of radio to the war efforts. This, with the family event the weekend of August 1st and 2nd called Wireless Waves. Various radio societies and other groups will demonstrate a range of equipment from World War Two onwards. Groups taking part include the Vintage and Military Amateur Radio Society, Milton Keynes Amateur Radio Society, Bletchley Park Radio Society and a World War Two replica German field radio station. Full details are at www.bletchleypark.org.uk. (GB2RS)

**

WORLDBEAT: US BASED TRANS-ATLANTIC BEACON UPS POWER

The WA1ZMS trans-Atlantic beacon operated by Brian Justin on 144.285 MHz is now running a 500 watt transmitter and giving the system a 7 kilowatt Effective Radiated Power signal beaming toward Europe. The beacon is G-P-S locked and the antenna is made up of two stacked 5-element yagi's beaming at 60 degrees from grid locator FM07fm. More about this system is on-line at www.directivesystems.com/WA1ZMS.htm (Southgate)

**

THE CONTEST CORNER: THE 2009 EUROPEAN DX CHAMPIIONSHIP

Turning to contest news, Saturday, August 1st is the European HF Championship contest. This event runs from 1200 until 2359 U-T-C using SSB and CW on all HF bands from 80 to 10 meters. The interesting exchange being used this year is the last two digits of the year you were licensed in addition to the obligatory signal report. An interesting exchange indeed. (Via e-mail)

**

DX

In DX, word that a multi-national operation from Swaziland will be on the air through August 11th. They will sign 3DA0SS from the Hawane Resort and a campsite near Manzini. Plans are to cover as many bands and modes as possible, including PSK31, RTTY and CW. Operations will be on or near to scout frequencies. QSLs should be sent via GI4FUM.

P49T and W3TEF portable P4 will activate P41USA over the anniversary date of the USA attacks on September 11th, 2001. Listen for P41USA to be active on all bands between September 8th and the 17th. Activity will include the September VHF Contest. All QSLs go to W3TEF.

OY1CT was active from Streymoy in the Faroe Islands during the RSGB IOTA Contest. If you work him QSL direct to OY1CT.

LA1BN and LA1LO will be operational on 50.155 MHz from grid square JO39 in the Norwegian mountains from August 10th to the 15th. QSL as directed by the operators.

Lastly, JA6VDB and JE6AQP will be active slash 6 from Japan's Nozaki Island, Ojika Island and Goto Island between August 8th to the 12th. Their operation will be on 40 through 15 meters using CW and SSB. QSL via their home callsigns, direct or via the bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: HONORING KEPLER WITH A SPACESHIP

And finally this week, any ham who operates or tracks ham satellites is well aware of the term Keplerian Elements. That's the mathematics numbers used to point your antenna. Well in honor of the man who developed them, Europe's next space freighter will be called Johannes Kepler. This, in honor of the great 17th Century German scientist's work. Frank Lusa, VK2FJL, has the rest of the story.

--

Johannes Kepler was the father of celestial mechanics. His three laws describe planetary motion and allow scientists to predict how objects will move through the solar system.

The Automated Transfer Vehicle is currently being assembled in Bremen ready for its 2010 mission to resupply the International Space Station.

European Space Agency delegates agreed to the name at a recent meeting. The first ATV was called Jules Verne after the French science fiction writer and completed a flawless maiden mission last year. It delivered more than five tones of supplies to the orbiting outpost before dropping back to Earth in a controlled burn-up over the Pacific Ocean.

The ATV is one of the most capable spacecraft ever developed in Europe. After launch, the space truck can work out where it needs to go in space, and then makes a fully automatic docking once it arrives at its

destination.

--

Another Kepler spacecraft is also about to make the headlines. The US space agency has also used the Kepler name for its news planet hunting telescope due for launch in August. (WIA News)

Change of Tone!

Because 123 Hz was prone to interference such as music on the channel, FTAC
has decided to revise such & has now set 91.5 Hz as the general use tone
for repeaters.
The WIA Band Plan has been Updated to reflect this and other changes, the
new Band plans are dated July 24 2009.

MEOW - THE CATS WHISKERS!

Australia's defences against future bushfire threats received a significant
boost this week with Telstra's launch of their $200,000 Mobile Exchange on
Wheels, or, M.E.O.W.

MEOW is a simple and highly portable, fully functional telephone exchange,
specifically designed to provide communications to disaster areas and was
developed by Telstra engineers after the devastating bushfires Black Saturday.

At an official event in Marysville, Telstra Consumer Group Managing Director,
David Moffatt, said the launch of the MEOW was an example of Telstra's ability
to use technology in response to natural disasters.

Telstra's Mobile Exchange on Wheels weighs just three tonnes, light-enough to
be towed behind a 4WD or light truck, and can be deployed within just
30 minutes.

Once on-site two technicians can activate the device which can then provide
450 telephone services and over 300 ADSL2+ services at speeds of up to 20Mbps.

COP THIS!

According to the Sydney Morning Herald, The Queensland Police "fraud squad" is crowing about being the first police force in the world to drive around scanning for open Wi-Fi hotspots, warning owners that they need to tighten up security.

Detective Superintendent Hay told the Herald that "it was illegal to use someone else's network bandwidth without their permission," though in most countries the laws are unclear on the subject.

Trying to bring down the world's largest free ISP (linksys) is probably an uphill battle, though Hay tells the paper the effort will "save mum, grandma and grandpa from losing their life savings, having their identity stolen or losing their kids' inheritance."

Wardriving is going mobile with a notebook and directional antenna looking for open wireless links around the "burbs".

And hot on this item, word that a UK man is "allergic" to wi-fi waves.

For Steve Miller a trip to his local High Street is a living hell that makes him sick, dizzy and confused.

Pubs make him feel the same and he can't use trains, airports or hotels without experiencing head-banging agony.

But Steve doesn't suffer from some strange phobia. He is allergic to wi-fi.

"If I fancy a pint I have to travel three miles to the only pub in my area that doesn't have it. I can't just go to the shops because huge parts of the High Street affect me.

Being extra-sensitive to this "electro-smog" has made moving house a nightmare for Steve, as stray signals from neighbouring buildings could make him ill.

It has also cost the top DJ thousands of pounds in lost income.

Alan Shannon VK4SN has advised the WIA that the Lockyer Valley Radio &
Electronics Club will hold its Annual General Meeting at the Mary St Community
Centre, Laidley on August Nine at 2pm.

TARC Management Meeting this Tuesday

The Management Meeting of the Townsville Amateur Radio Club happens Tuesday
4th of August from 7-30pm at the Club Rooms SES HQ Green Street West End.
Along with the usual things that happen at the meeting there will also
be some late breaking info about the Cardwell Classic Rally and TARCs
activity during the Lighthouse Weekend.

TRUNK CALL

On this day, National Tree Day, members of the Maryborough Electronics & Radio
Group, "MERGE", will be operating their "Living Tree Antenna" from 1200 hrs
AEST. Listen out for their "TREE POWERED TRANSMISSIONS" on or around 3615,
7060 or 14.190.

"MERGE" invites others to look up "Tree Antenna" on the web and attempt to do
the same, but will welcome contacts from all.

North West Tasmania Amateur Television Group's Foundation Assessment Success.

Congratulations to Mark Grewar for successfully completing his assessment for
the Foundation Licence.

Mark passed with flying colours and has requested a call sign of VK7FZZZ.

He is anxiously waiting for same and expects to be operational on 2M and HF
as soon as he receives same.

If you hear Mark on air shortly, please give him a call, as he would
appreciate some contacts.

Again, congrats on attaining your Foundation Licence, Mark.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Are you a Foundation Licence holder wanting to upgrade?

Amateur Radio Victoria announces its latest Standard Licence Bridging Courses. These are designed to help Foundation Licensees bridge the knowledge gap between the Foundation and Standard Licence syllabuses.

The course will be run over five Wednesday nights in September plus a weekend at the Amateur Radio Victoria offices in Ashburton.

Places are limited and filling quickly. For more information contact Barry Robinson VK3PV.

Phone 0428 516 001
email vk3pv@amateurradio.com.au

Live on the Gold Coast Strip?

Have you heard of the F-Troop net?

Well here's your chance to join in. The Gold Coast Amateur Radio Society holds a casual net every Tuesday 7pm, on 146.700 to encourage foundation operators to get involved in controlling nets.

Gold Coast also invite all amateurs to join in and take part in technical discussions and other topics that cover the hobby we all enjoy.

Every Tuesday 7pm, on 146.700

TARC WIA Exams Information

Exam sessions in the North Queensland region are held on demand with WIA Assessors and assessment packs available for all 3 levels of licensing.

Contact theTARCinc Acting WIA Exams Regional Co-ordinator Ray VK4NET on mobile 0419 637 637 to have a mutually suitable date and WIA Assessor assigned to your assessment.

Further information also available at
tarc.org.au

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Invitation to a seminar on Future Wireless Technologies

The New Zealand Ministry invites participation at a seminar on Future Wireless Technologies - including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies on August 24.
The purpose of this event is to share knowledge amongst participants about emerging developments and to commence identifying the areas on which to focus future technical and regulatory work.

I.C.A.S.A. TO HOLD HEARING ON TABLE OF FREQUENCIES

ICASA the regulatory body in South Africa will be holding public hearings on proposed revisions to the table of frequency allocations in South Africa from 17 August.

The S.A.R.L. will be presenting the case for Amateur Radio.

Last year SARL made proposals that new amateur allocations be considered around 500 kHz and 5 MHz, the extension of 160 metres to the full 1.8-2.0 kHz and allocations 2300 - 2450 MHz and 3300 - 3500 MHz.

SARL is currently preparing its case in greater detail motivating the reasons why these allocations will be beneficial to amateur radio and its contribution to propagation and other studies.

JUST WHEN YOU THOUGHT IT WAS SAFE

It's once more into the breach for the Federal Communications Commission's efforts to authorize Broadband Over Power Line technology.

The USA agency has unfortunately issued a new Notice of Proposed Rulemaking, asking for feedback on the power levels Access BPL systems should operate at so that they don't interfere with other services.

The American Radio Relay League (ARRL) stopped this process dead in its tracks (as rightfully they should have) last year, having raised concerns about the transparency of the proceeding and BPL's potential for messing with ham radio signals and other bands.

But the Commission is sticking to its guns, arguing that the technical standards it has already set may still be sufficienti¿½at least, with a

modification or two.

RD 2009

Hello listeners I am peter Harding VK4OD with greetings from the desk of the RD Contest Manager.

With this years RD Contest just around the corner here on Active service from East Timor is Lieutenant Chris Megaw VK4FR with some little known information from WWII

Hello Listeners I am Lieutenant Chris Megaw, Currently on active Service in East Timor, with the Remembrance Day Contest just around the corner I have a short story in regards to the Biscuit Bombers in WWII

Attached to one of the Australian Helicopter units here in East Timor, One of my roles here is to resupply by Air, as they did in WWII.

At that time they did have very limited success with the delivery of supplies by air, abandoning it favour of resupply by sea.

On the night of April 19th 1942 all radios in the northern Australian port of Darwin were silent, the reason for this was that on the previous night, a weak signal, using a three month old coast watcher code, from a coast watcher who had not been heard from for some time, had been picked up at the radio listening station at HQ Northern Territory Force in Darwin. All commercial and military radios had been told to stay off the air. About one month had passed since the last of the Allied Pacific bases had fallen and at the time the Japanese were believed have uncontested control of their new empire, apart from some guerrilla resistance in the Philippines. That night the signal was received again. This time more clearly but the listeners in Darwin were sceptical, suspecting a Japanese ruse. They demanded proof of identity from the signallers, a transcript of the message follows./

/Darwin : "Do you know George Parker (the coast watcher)?"
Signaller: "Yes, he is with us."
Darwin : "What rank is he?"
Signaller: "Captain."
Darwin : "Is he there? Bring him to the transmitter. What is your wife's name, George?"
Parker : "Joan."
Darwin : "What is the street number of your house?"
Parker : "94." /

/ A coast watcher officer in Darwin, knew from set procedures that this was Parker and that he was not a prisoner. Darwin HQ was satisfied and asked for a report. *The response was completely unexpected and secured a place in Australian military history.*/

/ "The Timor force is intact and still fighting. Badly need boots, quinine, money and ammunition."/

I look forward to when we next meet just before the RD commences.

International Lighthouse and Lightship Weekend

With just two weeks to go this annual event is set to be a huge success with 320 lighthouses registered so far and another more than 100 expected in coming days.

Australia remains in the lead with 45 registrations ahead of Germany on 41.

The Lighthouse Weekend is on the 15th and 16th of August. To check out those already registered or to make a registration just visit the website ILLW.NET

WIRELESS WEATHER

BABY IT'S COLD OUTSIDE!

Talk about the cold of space. On July 2nd the flight detectors of Planck' spacecraft's High Frequency Instrument reached the amazingly low operating temperature of -273ï¿½C and did it by radio.

Amateur Radio Newsline's says the cool-down took place as the spacecraft has just entered its final orbit around the second LaGrange point of the Sun-Earth system.

Planck is equipped with a passive cooling system that brings its temperature down to about -230ï¿½C by radiating heat into space. Three active coolers were ordered to take over from there to bring the temperature down further to an amazing low of -273.05ï¿½C.

That's only 0.1ï¿½C above absolute zero which is the coldest temperature theoretically possible in our universe.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Smart clothes could take photos.

Clothes could one day take snaps of everything happening around whoever is wearing them.

US researchers have made smart fabric that can detect the wavelength and direction of light falling on it.

The research team has found a way to accurately place sensors in each fibre and co-ordinate the electrical signals they send when light falls on them.

The results were a step towards "ambient light imaging fabrics" said the researchers.

Led by Dr Yoel Fink from the Massachusetts Institute of Technology, the researchers have extended earlier work that placed sensors in relatively

large polymer fibres.

Dr Fink and colleagues found a way to stretch the 25mm strands of polymer into much thinner fibres while maintaining the relative positions of the sensors.

This earlier work has led to the creation of very long and flexible light and temperature sensors that may find a role in smart fabrics for soldiers or those working in hostile environments.

In their latest work, described in a paper in Nano Letters, these thinner strands were woven into a 0.1m square section of fabric. The careful creation of the fibres and positioning of the light-sensitive elements meant that the team knew which signals were being sent by which sensors.

This enabled the team to reconstruct, albeit crudely, an image projected onto the small square of fabric. The researchers said their work was an "important step" towards finding ways to get many nanoscale devices working together.

Looking for a healthy add on to your amateur radio interests?

A day out with your radio on a farm property, or in the bush?

Want to take the YL or XYL and the kids?

Want to help others and their families engage in healthy outdoor activity?

How about an activity where motive force is restricted to one horse power, and where you can talk to the drivers as they pass?

Where the fuel used is grown in the paddock and a minimum of greenhouse gas is produced - naturally.

Here's your chance, particularly if you are in VK7.

WICEN Tasmania (South) regularly provides safety checkpoints for the Southern Tasmania Endurance Riders.

Their next ride on the 15th of August is close to Hobart, on the Clifton Vale property between Dysart and Elderslie.

So, if you want to get out of the shack, get some fresh air, help others involved in a great family activity and use your radio for something useful and enjoyable, mark your calendar now for the 14th and 15th August and give Chris VK7FCDW or Roger VK7ARN a call to let em know you'll be there.

(sourced to vk7news and Roger, VK7ARN, Secretary WICEN Tasmania (South))

HAM RADIO HELPS AVOID RAILWAY ACCIDENT

Ham radio may have helped to avoid a railway accident. One involving a group of Illinois youngsters who decided to try to joy ride on a commuter train.

Paul Streeter, AB9PS, had been attending a meeting of the National Railway Historical Society.
As his train home departed the station, his son David, N9JFE, and two other club members who had waited with him noticed that a couple kids had jumped onto the engine. Sensing the urgency in the situation, N9JFE used the emergency provision of the FCC's Amateur Service rules. He tuned his HT to the railroad's frequency to notify the engineer that he had some unwanted kids clinging to the locomotive.

The engineer brought the train to an emergency stop. As soon as the train came to a halt, the crew jumped out when it chased the kids away.

Now here's the kicker. Apparently the kids took refuge right in front of the Downers Grove Police Department after they jumped off the engine. In fact, they were seen sitting on the agency's steps. The engineer then asked the dispatcher to notify the police of what had transpired and of the youngsters where-abouts.

AB9PS says that in his opinion that the situation was definitely life-threatening. He says that the train could have reached 60 mph even though it was a local. At that speed the kids would not have been able to hang on.

On 20th July 2009 one of Brisbane Amateur Radio club members, Arthur VK4KBN
became a silent key at the age of 78.

Arthur was a real Gentleman and was always willing to help others in need.

He was net control of a daily net at 8am on vhf in the Brisbane area.

VK4KBN will be greatly missed by those who knew him, especially members of the Brisbane Amateur Radio Club.

(Les Parker VK4SO)

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

The Wide Bay Mini Ham Fest is now a happy memory for the many people who attended Gootchie last weekend. Close to 100 people passed through the doors and despite the seasonal ills so many people contributed to its success. One person who is recovering from pneumonia drove across Brisbane to ensure items were available. Another person who had been in hospital twice in the previous fortnight manned a table of pre-loved items for sale.

It is these untold stories of devotion to the hobby that make one realise how much members of this hobby are prepared to give of themselves. There is a true spirit of amateur radio which is not always obvious until you participate in an event like this.

So successful and harmonious was the day that the QCWA ladies have already marked their calender for next year's ham fest and this before they were even asked.

As a learning exercise, organising an event in 5 weeks is certainly a steep slope to climb. The point is that if the amateurs of the Wide Bay area can do this without too many hiccoughs then it proves it can be done elsewhere. With the benefit of hindsight, the 2010 Wide Bay Mini Hamfest will be better.

Despite problems (Murphy came) Erik, VK4AES and his Easypal team were able to demonstrate and explain this mode of digital SSTV to several interested amateurs. Look out for some more signals appearing from the south east of VK4 in the future.

GCEG conducts a net each Monday at 7.30 p.m. on Mt Corella repeater, 146.725MHz and the next monthly meeting will be held in the basement rooms of Leading Edge Electronics, Reef Street, Gympie, Thursday next, 6th August at 7.30 p.m.

Redcliffe and District Radio Club

I'm Ray VK4CF back with news from the Redcliffe AR Club".

At the beginning of last week John VK4YJV and Peter VK4EA, climbed the repeater the mast to put the new 2 metre antenna into action. Reports have indicated that the repeater is working into areas that it has not been working in before. The repeater footprint appears to be from south of Yatala to the Yandina turn off on the north coast. Scotty VK4FLAE and John VK4YJV were able to keyed up the repeater from the top of Cunningham Gap and then from near Stanthorpe.

Whatever the footprint the repeater is working a real treat. The 70 cm antenna is still the large whip and this has also improved the output as the diplexer is not in use and the cavities are enjoying the reduced workload.

While talking about John, VK4YJV, John had successful surgery on his back last Tuesday as is now walking without pain but will be taking it easy, until he sees the specialist next month.

Last meeting night, Ric Day the acting principal of the Caboolture Special school presented the club a certificate of appreciation to recognize the club's assistance in the development of its students in literacy and numeracy and their communication skills using the medium of amateur radio.

Peter VK4HOY who is the school's Vocational Educational Co-ordinator, also invited the club to participate with the school to contact the international space station and many club members said that they would be pleased to assist with this great venture with the students.

Remember the Aircraft open day at the Caboolture Air Field this Sunday and please visit the Redcliffe club's stand at the airport.

August General Meeting BBQ

Our Next general meeting on 4th August is our BBQ meeting where a very short meeting will commence at 6pm followed by a BBQ. Members are asked to bring some salad and/or dessert.

Sunfest 2009

The Sunshine Coast Amateur Radio club will be holding their Annual Sunfest on Saturday September 12th at the same place as last year which is the Woombye

School of Arts Hall Blackall Street Woombye. UBD Map 66 F 12

For a table please contact Harry VK4TK on 0409 488 025 or via email vk4tk@dodo.com.au

Book early so you don't miss out.

There will be 25 tables of new and preloved goodies, a door prize and raffles throughout the day. Tables are $15.00 and this includes 2 entry tickets. Normal Admission price is $5.00 a head.

The "Kitchen" will be running as usual with hot and cold food and drinks.

Until next time, this is Gordon VK4VP.

GB2RS NEWS

Sunday 2nd August 2009

The news headlines

* Avoid 7.1 to 7.2MHz if holidaying in France

* International Lighthouse and Lightship Weekend activity looking good

* National Hamfest promotes local amateur radio

Amateurs visiting France should note that the frequencies 7.1 to 7.2MHz have not yet been authorised in that country. Although the Department that controls frequency allocation in France, the AFN, has approved the use of that portion, it has yet to be signed off by a Ministerial Decree and published in the official Journal.

Entries in the 2009 International Lighthouse/Lightship Weekend have reached 310. Organisers say that this is well on schedule to equal or better last year's total of 406. Australia currently leads the list with 45 entries, followed by Germany with 41. Some of the more exotic places taking part include light houses or light ships in Egypt, Panama, Gibraltar, Isle of Man, Sardinia, Iceland and Namibia. The International Lighthouse/Lightship Weekend, which this year begins on 15 August, is fast becoming one of the most popular international events in the amateur radio calendar. More information is online at illw.net.

The National Hamfest, organised by the RSGB and Lincoln Short Wave Club, is welcoming radio clubs that would like to take a table and promote themselves. It will give the clubs the opportunity to recruit members and promoting the club to the amateur radio public. A special booking form is available on the National Hamfest website, www.rsgb.org/events/hamfest09/booking.

Today, Sunday 2 August, Bletchley Park is celebrating the contribution made by radio communications to the war effort. This is a family event called Wireless Waves, and Bletchley Park is open to the public today from 10am. In addition to the activities reported in our news item last Sunday, it has also been agreed that GB2RS news readings will take place at 1pm on 3650kHz LSB and 145.525MHz FM. A further reading will be put out at 2.30pm on 7150kHz LSB. The news readers will take calls after the bulletins using the RSGB HQ callsign GB3RS. In charge of the operation will be Alison, G8ROG and Andrew, M0GJH, representing the RSGB's London and Thames Valley Region 9. Anyone interested in radio is

urged to pay a visit. The event is open until about 5pm and further details can be found at www.bletchleypark.org.uk.

AMSAT-UK has announced a new amateur satellite project called the FUNcube. The project has received major initial funding from the Radio Communications Foundation. It is an educational, single cubesat project with the goal of enthusing and educating young people about radio, space, physics and electronics. The target audience consists of primary and secondary school pupils and FUNcube will feature a 145MHz telemetry beacon that will provide a strong signal for the pupils to receive. It is planned to develop a simple receiver board that can be connected to the USB port of a laptop to display telemetry in an interesting way. The satellite will contain a materials science experiment, from which the school students can receive telemetry data which they can compare to the results they obtained from similar reference experiments in the classroom.

Contest University is taking place on 10 October at the RSGB Convention in Wyboston near Bedford. The day-long programme gives amateurs the chance to learn all the skills and secrets to get under way with contesting activities and offers experienced contesters the opportunity to learn from others and possibly pick up on some new tips to gain that winning edge. Sponsored by Icom UK, the event is based on the highly successful Dayton event. For more details on the RSGB Convention, which take place from 9 to 11 October, check out the latest edition of RadCom or see www.rsgb.org/rsgbconvention.

The Imperial War Museum North, in Manchester, is running an exhibition focussed on PoWs during the last war. Amongst the exhibits is a radio made using cocoa tins, toothbrushes and an ashtray. It was built by Ernest Shackleton, G6SN, whilst a prisoner. His radio meant prisoners were better informed about the war than their captors. The exhibition is open until the end of the year. You can find out more at http://north.iwm.org.uk.

Thanks to donations from several interested parties, a new D-Star repeater, GB7SN, has been installed at Norton in the South of Sheffield. It has a receive frequency of 439.7375MHz and a transmit frequency of 430.7375MHz. The UHF frequency of GB7SF-B was transferred to GB7SN-B and GB7SF-B was taken off the air on 23 July. GB7SN port B was switched on test at 1511 BST on 23 July and now offers extended coverage to the South of Sheffield, Chesterfield and Worksop Areas. It is hoped to connect this to the worldwide D-Star network in the near future. GB7SF remains operational on VHF giving good coverage over Sheffield.

The Bromley and District Amateur Radio Society will be running a Foundation Course on 3 and 17 October. Anyone interested should check out their website for full details. www.bdars.co.uk.

And now for the details of rallies and events for the coming week

Today, 2 August, brings the West Somerset ARC Rally & Boot Sale which takes pace at Allerford Community Hall and Recreation Ground, Allerford, Minehead TA24 8HL, from 10am.Details from Bob, G1ONV, on 01643 820265.

King's Lynn Arc Rally & Car Boot Sale takes place today, 2 August, at King's Gaywood Community Centre, PE30 4DZ. Opening time is 10am and entry is £1.50. Details from Ray, G3RSV, on 01553 671307. Also today, Sunday 2 August, is the Lorn Radio Amateur Rally at Crianlarich Village Hall, near the junction of the A2 with the A85. Opening time is 10.30, and details are on the web at www.gm0lra.freeuk.com.

In response to many requests there will be an hour-long talk and demonstration of amateur microwave moon bounce and the Deep Space Network during the afternoon of the Flight Refuelling Hamfest on 9 August at 1300. FRARS EME Group members will be in attendance and able to answer questions on equipment requirements and the techniques needed to operate on the bands 1.3-24GHz. In addition, Paul, M0EYT will demonstrate his 8.4GHz Deep Space Network reception using a homebuilt receiver and tracking 3.4m parabolic dish. FRARS Hamfest is held at the Cobham Sports and Social Club, Merley, Wimborne Minster in Dorset. Details at www.frars.org.uk.

Now for the news of special events

GB2VET will be celebrating Veteran's Day over the weekend of 1 and 2 August. The station will be at East Park, Hull, HU8 8JU. Operations will be from 9 till 6 on 80, 40 and 20m CW and SSB, plus 2m and 70cm, including an IRLP station on 430.0125 FM.

Norfolk County RAYNET will be operational on Sunday 9 August with a Special Event Station, GB4NCR, from Walcott in Norfolk. Operations will be on 2m and 80m SSB with a primary frequency of 3.663MHz. Note that 40 will be used if 80m isn't open. QSL cards are available and can be send either via the Bureau or direct to G4PSH with a stamped self-addressed envelope. During this event, Exercise Sea Spray will take place in cooperation with the local community and Flood Wardens for this area.

The Norman Lockyer Observatory Amateur Radio Group will be on the air Saturday 8 August 2009 in support of the South West Astrofair, which is being run by the Norman Lockyer Observatory in Sidmouth, Devon. The demonstration station will use the permanent NoV callsign of GB2NLO and will be operational on 160m, 80m, 40m and 20m using SSB, CW, PSK31 and SSTV as appropriate between 0900 and 1800UTC. There will also be demonstrations of satellite communications on 2m and 70cm. The aim is to demonstrate amateur radio to all visitors, encourage new entrants to the hobby and to make as many local and DX contacts as possible. Passing of greetings messages will, hopefully, be a feature. See www.gb2nlo.org for details.

On the weekends of 8 and 9, the 22 and 23 August, Marches Amateur Radio Society will be operating GB1SSB from the Old Racecourse, Oswestry to celebrate the 60th anniversary of the first British amateur station to

use SSB. The station belonged to H Woodhead, G2NX, who resided in the Oswestry area. The adoption of SSB was one of the greatest technical advances in amateur radio since the arrival of the superheterodyne receiver. GB1SSB will be operational on HF, VHF and UHF on phone and, hopefully, PSK31. And now the HF DX news compiled from 425 DX News and other sources.

JM1LJS and JA3RAF will be active from Wallis Island between 9 and 15 August using the callsign FW1W. They plan to operate SSB, CW and possibly some digital mode (by JA3RAF) on 40 to 6 metres. QSLs via home calls, direct only.

A multi-national group is in Swaziland until 11 August. They will sign 3DA0SS from both the Hawane Resort and a campsite near Manzini. Plans are to cover as many bands and modes as possible, including PSK31, RTTY and CW.

OH1TX and OH0RJ will be leading a three man Japanese team on a two day trip to Market Reef in mid-August. They expect to arrive on the `Rock' by noon on 10 August and to depart early on the 12th. They will use the call OJ0Japan.

3B8FQ has received approval and will be active as 3B7FQ from St. Brandon Island, which is IOTA reference AF-015, in August. This may be his last visit to 3B7 for the next five years. It will be a working trip, with time shared for maintenance on the island's meteorological equipment. He will depart Mauritius on 10 August and returns from St. Brandon on the 30th. Operation will be SSB and CW on 40 to 10 metres. QSL via K5XK.

CT1GPQ will be active from Timor Lorosae between 3 August and 3 October. Activity will be on 40, 30, 20 and 17 meters using SSB, RTTY and preferably CW. The pilot station and QSL manager is Toze, CT1GFK.

Now the contest news

On 4 August, the 144MHz UK Activity Contest & Club Championship takes place between 1900 and 2130. Using all modes, the exchange is signal report, serial number and locator. The 432MHz UK Activity Contest takes place on 11 August also between 1900 and 2130. Again the exchange is signal report, serial number and locator.

The DARC-organised WAE DX CW contest has categories for single- and multi-op stations and low or high power and is well supported. Remember that European stations should work only non-Europeans. The contest is held on 8 and 9 August between 0000 and 2359 using CW only on the 3.5 to 28MHz bands. The exchange is signal report and serial number.

Now the solar factual data for the period from the 20th to the 26th of July, compiled by Neil Clarke, G0CAS on the 27th of July.

The solar disc was spotless everyday. The sunspot group from a couple of weeks ago failed to reappear around the 25th. It had decayed away

during its transition on the far side of the Sun. solar activity was very low with no solar flares taking place at all. The solar flux averaged 68 units, only on the 29th did it increase to 69 units. The 90 day solar flux average on the 26th was the same as last week at 69 units. X-ray flux levels remained below the minimum reporting level everyday. The only activity this week came in the form of a coronal hole disturbance. This arrived early on the 22nd and for a short time activity increased to major storm levels with the 3 hourly Kp index reaching 6 on a scale from zero which is very quiet to 9 which is severe storm. The Ap index for the 22nd was 24 units. The remaining days were at quiet with the Ap in single figures. The average was Ap 8 units. Solar wind data at the ACE spacecraft saw solar wind speeds increase from a slow 280 kilometres per second to a fast 600 kilometres per second by the 24th. Particle densities started at low levels but increased to 40 particles per cubic centimetre by the 22nd. Bz varied between minus and plus 1 nanoTeslas on the quiet days to minus 17 and plus 14 nanoTeslas during the disturbance.

And finally the solar forecast. This week solar activity is expected to be at very low levels. The solar disc could be spotless on some days. Solar flux levels should be around the 70 mark for most of the week. At the moment it would take a rather large sunspot group to increase the solar flux towards the 80s, or even higher. Geomagnetic activity is expected to be quiet, however, a slight increase could take place next weekend due to a small coronal hole. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. The darkness hour lows should be about 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 24MHz. The optimum working frequency with a 90 per cent success rate well be around 19MHz. The best time to try the path will be between 1200 and 2000 hours UTC. August normally signals the end of the summer sporadic-E season. Seeing that we are just at the beginning of the month openings should still take place but over the next few weeks they will become less frequent and also less intense.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service

area of your transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 2 August Chelmsford Amateur Radio Society is operating HF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Monday 3 August Braintree and District Amateur Radio Society is having an operating evening. Contact John, M5AJB, on 01787 460 947.

On Monday 3 August Burnham Beeches Radio Club is having a pub meeting. Contact Dave, G4XDU, on 01628 625 720.

On Monday 3 August Southdown Amateur Radio Society is operating at the Hailsham shack. Contact John, G3DQY, on 01424 424 319.

On Monday 3 August Surrey Radio Contact Club is having a Meccano evening with Alan Burman. Contact Ray, G4FFY, on 020 8644 7589.

On Tuesday 4 August Andover Radio Amateurs Club is working on the club SDR construction project. Contact Martin, M0MWS, on 0777 618 1646.

On Tuesday 4 August Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815.

On Tuesday 4 August Chelmsford Amateur Radio Society is having a talk on the work of the IARU by Peter Chadwick, G3RZP. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 4 August Horndean and District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 5 August Dover Radio Club is having a portable evening at Dover Patrol Memorial. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk.

On Wednesday 5 August Norfolk Amateur Radio Club is having a talk on Wi-Fi and Bluetooth by David, G7URP and Mark, G0LGJ. Contact Chris Danby, G0DWV, on 01603 419204.

On Wednesday 5 August Southdown Amateur Radio Society is having a barbecue at the QTH of Peter, G6GVM. Contact John, G3DQY, on 01424 424 319.

On Thursday 6 August Cray Valley Radio Society is having a barbecue at the Bull, Shooters Hill. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm.

On Thursday 6 August Horsham Amateur Radio Club is having a talk by Len Culhane on the origins of solar activity and its effects on the near earth environment. Details on the web at www.harc.org.uk. On Friday 7 August Cambridge and District Amateur Radio Club continues its series of talks on C programming. Contact David Leary, G8JKV, on 01223 355254.

On Friday 7 August Crystal Palace Radio and Electronics Club is having a hamburgers and ham bands evening. Contact Bob, G3OOU, on 01737 552 170.

On Friday 7 August Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Friday 7 August Wimbledon and District Amateur Radio Society is having a summer camp barbecue. Contact Jim, M0CON, on 020 8874 7456.

On Sunday 9 August Chelmsford Amateur Radio Society Operating is operating VHF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Sunday 9 August Wimbledon and District Amateur Radio Society is dismantling the summer camp. Contact Jim, M0CON, on 020 8874 7456.

NEWS FOR THE SOUTH-WEST Advance notice first that Rob Mannion's planned visit to Plymouth Radio Club on Tuesday 11 August has unfortunately had to be cancelled due to Rob having a medical condition needing hospital treatment.

On Sunday 2 August Appledore and District Amateur Radio Club is having a field day. Contact Brian Jewell, M0BRB, on 01237 473251.

On Sunday 2 August Bristol RSGB Group is having a coach trip to Bletchley Park. Contact Robin, G3TKF, on 01225 420442.

On Tuesday 4 August Blackmore Vale Amateur Radio Society is planning for the Gillingham and Shaftesbury show. Contact Tony G0GFL, on 01258 860741.

On Tuesday 4 August West Devon Radio Club is having a natter night. Contact Jules Cuddy, M1AGY, on 01752291588.

On Wednesday 5 August Cornish Radio Amateur Club is having a Main meeting. Contact Steve, G7VOH, on 01209 844939.

On Wednesday 5 August Exmouth Amateur Radio Club is having a QRP field evening on Woodbury Common. Contact Mike, G1GZG, on 01395 274172.

On Wednesday 5 August Taunton and District Amateur Radio Club is operating the club station and having a Morse class. Contact William, G3WNI, on 01823 666 234.

On Wednesday 5 August Thornbury and South Gloucestershire Amateur Radio Club is having a fox hunt with Stan, G0RYM. Contact Tony, G0WMB, on 01454 417048.

On Thursday 6 August Newquay and District Amateur Radio Society is having a talk by M0PCM on digital modes and their uses. Contact Joe Bell, M6JOE, on 01726 891557.

On Thursday 6 August South Bristol Amateur Radio Club is having a talk on the history of callsigns by Len, G4RZY. Contact Len, G4RZY, on 01275 834 282.

On Friday 7 August East Cleveland Amateur Radio Club is holding a technical forum. Contact Alistair, G4OLK, on 01642 475 671.

On Friday 7 August Tynemouth Radio Club is having an operating night, discussing technical topics and holding a Morse class. Contact Graham Errington, on 07812 172136.

On Saturday 8 August Angel Of The North Amateur Radio Club is hosting a Train the Trainers day at Whitehall Road Methodist Church Hall in Gateshead. Pre-booking is essential. Contact Nancy Bone, G7UUR, on 0191 4770036.

NEWS FOR SCOTLAND On Tuesday 4 August Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 0131 449 7641.

On Wednesday 5 August Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905.

On Thursday 6 August Aberdeen Amateur Radio Society is having a Junk Sale. Contact Lewis, GM4AJR, on 01224 575 663.

On Friday 7 August Ayr Amateur Radio Group is operating a special event station for the weekend at the Ayr Flower Show. Contact Charlie, MM0GNS, on 01563 551704.

On Friday 7 August Cockenzie and Port Seton Amateur Radio Club is having a club night. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES On Monday 3 August Llanelli Amateur Radio Society is on the air. Contact Craig, MW0MXT, on 01269 840292.

On Thursday 6 August Meirion Amateur Radio Society is on the air. Contact John, MW0VTK, on 07868 738016.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

2129. ANDREW KOENIG, KE5GDB, NAMED RECIPIENT OF THE 2009 AMATEUR RADIO NEWSLINE(tm) "YOUNG HAM OF THE YEAR" AWARD

NEWS RELEASE

For Immediate Release (July 30, 2009)

Contact: Bill Pasternak (WA6ITF) / Amateur Radio Newsline(tm) 661-296-7180 / newsline@arnewsline.org Dennis Motschenbacher (K7BV) / Vertex-Standard Corp. 714-827-7600 / d.motschenbacher@vxstdusa.com Rich Moseson, (W2VU) / CQ Communications, Inc. 516-681-2922 / w2vu@cq-amateur-radio.com

ANDREW KOENIG, KE5GDB, NAMED RECIPIENT OF THE 2009 AMATEUR RADIO NEWSLINE(tm) "YOUNG HAM OF THE YEAR" AWARD

"Wow! Oh, my God. All my friends here at Seabase are going to be really impressed. Oh, my God!"

And, that's how it sounded when we caught up with Andrew Koenig, call letters KE5GDB, by cellphone at the Boy Scouts of America Seabase in Key West, Florida, where he had just arrived with members of Troop 848 from Houston for a week of scuba diving adventures.

The Life Scout, who is just shy of his 16th birthday, is working to earn the Eagle rank and was ecstatic to learn he had been chosen for special recognition by the Amateur Radio Newsline. Before telling him he had been selected as the Young Ham of the Year, we asked Andrew how he might feel if he were to receive such an award. He said it would be a nice honor to share with his mentors, including his award nominator Nick Lance, call letters KC5KBO, who has helped several NASA astronauts earn their ham tickets.

"Young Ham of the Year would probably go in the book of things that I've done in ham radio that they are really impressed with," Andrew said. "It would just mean a lot to me.

"Nick Lance, he hasn't really been pushing me to do anything. A lot of the stuff I discover on my own. But, he's one of the big roles, one of the key aspects in ham radio and it would give him a really good feeling to know that one of his students went on to get youth ham of the year."

Andrew holds a General class license and passed the test for his first ticket back in 2005 while a sixth-grader at the Westbrook Intermediate School in Houston where Lance - who is retiring in August from the Johnson Space Center - teaches an amateur radio license class.

Andrew is the son of Joe and Lauri Koenig of Houston. Joe holds the call letters KE5JQA and got licensed as a result of Andrew's interest. Andrew also has a younger brother, Kyle.

Among the achievements Andrew has accomplished is helping with an Amateur Radio on the International Space Station (ARISS) contact at the Westbrook Intermediate School.

"I actually helped test a lot of the equipment for the contact, since it was a telebridge contact," Andrew recalled. "The station that was actually contacting the ISS was in California, I believe.

"And, we were in Clear Lake, Texas. So, for some reason the phone patch wasn't working properly. So, I had to actually go into one of the school phones and test that - I think about 15 minutes worth of testing before the contact started. And, finally right on time, we got it going again and everything was working just fine."

The contact with Astronaut Clay Anderson, who holds the ham radio call sign KD5PLA, was a success - thanks to Andrew.

Andrew also helped facilitate a terrestrial contact between Astronaut Chris Hadfield (ham radio call letters KC5RNJ and VA3OOG) and students at two Canadian schools using an Internet Repeater Linking Project (IRLP) node he had built and placed in his bedroom closet.

Andrew, who enjoys VHF and UHF operations, tried and tried and was finally successful in making his own contact with the space station using his handheld radios and portable directional antenna. He also has participated in training astronauts at the Johnson Space Center on ARISS contacts with schools, conducting simulated contacts with them, playing the role of the school students.

Andrew has also been quite active with public service events through the Clear Lake Amateur Radio Club in suburban Houston where he is immediate past vice president. He is also a member of the Seabrook Citizen's Emergency Response Team.

Among his other achievements is creating his own bicycle mobile setup:

"I had tried putting a handi-talkie on my bike and I wasn't impressed with the results because the rubber duck just didn't get out as far as I wanted to," Andrew recalled. "A couple months before, I had ordered my first mobile rig (radio), the FT-7800.

"And, actually a couple weeks before I decided to put it all together on the bike, I had bought a brand new gel cell battery. So, I thought, you know, hey I've got this remote that came free with the radio, I've got the battery, I've got an antenna, I got everything I need to make it happen. So, I just mounted it all on the bike with zip ties and I

had 50 watts mobile on a bike for VHF and UHF."

That attracted some attention from CQ magazine, which was looking for photo ideas for its 2008 calendar. Photographer Larry Mulvehill (WB2ZPI) visited Houston and Andrew's bicycle mobile became the calendar photo for September 2008. He and his bedroom-closet IRLP node will be featured the cover of the September 2009 issue of CQ magazine.

Andrew is going into his sophomore year at Clear Lake High School where he is a member of the school's marching band. He is also into computers and creating websites and he maintains his own website started when he was in middle school. Check out www.thathamkid.com. It offers kid-friendly information about ham radio, along with a jokes page and a lot more about Andrew's activities in amateur radio - including his working satellites.

His mentor and nominator for this award, Nick Lance, KC5KBO, summed it up best when he said: "Andrew has truly been an outstanding student of amateur radio.....He is an inspiration both to his fellow students and to hams of all ages."

Award Ceremony

The 2009 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Andrew Koenig, KE5GDB, on Saturday, August 15th, 2009 at the Huntsville Hamfest in Huntsville, Alabama. As the 2009 "Young Ham of the Year," Andrew will receive -- courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat him to an expense-paid week at Spacecamp Huntsville, and will present Andrew with a variety of CQ products. Amateur Radio Newsline(tm) will provide Andrew with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc., Hollywood California. Heil Sound Ltd. will also be presenting Andrew with a ham radio related gift.

The presentation of the award as a regular feature of the Huntsville Hamfest has been made possible through the generosity and kindness of the event's Planning Committee and the good offices of Huntsville Hamfest Association Vice President Charlie Emerson, N4OKL. (See http://www.hamfest.org)

This year's award ceremony will be hosted by Don Wilbanks (AE5DW) of Amateur Radio Newsline(tm) along with representatives of corporate underwriters Vertex-Standard and CQ Communications, Inc.

Award Program Background

The Amateur Radio Newsline(tm) "Young Ham of the Year" award (formerly the Westlink Report Young Ham of the Year Award) has been presented annually since 1986 to a licensed radio amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in

communications through the Amateur Radio hobby/service. It maintains a website will full information on the award program and background material located at http://www.arnewsline.org.

Award Sponsors

The award program is jointly sponsored by the Los Angeles, California-based Amateur Radio Newsline(tm) with corporate support from Vertex-Standard Corporation of Cerritos, California and CQ Magazine of Hicksville, NY.

Since 1976, the Southern California-based Amateur Radio Newsline(tm) and its predecessor, the Westlink Radio Network, have been providing radio amateurs around the world with up-to-the-minute news at no cost to them. Amateur Radio Newsline(tm) also co-sponsors with the Quarter Century Wireless Association the "Roy Neal, K6DUE, Amateur Radio Mentoring Project" that serves as a clearinghouse to match radio amateurs in need of educational assistance on the hobby with those able to aid them. (See http://www.arnewsline.org)

The award's two corporate underwriters are world leaders in their respective areas of Amateur Radio product support.

Vertex-Standard Corporation is considered the trailblazer in the design, manufacture and distribution of high quality Vertex-Standard commercial two-way radio, monitoring and air-band communications equipment along with its Standard Horizon marine electronics line and Yaesu brand Amateur Radio equipment. The Yaesu name is known world-wide among ham radio aficionados and is synonymous with premium quality ham radio gear. (See http://www.vertexstandard.com)

CQ Magazine and its sister publications, CQ VHF, Popular Communications and WorldRadio Online, are published by CQ Communications, Inc., and are considered the trend-setting publications serving today's modern radio amateur. (See http://www.cq-amateur-radio.com)

Past Recipients

Past recipients of the "ARNewsline Young Ham of the Year Award" include Shawn Alan Wakefield, WK5P, of Bartlesville, OK (1986); David Rosenman, KA9PMK, of Muncie, IN (1987); Jonathan Binstock, NK3D, of Potomac, MD (1988); Erin McGinnis, KAOWTE, of Topeka, KS (1989); Mary Alestra, KB2IGG, of Staten Island, NY (1990); Richard S. "Sammy" Garrett, AAOCR, of St. Louis, MO (1991); Angela (Angie) Fischer, KBOHXY, also of St. Louis (1992); Kevin Boudreaux, N5XMH, of New Orleans, LA (1993); Allison Daneen Zettwoch, KD4CKP, of Louisville KY (1994); Adam Weyhaupt, N9MEZ, of Alton IL (1995); Toby Metz, KB7UIM, of Boise ID (1996); Brian Mileshosky, N5ZGT, of Albuquerque NM (1997); Richard Paczkowski, Jr., KF4BIA, of Edgewater, FL (1998); Michelle Swann, KE4EZI, of Warner-Robins, GA (1999); Christopher Arthur, KT4XA, of Russelville, AL (2000); Patrick Clark, KC8BFD, of Elkwood, WV (2001); Josh Abramowicz, KB3GWY, of Reading, PA (2002); Jay Thompson, W6JAY, of Santa Ana, CA (2003); Andrea Hartlage, KB4IUM, of Grayson, GA (2004),

Rebekah Dorff, WG4Y, of Hoover, AL (2005), Catherine Ferry, NC8F, of Streetville, OH. (2006), Grant Morine, W4GHM, of Wilmington, NC (2007) and Emily Stewart, KC0PTL, of Leavenworth, KS. (2008).

==> NEVADA HAMS COORDINATE ROADSIDE MEDICAL RESCUE

On the afternoon of July 16, ARRL Elko County (Nevada) Emergency
Coordinator Greg Barker, K7CWL, was making his way home on Nevada
Highway 278 when a van sped past him. About 60 miles later into his
trip, he saw the van slow down and pull over to the side of the road.
Barker, a physical therapist, pulled over and asked if he could assist.
An elderly couple, their daughter and granddaughter were on the way to
the hospital in Elko -- another 60 miles -- as the grandmother was
experiencing what they believed was a series of mini-strokes.
```

The daughter told Barker that their van kept losing power and wouldn't run. Barker assessed the grandmother and tried to call 911 on his cell phone, but there was no coverage in that area. "I put out a call on my mobile radio, requesting immediate assistance, using the 146.850 repeater located about 55 miles away, part of a wide-area linked repeater system maintained by the Elko Amateur Radio Club," he told the ARRL. "Kent LeBart, K6IN, club president and a radio technician for the Nevada State Highway Patrol, was monitoring the system and responded immediately, asking how he could be of assistance."

Using the crossband repeat mode on his mobile radio, Barker was able to stay with the family at the van. He also used his handheld transceiver to tell LeBart that the grandmother needed to get to the emergency room. "Kent contacted central dispatch and relayed the information I gave him and asked me questions from the dispatch about the patient's situation and condition," he said. "Based on that information, they sent a medivac helicopter from Elko and an ambulance from Carlin."

Barker said that Highway 278 has no mile markers: "I relayed information to dispatch about the location using the closest ranch name and mountain pass turn-off as landmarks. With this information, volunteer fire fighters and first responders were on scene in about 20 minutes and the helicopter was on scene in about 30 minutes, followed by the ambulance at about 35 minutes."

Another local ham, Joe Sasgen, AD7OO, was able to offer useful information about approximate arrival times of the helicopter and ambulance. "Joe was monitoring central dispatch out of Elko," Barker said. "This information was reassuring to the family."

Flight paramedics assessed the grandmother and determined that a flight was justified based on her condition, Barker told the ARRL. "I was able to take her husband into the hospital in Elko to meet his wife. This is another testament to the value and utility of Amateur Radio, particularly on the lonely highways of rural Northern Nevada."

==> LOCAL HAMS AID RESCUE SQUAD TO SOLVE PUBLIC SAFETY INTERFERENCE ISSUE

When you live on a remote island with numerous mountains and valleys, communications can be tricky. Add interference that blocks the main communications frequency used by the local emergency rescue squad and you've got a disaster waiting to happen. That's what responders and residents on St John in the US Virgin Islands recently found themselves facing.

On June 12, the primary repeater output frequency for St John Rescue <http://www.stjohnrescue.org/> was completely blocked by a 2-tone AFSK signal that continued for more than a week. Because St John Rescue uses the frequency to dispatch, monitor and provide two-way communications during emergency calls, it was vital that the cause of the problem be detected and corrected.

According to Phyllis Benton, NP2MZ, a Public Information Officer in the ARRL US Virgin Islands Section, some members of St John Rescue are also members of ARES. With some additional help from the FCC, three hams -- Paul Jordan, NP2JF, Mal Preston, NP2L, and George Cline, KP2G -- set out to find the source of the interference.

The interference was not directly affecting operation of a second rescue repeater, Benton told the ARRL. "St John Rescue Chief Gilly Grimes and Paul Jordan, NP2JF, used handheld Yagi antennas to 'fox hunt' for the source of interference," she said. "To their surprise, the signal was being received off the back of the antennas and coming in very strong."

The source of the interference turned out to be 32 miles away from a tower on Mount St Georges on the island of St Croix. "The carrier frequency was just 7.5 kHz above the rescue frequency of 158.7525 MHz," she explained. "Upon closer inspection, the problem was isolated to a repeater that is part of the new US Virgin Islands territory-wide MPT 1327 trunking system. This transmitter was licensed for and was putting out 120 W with a pass band of 50 kHz and was being tested as the control channel."

Benton said that the second, unaffected repeater operates at an output frequency of 159.660 MHz, far enough away from the trunking frequency being tested to avoid being affected: "This second repeater serves areas not covered by the primary repeater. So, until the problem was resolved, a large part of St John was left without reliable rescue emergency radio communications. Once the source of the problem was identified, the interference was turned off on June 19."

To head off any future interference problems, the trunking system promoters have asked St John Rescue to change its current repeater frequencies to frequencies that theoretically would not receive interference from the trunking system. Benton said that St John Rescue is considering this request. -- Information provided by PIO Phyllis Benton, NP2MZ

==> BAKER, CLYBURN CONFIRMED BY SENATE: FCC AT FULL SLATE

On Friday, July 24, the Senate confirmed the nominations of Meredith Attwell Baker and Mignon Clyburn as FCC Commissioners. Both nominees appeared before the Senate Committee on Commerce, Science and Transportation on July 15 to be vetted by the 25 members of the committee. Baker and Clyburn were nominated by President Barack Obama on June 25; no date has been set for their swearing in.

Clyburn will fill the unexpired term of Republican Deborah Taylor Tate, whose tenure as a Commissioner came to a close on January 3, 2009 when the Senate failed to confirm her nomination; Clyburn's term will expire June 30, 2012. Baker will fill the unexpired term of fellow Republican and former Chairman Kevin J. Martin who resigned in January 2009; her term will expire June 30, 2011. Baker will join Robert McDowell as a Republican on the Commission. Current Commissioner Michael Copps is a Democrat, as are Chairman Julius Genachowski and Clyburn. Only three

sitting Commissioners may be members of the same political party.

For much of this year, the FCC has been operating with just three commissioners. Once Genachowski was sworn in as chairman, Commissioner Jonathan Adelstein, a Democrat, left the FCC. He was confirmed by the Senate as the Administrator for the United States Department of Agriculture's Rural Utilities Service (RUS), also on July 24. Chairman Genachowski said that he is looking forward to "forging a strong partnership with Jonathan as the FCC and RUS collaborate to extend the benefits of broadband to all corners of the country."

Meredith Baker Attwell
Baker, the daughter-in-law of former Secretary of State James Baker, served as the Acting Assistant Secretary for Communications and Information and the Acting Administrator of the National Telecommunications and Information Administration (NTIA) from 2007 to January 2009. Named as Deputy Assistant Secretary in February 2007, Baker first joined NTIA as a Senior Advisor in January 2004, and also served as Acting Associate Administrator for the Office of International Affairs and on detail to the White House, Office of Science and Technology Policy.

Baker spearheaded the coupon program for digital-to-analog converter boxes to help facilitate the transition to digital television (DTV). She has served on delegations representing the United States at major international telecommunications conferences and engaged in bilateral discussions with senior level officials from countries around the world. Before joining NTIA, Baker was Vice President at the firm of Williams Mullen Strategies where she focused on telecommunications, intellectual property and international trade issues. From 2000-2002, she held the position as Senior Counsel to Covad Communications. Before that, she was Director of Congressional Affairs at the Cellular Telecommunications Industry Association (CTIA) from 1998-2000. In the 1990s, Baker worked at the US Court of Appeals Fifth Circuit in Houston and later at the law firm of DeLange and Hudspeth. From 1990-1992, she worked in the Legislative Affairs Office of the US Department of State in Washington, DC.

In her opening statement at her confirmation hearing, Baker spoke of the need for broadband technology. "Chairman Genachowski, who is off to a great start at the FCC, gave an inspirational introductory speech to the FCC staff on the day of his arrival," she said. "He stated that the promise of technology has never been brighter and consequently, the obligations of the Commission have never been greater. I share that view. The FCC holds the keys to unleashing the power of broadband, the new media landscape and true public safety interoperability. That responsibility is challenging but the rewards will truly make a difference in the life and future of every American" <http://commerce.senate.gov/public/_files/BakerStatement.pdf>.

Baker reminded the Committee that Congress has directed the FCC to develop and implement a National Broadband Plan by February 2010. "This

directive holds great promise for our nation," she said. "Not only do many aspects of our children's education and opportunities for lifelong learning depend on this directive, but so too does the next generation of health care delivery, smart energy grid development, and public safety interoperability. The FCC will play an important role in making sure that the right regulatory environment exists to incent companies to build out infrastructure faster, to reward innovation and investment and to encourage competition."

She also spoke about the Radio Spectrum Inventory Act that was introduced in March in the Senate; a companion bill was introduced in the House in early July <http://www.arrl.org/news/stories/2009/07/15/10964/>: "I believe we can reap great benefits from a spectrum policy that unlocks the value of the public airwaves in more efficient, transparent and flexible ways. The Spectrum Inventory bill that this Committee marked up last week shows important leadership and is a first step to increasing wireless broadband use in innovative ways such as secondary markets, leasing, and testbeds."

Chairman Genachowski congratulated Baker on her confirmation. "Meredith is a distinguished public servant who will bring unique insight and expertise to bear in the agency's policymaking process," he said. "I enthusiastically await Meredith's arrival at the FCC and the opportunity to collaborate with her on advancing our shared goal of improving the lives of all Americans. With the full slate of Commissioners on board, I look forward to working with all of my colleagues on policies that advance innovation, investment, competition and consumer interests."

Mignon Clyburn
Clyburn, the daughter of House Majority Whip Representative James Clyburn (D-SC), has served on the Public Service Commission of South Carolina since 1998. The Public Service Commission regulates South Carolina's investor owned public utilities, including providers of telecommunications services. Before her election to that body, she spent 14 years as the publisher and general manager of The Coastal Times, a weekly newspaper in Charleston, South Carolina.

In 1998, Clyburn was elected by the South Carolina General Assembly as a Commissioner to represent the Sixth Congressional District; she has been re-elected three times, chairing the Commission from 2002-2004. She is a past chair of the Southeastern Association of Regulatory Utility Commissioners, and is presently the chair of the Washington Action Committee of the National Association of Regulatory Utility Commissioners (NARUC). Clyburn also serves on NARUC's Audit Committee and Utilities Market Access Partnership Board.

Clyburn told the Committee that she will "work with each member of [the Commerce, Science and Transportation] Committee to ensure that the FCC is fair, open and transparent and that it protects consumers, encourages robust competition in the marketplace and champions technological innovation."

In her opening statement, Clyburn emphasized that "We also must ensure that all Americans have access to and can make productive use of the communications tools essential to making the American Dream a reality. Most notably, by providing universal, high-speed, high-quality affordable access to broadband we can establish the essential underpinnings for enduring national prosperity" <http://commerce.senate.gov/public/_files/ClyburnStatement.pdf>.

In speaking to the Committee, she said she was "a strong believer in the value of collaboration within and among levels of the government," and has "witnessed first-hand the benefits of and necessity for cooperation among local, state and federal governmental agencies. These partnerships are essential to achieving a uniform and predictable regulatory environment in which technological innovation can thrive."

Clyburn said that network operators should have "reasonable tools" to control what goes over their networks. She said that whether network neutrality regulations were needed would depend on whether the market was competitive. If so, there might be no need, but if not, it warranted consideration.

"It is with great pleasure that I congratulate Mignon L. Clyburn on her Senate confirmation," Chairman Genachowski said. "Mignon's deep commitment to public service, experience in state government, and entrepreneurial expertise will be invaluable assets to this agency. I enthusiastically await Mignon's arrival at the FCC and the opportunity to collaborate with her on advancing our shared goal of improving the lives of all Americans through communications. With the full slate of Commissioners on board, I look forward to working with all of my colleagues on policies that promote innovation, investment, competition and consumers."

==> FCC ISSUES CITATION TO PART 15 MARKETER

On July 28, the FCC issued a Citation to Hobby Lobby International (HLI) <http://www.hobby-lobby.com/> for marketing non-compliant radio frequency devices <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-1626A1.pdf>. According to the Commission, these devices were in violation of the Communications Act of 1934, As Amended and the Commission's Rules, as well as United States Customs and Border Patrol regulations.

On March 5, the Spectrum Enforcement Division of the Commission's Enforcement Bureau sent HLI a Letter of Inquiry, initiating an investigation. The FCC wanted to know if the Tennessee-based company was marketing an unauthorized radio frequency device, specifically, the Pilot View FPV 2400 video transmitter <http://www.rcgroups.com/forums/showthread.php?t=858566>. According to the Citation, the FCC observed that the device was marketed on the retailer's Web site.

HLI responded to the Letter of Inquiry on May 7, telling the FCC that they began selling the Pilot View FPV 2400 video transmitter on May 12,

2008; they have sold 109 units of the device in the United States. In its reply, the company told the FCC that the manufacturer of the transmitter, Intelligent Flight, an Australian company, represented to them that the device was FCC compliant. HLI admitted they imported the transmitters, but did not file any FCC Form 740s for the imported units (before radio frequency devices may be imported to the United States, an FCC Form 740 [or the electronic equivalent] must be filed with the United States Customs and Border Patrol). According to the Citation, HLI stated that the last date that a transmitter was received was November 17, 2008, which is around the time that HLI's contact at Intelligent Flight stopped responding to their requests for further information concerning the device.

The FCC noted that HLI sent a unit to a test lab prior to receiving the Letter of Inquiry. "After receiving the Letter of Inquiry, HLI contacted the test lab to inquire about the test results and learned, for the first time, that the device is not FCC compliant," the Citation said. "HLI provide[d] a copy of the test results, which indicate that the device substantially exceeds FCC radiated emission limits. HLI state[d] that [they] discontinued selling this device as soon as it became aware that the device was not FCC compliant."

The FCC said "it appears that HLI violated Section 302(b) of the Act and Sections 2.803 and 15.209 of the Rules by marketing in the United States the Pilot View FPV 2400 transmitter. It also appears that HLI violated Section 2.1203 of the Rules by importing the Pilot View FPV 2400 transmitter without making the required import declaration."

HLI was warned that "if, after receipt of this citation, you violate the Communications Act or the Commission's Rules in any manner described herein, the Commission may impose monetary forfeitures not to exceed $16,000 for each such violation or each day of a continuing violation." The company was given 30 days to respond to the Citation either through a personal interview at the Commission's Field Office nearest to your place of business or a written statement. HLI was advised that any response should specify the actions that they are taking to ensure that they do not violate the Commission's Rules governing the marketing and importing of radio frequency equipment in the future.

==> SPACE SHUTTLE ENDEAVOUR TO DEPLOY STUDENT-BUILT SATELLITES

The space shuttle Endeavour returned to Earth on Friday, July 31, but before it left orbit, it deployed four student-built satellites, all with telemetry downlinks in the 2 meter (70 cm) amateur bands.

The twin spherical satellites -- named Castor and Pollux -- were designed by students in cooperation with the Naval Research Laboratory as part of the Atmospheric Neutral Density Experiment (ANDE) <http://www.nasa.gov/mission_pages/station/science/experiments/STP-H2-ANDE.html>. Both satellites will transmit 1200-baud packet radio telemetry on 145.825 MHz. Hams are encouraged to submit telemetry reports with special QSLs and mission patches planned (check the ANDE Web site for

updates).

Castor and Pollux carry an FX.25 experiment that adds Forward Error Correction to standard AX.25 packets. The hope is that FX.25 will improve communication efficiency while still being compatible with existing packet equipment. The satellites also occasionally run GMSK/FX.25 modulation experiments at 9600 baud.

In addition to Castor and Pollux, Endeavour also deployed student satellites from the University of Texas and Texas A&M. The tiny picosatellites, christened BEVO-1 and AggieSat2, respectively, are part of an ambitious experiment that will ultimately culminate in autonomous docking of picosats in orbit. For this mission, however, BEVO-1 and AggieSat2 launched as one unit and then separated to collect position data and test a new NASA Global Positioning System receiver known as DRAGON.

BEVO-1 transmits Morse code beacons (20 WPM) or packet radio data telemetry at 437.325 MHz. AggieSat2 beacons at 436.250 MHz. The satellites primarily transmit 9600-baud packet telemetry when over the United States. As with Castor and Pollux, reception reports are welcome <http://paradigm.ae.utexas.edu/ops/>.

Orbiting at a relatively low altitude of 185 miles, these satellites should be easy to receive with standard FM transceivers and omnidirectional antennas. They should enjoy an operational life of 3-6 months and will likely re-enter the Earth's atmosphere within a year.

==> FUNcube CUBESAT PROJECT ANNOUNCED

AMSAT-UK <http://www.uk.amsat.org/> has announced a new amateur satellite project -- FUNcube <http://www.funcube.org.uk/> -- an educational single cubesat project that features a 435-145 MHz linear transponder for SSB/CW operation. According to AMSAT-UK, FUNcube will "enthuse and educate" young people about radio, space, physics and electronics. "The idea of FUNcube is to combine an educational project to excite young people with a simple linear transponder for radio amateurs to use with either legacy modes like CW and SSB, or, still to come, digital ones," said IARU Region 1 Satellite Coordinator Graham Shirville, G3VZV. Shirville is also affiliated with AMSAT-UK and ARISS-Europe <http://www.ariss-eu.org/>.

FUNcube's target audience consists of primary and secondary school students. The new satellite will feature a 145 MHz telemetry beacon that will provide a strong signal for the pupils to receive. "A simple receiver board is being developed," Shirville explained. "This can be connected to the USB port of a laptop to display telemetry in a fun way for the kids to learn. FUNcube will contain a materials science experiment, from which the school students can receive telemetry data that they can compare to the results they obtained from similar reference experiments in the classroom." FUNcube is the first cubesat designed to benefit this age group and is expected to be the first

British cubesat to reach space.

According to Shirville, FUNcube would be launched into a Sun Synchronous Low Earth Orbit (about 600-700 km above the Earth) using one of the many launch opportunities that exist for cubesat missions. According to QST Editor and satellite expert Steve Ford, WB8IMY, since FUNcube will be in a low orbit, amateurs from all around the world, including North America, should be able to access it.

FUNcube will carry a UHF-to-VHF linear transponder that will have up to 1 W and that can be used by radio amateurs worldwide for SSB and CW communications. Measuring just 10x10x10 cm and with a mass of less than 1 kg, it will be the smallest ever satellite to carry a linear transponder. The choice of frequencies will enable radio amateurs to use their existing VO-52 or DO-64 station.

A key feature of the satellite is the absence of an on-board computer. For reliability and maximum power efficiency, Shirville explained that the design has been kept as "straight-forward as possible," with satellite control being achieved using simple commands.

Shirville said the project should take less than a year to build: "Then we need to find a cubesat launch opportunity. We believe that this is an achievable mission with a relatively short timescale."

AMSAT-UK teams have provided hardware for more than 10 satellites over the past 35 years, including SSETI Express in 2005. They are presently involved with the development of hardware and software for a number of satellite projects, including the European Student Earth Orbiter (ESEO), P3E, SuitSat2 <http://suitsat2.org/>, the Columbus module on the International Space Station and also the GENSO Ground Station Network. "We hope that ESEO and SuitSat2 might have data formats with VHF downlinks that are also compatible with FUNcube-- this would make the educational potential even greater," Shirville said. -- Information provided by Graham Shirville, G3VZV

==>SOLAR UPDATE

Tad "Speckled by the mid-day Sun" Cook, K7RA, this week reports: No sunspot activity this week, and if no sunspot appears today, July 31, the average sunspot number for July will be 5.1; this is down from June's average of 6.6. The monthly average of the daily sunspot number, January-July 2009, is 2.8, 2.5, 0.8, 1.3, 4, 6.6 and 5.1. The three-month averages for October 2008-June 2009 were 4.5, 4.4, 3.6, 2.2, 2, 1.5, 2, 4.2 and 5.2. This takes into account all the daily sunspot numbers for September 2008-July 2009, and those numbers are for the center months of each of those three month moving average periods. Sunspot numbers for July 23-29 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 67.8, 68.3, 69.1, 67.6, 68.4, 68.7 and 68.3 with a mean of 68.3. The estimated planetary A indices were 8, 6, 7, 3, 4, 4 and 2 with a mean of 4.9. The estimated mid-latitude A indices were 8, 5, 5, 1, 2, 3 and 2 with a mean of 3.7. Geophysical Institute Prague

predicts unsettled conditions July 31, quiet to unsettled August 1, quiet August 2-4, quiet to unsettled August 5 and unsettled August 6. For this weekend, the planetary A index is predicted at 7, which is slightly more active than it has been lately. A solar wind from a coronal hole would be the cause. We are hoping for a return of a recent sunspot group, but only a weak sunspot was spotted from European observatories this morning (July 31). For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Samuel Taylor Coleridge's "This Lime-tree Bower My Prison" <http://www.poetryfoundation.org/archive/poem.html?id=173248>.

==>IN BRIEF:

* This Week on the Radio: This week, there is an NCCC Sprint on August 1. The ARRL UHF Contest, the 10-10 Summer QSO Party and the North American QSO Party (CW) are August 1-2. Next week, there is an NCCC Sprint Ladder on August 7. The WAE DX Contest (CW) and the Maryland-DC QSO Party are August 8-9. The SKCC Weekend Sprint is August 9. The MMMonVHF/DUBUS 144 MHz Meteorscatter Sprint Contest and the NAQCC Straight Key/Bug Sprint are August 12. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, August 23, 2009, for these online course sessions beginning on Friday, September 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE

Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* Amateurs Provide Communications Support During Gas Leak: On Friday, July 23 at 2 PM, Sacramento City CERT <http://www.sacramentocert.net/> activated Sacramento City Fire CERT and Sacramento County ARES for a large natural gas leak in South Sacramento. According to ARRL Sacramento Valley Section DEC and CERT Communications Manager Frank Reshke, N6SNO, a two block area was evacuated due to the leak. "Around 30 people came to a shelter that had been set up at a local church," he said. "This is where the CERT and ARES amateurs established a communications network with the Unified Command of Sacramento City Fire and Police and the Red Cross." Reshke said the incident lasted for four hours: "At 6:05 PM, the Unified Command allowed the evacuees back into the neighborhood." -- Information provided by Frank Reshke, N6SNO

* FCC Expands ARRL's 500 kHz Experimental License: On July 28, the FCC approved a modification that expands the ARRL's 500 kHz experimental license WD2XSH <https://fjallfoss.fcc.gov/els/GetAtt.html?id=100140&x=.>. According to Experiment Coordinator Fritz Raab, W1FR, the expansion allows for more frequencies, more stations and portable operations. "We can now operate between 495-510 kHz," Raab said. "We were previously limited to 505-510 kHz. We will not be using 500 kHz itself so as to ensure that there is no conflict with the heritage stations on that frequency. The expansion also gives us the opportunity to expand the number of participating stations. We can now have 42 stations, where before we were limited to 23." Raab said that the expansion will now let participants operate within 50 km of their designated stations. This was not allowed under the previous terms of the experimental license. "Some stations have reduced operating bands to ensure that they do not interfere with nearby non-directional beacons (NDB). The FCC's Office of Engineering and Technology granted the WD2XSH experimental license to the ARRL in September 2006 <http://www.arrl.org/news/stories/2006/09/15/104/>. Find out more information on the ARRL's 500 kHz Experiment in the July/August 2007 issue of QEX <http://www.arrl.org/qex>.

* International Lighthouse/Lightship Weekend: More than 300 lighthouses in more than 51 countries -- from Argentina to Wales -- will be on the air for 2009 International Lighthouse/Lightship Weekend (ILLW) <http://illw.net/> organized by the Ayr Amateur Radio Group (AARG) in Scotland <http://www.gm0ayr.org/>. The event, held for the 11th year in a row, takes place Saturday, August 15 0001 UTC-Sunday, August 16 2359 UTC. While not a contest, the ILLW is more of a QSO Party and Amateur Radio demonstration. The ILLW aims to raise public awareness of lighthouses and lightships and the need for their preservation and restoration, promote Amateur Radio and foster international goodwill. Stations at more than 40 US lights are expected to be on the air for the event, and several stations will identify with special event call signs. Participating lighthouse/lightship stations do not have to be inside the structure or on the vessel itself; a Field Day-type setup at or adjacent

to the light is sufficient. More information about the event, including a registration form, is available on the ILLW Web site <http://illw.net/2009_list.htm>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

We may have won the battle, but dictatorships have no place for people who are right. Consider that Congress is once again auditing for "unused spectrum" even after the transition to ATSC and the abandonment of VHF TV.

2135. "I Was Here First" Techno Remix Available!

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-01 23:27:34 UTC
From: Azz Pizz <penachew@yomomma.hot.invalid>

Yes, the moment has arrived where you can download the Techno Remix of the infamous "I Was Here First!" recording.

Download it here:

http://rapidshare.com/files/262672413/DJ_Marconi_-_I_Was_Here_First__Techno_Remix_.mp3

And if you don't have the original recording, I first found it here:

http://www.ve7kfm.com/n9ogl_rant.mp3

Do download the techno remix (and if you haven't heard the original, download that first!)

P.S. If I didn't need Kelp, I wouldn't have spent all evening on this.

P.S.S. What the hell was that recording about? It's really messed up...

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, A35RK, CX3AL, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G3VOF, G4PLY, HA0HW, I1JQJ/IK1ADH & 425 DX News, LZ1PJ, M0XDF, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-July, through Sunday, 2nd-August there were 205 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week that "all is working to schedule, paperwork is done, flights are booked, boat (a catamaran) is chartered and hardware is in store." During the next few weeks the team will test all of their antennas by taking them to a beach resort by the salt water on the North Sea. Their Web page is now active at: http://www.conwayreef2009.de

3DA0, SWAZILAND (Just a Reminder). Operators David/GI4FUM, Tony/G4LDL, Malcolm/GM3TAL, Gerry/M0VAA, Michael/NC4MM and Yuri/UT5EL are now active as 3DA0DJ, 3DA0TB, 3DA0MH, 3DA0VA, 3DA0MM and 3DA0EL until August 11. The group will operate mainly from the Hawane Resort, but will also be active as 3DA0SS from the international scout camp near Manzini. Activity is expected on 160-10 meters using two stations. Over the past weekend there has been plenty of activity on 80/40/30/20/17 meters using mainly CW/SSB but some RTTY. QSL via their home callsigns.

4W, TIMOR-LESTE (Update). AL, CT1GPQ, will be active as 4W6AL from Timor Lorosae between August 7th and October 3rd. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. His station setup will be an Icom IC-706 MK2g, a dipole for 40 and 30 meters and square loops for 20 and 17 meters. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@algarvedx.com
Activity logs will be online (possibly daily) on: http://algarvedx.com
All information will be sent first via the Algarve STAR DX Team Mailing List. Subscriptions are available on team's WEB site. PLEASE NOTE: This is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time.

5B/C4, CYPRUS. Andy, LZ2HM, will be active as 5B/LZ2HM between August 4-11th. Activity will be on the HF bands plus 6 meters and possibly VHF/UHF bands (KM64HV). QSL via info on QRZ.com. ADDED NOTE: Andy was also active during the WAEDC CW Contest this past weekend as C4I.

5H, TANZANIA. Pat, N2IEN, will be active as 5H2PD until August 8th. Activity will be on 40/30/20/15 meters using CW and SSB. Over the past weekend Pat was on 30 meters CW after 1600z. QSL via N2IEN.

7P, LESOTHO (Update). A team of five operators are now active from the "Trading Post Lodge" in Roma until August 13th. They have two stations on the air at all times with a third station to possibly be on for PSK and RTTY. Activity will be on all bands, but with a special effort on 160/80 meters. Operators are: Pista/HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK via M0URX, others via their home callsigns. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net/7p8.html

A2,BOTSWANA. Operators Les/W2LPL and his son Dan/W2DBL will be active as A25/W2LPL from the Tuli Block in Mashatu, after their South African operation (see below), between August 16-19th. Activity will be mainly 20 meters using SSB and PSK31. They will use a FT-857 into an end feed antenna running 100 watts. QSL via W2LPL.

A3, TONGA. Paul, A35RK, informs OPDX that changes are (and will be) taking place in Tonga. He informs that he has recently made a visit to Nuku'alofa, the capital city, and during his stay there, Paul had a very productive meeting with the Radio Licensing Officer and the Technical Officer in the newly formed Department of Communications. In the past amateur radio issues have been managed by a variety of different government agencies: Tonga Telecom, Marine and Ports, the Post Office, the Treasury, and most

recently the Prime Minister's Office. Pauls states, "All that has changed, and we now have a 'one-stop-shop' for amateur radio licensing and regulation. Virtually all radio-related legislation is currently under review, and a number of changes will be coming soon. A brief summary of our discussion, and the outcomes, follows:
INFORMATION AVAILABILITY - The Department of Communications is building a website. They intend to make license application forms available online.

LICENSING PROCEDURES - Licensing procedures for visiting operators and yachts in transit will be simplified, especially for those entering the country somewhere other than Nuku'alofa (ie Vava'u). They may also make it possible to actually apply for a license online. However, they still want to 'see' an applicant before actually issuing a license.

ENTRY LEVEL LICENSE CLASS - A 'Novice' type of entry level license may be created, in order to encourage more activity. The formation of a club station and licensing classes (possibly thru the Tonga Maritime Training Institute) was discussed.

CALLSIGN ALLOCATION -
1) A35x (single letter suffix) callsigns may soon be issued to resident 'Advanced Class' licensees, and possibly to special event and contest operations.
2) A35xx (2 letter suffix) callsigns may be issued to entry level licensees.
3) A35xxx (3 letter suffix) callsigns may be issued to short-term visitors and transitting yachts.
4) The existing callsign registry will be 'purged' of all inactive callsigns, thus allowing for more new issues. An effort will be made to publish a list of 'current' licensees annually.

POWER LIMITS - Permitted output power will increase from the present 100 watts to 400 watts. This will bring Tonga up to the same level that is authorized in New Zealand and Australia.

ADDITIONAL 40 METER ALLOCATION - The current 40M allocation is 7.0-7.1 MHz. In addition, 7.1-7.2 MHz operation will be permitted on a secondary basis.

60 METER ALLOCATION - This was discussed, but no allocation will be considered until further studies and consultations are made, possibly next year.

EMERGENCY COMMUNICATIONS - Tonga now has a government Emergency Response Plan, and amateur radio participation is authorized in conjunction with the Tonga Defense Force, the Tonga Meteorological Service, the Ministry of Civil Aviation, and the Tonga Red Cross.

MONITORING and ENFORCEMENT - The government intends to more carefully monitor amateur and maritime communications in an effort to reduce 'boot-legging' and to insure compliance with regulations.

I'll keep you advised as things develop. Discussions continue, and I must say that the new Department of Communications is very open and cooperative. If anyone needs further information, they may contact: Fe'ao Vakata (That's pronounced "Fay AH oh Va ka TAH"), Radio Licensing Officer <fvakata@pmo.gov.to>"

A3, TONGA. Ramon, XE1KK, is planning to be active from Tonga in October during the CQWW DX SSB Contest (October 24-25th). His callsign will be announced later. He is expected to use 100 watts into some dipoles. QSLs are preferred via LoTW, but the Bureau is "OK".

AM5/AN5/AO5/EG5/EH5, SPAIN (Special Event). Look for the following special event callsigns to be active between August 8-23rd. Activity is to celebrate the "Formula One Grand Prix of Europe" in Valencia, Spain. The following special callsigns will be activated by the following operators:
AM5FUV - Juan/EC5BZR EG5FUV - Jose/EA5FL
AN5FUV - Vincent/EB5GGB EH5FUV - Nando/EA5GVZ
AO5FUV - Pepe/EA5UB
Activity will be mainly on the HF bands using CW, SSB and the Digital modes. A special award will be issued to those who make at least 3 QSOs with 3 different stations. QSL Manager is Jose, EA5FL; QSL direct or by the Bureau. For more information see QRZ.com.

GB111, ENGLAND (Special Event). Viv, G4PLY, will activate special event station GB111HP on the air during the month of August. This is a tribute to Harry Patch (GB90WWI) who sadly passed away on Saturday, July 25th, 5 weeks after celebrating his 111th birthday. He was the oldest surviving combatant living in the UK who fought in World War I. QSL via G4PLY, direct or by the Bureau. NO e-QSL or LoTW.

GB4, ENGLAND (Special Event). Look for special event station GB4WINGS to be active between now and August 8th. Activity will be on HF (SSB/Data with some CW) and 2m (SSB), mostly during the day and some evenings. The special event is during the "WINGS 2009" (Windsor INternational Guide and Scout camp, see <http://www.wings2009.org.uk> in Windsor Great Part, England. Some 6,000 Guides and Scouts from over 40 countries across the globe will be attending this 7 day event of fun, adventure and challenge. QSL via the bureau or direct to M0XDF (QRZ.com).

IOTA NEWS.....
AF-019. Tony, IK1QBT, will once again be active as IG9X from Lampedusa Island (African Italy) during the CQWW DX CW Contest (November 29-29th) as a Single-Op/High-Power entry. He will concentrate on the lower bands prior to contest as IG9/IK1QBT. QSL via his home callsign, by the Bureau or direct.

OC-130. Hans, DL5SDF, has returned to Mindanao (OC-130) and will be active again as DU9/DL5SDF until June 2010. His activity will be CW only, once all his antennas are installed (sometime in August). QSL via DL5SDF, by the DL bureau or direct to: Hans Bohnet, Purok 5, Lower Bon-Bon, Libertad, Butuan City 8600, Philippines. PLEASE NOTE: All bureau requests will have to wait until he returns.

J7, DOMINICA. Pierre, HB9CUA, is once again active as J79PAK from Nature Island (FK95ii) until August 6th. Activity has been mainly 6 meters using CW and SSB. There has been activity on 20/17/15 meters. QSL via home callsign.

JU85, MONGOLIA. Look for special event station JU85TTC to be on the air to celebrate the 85th anniversary of "Technique Technology College of Mongolia" between now and September 31st. Activity over the past weekend has been on 20 meters CW. QSL via JT1DN.

KH6BZF PROPAGATION FORECAST/REPORT (For July August 3-9th).....
Aug 3 AN SOLAR REFERENCE
Aug 4 AN ---------------
Aug 5 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 6 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 7 AN GEOMAGNETIC REFERENCE
Aug 8 AN ----------------------
Aug 9 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ACTIVITY/NEWS.....
Hector, CE3FZL, will be active as CE2P from Punta Panul Lighthouse (ARLHS-073) in the San Antonio Harbor, Chile, during the upcoming International Lighthouses/Lightships Weekend (ILLW), August 15-16th. Activity will be on 40 meters SSB. QSL CE2P via EA5KB (QRZ.com).

Members of the "Radio Club Uruguayo" will be using the special callsign CW1R from the Punta del Este Lighthouse (ARLHS URU-008, Grid Locator GF25ma) during the upcoming International Lighthouse/Lightship Weekend between August 14-16th. Activity will be on 80-15 meters using CW, SSB and the Digital modes. They will have at least two stations on the air. This will be the first activation of Punta del Este Lighthouse. QSLs for this activity are only DIRECT to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA (w/SAE and 1 new IRC or 2 green stamps).

LAST MINUTE CHANGE. Operators Doug/KD8CAO and John/K8YSE activated "Big Red" Holland Harbor South Pierhead Lighthouse (USA 375), Michigan, instead of Grand Haven South Pierhead LH on August 2nd. QSL via K8YSE.

Members of the "Air Mobile Radio Operator Society" (ND3E) will activate Reedy Island (Not IOTA, USI DE-001, New Castle County, Delaware), plus Old Reedy Island lighthouse (ARLHS USA-568) between 1700z, August 7th and 1900z, August 8th. Activity will be on 80/40/20 meters using CW, SSB and PSK31. QSL by the Bureau or direct to AE3J with SASE.

Members of the "Valley of the Moon Amateur Radio Club" will be active as N6P from the Point Reyes lighthouse (ARLHS USA-636, WW Loc. CM87LX, Marin County, California) between August 7-9th. Bands/modes of activity were not provided. QSL via W6AJF: VOMARC, c/o K. McTaggart, 402 Fourth St. E, Sonoma, CA 95476. Visit their Web page at:

http://www.vomarc.org/index.html

Members of the "Grupo Mistongo DX Tandil" will activate the following
lighthouses in the city of Puerto Quequen, Necochea, during the Inter-
national Lighthouses/Lightships Weekend (ILLW), August 15-16th:
Baliza Pescador Posterior - ARLHS ARG-113
Baliza Espigon Este - ARLHS ARG-114
Other activity pending: Baliza Las Grutas - ARLHS ARG-115 (Rio Negro)

Three radio clubs in Argentina will activate the following lighthouses
for the upcoming ILLW and the "Faros del Litoral Atantico Argentino 2009
Award". Look for the following between August 14-16th:
* GRUPO DX BAHIA BLANCA (GDXBB - LU3DXG):
- Recalada Lighthouse (ARLHS ARG-009) - LU5DRV/D and other
- El Rincon Lighthouse (ARLHS ARG-036) -LU4ETN/D and other
- Claromeco Lighthouse (ARLHS ARG-014) - LU4DBP/ and other
- Punta Conscriptos Lighthouse (ARLHS ARG-052) - LU1WJF/W and other
- Malecon Este Beacon (New one! ARLHS ARG reference number to be
issuedd) - LU3DXG.
QSL all via: R.C. GDXBB, C. de Correo 709,8000 Bahia Blanca.
* GRUPO MISTONGO DX TANDIL (GMDXT - LU2EE):
- Pescador Posterior Beacon (ARLHS ARG-113) - New one!
- Espigon Este Beacon (ARLHS ARG-114) - New one!
QSL all via: GMDXT, C. de Correo 184, 7000 Tandil.
* AVELLANEDA RADIO CLUB (LU7EO)
- Punta Medanos Lighthouse (ARLHS ARG-008) - LU7EO.
- KM. 0.900 Beacon (ARLHS ARG-110) - LU9DPD/D.
QSL all via: Avellaneda Radio Club, C. de Correo 41,
1870 Avellaneda (BA).

Helmich, PA0HEL, will be active as TM0LHG from the Gravelines Lighthouse
(ARLHS FRA-751, ILLW FR-0002) at Petit Fort Philippe during the ILLW
(August 15-16th). QSL direct or by the VERON Bureau only (Not the
French Bureau).

P2, PAPUA NEW GUINEA (IOTA Op). Hans, SM6CVX, is expected to continue
his IOTA hopping in Papua New Guinea (this time solo) during the month
of November. He is going to activate three IOTAs this time. Activity
will probably be mainly CW using the callsign P29VCX. QSL via SM6CVX.
His current schedule is as follows:
November 11-13th - Hastings Island (OC-117)
November 13-14th - Normanby Island (OC-116)
November 15-16th - Loloata Island (OC-240)
Look for more details and updates on the following Web page at:
http://www.425dxn.org/dxped/p29_2009

PZ, SURINAME (Update). Mike, AJ9C, will be active as PZ5M between October
22-29th. He is expected to be active on 160-6 meters using CW, SSB and
RTTY, as well as an entry in the CQWW DX SSB Contest (October 24-25th).
QSL to his home callsign with SASE/USD(s) for return postage.

QSL INFO AND NEWS.....

QSLS VIA LOTW: A7/M0FGA

QSLS RECEIVED VIA MAIL: 3D2YA, 3DA0ZO, 3XM6JR, 4U1UN, 5T5DC, A7/M0FGA, AT9RS, E44M, EX8MLE, EZ8AQ, HZ1FS/p, K5D, LU7YS, OJ1ABOA, R1FJT, S92LX, T47C, TF3CW, V63TO, VP5/K5CM, ZF2XP and ZY0F

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

SPECIAL GEOPARK AWARD AVAILABLE (Update/Be The First!). Martin, G3VOF/ GB6GEO, reports: For amateur radio stations/SWLs around the world who contact/hear Geopark stations, the English Riviera Geopark is offering a special commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO (instant qualifier), or two Geopark stations excluding GB6GEO. (This award will also apply to SWLs on a heard basis). This certificate is endorsed by our Queens husband H.R.H The Duke of Edinburgh with his own words congratulating the holder. Certificates will cost 2.20 UK(pounds) each, 3 Euro's and rest of the world 5 USDs. Alternatively certificate holders to be the first in their country to claim the certificate will have an 'FC' suffix following the certificate number. This denotes the first person in their country to claim the 'Geoparks' award. These certificate holders will be worth one point towards the basic certificate, and two holders are required to claim the award, or work any five (5) non first country certificate holders to claim it. Certificate Manager is Martin Foster, G3VOF. QSL direct via the address on QRZ.com. Only log details are necessary. Also see QRZ.com for more details and the latest updates. Only log details are necessary. First country holders so far include, G4FCN, ON4CAS, K7IWH, 2E0WAI, S53EO, IW2CAM, GW4BKG, and DL3FJK. (You will need only two of these callsigns worked/heard to claim the award) Other callsigns include M6PHD, G7URW, G6CLD, 2E0TAD, G3LQX, M0XLT, G3LHJ, G3PVB, G1FON, G4VUD, 2E0PDL, G7JHE, G3BIT, M1AEI, G3GHS, G0KEK, G3SNU, 2E0JWJ, DJ6WX, 2E0TAG, 2E0GHR, G4VFG, G3SVK, G3JSR, G4VTO, G3NJA/A, 2E0TQR, and M0HEM. (Any five of these callsigns worked/heard will enable you to claim the certificate) Many of these certificate holders can be found on the Torbay Amateur Radio Society LF/HF/VHF nets, details from the Web site: http://www.tars.org.uk To see a picture of the special Geopark certificate, go to: http://www.globalgeopark.org/publish/portal1/tab80/info4187.htm

SX2, GREECE. Pista, HA8UT, and his family are currently on a summer holiday in Neo Potidea (KN10qe) on the Kassandra Peninsula until August 4th. They are using the callsign SX2Z. The family consists of: Pista/ HA8UT (aka HA8Z and HG8Z), Erzsi/HA8TU (XYL), Eliz/HA8TT (the younger daughter of Pista), Andrea/HG8SS (the older daughter of Pista) and her husband Dezso/HA8SS. Their rig is an IC-706 MK2G, and they will be using a vertical and dipole antennas. Activity will be on 40-10 meters plus 6m on CW and SSB. QSL via HA8UT, by the HA Bureau or direct (QRZ.com address).

T6, AFGHANISTAN. Steve, W7VOA, will be in Kabul for national election news reporting between August 8-22nd, and will be active as T6AD when time permits. Activity will be on 40/20/15 meters CW (and maybe PSK) using 100 watts and a G5RV antenna. QSL via K2AU.

TK, CORSICA (Update). Laurent, F8BBL, is on holiday on the main island of Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between now and August 15th. His QTH will be located in the Valinco Gulf, near the city of Olmeto (Department South Corsica/2A, WW Loc. Loc JN41KQ). His activity will be QRP using a FT-817 and a new MP1 antenna. He is signing TK8B. Activity is on the HF bands, mainly CW, but some SSB during his spare time. His other possibly activities (weather and sea permitting) will be:
August 6th - Activity from the Lavezzi Islands (EU-164, DIFM TK-011, Loc JN41OI) starting around 0900z.
August 8th - Laurent will climb the summit Punta di Buturetu (SOTA TK/TK112, 870m ASL, WW Loc. JN41KR) and expects to be on the air around 1000z.
August 11th - Activity from the Sanguinaires Islands (EU-104, DIFM TK-002, Loc JN41HV) starting around 0900z.

Suggested frequencies are: 7032 kHz/CW, 7096 kHz/SSB and 10118 kHz/CW. QSL via his home callsign, direct or by the REF-Union Bureau only or by the LoTW. Visit his web page at: http://rnb.dx-cw.net

TM9, FRANCE (Special Event). The 31st Clipperton DX Club Convention will be held in Strasbourg, France, between September 18-19th. Look for special event station TM9CDX to be on the air between September 5-19th. Operators mentioned are: Gerard/F2VX, Thierry/F4TTR, Laurent/F5AEG, Rafik/F5CQ, Flo/F5CWU, Alain/F5LMJ, Maurice/F5NQL, John "Gun"/F5VHQ, Serge/F6AML, Maurice/F5NQL, Laurent/F1JKJ, David/F8CRS and Laurent/F8BBL. Activity will be on all HF, VHF and UHF bands using CW/SSB/FM/Digital modes. QSL via F5CWU, direct (SAE + postage) or by the French REF-Union Bureau (please only this bureau.). PLEASE NOTE: Number designator will now change every year and represent the year of the convention (ex. 2010 will be TM0CDX, 2011 TM1CDX, etc...)

VK9N, NORFOLK ISLANDS (Op QRT!). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) are now QRT as VK9NI as of 2110z, July 28th. According to their Web page, the HARAOA Group made 11199 QSOs with 5397 unique callsigns. A complete breakdown of QSOs can be seen at: http://www.clublog.org/charts/?c=VK9NI#r
PLEASE NOTE: QSL via VK3HR (NOT W3HNK as first announced). More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

WFF ACTIVITY. Plamen, LZ3FM, plans to activate the Biosphere Reserve Kamchia (LZFF-011) during his holiday between August 10-20th. Callsign to be used will be either LZ01WFF/2 or LZ3FM/2. Equipment will be IC-746 plus a 4-band GP and dipole antennas. Activity will be on HF + 6m, mainly CW with some SSB. QSL via LZ1PJ, direct or by the Bureau. E-mail requests for Bureau cards are accepted (via lz1pj@bfra.org). Write QSO details and callsign worked, since Ivan, LZ1PJ, manages other callsigns too.
PLEASE NOTE: LZ01WFF is used for activation for other WFF references by other operators. Ivan, LZ1PJ, will manage this activation only. For other activations listen to operator's instructions.

ZS6, SOUTH AFRICA. Operators Les/W2LPL and his son Dan/W2DBL will
be active as ZS6/W2LPL between August 11-15th. Activity will be mainly
20 meters using SSB and PSK31. They will use a FT-857 into an end feed
antenna running 100 watts. QSL via W2LPL.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 2nd August 2009

ComReg Consultation on the 2300 to 2400 MHz Band

On 15 June ComReg published a consultation paper on the release of spectrum in the 2300 to 2400 MHz band. The Society has submitted a detailed response to this paper highlighting the extent to which the band is used by the amateur service both here and in the UK and the need to afford protection to the amateur service so that effective use may continue to be made of the band. As well as preserving the secondary status of the amateur service throughout the band.

The response seeks a small amateur primary allocation in the segment 2300 to 2330 MHz. The UK Microwave Group with which the Society had been in touch has also made a submission supportive of the more detailed response from the IRTS.

Theory Examination

Thirty candidates sat the examination held on 30 June at centres in Letterkenny, Carrigtwohill and Dublin and sixteen were successful. The results were with candidates on Friday the 17th of July and we understand that some of them have since received their licences. The new exam agreement (unlike the previous one) requires ComReg to issue the results within 20 working days of receiving them from IRTS. This brings to 185 the total number who have sat the 9 examinations held since IRTS took over responsibility for the examination just over four years ago in May 2005. Of these, 112 (61%) obtained the HAREC qualification.

Next Theory Examination

The next Theory Examination for the Amateur Station Licence will be held on Tuesday the 6th of October at 2p.m. in the ComReg Offices in Dublin. Places for the examination are limited and will, as usual, be

allocated on a first come first served basis and will only be reserved on receipt of the examination fee. Intending candidates should forward the appropriate fee to Sean Nolan EI7CD, 12 Little Meadow, Pottery Road, Dunlaoghaire, Co. Dublin in order to reserve a place for the exam.

The fee is 50 Euro or 25 Euro for full-time registered students, repeat candidates and those who are retired, unemployed or have a disability. Cheques and Money Orders should be made payable to the IRTS. When forwarding the exam fee intending candidates should enclose their postal address as well as phone and e-mail contact details.

The closing date for applications to sit the examination, which will be strictly enforced, is Monday the 21st of September. Intending candidates should note that anyone who fails to produce a photo identity on the day of the examination will not be allowed to sit the examination. The photo ID can be a driving licence, a passport, an employment photo identity card or a student card containing a photograph. A national Garda photo ID would also be acceptable.

Sean EI7CDs address can also be found in the IRTS call book or in the call book section of the IRTS website at www.irts.ie Sean's e-mail address for any further enquiries is &#65533;ei7cd at gofree dot indigo dot ie&#65533; Also available on the &#65533;Downloads&#65533; section of the IRTS website are Examination Notes with a sample examination paper. Also, in the Radio Theory Links section on the website is some very useful information for those studying for the examination.

The examination consists of a question paper of 60 multiple-choice questions divided into three main sections A, B and C and the time allowed is two hours. The pass mark is 60% and a pass is required in each of the three main sections of the paper. Intending candidates should note in particular, that in Section B of the paper &#65533; National and International Rules and Operating Procedures&#65533;- questions on the National Rules will be based on the new Wireless Telegraphy (Amateur Station Licence) Regulations 2009 which came into force on I June 2009.

These Regulations and other matters in relation to the operation of amateur stations can be found in the &#65533;Amateur Station Licence Guidelines&#65533; published by ComReg in Document 09/45 which is available on the

�Publications� section of the ComReg website at
www.comreg.ie

DXpedition to Clare Island

Members of the Dalkey Island Contest Group activated Clare Island, EU121 for the IOTA Islands on the Air contest last weekend. The team arrived on the island on Thursday evening and on Friday morning, in glorious sunshine, set about erecting the antennas which was all completed by early Friday evening.

Antennas consisted of inverted V dipoles for 40 and 80 and an elevated vertical with the top at 60 feet also for 40. The 40 metre antennas doubled up on 15 quite satisfactorily. A delta loop for 20 and a full wave loop for 10 completed the mini aerial farm.

All the antennas were resonant and coax fed with matching stubs on the loops. During the contest over 1600 stations were worked in the 24 hours which with the multipliers gave a score of over 2.6 million points. This was a very good performance for 100 watts to single element wire antennas.

The weather was reasonably kind with good days on Friday and Saturday strong winds and rain on Saturday night and intermittent showers on Sunday. The first class accommodation and the excellent food in O�Gradys Guesthouse which we had taken over for the event more than made up for any shortcomings in the weather.

Operators were EI2CA, EI5DI, EI6EW, EI7CC, EI7CD, EI8BP and EI8CE. The ladies who came along on the trip enjoyed the excellent walking facilities on the island and the few days away were enjoyed by all.

IOTA Contest

A number of offshore Irish islands were on the air for the IOTA Contest, which took place last weekend. Members of South Dublin Radio Club and the City of Belfast Radio Amateur Society were once again on Inis Oirr, while the Dalkey Island Contest Group were on Clare Island.

Rathlin Island, off the Antrim coast, hosted two DXpeditions: The Kilmarnock & Loudoun Amateur Radio Club, using the call sign GI0ADX, were there for the eleventh consecutive year, while a group from County Dublin and County Down (call sign GI0MPG) were on

Rathlin's East Lighthouse for the second year running. The IOTA contest was also, of course, well supported by mainland EI and GI stations.

Most participants reported that band conditions were better than last year, with longer openings on the higher frequency bands than in recent years.

Will this be the year?

The 2m WA1ZMS trans-Atlantic beacon

The WA1ZMS beacon on 144.285000 MHz is now running a 500 watt transmitter giving 7 kW ERP

The beacon is GPS locked and the antenna comprises two 5-element stacked yagis beaming at 60 degrees from IARU locator FM07fm.

EI2MOG On Air

Dundalk Amateur Radio Society are now operating a Echolink internet gateway link on 145.2125Mhz simplex. The link has been issued the callsign EI2MOG by Comreg and node number 57007 by Echolink. EI2MOG will operate 24/7 from it's location at Mount Oriel, Co.Louth, coverage reports are now welcome via email to info /at/ ei7dar.com. Further details can be found at www.ei7dar.com.

The next meeting of the Society is on Wednesday 5th August at 20.00pm, all are welcome to attend.

Shannon Basin Radio Club

The next meeting of the Shannon Basin Radio Club will take place in Hannond Hotel on Wednesday night next the 5th Aug at 20:30.

All members are asked to attend and all newcomers welcome.

South Eastern Amateur Radio Group

At the general meeting of South Eastern Amateur Radio Group on Monday last, John Ronan (EI7IG) gave a talk about AREN / Emergency radio operating procedure and spoke about AREN plans in general with some discussion around AREN training. The meeting was a very productive and well attended one and the club would like to thank

John for doing this talk.

The next general meeting will take place at 8.30 p.m. on Monday the 31st of August.

Please Note: Both Committee and General meetings take place on the last Monday of each month. Committee meetings take place at 8.00 p.m. and the general meeting follows at 8.30 p.m. General meetings are open to all members and visitors are very welcome.

AREN Net

Net's are held on the 7th and 21st of each Month. It is envisaged that the net on the 21st of each month will be a digital mode training net.

Rallies

C.R.C. Rally 2009

The Cork Radio Club is holding their Rally in the Montenotte Hotel in Cork on the 13th of September. Special rates for those who wish to stay overnight just mention Cork radio Club.

Food all day, plenty of parking & doors open at 11am. All the usual traders will be there.

Mayo Rally

The 2009 Mayo Rally will be held on Sunday November 22nd in Castlebar. The venue is The Welcome Inn Hotel, Where the 2008 rally was held at short notice, and doors open at 11.00am.

Rally Director, Padraic Baynes, EI9JA, is now taking bookings for stands at the Rally. He can be contacted on 087 6957154. The hotel will be offering a Rally special deal for accommodation. Full details will be available soon.

This week in History

1866 After a dozen years, Cyrus Field successfully completed the trans-Atlantic Cable.

1872 Dr M Loomis granted patent for wireless experiments.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to

�charlie dot Carolan at gmail dot com� Or by phone to 087-6265418

News can also be submitted via e-mail to

2139. Minimum gauge wire for connection to ground rod

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-03 02:58:29 UTC
From: KJ4NTS <KJ4NTS@dontask.com>

I have about a 50 foot run from my radio to the outside ground rod. What's the minimum gauge wire
that is acceptable for this connection?

I'm not aware of any electrical code that covers the wire gauge required to ground an amateur radio
and antenna.

Is this intended as an RF ground or lightning protection?

Primarily an RF ground since the antennas will be in my attic. However, I would appreciate the
information for both cases.

Is a nice station grounding pdf from Polyphasor. Sorry for the tinyurl,
the original url is a mile long.

Everyone should have a copy, and the writer should get an award for his
or her clarity.

Richard is correct. It is simple, and it is not trivial.

That's a good article, but it is focused on grounding for lightning protection. I am interested in
that, but I am also interested in having an effective RF ground.

I've been able to get a total of 16 feet of ground rod down in the form of 4 four-foot rods, but I
have a 50 foot run from my office to the ground rods, and I'm concerned about RF impedance in that
connection.

The two are pretty much Mutually Exclusive. What makes for Good
Lightning Protection, really doesn't have ANYTHING to do with RF
Grounding, especially if your using an End Feed Vertical, for an
Antenna. Lightning Protection is a Ground Rod that meets NEC.
Low Impedance RF Grounding System design is a Science and Art all in
itself.

Atta boy Bruce!
A ground plane or counterpoise is part and parcel of a antenna all of
which does not necessarily radiate and it is not of the same potential
of the true ground that should be at the lowest potential of them all.
It is for this reason the transmitter chassis is grounded and
separated from the radiator system which has it's own closed circuit

and where the potential is above that of true ground. In this way your transmitting circuit does not have a ground loop which is the last thing that you want.
Lightning tries to get to the true ground by the shortest route and the requirement is for you to not be part of it's route, even if your radio has to be the sacrificial lamb if you haven't pulled the plug.

i don't know where you get your radios, but in all of them here the coax
connector is connected to the transmitter chassis which also has a lug for
going to the safety ground.

Hi,

A couple years ago I got an Amateur Extra license "the easy way," I memorized the answers. It took about a week and a few nemonic clues. So today I want to get started in the hobby and realise I know absolutely nothing about it! SO I'm faced with the embarrassing task of trying to start in a hobby I know nothing about while holding the credentials of an "expert." I sorely regret having taken the easy way and not studied along the way woeking my way up.

By golly, I believe you are correct! I thought that was a bad
practice! Are all electronics at the same potential in the U.S. as
its container? So with a ground connection at the electrical supply
point and a provided connection for another generated "ground", is
that not an invitation for ground loops?

>
> >Lightning tries to get to the true ground by the shortest route and

H'mm, the ground point with the lowest potential relative to other
ground potentials in the same system is the "true" ground of the
system. Now can you tell me which "ground" is protected and from
what? And RF ground; is that protected from lightning? Lightning is
multi frequency oriented so it would appear to me it would gyrate
towards a radiator.
What about just one wire to the antenna and let the earth be the
return line to close the circuit! Seems like the definitions have gone
awry without involvement of a chassis ground
but then it is you that is electrically educated and the better judge.

2154. HELP WITH A KENWOOD TM-733A.....

This is a dual band VHF / UHF mobile radio.
I can't find any service manuals for this radio anywhere online. .
Can somebody please pinpoint where the VCO adjustment is on the UHF side.

Symptom:
towards the upper part of the UHF band it transmits full power then drops.
On the lower part of the UHF band it transmits fine and does not drop.

THANKS, 73, Mark

That's about a quarter wave at 5MHz. It sure isn't an effective
ground.You'd need a tuner on the ground wire as well.

Gathering from your other posts, you are in a difficult situation. RF grounding from a non ground floor or basement location is an issue. The problem is proportional to the frequency and wavelength, which is to say that at 10 meters, your RF ground won't.

Is there any possibility of putting in a balanced antenna? Or one of the so called no-ground verticals? All antenna setups are a compromise of one sort or another. Your setup will be a little bit more of a compromise.

This isn't to say there is no solution. There is always a solution of some sort.

> connection.

I ran attic mounted antennas for a period time and here is my
experience. First, don't bother running any ground to the antenna,
especially at 50 feet long. It will act more like a radiating element
than a ground, then you will get to meet Mr. RFI as you will discover
all types items your RF can affect. Since your antennas are in the
attic, static and lightning should not be an issue, unless you or a
close neighbor takes a direct hit.

I keep everything disconnected unless I am operating, it is the only
way I know of to keep lightning from destroying your station. If you
or your neighbor takes a direct hit, there is not much you can do to
prevent damage, unless you have everything disconnected, AC/Ground/
Antennas/Control lines/etc.

Second, your four foot ground rods are about useless for both RF and
DC ground. Minimal is eight feet. My current station has 7 eight foot
ground rods, spaced no more than eight feet apart, and all grounds are
tied together, including the panel box ground. This is done to make
sure all grounds are at the same potential.

You did not describe your station so the information someone can
provide is limited. In my case, my station was on the second floor,
so instead of having a ground, I used a tunable counterpoise system as

my RF ground. MFJ makes the tune boxes, and Ten-Tec may still sell them in kit from too. I used the one from Ten-Tec, it worked well at my location, but it still was a compromise, when compared to having a true ground system and outside antennas.

yes, it is. that is why your 'shack' ground has to be connected to the
service entrance ground.

you have to define the 'system'. but there is always the possibility that
someone outside the 'system' can reach in and measure your 'ground '
connection relative to something else and measure a potential. potential is
what is relative, hook a 12v battery to a meter and set it on a table,
connect another 12v battery between a ground rod and one terminal of the
first battery... does the meter reading change? what is the potential of
the positive terminal of the battery? if you were sitting on the table and
couldn't reach the ground rod or 2nd battery terminals could you tell what
the voltage of the 2nd battery was?

>Now can you tell me which "ground" is protected and from
>what?

'ground' is not protected from anything. 'ground' is a convenient point to
connect everything and to make measurements from.

> And RF ground; is that protected from lightning?

there is no such thing as an 'rf ground'. there is at best a low impedance path for return currents to get back to the feedpoint... if that happens to be through the earth (note for you, earth means dirt, not earth as in electrical ground that we call it in the states) then we may want to call it 'ground' but it really isn't.

now, why do i say there is no such thing as an rf ground? consider what happens around a 10m 1/4 wave vertical mounted on the ground connected to the center conductor of the coax, with a single ground rod as the connection for the shield of the coax. The current going into the 1/4 wave vertical and the current coming out of the ground rod have to be equal at the coax connection... so, current flows up the vertical, back through the ground, up the ground rod and back to the coax... very simple... until you take your rf voltmeter and connect it to the ground rod and stick the other probe in the ground some distance from the rod, lets say about 1/4 wave away (more or less, propagation velocity through the ground is slower so it would be physically less than 1/4 wave in free space, etc, etc). what voltage do you read on your meter?? it is difficult to calculate because of all the interfaces and bulk conductivities, the sizes of the ground rod and probe, etc... but suffice it to say, it ain't zero. why not, aren't both probes connected to 'ground'?? well, yes, and no. because there is current flowing through the earth trying to get back to that coax connection there has to be a voltage difference. current in earth * resistivity of earth = voltage between points on the earth, give or take a few units. now lets say we add a radial wire to connect the ground rod at the feed point of the vertical to the probe where you measure the voltage of the earth... does the voltage go away? after all you just shorted out your voltmeter didn't you?? but no! there is still voltage! why you ask?? well, even though you have made a lower impedance path there is still current on the wire, and since the wire has inductance and capacitance the propagation time is not zero, so there is still a voltage difference causing that current to flow along the radial wire... why is it necessary to insulate the ends of raised radials if they are a 'ground' plane under a vertical antenna?

lightning 'ground' is even worse because the currents are bigger... consider a 100ka bolt with a rise time of 1usec hitting the ground and spreading out at about .3c (approximately what i measured in one experiment for a buried radial wire)... the potential difference between points just a few feet apart can be huge, that is a common cause of lightning deaths, current hits tree, goes through ground, up one leg, down the other, or up one leg and out an arm that is closer to something conductive away from the tree... like a golf club. the key with designing lightning 'ground' systems is to realize that this potential exists and make sure you can handle it. the 'single point ground' is the classic way because it makes the distance zero which takes the rise time and propagation speed out of the equation. unfortunately that is not always possible, so that is where other methods are needed to keep voltages across protected equipment equalized.

>Lightning is multi frequency oriented so it would appear to me it would
>gyrate

>towards a radiator.

i have never known lightning to gyrate. it takes all sorts of convoluted paths, but none that i would call gyrating.

>What about just one wire to the antenna and let the earth be the
>return line to close the circuit!

certainly, and many have done that, and some have gotten burned. consider this case... sit on your table with the 12v battery again, but instead of the meter hook up a transmitter to it. assume there is one so-239 output jack mounted on the radio's metal case and no other connections, just 12v in, rf out. run a wire straight out from the so-239 center conductor then touch the radio's metal case... what happens? if the power is high enough you get burned... why? you are touching the radio case, isn't that 'ground'? you aren't touching the earth? so what is happening??? well, you are now part of the return path for current that has to find a way back to the chassis side of the so-239, and since you are likely much larger than the case of the radio you make a more efficient collector.

change the setup, now run a wire from the case of the radio to the ground rod where the 2nd battery used to be connected... now you have another path for current to get back to the chassis side of the connector, from the 'earth' through the ground rod up the wire and to the radio... now touch the case and what happens? well, if the earth to radio circuit is lower impedance than your body to radio, more current flows on that side and you don't get burned... not good enough? still getting burned??? get one of those counterpoise resonator thingies... they are really just a small match box for a long wire... run the wire around the floor and tune it up. why does it work better? it provides a lower impedance path for collecting up that return current and getting it back to the radio. no magic, it is just providing the return current instead of letting your body collect it.

> Seems like the definitions have gone awry without involvement of a chassis
> ground

ah, chassis ground, yet another type of ground.

>but then it is you that is electrically educated and the better judge.

one of the few things you have said that i agree with

http://newmasti.blogspot.com

Priyanka Chopra caught everyone’s attention in the video for ‘Desi Girl’ from Bollywood’s movie “Dostana.” She is also in a gold, nude colored sari. The sari is gathered on her shoulder unlike the traditional way of draping a sari so that less is seen. As for her blouse, this skimpy, halter top appears to be more like a bikini top than a full shirt.

Amateur Radio Newsline(tm) Report 1669 - August 7 2009

Amateur Radio Newsline report number 1669 with a release date of
Friday, August 7, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Restructuring comes to Tonga, 40 meter
expansion is delayed in France, four new hamsats are on-orbit but only
two are operational, a broadcaster is fined for alleged interference to
aviation radio and a long overdue editorial from us to you. What's it
about you ask? Find out right here on Amateur Radio Newsline(tm)
report number 1669 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: MAJOR CHANGES IN TONGA

Major changes are taking place in amateur radio in Tonga. This,
according to Paul Kidd, A-35-R-K, who tells the Ohio Penn DX Newsletter
that he recently had a meeting with that nations radio Licensing
Officer and the Technical Officer in the newly formed Department of
Communications. Amateur Radio Newsline's Don Carlson, KQ6FM, is here
with some of what A-35-R-K learned.

--

In the past, amateur radio licenses in Tonga have been managed and
issued by a variety of different government agencies. That's now
changed with the creation of the Department of Communications which is
already building a website and plans to make license application forms
available online.

For newcomers, a 'Novice' or some other type of entry level license may
be created to encourage more activity. The formation of a club station
and licensing classes, possibly through the Tonga Maritime Training
Institute, was also discussed.

Licensing procedures for visiting operators and yachts in transit will
be simplified, especially for those entering the country somewhere
other than the capital. The new agency may make it possible for
visitors to apply on-line, however, they will still want to see an
applicant in person before issuing a license.

As to call signs, A35 single letter suffix calls may soon be issued to
resident Advanced Class licensees, and possibly to special event and
contest operations as well. A35 two letter suffix callsigns may be

issued to entry level licensees while 3 letter suffix callsigns will likely be issued to short-term visitors and transiting yachts.

In other changes, the permitted output power will increase to 400 watts to bring Tonga up to the same level that is authorized in New Zealand and Australia. The current 40 meter allocation of 7.0- to 7.1 MHz will be continued but 7.1 to 7.2 MHz operation will be permitted on a secondary basis as well. An allocation for 60 meters was discussed, but no action on this will be considered until further studies and consultations are made.

Maybe most important of all, A35RK says that Tonga now has a government Emergency Response Plan, and amateur radio participation in it is authorized. This, in conjunction with the Tonga Defense Force, the Tonga Meteorological Service, the Ministry of Civil Aviation, and the Tonga Red Cross. In all some very positive steps forward for ham radio in that nation.

For the Amateur Radio Newsline, I'm Don Carlson, KQFM, in Reno.

--

The Tonga government also intends to more carefully monitor amateur and maritime communications in an effort to reduce unlicensed operation and to insure compliance with regulations. (OPDX)

**

RESTRUCTURING: 7.1 - 7.2 MHz STILL OFF LIMITS IN FRANCE

If you plan to vacation in France, be sure to avoid 7.1 to 7.2MHz . At least for now. This is because French telecommunications authorities have not authorized that spectrum parcel in that country. Although the Department that controls frequency allocation in France, the AFN, has approved the use of that portion, it has yet to be signed off by a Ministerial Decree nor published in the official Journal.

** HAM RADIO IN SPACE: FOUR NEW MICRO HAMSATS ON-ORBIT BUT ONLY TWOP WORK

Four new ham radio satellites have been deployed from the Space Shuttle Endevour during the now concluded STS-127 mission. The new birds are named Castor, Pollux, BEVO1 and AggieSat but only two appear to be working.

Castor and Pollux are reported to be O-K. They will transmit on 145.825 MHz at 1200 baud AFSK and 9600 baud FSK. The transmitter uses the AX.25 protocol. Initial Keplarian elements to track them are posted on the AMSAT website.

BEVO1 and AggieSat2 were also ejected together from the Space Shuttle but it appears that they failed to separate. No signals have been heard from BEVO1, although beacon packets have been reported as coming from AggieSat2.

The current theory is that only partial separation occurred. And while the inhibit switches keeping the satellites powered off have been closed, allowing the satellites to boot up it is likely that the antennas did not deploy correctly. AggieSat2 transmits with 1watt of power so it is easier to hear, while BEVO1 only has 200 milliwatts out during beacon mode.

More is on the web at
http://www.amsat.org/amsat/archive/amsat-bb/48hour/msg72870.html (ANS)

**

HAM RADIO IN SPACE: BETTER THAN USUAL PERSEID METEOR SHOWER ON AUGUST 12

Meteor scatter enthusiasts listen up. This year's Perseid meteor shower could be even better than usual.

According to NASA's Meteoroid Environment Office, a filament of comet dust has drifted across Earth's path. When Earth passes through it, sometime between 0800 and 0900 UTC on August 12th, the Perseid meteor rate could surge to twice its normal value.

Translated into ham radio language, this means more meteors leaving ionized trails as they burn up in the Earth's atmosphere and more chances for those involved in the meteor scatter mode to make contacts by bouncing signals off those ionized trails.

You can check spaceweather.com for details on this years Perseid meteor shower and tips on how best to observe it. (Spaceweather)

**

RESCUE RADIO: HAM RADIO REPORTS CITED IN CANARY ISLAND FIRE

Strong winds fanned forest fires on Saturday and Sunday August 1st and 2nd on the Spanish Canary Island of La Palma. According to news reports attributed to unnamed radio amateurs large plumes of smoke could be seen rising from the island's southern tip where fires were active on two fronts.

The reports said that firefighters were forced to retreat as flames raged out of control near two towns. Some 4,000 residents were evacuated from the area Saturday.

La Palma is located of the coast of West Africa, and is one of the least developed of the Canary Islands. At airtime news reports say that the fire has destroyed some 50 homes. No other information on the role ham radio operators may have played in rescue radio efforts was included in news reports from the region. (Published news reports)

**

RESCUE RADIO: NEVADA COUNTY THANKS HAMS

Back in the United States, several Nevada Amateur radio operators conducted a Simulated Emergency Test at the Panaca Nevada Fire Department on June 27 and 28. The test was used to demonstrate ham the radio operator's emergency communications capabilities using various modes of operation. This included Digital, Single Side Band and CW.

Rick Stever, head of Lincoln Co. Emergency Management, thanked Lee Hone K7NKH and Chuck Reifsnyder AD7OY for their help in organizing the ham radio aspect of the event. Stever also voiced his support to the members of the community who participated and who continue to support the county's Emergency Management. (Lincoln Record)

**

RESCUE RADIO: HIGH WINDS VS. HAMS ACROSS THE MIDWEST

Central Indiana hams felt like thy got dumped on this past week and for good reason. 4 to 8 inches of rain fell on south-central Indiana the morning rush hour and the noon hour.

Johnson county hams, just south of Indianapolis, were busy calling in reports of flooded streets as they had flashbacks to last years 100 year flood. That June 2008 event tore out bridges, ripped open a dam and flooded homes throughout the county.

In rural Brown county, high winds toppled trees, damaged homes and brought down power lines leaving thousands of residents in the dark and without phone service. EMA Director Richard Woehlecke, K9VM, said it was the worst flooding and wind damage that he had seen in a decade.

Further south in Jackson county, much heavier rains flooded county roads keeping some closed for most of the week. Some hams maintained stand-by communications throughout the incident.

And west if Indianapolis QIN Net manager Ivan Flint, W9ILF, is picking up pieces of radio equipment and his home after high winds ripped through the area. Flint's amateur radio and antennas were damaged as a result of the high winds.

Reporting from Indianapolis, this is Jack Parker, W8ISH. (W8ISH)

**

ENFORCEMENT: FCC WARNS HLI ABOUT UNCERTIFIED VIDEO TRANSMITTER

The FCC has issued an official Citation to Hobby Lobby International for marketing what the agency terms as non-compliant radio frequency devices. According to the Commission, these devices called Pilot View FPV 2400 video transmitter exceeded the maximum radiated power limit for a Part 15 device.

Back on March 5th, the FCC's Spectrum Enforcement Division sent Hobby Lobby International a Letter of Inquiry asking if the Tennessee company was marketing an unauthorized radio frequency device through its website. The company responded by telling the FCC that they began

selling the Pilot View FPV 2400 video transmitter in May of 2008 and so far had sold 109 units of the device in the United States. Hobby Lobby also noted that the Australian manufacturer of the transmitter, Intelligent Flight, had represented to them that the device was FCC compliant.

The FCC noted that Hobby Lobby sent a unit to a Commission's lab for evaluation prior to receiving the Letter of Inquiry. After receiving the Letter of Inquiry, Hobby Lobby contacted the test lab to inquire about the test results. At that point it learned that the device is not FCC compliant. According to the Citation, Hobby Lobby says that the last date that a transmitter was received by it was November of 2008. Its also the time when it lost all contact at Intelligent Flight.

In the Citation, the FCC says that it appears that Hobby Lobby violated several sections of the Rules by marketing the Pilot View FPV 2400 transmitter in the United States. The company was then told that future violations of this sort could lead to monetary forfeitures of up to $16,000 for each violation or each day a violation continues. (FCC)

ENFORCEMENT: BROADCASTER FINED FOR AVIATION BAND INTERFERENCE

The FCC has affirmed a $4000 fine issued against California based Playa Del Sol Broadcasters. This after it determined that a broadcast translator at its transmit site was causing interference to three frequencies in the aviation band. Bruce Tennant, K6PZW, reports:

--

On March 12, 2008, the FCC Enforcement Bureau's San Diego, California, office received a complaint of interference from the Riverside County Sheriff's Department regarding the aviation frequency of 122.875 MHz, in the Indian Wells, California area. The Sheriff's Department identified the interference as having the same audio as station KRCK on 97.7 MHz in Mecca, California. That's a station licensed to Playa del Sol

On March 13, 2008, an agent from the San Diego Office traveled to the Indian Wells and was able to detect the audio of KRCK on three separate frequencies in the VHF aviation band. These were 109.5 MHz, 122.2 MHz, and 136.1 MHz. The agent also determined that the three signals were emanating from the KRCK studio which is collocated with FM Broadcast

Translator station K238AK.

On March 14, 2008, the agent returned to the studio location of KRCK and inspected FM Broadcast Translator station K238AK. During the inspection, the agent requested that the translator station be taken off the air. By using portable measurement equipment, the agent determined that all three signals previously measured in the aviation band went off the air and returned whenever the K238AK transmitter was switched off. The agent determined that the measured signals on 109.5 MHz, 122.2 MHz, and 136.1 MHz, were spurious emissions emanating from station K238AK.

On July 31, 2008, the San Diego Office issued a Notice of Apparent Liability in the amount of $4,000 to Playa. The notice found that Playa apparently willfully and repeatedly violated the Rules by failing to adequately attenuate by at least 60 db the spurious emissions from its translator.

In its Response, Playa argues that a forfeiture is not warranted in this case because it responded to the San Diego Office and addressed the issue "promptly and fully," and that the violation was not willful or repeated.

Now, after weighing the Playa del Sol response and in conjunction with the agency's Forfeiture Policy Statement the FCC conclude this past July 17th that Playa del Sol Broadcasting willfully and repeatedly violated Section 74.1236(c) of the Rules. Considering the entire record including the fact that Playa did not cease the unauthorized emissions until the San Diego agent confirmed its translator as the source of the interference, the FCC says that neither reduction nor cancellation of the proposed $4,000 forfeiture is warranted.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Playa del Sol Broadcasting was given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT FOPLLOW-UP: FCC ISSUES $24000 NAL TO ALLEGED SHOPING CENTER RADIO JAMMER

The FCC has issued a $24,0000 Notice of Apparent Liability for Forfeiture to Kevin W. Bondy, licensee of GMRS station WQGX752, in Encino, California. This for apparently willfully and repeatedly violating Section 95.183(a)(5) of the Commission's Rules by engaging in unlicensed radio operation and intentional interference to licensed radio operations; and apparently willfully and Section 95.115 of the Rules by failing to allow an inspection of his radio equipment by Commission personnel.

You may remember our story a few months ago when an agent from the Los Angeles FCC office used direction finding equipment to locate the source off interference to the shopping centers radio system. Using mobile direction finding gear the agent traced the signal to Bondy's car and accompanied by deputies from the Ventura County Sheriff's office confronted him. The FCC agent identified himself to Bondy and explained that a refusal to allow an inspection could result in a fine. Then the agent asked Bondy if he could perform an inspection of all radios in his vehicle. Initially, Bondy refused to allow an inspection, then later agreed to allow an inspection, then refused again. Bondy's refusal was witnessed by the Sheriff's Department deputies.

Now, after weighing all the evidence the FCC says that in its opinion that Kevin W. Bondy's actions warrant not only the base amount fine for each violation but an enhancement based an several circumstances. These include the nature, circumstances, extent, and gravity of the violations, and with respect to the violator, the degree of culpability, and history of prior offenses, ability to pay, and other such matters as justice may require. Applying the Forfeiture Policy Statement and the statutory factors to the case, the FCC concludes that Bondy is apparently liable for a $24,000 forfeiture.

As is always the case, Bondy was given the customary 30 days from the May 14th date of the liability notice to pay or to file an appeal. That date has long since passed. Meantime an informed source indicated to the CGC Communicator that Bondy may walk away free from the most serious criminal charges levied against him. CGC reports that its possible that a Ventura county prosecutor filed the wrong charges with a wiretapping charge being at the heart of the matter. The presiding judge dismissed that charge on July 23, along with another charge stemming from it. As of now, the only prevailing criminal charge against Bondy is one of making annoying phone calls, but the prosecution has the option to re-file its case. (FCC, CGC)

**

RADIO LAW: COMMENTERS TO FCC FEAR IBOC INTERFERENCE

Mentions of alleged interference due to increased FM In Band On Channel or IBOC digital radio m power levels are now cropping up in filed comments to the Federal Communications Commission. The FCC had asked about how to treat cases of alleged interference when it sought the next round of comments on the proposed voluntary FM IBOC power increase.

According to Radio World On-Line, approximately 32 of 41 comments filed oppose a blanket power increase for IBOC operations. Many urge the FCC to wait until after the tests being conducted by National Public Radio Labs are concluded before the agency makes a decision on the proposed power increase.

In its filing, NPR stated that the few commenters supporting the proposed blanket power increase have offered no new evidence or basis to justify the proposal. NPR calls this a significant omission, particularly given the failure of the prior testing to examine the impact of the proposed increase on analog SCA subcarrier services for the visually impaired and other SCA compatibility.

The comment period on this matter closed about three weeks ago. (RW)

**

NAMES IN THE NEWS: K0DQ FIRST EVER TO WIN ALL MAJOR DX CONTESTS SINGLE OP

A McLean, Virginia ham operating the 2008 CW weekend of the CQ World Wide DX Contest has perhaps become the only person ever to win single-op world championships in all six major ham radio DX contests John Scott Redd, K0DQ, on the air from Aruba as P40Q racked up over a million more points than his closest competitor in the Single-Operator Low Power Class

Redd got his first taste of contest victory back in 1966 as a Navy officer posted to Uruguay and operating CX2CO in the phone weekend of the CQ World Wide DX Contest. Redd worked his way up through the Navy ranks to Vice Admiral and became Commander of the Fifth Fleet. He then served as a civilian in the Iraq Coalition Provisional Authority and as Director of the National Counterterrorism Center before retiring in late 2007.

But ham radio and contesting were never far away, and operating from Mexico as XE1IIJ in the early 1970s, Redd won single-op world championships in the CQWW Phone Contest, the ARRL DX Phone and CW Contests and the CQ WPX Phone Contest. Thirty years later, when his professional life permitted a little more hamming time, he added the WPX CW crown as P41P, operating from P43P's station in Aruba, in 2002. The only prize that eluded him was the CQWW CW. That is until now.

Redd has already been inducted into the CQ Amateur Radio Hall of Fame for his contesting achievements on top of all his other accomplishments. (CQ)

EMERGING TECHNOLOGY: MARINE CORPS BANS SOCIAL NETWORKING SITES

The U.S. Marine Corps has banned MySpace, Twitter, Facebook, and several other social media sites from its networks. The ban which is effective immediately was instituted in response to a late July warning from U.S. Strategic Command.

According to news reports the Strategic Command told the rest of the military it was considering a Defense Department-wide ban on the Web 2.0 sites. This, due to what the government says are network security concerns.

The Marine Corps says it will issue waivers to the Web 2.0 blockade if a "mission critical need" can be proven. They will continue to allow access to the military's internal "SNS-like services." But for most members of the Corps, access to the real, public social networks is now shut off for at least the next 12 months. (Published news reports)

**

RADIO FINDINGS: OLDER AMERICANS PREFER NEW GADGETS

A study called: "Graying Gadgets: How Older Americans View Consumer Electronics." Says that 67% of those Americans over the age of 70 use a cell phone on a weekly basis. Also that 27% more likely to visit travel Web sites than the average Internet user, and 98% more likely to visit health sites. When asked about what top five consumer electronics they intend to buy in the next year, this demographic listed High Definition TV sets, laptop computers, cell phones, digital cameras or GPS devices.

Even though this group consisting of boomers and World War II-generation Americans grew up with radio, it was not listed in their top five items that they must have. For manufacturers of consumer goods this seems to bolster the argument for having an AM / FM radio included on cell phones.

More than 3,000 older Americans took part in the study in November and December 2008. Those interviewed ranged in age from 55 to 85. (RW)

RADIO IN SPACE: YOUR NAME HEADED TO MARS

Your name and call could be added to a microchip on the Mars Science Laboratory Rover heading to the red planet in 2011.

All you need to do is to go to the Jet Propulsion Laboratory U-R-L found in this weeks printed Newsline report and fill in the blanks. While there is no space for your callsign, many hams are simply adding it right after their last name.

The Mars Science Laboratory is part of NASA's Mars Exploration Program. This is a long-term effort of robotic exploration of the red planet. The Mars Science Laboratory is a rover that will assess whether Mars ever was, or is still today, an environment able to support microbial life.

Again, to get your name on that Mars bound microchip is to http://mars9.jpl.nasa.gov/msl/participate/sendyourname/index.cfm (VK2SKY)

**

RADIO IN SPACE: EXTENDING THE WORLD WIDE WEB INTO THE FINAL FRONTIER

The University of Colorado at Boulder is working with NASA to extend the Interenet into the final frontier. The two are working to develop and test the new communications technology which will extend Earth's Internet into outer space and across the solar system.

Called Disruption Tolerant Networking, or DTN, the new technology will enable NASA and other space agencies around the world to better communicate with international fleets of spacecraft that will be used to explore the Moon, Mars and beyond in the coming decades. Or put another way, its expanding the Internet where no website has ever been before. (NASA)

**

ON THE AIR: CELEBRATING KARATE IN GERMANY IN DECEMBER

Members of Germany's Waldkirchen Radio Club will activate special event station DP3SSKW on CW and SSB through December 31st. This, to celebrate the 3rd Shito-ryu Shukokai Karate 2009 Worldcup. Skeds for 40 and 80 meters are possible via E-mail to DK7FK at b (dot) barth (at) pension-monika (dot) de. QSL via the bureau or direct to DK7FK. (Southgate)

**

ON THE AIR: UK RAYNET SPECIAL EVENT AUGUST 9

>From the U-K word that Norfolk County RAYNET will be operational on Sunday August 9th with a special event station. GB4NCR, from Walcott in Norfolk on 80 meter SSB with a primary frequency of 3.663MHz. 40 meters will be used if 80 isn't open. QSL cards are available and can be send either via the bureau or direct to G4PSH with a stamped self-addressed envelope. (RSGB)

**

ON THE AIR: CELEBRATING THE SPANISH FORMULIA 1 RACE

Ham Radio will be a part of the Formula 1 Spanish Grand Prix will take place in Valencia Spain from August 8th to 23rd. Commemorative stations AM5FUV, AO5FUV, AN5FUV EG5FUV and EH5FUV will take to the airwaves to help commemorate this years event. A special award will be

issued to those who will make at last 3 QSO's with 3 different event stations. The QSL Manager will be EA5FL. Further information can be found at QRZ.com. (Southgate)

**

ON THE AIR: THE IOWA QSO PARTY IN OCTOBER

Back in the USA the 2009 Iowa QSO Party takes place on October 17th from 1400 to 2300 U-T-C. All band and modes are included but no contacts using repeaters or other relay devices are allowed. More information plus summary sheets are at www dot wa0dx dot org. (Via e-mail)

**

DX

In DX, word that 3B8FQ has received approval and will be active as 3B7FQ from St. Brandon Island, in August. He will depart Mauritius on the 10th of August and returns from St. Brandon on the 30th. Operation will be SSB and CW on 40 to 10 meters. This may be his last visit to 3B7 for the next five years. QSL via K5XK.

More than 12,000 contacts were made by VK9NI from Norfolk Island during mainly the RSGB Islands on the Air contest on July 5th and 6th. This, despite poor band conditions on 160 through to 10 meters. A nine-member team ran multiple stations using phone, CW and RTTY. If you worked them, QSL as directed on the air.

JM1LJS and JA3RAF will be active from Wallis Island between August 9th and 15th using the callsign FW1W. They plan to operate SSB, CW and possibly some digital modes on 40 through 6 meters. QSL direct via their home calls only.

A multi-national group is on the air from Swaziland until August 11th signing 3DA0SS. Operation is from both the Hawane Resort and a campsite near Manzini. Plans are to cover as many bands and modes as possible, including PSK31, RTTY and CW. QSL as directed on the air.

OH1TX and OH0RJ will be leading a three man team on a two day trip to Market Reef in mid-August. They expect to arrive on the `Rock' by noon on August 10th and to depart early on the 12th. They will use the call O-J-0Zero-Japan.

Lastly, CT1GPQ will be active from Timor Lorosae between August rd and the 3rd of October. His activity will be on 40, 30, 20 and 17 meters using SSB, RTTY and CW. The pilot station and QSL manager is CT1GFK.

Above from various DX news sources

THAT FINAL ITEM: AN EDITORIAL ON INTERFERENCE

And finally this week, we depart from the customary to bring you one of our infrequent editorials. This one deals with malicious interference, those who cause it and also those who seem to seek it out. Here's our Producer Bill Pasternak, WA6ITF:

--

Over the past two weeks we have been getting complaints that Newsline is jamming and in other ways harassing users of the frequency of 14.275 MHz on the 20 meter band.

For the record, we at the Amateur Radio Newsline are information providers only. We have no broadcast equipment and we air nothing ourselves. Our audio content is distributed over the Internet and by automated telephone and is formatted for retransmission specifically over VHF and UHF FM repeaters because that is where we believe that it belongs. It was never intended for retransmission on the High Frequency bands, however there are some hams who have chosen to do so for reasons known only to themselves.

If you are among those being interfered with on 14.275 MHz and live within the United States or its possessions, we suggest you obtain the call letters of the station that is doing the rebroadcast that is interfering with you and file a formal complaint with the FCC. It is the responsibility of that Federal Government agency to police the airwaves and only that agency can solve your problem.

That said, we would also question why anyone would even want to operate on or near 14.275 MHz. That is a frequency with a long history of being the home of numerous problems in our service.

With so many other frequencies available on 20 meters alone, there would seem to be no reason to congregate on 14.275 MHz other than to satisfy ones own voyeuristic needs. And in our humble view, that is not a good reason to tune a radio to that frequency.

If you cannot help yourself and feel a need to be there, please do not call or e-mail us to say that you were jammed or harassed. We will only respond that we warned you not to waste your time operating on or near 14.275.

I'm Bill Pasternak, WA6ITF, and that how we see it in the studio in Los Angeles.

--

There is simple solution to the problem of 14.275 MHz or any other frequency like it. Just don't bother listening and forget those who are making it into a mess even exist. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that next weekend, August 15th and 16th is the Huntsville Hamfest and the presentation of the 2009 Young Ham of the Year Award to Andrew Koenig, KE5GDB. We hope to see and meet many of you there.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

RENEW OR LOSE!

gathering of community broadcasting technologists

BOGONG HIGH PLAINS WINTER EXPEDITION

aug 15 and 16 is wia remembrance day contest

RADIO COULD CHALLENGE BPL FOR ELECTRICAL SYSTEM MONITORING
All up and coming in this edition of
WIANEWS for week commencing Aug 09

Timely Reminder

A reminder to ensure you pay your license renewal on or before time.

Here is Gordon VK4VP:-

"ACMA provide a 60 day grace period before the callsign is listed on the web
for other amateurs to acquire.

Generally they will send out a letter advising that your license has expired
as a reminder to renew it. You may have waited a long time to get a particular

callsign and it can be gone all too quickly.

Put a note on the calendar or in your computer to remind you of the date for renewal and if you hear nothing by that time a check of the website or a phone call to ACMA may prevent losing that cherished callsign."

(Gordon VK4VP)

CBAA

The first formal gathering of Community Broadcasting technologists held in Australia.

Technorama 2009

VK3FFFM joins us:-

"Skilling and technology support is a major challenge for community broadcasters.

Technorama 2009 is the first step, being held from
Friday 4th September -Sunday 6th September in Melbourne.

Where do I find more information?

Download program and registration from www.cbaa.org.au, click on Technorama tab at the left

Use the CBAA discussion Technorama forums for latest information or to ask questions.

All station technologists, engineers, managers, sector suppliers of tech services and equipment.

Anyone that contributes to technology decisions, or techs wishing to get involved Australia wide, are invited to attend.

Get in Early with your registration."

Launch your own personal DIY satellite

Planet Earth has entered the age of the Personal Satellite with the introduction of Interorbital's TubeSat Personal Satellite.

This Kit is the low-cost alternative to the CubeSat.

And, best of all, the $8000 price of the TubeSat kit actually includes the price of a launch into Low-Earth-Orbit!
Launches are expected to begin in the fourth quarter of 2010.

Total Price of the TubeSat Kit including a Launch to Orbit is only $8,000!

You can read more on the Space Fellowship website
http://spacefellowship.com/2009/08/01/interorbital-syatems-tubesat-personal-satellite-kit/

(SouthGate)

Big hike to reach remote lighthouse

The International Lighthouse and Lightship Weekend on the 15th and 16th of August could turn out to be a record year with 355 lighthouses registered so far.

Still in the lead on the country tally is Australia on 46, Germany 42, England and the USA around 35 each, and equal pegging on 21 are Argentina, Holland and Sweden.

Most Australian lighthouses easily accessible. An exception is the most

southerly lighthouse on the mainland which is at Wilsons Promontory Victoria.

Adam Shrimpton VK3PHY is set for the 18-kilometre walk to reach the lighthouse carrying a Yaesu FT817 transceiver, dipole, a quarter-wave 20m vertical, 9-metre squid pole, batteries and charger, plus food and warm

clothes.

He was involved in the Lady Bay Warrnambool Lighthouse last year and says this inspired him to do something out-of-the-ordinary this year.

There are still lighthouses available to put on air. Check out the official website www.illw.net for the full list and online registration. How many lighthouses will you contact?

(Barry Robinson VK3PV

Hello everybody, I'm Bryan VK3HXR with a couple of words about the WIA National News Podcast.

That's right _podcast_.

A podcast is simply an audio file distributed somewhat automatically via RSS. And 'RSS' is a system where programs query a small summary file on websites rather than you, the user, loading the whole website every time you want to check if there's anything new.

Think of it as "email for audio". The software checks every so often in the background and when there's a new episode it downloads it and notifies you it's ready to play.

So, why is this so good? Well, just about every web browser, email client and music playing software knows how to download podcasts and if you subscribe to the WIA News Podcast you'll get the _freshest_ news bulletin as soon as it's uploaded!

So if you want to listen to the freshest Amateur Radio news on your MP3 player while you're mowing the lawn, burn it to a CD and listen to it on your way into work or in the background between DX contacts in the wee hours of the morning, the WIA News Podcast is yours, any time you want it.

Now the mp3 file _has_ been available for a while and has always been used by the HF, repeater and IRLP broadcasters. If you're involved with putting the

news to air, you'll love the new system, especially if you're writing automation scripts.

Every episode is now uniquely named with the date in the title and there are commandline podcatchers (like 'hpodder') to make your life easier. No more wondering if the downloaded wianews.mp3 file is the most current one - you'll know it is.

So head over to the WIA.org.au website and you find the podcast link on the News Broadcast Page in the News and Events section. And if you're an iTunes user, you'll find it in the Podcast Directory by searching for 'Wireless Institute'.

'hpodder' commandline podcatcher (linux/posix & OSX)
http://software.complete.org/software/projects/show/hpodder

'Armangil's' commanline podcatcher (windows, linux/posix & OSX)
(requires Ruby) http://podcatcher.rubyforge.org/

ACMA asked to jam radio broadcasts

Deliberate jamming has long occurred on the shortwave bands as nations want to deny their citizens access to foreign broadcasts, the practice is now being suggested within Australia, for another reason...Jim Linton VK3PC explains.

"Analogue FM radio stations in Victoria's second largest city, Geelong, fear their listeners will be lured to tune into the new digital transmission stations in Melbourne.

Grant Broadcasters Pty Ltd which operate two FM stations in Geelong has called on the ACMA to jam the Melbourne signals.

This because there will be a considerable delay in extending digital radio to Geelong and other regional areas.

The government owned broadcasters ABC and SBS are opposed to their digital signals being denied to Geelong.

The ACMA is considering options for the introduction of coverage management systems to stop the fortuitous digital radio coverage. If jamming did go ahead it would need to be funded by broadcasters claiming market protection."

(Jim Linton VK3PC)

Since that story was filed we have contacted the DAB+ Engineering Committee for CRA and a spokesman said "ACMA will not contemplate such a scheme".

HAMS ACROSS AUSTRALIA.

web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

The Next meeting and AGM of Illawarra Amateur Radio Society will be held at Industry World, Off Springhill Road Coniston on Tuesday the 11th of August 2009 at 7.30pm.

At this meeting the present committee will stand down and those that wish to stand again will do so.

Please consider nominating to become a committee member to assist the club with the good work needed to keep the club rolling along. Please note the Nomination forms are available on their website.

www.iars.org.au

Membership forms are also available on the website.

For those that don't have internet access please call Tony VK2TS on 0404 839465 and alternate arrangements can be made.

The membership fees also help keep twelve repeaters and 3 APRS digipeaters on air.

Westlakes club have arranged to have Jeff Johnson VK4XJJ present a talk on his trek across Australia Now listed for Saturday August 22nd in the Westlakes club Library due to a double booking by Jeff for the 29th.

Westlakes ARC in conjunction with Port Stephens ARC have registered and will be activating Norah Head Lighthouse over the ILLW 15/16th August operating as VK2ATZ portable.

VK3
web service:- http://www.amateurradio.com.au/news/
VKC Roundup http://www.police

Now until Aug Ten its the Bogong High Plains Winter Expedition, so listen out for NERGs VK3GT, VK3SN & VK3HFI across the HF bands and local VHF/UHF repeaters during their annual cross country expedition

Then Thursday 13 August - NERG Annual General Meeting and elections.

(Mark VK3BYY North East Radio Group, Briar Hill, Australia).

VK5
www.qsl.net/vk5bar/

Hello, this is Jade, VK5FXYL on behalf of the EARC. On the 22nd of August at Mawson Lakes Library we are hosting a meet and greet information demonstration about Amateur radio. There will be active on-air and technical displays. A chance to meet members of the club and ask questions about Amateur radio. Bring your friends, bring your family, bring your neighbours. This is a chance to learn about a fantastic hobby. Starts at 10 in the morning and finishs at 4pm. We look forward to seeing you there.

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

The VK7 stations that are currently registered for lighthouse participation are:

Winston VK7EM who will be operating from Mersey Bluff Lighthouse and is number AU0040.

Wayne VK7FWAY and Eric VK7FEJE who will be operating from Table Cape Light is number AU0039.

Bill VK7MX, Duncan VK7FLAK and XYL VK7FYMX will be operating from Low Head Lighthouse which is number AU0048.

Gavin VK7VTX will be operating on Flinders Island at the Pot Boil Channel lighthouse which is number AU0062 and IOTA number OC-195, and,

John VK7ZZ will be operating from Cape Bruny Lighthouse which is number AU0005.

Make sure you give these stations a special call if you here them during the weekend and make sure you get a number from them in the all important RD!

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Summerland, Lismore Region are running a Foundation course over the RD weekend., 15 & 16 August at a cost of $20 plus text book and exam fee.

Advanced Theory course will be 22/23 & 29/30 August. The four day course $50 plus text book and exam fee.

WIA exam fees are currently $35 for under 18 years or $67 for adults.

Tassies Cradle Coast Amateur Radio Club (CCARC)

The CCARC has welcomed new members Peter VK7LCW and Chris VK7KEE .

Members are advised that the next meeting will be a "social meeting" on the 29th of August. It is anticipated that dey will have a guest speaker providing a session on radio controlled model aeroplanes.

The Cradle Coast Amateur Radio Club offers full assessments to its members, and to any other person who are interested in upgrading their Amateur Qualifications or sitting any other of the Licence Exams.

Details may be obtained from Keith Winkler VK7KW on telephone 6428 2185 or email winklerkw@hotmail.com

http://my-x15.net/ccarc/

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CHINA NOW AT 90000 HAMS

Ham radio is growing in China. According to the Chinese Radio Sports Association which oversees licensing for hobbyists in the world's most populous country, some 90,000 of the worlds radio amateurs live in are in that nation and the number has been steadily growing in recent years. This, despite mobile phones and the Internet becoming commonplace in nearly all of the country.

US SENATE WANTS TO KNOW WHAT SPECTRUM IS IN USE

The United States Senate Commerce Committee wants Congress to get an inventory of how the nation's spectrum is being used and managed. To accomplish this the committee has passed a measure backed by Communications Subcommittee Chairman to have the Federal Communications Commission and the National Telecommunications and Information Administration report to Congress how much spectrum is used in each band and how. This includes what portions require a license for use and what portions allow unlicensed use.

RADIO COULD CHALLENGE BPL FOR ELECTRICAL SYSTEM MONITORING

FM subcarriers on broadcast stations also called SCA channels could challenge BPL in the area of power grid monitoring. Jerry Gaul KE7GGV speaking on Amateur Radio Newsline said:

B-P-L should watch out, here comes S-C-A. e-Radio and Direct Energy announce that they are partnering with manufacturers of smart grid devices such as thermostats, in-home displays, load controls and appliances to use broadcast RF as a way to monitor power consumption needs.

Using FM subcarriers leased from radio stations, e-Radio transmits the notifications to the home-based receivers across a municipality or utility service area that results in significantly reduced peak energy demand. The technology can also intervene on the consumer's behalf, cycling off appliances for set periods of time during peak periods.

WEIRD AND WONDERFUL

Ever wondered how the French Call Sign system is derived?

according the call sign QSO'd:

F1 is an old call issued for only 144 MHz and up but allowed in the HF bands since 2003.

F2 (two letter suffix) in an old call sign issued between the 1950 and 1955's

F3 (two letter suffix) is an old call sign issued between the 30's and 40's

F4 is an old FA1 or a regular without CW on 144 until 2003 and on HF after 2003. (A licence without CW allows only automatic CW, not manual)

F5 is a regular full licence of the 1950s (with a two letter suffix), or an old FB1 (with a three letter suffix) or a regular full licence from 99 to 2003

F6 with a three letter suffix is a regular full licence from between 1968 and 1998.

F7 with a two letter suffix, was issued to an NATO member ham in France between 1949 and 1967

F8 is and old licence from pre WW2 (with a two letter suffix) or an old FB1, with CW certificate (with a three letter suffix), of a new ham with a full CW licence issued after 2003.

F0xxx call signs (with three letter suffixes) are novice licences for phone only on 144, 10 watts.

F2, F3 or F9 are old call signs reissued to full new licensees just after WW2.

An F8Kxx licence is issued to a Radio Club.

Some National Ham Associations have call signs as follows:

F6PTT - the National Postmen's Association.

F8UFT - the Union Franï¿½aise des Telegraphistes.

F8AFH - the French national Association for Blind or Disabled Hams,

It is worthwhile knowing that the old F2, F3, F9 licences never had a 3 letter suffix.

For the overseas French territories, it's the same mess.

Need some more information? Write to f5nql@)aol.com
Maurice has an interesting and extensive personal profile on www.qrz.com

OPERATIONAL NEWS -

Hello I'm Peter Harding VK4OD the RD Contest Manage.

Next Saturday is the 15th August, and that heralds in this years RD Contest.

I have a VERY special line up of special Guest Speakers, due to the line up this year, we will present an extended broadcast that will run for 30 Minutes, and as Prior to the Contest commencing we will present this years Opening Speech, we such it will commence at 07:30 utc, and NOT at 07:45 as in the past.

So we would ask that any of the club stations that would normally air the address, that their Broadcast officers be made aware of the time change.

Following on from Last week where Lt Chris Megaw on Active Service in East Timor spoke about the WWII Radio Operator in Timor Here now is Justin VK7TWwith some more on that story.

"World War II saw the need for skilled radio people to operate and maintain defence radio equipment. Amateurs filled this need and many helped in the creation of a communications infrastructure for the Australian Defence Forces.

One such person was Signalman Max Loveless VK7ML SK. He was an amateur before WWII and became involved as a signals operator with "Sparrowforce" on Dutch Timor with the AIF.

Members of the 2/2nd Australian Independent Company, fortress signals section and members of 8th Division Signals, pooled their resources to build a set capable of raising Darwin.

After many trials and much revision a radio was devised from pieces of other sets and from parts scrounged among the troops or stolen from the enemy and on the 20th April 1942, Darwin was made aware that the Australians in Timor were alive and well. The bulk of the work was undertaken by Signallers Max Loveless and Keith Richards, assisted by Jack Sargent and John Donovan.

The set was affectionately named "Winnie the War Winner" after Winston Churchill and after several days of answering some personal questions Darwin was convinced of the authenticity of the signals, and was able to arrange for much-needed supplies to be delivered to the isolated troops.

A wonderful story of ordinary people doing extraordinary things.

I'm Justin VKTW."

http://www.awm.gov.au/encyclopedia/winnie.asp

Please be sure to post or Email your logs as soon as possible before the closing date.

In all cases, logs must be received by last mail on Monday 15th September, 2009. Late entries will not be eligible. Electronically sent logs will be returned with a courtesy note, also Snail Mail will be returned unopened.

See you in the contest.

Let me introduce myself, I am Lesley, VK5HLS, the new ALARA Contest Manager. I am looking forward to hearing lots of you, YL'S and OM'S on the air during the last weekend of August Saturday August 29 to Sunday 30th at 0600 UTC Saturday until 1159 UTC Sunday - that is 0600 utc Saturday August 29th until 1159 utc Sunday August 30th.

The rules of the contest are on the alara website: www.alara.org.au; in your August AR and also in your last Alara newsletter. No excuses for not getting on the air and having a go.

I look forward to speaking with some of you on the radio waves and then being inundated with logs before the 30th September."

73, Lesley VK5HLS

REPEATER PROBLEMS CONTINUE IN THE UK

Malicious interference and other firms of on the air abuse are still plaguing repeaters in London, England. Because of this at least one system is considering some drastic action with support of government regulators. Jeramy Boot, G4NJH, says

Repeater users in the London area will be aware that abuse continues to mar the network with a minority making it unpleasant for those who simply wish to enjoy the hobby. The East London 2m repeater, GB3EL, has been suffering from abuse recently and the Keeper has instigated a curfew between the 6pm and 6am to reduce the instances of abuse.

This action has proven effective in the past and the RSGB Emerging Technologies Committee and Ofcom support the Keeper's actions. The ETCC encourages proactive measures by all Keepers to manage their repeaters in accordance with the terms of their NoVs. Users are especially asked to consider their own actions and not to react when abuse is heard, as this is just what abusers are hoping will happen.

The Term NOV used in that report stands for Notice of Variation to a UK ham license that permits one to put up a repeater. Unlike the United States where anyone install a temporary repeater to replace one that's gone dark to fight user abuse, in the UK it's the national society that holds all of the repeater operators licenses. An individual who decides to put one up without it being licensed could wind up doing some serious time in the old gray bar hotel.

Amateur Radio Previews
August 2009

Nip down to your newsagent and get the August issue of Amateur Radio. It's already out, sharp on the first of the month. Look for the dramatic photo of a huge 26 metre dish on the front cover. That's 85 feet if you are still tuned to imperial measure, which is far wider than most residential blocks.

EME stands for earth-moon-earth, and there is a dedicated group of amateurs who bounce their signals off our big natural satellite to communicate around the globe. Two of these EME buffs are Rex Moncur VK7MO and Justin Giles-Clark VK7TW, and if you turn to page 22 you can read all about some of their recent achievements. Yes, they were using that monster dish shown on the front cover, and only three milli-watts of transmitter power - what a difference a bit of antenna gain makes!! And there are more big-dish colour photos inside the back cover.

Just imagine a group of school kids in Switzerland chatting to Doug McArthur VK3UM in Victoria, but via a transmission path of 750,000 kilometres - yes, by bouncing the signal off the moon. This was on sideband voice, and Doug was using his 8.6 metre dish on 23 centi-metres (that's about 1,296 Megahertz) and around 500 watts of transmitter power. The kids called Doug "the man in the moon", but he seems not to mind too much. Read his account of this most

successful adventure on page 24, and see "Doug's dish" pictured inside the back cover. Check the Editorial, too.

Contests are great fun, and there are plenty of them coming up this month and next. Make sure you are up to speed on the rules by reading pages 42 to 46. Peter Harding VK4OD has a full coverage for the Remembrance Day Contest and there is also the ALARA Contest plus the Westlakes Cup. Plus the regular Contests column, courtesy of Craig Edwards VK8PDX who is now in Alice Springs, on page 41.

NEW FISTS DOWNUNDER MEMBER

Fists are proudly announcing their latest new member, VK3KS-Mavis #14110. Last month FISTS featured the exceptional achievement of Mavis Stafford VK3KS, CW operator, who recently celebrated completing 70 years as a radio amateur. The suggestion was made that, in recognition of this outstanding achievement, FISTS should invite Mavis to be an honorary member of FISTS Down Under. Delighted they are that she has accepted. Mavis's career is covered in last month's FISTS Down Under.

W1AW BULLETINS TO ADD DIGITAL

Word that the ARRL's W1AW bulletin station will add new digital modes to its transmitting schedule in mid-August.

This following a survey of listeners who say that they want the digital transmissions.

On August 17th W1AW will replace its AMTOR and ASCII transmissions with PSK31 and MFSK16, respectively. RTTY will continue to be the first digital mode used in the transmission schedule. The frequencies used by W1AW for all its digital transmissions will remain the same.

The W1AW operating schedule complete with times and frequencies can be found on the ARRLWeb page .

THE PERSEIDS ARE COMING

Earth is entering a stream of dusty debris from Comet Swift-Tuttle, the source of the annual Perseid meteor shower. Although the shower will not peak until 11 and 12 August, the show is already under way.

We are just on the outskirts of the debris stream now. If you go out at night and watch the sky, you will probably only see a few Perseids per hour.

According to Science at NASA, the Earth passes through the densest part of the debris stream sometime on 12 August when dozens of meteors can be seen per hour.

Perseids can appear in any part of the sky, their tails all pointing back to the shower's radiant in the Perseus constellation.

For radio amateurs, meteor showers provide increased opportunities for meteor scatter communication. Since 2000, several digital modes implemented by

computer programs have replaced voice and Morse code communications in popularity.

The most popular program is "Weak Signal Communication, by K1JT" (WSJT) which offers specific digital protocols optimised for meteor scatter, ionospheric scatter, EME at VHF/UHF, as well as HF sky wave propagation. The programme can decode fraction-of-a-second signals reflected from ionised meteor trails and steady signals 10 dB below the audible threshold.

WW SPECIAL INTEREST GROUP --- MILITARY

Government recognises work of Bletchley Park veterans

The UK Government has decided to recognise the vital contribution made by members of the Government Code and Cipher School at Bletchley Park during the Second World War.
Surviving military and civilian veterans who served at Bletchley Park and its outstations during the Second World War are eligible for a commemorative badge. The award of the commemorative badge is a fitting recognition of the vital role played by the Government Code and Cipher School during the war.

FCC Expands ARRL's 500 kHz Experimental License:

On July 28, the FCC approved a modification that expands the ARRL's 500 kHz experimental license WD2XSH.

According to Experiment Coordinator Fritz Raab, W1FR, the expansion allows for more frequencies, more stations and portable operations.

"We can now operate between 495-510 kHz," Raab said.

"We will not be using 500 kHz itself so as to ensure that there is no conflict with the heritage stations on that frequency.

As we move along in our club life, it is important to consider the directions that our club is taking and where we are going. Amateurs tend to be an isolated group who do their own thing from their own QTH. At times getting involvement in club activities can be difficult when there is no clear direction or feeling of ownership of the project.

Clubs have to find a path that allows all its members to input ideas and develop interests that create a sense of belonging for them to grow and, in fact, retain an active membership. The difficulty for us in the amateur fraternity is that we encompass many levels of expertise in our personal involvement in the hobby. Not only are there the different classes of licence but different paths to getting the ticket. Ages are spread widely and past experiences tend to colour the attitudes of people.

We have to remember to include all our members in the experience of AR at the club level. This is also required by the anti-discrimination acts in force both at state and federal level.But then this is the spirit of the hobby as set out in the "Amateur's Creed" isn't it?

As one amateur put it to me recently, "amateur radio is a communications hobby but we are notoriously poor at communicating amongst ourselves." This should be a reminder to us all, that in promoting the hobby we must be prepared to listen, consider and discuss. Or as a well known helicopter flying amateur put it some years ago, "make sure the brain is engaged before putting the mouth into gear."

The Gympie Communications and Electronics Group, Inc. holds its weekly net at 7.30 p.m. each Monday on VK4RCM, 146.725MHz.

Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

AMATEUR RADIO OPERATORS ARE OUT OF THEIR TREES

No, not really. However, a group of amateurs in Maryborough, Queensland, and one in Curra, near Gympie, were transmitting out of their trees last Sunday, Australia's National Tree Day.

>From the Maryborough Electronics & Radio Group, "MERGE", I'm Ray, VK4TPT.

Yes, the "MERGE' mob are at it again, using living trees as radiating HF antennas.

Kathy, VK4KJ, Van, VK4VAN, Bob, VK4FNBL and myself, VK4TPT, attempted to utilize a US Navy configuration involving a non-resonant Toroidal coil and tuned parallel lines without success and so reverted to a tuned Toroid and co-axial feed.

Despite only being able to tune to the 40m band and very heavy QRWM, (that's interference from a washing machine) "MERGE" were able to make contact with; VK2AMI mobile at ARAMAC, VK2FRKO at LEMON TREE PASSAGE, VK4BE at HERVEY BAY, VK4SWR mobile in TOWNSVILLE, VK2HF at McLEAN, VK2MPT in SYDNEY, VK2ABN South of BATEMANS BAY, VK3EW on the MORNINGTON PENINSULA and VK7ROY near LAUNCESTON.

Alan, VK4TAD, in CURRA used a much earlier configuration, shunt feeding the tree with a spike driven into the trunk.

Alan reported contacts with; VK2FJPR in GLOSTER, VK2FSEG in SYDNEY, and VK7ROY near LAUNCESTON.

Alan also heard a very light signal from, and MAY have got his callsign

through to Bob, VK0BP, at the DAVIS Base ANTARCTICA.

"MERG" would like others to try out "Tree Antennas". Links to the three known systems should be available in the text version of this news.

>From the Maryborough Electronics and Radio Group, this has been Ray, VK4TPT.

THIS IS QNEWS. GREETINGS ! THIS IS DON VK4FNQA WITH NEWS
FROM NORTH QUEENSLAND.

AS WE GO TO AIR THIS MORNING, SOME OF OUR FELLOW HAMS
ARE HEADING BACK HOME FOLLOWING SUCCESSFULLY PROVIDING
COMMUNICATIONS SUPPORT FOR THE 2009 WRIGHTWAYS CARDWELL RALLY.
MAY YOU ALL HAVE A SAFE JOURNEY BACK INTO TOWN
AND HOPE YOU ARE LISTENING IN !

TARC HAS THE PROJECT NIGHT THIS TUESDAY EVENING
AUGUST 11TH FROM 7-30PM AT THE CLUB ROOMS ATOP
SES HEADQUARTERS IN GREEN STREET WEST END.
COME ALONG AND LEND A HELPING HAND TO MAKE
SOMETHING WORK OR BE THERE TO PROCLAIM "WHOOPSIES !!"

ALL WELCOME !

NEXT WEEKEND TARCADIANS WILL BE PARTICIPATING IN THE
INTERNATIONAL LIGHTHOUSE LIGHTSHIP WEEKEND, WITH
THE GROUP TRAVELLING VIA THE MIGHTY BARGE HERCULES TO CAPE
CLEVELAND LIGHTHOUSE. IT IS NOT TOO LATE TO PUT YOUR NAME DOWN
FOR THIS PORTABLE OPERATION AND TO ALSO GET THE CHANCE TO SEE MIGALOO.
CONTACT STEVE VK4SJW RIGHT NOW ON 47723767.

THE REGISTRATION DEADLINE IS DRAWING NEARER FOR THE
NORTH QUEENSLAND AMATEUR RADIO CONVENTION.
THE CONVENTION IS BEING HELD FROM FRIDAY 18TH TO
SUNDAY 20TH SEPTEMBER, HOWEVER REGISTRATIONS CLOSE ON
FRIDAY AUGUST 28TH. PLANNING IS WELL ADVANCED WITH VISITS,
DISPLAYS AND LECTURES. CONTACT THE TOWNSVILLE AMATEUR RADIO CLUB
AS SOON AS YOU CAN FOR CONVENTION INFORMATION AND A REGISTRATION
FORM.

Encourage a new member into the Hobby.
You may be the one to benefit.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE, THIS HAS BEEN
DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU
ARE LISTENING TO QNEWS.

GB2RS NEWS

Sunday 9th August 2009

The news headlines

* PLT and other interference

* FUNcube funding from generous bequest

* Luso Towers to exhibit at National Hamfest

Call it what you like, it still interferes with the radio spectrum, so proclaims the August issue of the EMC Journal talking about PLT, PLC and BPL. You can read this issue via a free download from www.nutwooduk.co.uk. It only takes a few minutes to register and there is a wealth of information on the subject of potential interference caused by these systems to read.

AMSAT-UK has announced a new amateur satellite project called FUNcube. This is an educational single cubesat project with the goal of educating young people about radio, space, physics and electronics. The project has received major initial funding from the Radio Communications Foundation made possible through the generous bequest from a silent key who wanted the hobby that he loved brought to the attention of others. FUNcube will support the educational science, technology, engineering and math curricula and, at the same time, provide an additional resource for the Radio Society of Great Britain's GB4FUN Mobile Communications Centre. The target audience consists of primary and secondary school pupils and FUNcube will have a high power 145MHz telemetry beacon that will provide a strong signal for the pupils to easily receive. It will also carry a UHF to VHF linear transponder that will have up to 1 watt and which can be used by radio amateurs worldwide for SSB and CW communications.

If you remember the exciting pictures in July RadCom from the Dayton show of the $53,000 Luso Tower, you will be interested to hear that Luso have announced that they are going to attend The National Hamfest on 2 and 3 October. This is the first time that Luso Towers will be displaying in the UK and they intend to bring one of their monster towers with them to demonstrate the mechanics involved. Other companies now booked for the National Hamfest are Linear Amp UK, Peak Electronic Design and PW Publishing. Rob Mannion, Editor of Practical Wireless, will be there to meet readers and discuss all aspects of amateur radio. For all the latest news on the national hamfest, check out www.nationalhamfest.co.uk.

This year's Perseid meteor shower could be even better than usual. According to NASA's Meteoroid Environment Office, a filament of comet dust has drifted across Earth's path and when Earth passes through it, sometime between 0800 and 0900UTC on 12 August, the Perseid meteor rate could surge to twice its normal value. Check http://spaceweather.com for details and observing tips.

Two microsatellites have recently been launched from the Space Shuttle. Castor and Pollux are 19 inch aluminium spheres that are being used to study atmospheric drag. Both satellites are transmitting telemetry on 145.825MHz and with around 1W output they should be easy to receive. Full programme details are on the web at tinyurl.com/GB2RS-ande. The provisional programme for the RSGB Convention is now available on the RSGB website and it is packed with highlights. Visitors are still able to book packages on the RSGB Convention early bird booking discounts until Friday the 14 August. Savings of £5 per person per night are available, along with daily or weekend tickets for day visitors and there are even discounts available for groups of five tickets.

Stuart Tyler, G4UDZ has been the QSL sub manager for the G4X sub group since 1984 and has recently announced his intention to retire. He calculates that, in his time as a volunteer, he has personally shipped over 250,000 cards. The RSGB wishes to acknowledge his efforts as a volunteer and on behalf of his fellow amateurs to thank him for his dedicated service. Envelopes and uncollected cards have been transferred to the new sub manager, John Fogden, G4WSX, who will act for both G4W and G4X sub groups – see the RSGB members website for details. Members are asked to pass on this information to any G4 X callsigns that they may know. All amateurs should note that sub managers are only obliged to retain uncollected QSL cards for a period of 3 months where no SAEs are available.

Entries in the 2009 International Lighthouse/Lightship Weekend have reached 346. The UK as a whole has the most stations registers, some 52 in total to date. Australia has 46 stations registered, Germany 42 and the USA 37. Some exotic places are taking part too. The International Lighthouse/Lightship Weekend, which this year begins on 15 August, is fast becoming one of the most popular international events in the amateur radio calendar. More information is online at www.illw.net.

And now for the details of rallies and events for the coming week

In response to many requests there will be an hour-long talk and demonstration of amateur microwave moon bounce and the Deep Space Network during the afternoon of the Flight Refuelling Hamfest today, on 9 August, at 1300. FRARS EME Group members will be in attendance and able to answer questions on equipment requirements and the techniques needed to operate on the bands 1.3-24GHz. In addition, Paul, M0EYT will demonstrate his 8.4GHz Deep Space Network reception using a homebuilt receiver and tracking 3.4m parabolic dish. FRARS Hamfest is held at the Cobham Sports and Social Club, Merley, Wimborne Minster in Dorset. Details at www.frars.org.uk.

Now for the news of special events

Norfolk County RAYNET will be operational on Sunday 9 August with a Special Event Station, GB4NCR, from Walcott in Norfolk. Operations will be on 2m and 80m SSB with a primary frequency of 3.663MHz. Note that 40 will be used if 80m isn't open. QSL cards are available and can be send either via the Bureau or direct to G4PSH with a stamped self-addressed envelope. During this event, Exercise Sea Spray will take place in cooperation with the local community and Flood Wardens for this area.

Several stations have got in touch with their details for the International lighthouse and Lightship weekend on 15 and 16 August. GB2ELH will be on air from Eshaness Lighthouse in the Shetland Islands, QSL via bureau or MM5PSL. TM0LHG will be active from the Gravelines Lighthouse at Petit Fort Philippe, QSL direct or via the VERON bureau as they ask that nothing is sent via the French Bureau. GB0MOG will be on the air from the Mull of Galloway Lighthouse in Scotland. GB5HOD will be operated from the Hodbarrow Sea Wall Lighthouse and GB2SCA will be operated by the Scarborough Special Events Group from Scarborough Lighthouse, QSL via the Bureau, or direct to club call G0OOO. Swansea ARS will be operating on the Helwick lightship at Swansea Marina, for details, please contact Roger, GW4HSH on 01792 404422. A list of worldwide entrants can be found online at www.ILLW.net.

Members of Sands Amateur Radio Contest Group will be operating a number of stations on 15 August to celebrate Galloways Society for the Blind. The 25th Anniversary Cross Bay Walk will be led by Queens Guide Cedric Robinson MBE. The walk generally takes around three hours and needs The Queens Guide to navigate between Arnside and Kents Bank safely because of the quicksands around the bay that have taken many lives over the years. The callsigns to listen out for are GB2GSB, located at Arnside Knott, M0SCG/M which will be operating from the tractor which follows the walkers and GB4GSB, located at the end of the walk at Kents Bank. A special certificate is on offer for amateurs and SWLs who work any of the stations, more details at QRZ.com

And now the HF DX news compiled from 425 DX News and other sources.

LA1BN and LA1LO will be operational on 50.155MHz from grid square JO39 in the Norwegian mountains from 10 to 15 August. You should QSL as directed by the operators.

PD55EA will be on the air until 28 August. They will be active on 10, 20 and 40m using SSB and digital modes. There may also be activity on 2m. QSLs will be sent automatically via the bureau. If you want to QSL in other ways, please send QSL your via PD7BZ.

>From August 11 to 29, F2VX and FYFYD, will sign 4J/HC from Azerbaijan using mainly HF SSB. QSL via HC, direct with an sae plus postage or via the French Ref-Bureau. Please do not use any other bureau.

T6AD will be on the air using mainly CW during his free time from Afghanistan until 22 August. QSL via K2AU.

To celebrate the Formula 1 Spanish Grand Prix, five stations will be active until 23 August. Listen out for AM5FUV, AO5FUV, AN5FUV, EG5FUV and EH5FUV. They will be active mainly on the HF bands. A special award is available to those who will make at least three QSOs with three different stations. More information see QRZ.com.

OY/SP6IXF and OY/SP7VC will operate from the Faroe Islands from 10 to 16 August, all bands. SP7VC/MM will operate maritime mobile on the ferry from Denmark, via the Shetlands to the Faroe Islands. QSL to their home calls, direct or bureau. Now the contest news

There are three contests to watch out for over the next week and we also bring you advance notice for a UHF event.

On 11 August the 432MHz UK Activity Contest takes place between 1900 and 2130. Using all modes in the 432MHz band, the exchange is signal report, serial number and locator.

The 80m Club Sprint takes place on 13 August from 1900 to 2030. Using CW on the 3.5MHz band, the exchange is serial number and name.

The 70MHz Trophy Contest is on 16 August from 0900 to 1500. Using all modes in the band, the exchange is signal report, serial number, locator and postcode.

Advance notice now for 18 August when the UHF Activity Contest takes place using the 1.3 and 2.3GHz bands. All modes are allowed and the exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 27th July to the 2nd of August, compiled by Neil Clarke, G0CAS on the 3rd of August.

The solar disc was spotless for the third consecutive week. The last sunspot that was visible was on the 10th of July. Solar activity was very low with no solar flares taking place. Solar flux levels averaged 68 units with very little daily variation. The 90 day solar flux average on the 2nd was 69 units, that's the same level as last week. X-ray flux levels remained below the minimum reporting level everyday. Geomagnetic activity was quiet everyday. The average was Ap 4 units. Solar wind data provided by the ACE spacecraft saw solar wind speeds vary between 330 and 430 kilometres per second. Particle densities were low except for a rise to 25 particles per cubic centimetre during the evening of the 2nd. With the quiet geomagnetic field the Bz varied no more than minus and plus 7 nanoTeslas for the period.

And finally the solar forecast. This week solar activity is expected to continue at very low levels. At present there is no sign of any prolonged increase in solar activity. At best all we may see over the coming weeks are small sunspot groups which will have very little effect on propagation. Solar flux levels should be around the 70 mark all week. Geomagnetic activity could be at unsettled levels today and tomorrow due to a small coronal hole but then for the remainder of the week quiet levels are expected. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north.

Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of about 22MHz. The optimum working frequency with a 90 per cent success rate will be around 18MHz. The best time to try this path will be between 0800 and 1400 hours UTC. Sporadic-E could take place on some days during the coming week.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA Chelmsford Amateur Radio Society will be starting their next Foundation evening course on 3 September. The six week course will be held every Thursday evening at the Danbury Village Hall. To find out more talk to Clive on 01245 224577. Horndean & District ARC will be running their next Licence training course in October. The first part of the tuition for the Foundation Licence will be on 3 October, with the remainder of the course and the exam on 11 October. An Intermediate licence course will also be run, with the exam on 11 October. The Foundation course is run at a registered venue in the Portsmouth area. Further information from Stuart, G0FYX on 02392 472846. On Sunday 9 August Chelmsford Amateur Radio Society is operating HF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008. On Sunday 9 August Wimbledon and District Amateur Radio Society is dismantling its summer camp. Contact Jim, M0CON, on 020 8874 7456. On Monday 10 August Coulsdon Amateur Transmitting Society is having a barbecue at the QTH of G4RWW. Contact Andy, G8JAC, by email to g8jac<at>btinternet.com. On Monday 10 August Felixstowe and District Amateur Radio Society is having a field activity evening on Felixstowe Beach. Contact Paul, G4YQC, by email to pjw<at>btinternet.com. On Tuesday 11 August Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 11 August Plymouth Radio Club is having a normal meeting because Rob Mannion's planned visit has had to be postponed due to health reasons. Contact Bob G7NHB 01752 343177. On Wednesday 12 August Aylesbury Vale Radio Society is having a discussion evening. Contact Roger, G3MEH, on 01442 826 651. On Wednesday 12 August Dover Radio Club is having a portable evening at Farthing Common. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 12 August Farnborough and District Radio Society is having its construction contest and junk sale. Contact Derek G3OFA, by email to mail<at>fdrs.org.uk. On Wednesday 12 August Harwich Amateur Radio Interest Group is having a talk on the Isle Of Man DXpedition. Contact James, M0ZZO, on 01255 242748. On Wednesday 12 August Itchen Valley

Amateur Radio Club is having a talk on data compression by Graham, G3XSD. Contact Charlie, M0WYM, on 02380 439560. On Wednesday 12 August Norfolk Amateur Radio Club is having an informal, construction and workshop evening. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 12 August South Essex Amateur Radio Society is on the air. Contact Dave Speechley, G4UVJ, on 01268 697978. On Wednesday 12 August Southgate Amateur Radio Club is having a barbecue. Contact David Sharp M0XDS, by email to david.sharp1<at>tesco.net. On Thursday 13 August Basingstoke Amateur Radio Club is having a fox hunt to find Graham, M0CYX. Contact Clive, G4ODM, on 01256 326050. On Thursday 13 August Bittern DX Group is having an informal evening. Contact Keith, G0GFQ, on 01263 588 506. On Thursday 13 August Edgware and District Radio Society is on its summer break. Contact Mike, G4RNW, on 020 8950 0658. On Thursday 13 August Huntingdonshire Amateur Radio Society is having an informal evening. Contact Gerald, G8AKL, on 01487 740794. On Thursday 13 August Reading and District Amateur Radio Club is having a demonstration by Tony Hornby G1HBD, of his mobile ATV van. Contact Pete, G8FRC, on 01189 695 697. On Friday 14 August Brede Steam Amateur Radio Society is spending the weekend taking part in ILLW. Contact Steve, on 01424 720815. On Friday 14 August Cambridge and District Amateur Radio Club is having a shack evening. Contact David Leary, G8JKV on 01223 355254. On Saturday 15 August Chelmsford Amateur Radio Society commences a weekend operating from Chelmsford High Street to promote amateur radio. Contact Martyn, G1EFL, on 01245 469 008. On Saturday 15 August Harwell Amateur Radio Society is having its summer barbecue. Contact Malcolm, G8NRP, on 01235 524844. On Saturday 15 August Southdown Amateur Radio Society is operating at Beachy Head for the weekend for Lighthouses on the Air. Contact John, G3DQY, on 01424 424 319. On Sunday 16 August Chelmsford Amateur Radio Society is operating HF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

NEWS FOR THE SOUTH-WEST Earlier this year the idea to re-start the Mid Somerset Amateur Radio Club was mooted. Following successful informal meetings once a month, the club has now officially formed with a constitution and elected committee. Meetings are held at 7pm on the 2nd Tuesday every month at Peter Street Rooms, Peter Street, Shepton Mallet, Somerset. There is a proposal to organise a RAYNET Group in Jersey. RAYNET members from Guernsey are visiting to give a talk and to see if there is sufficient interest in Jersey. The talk will be held at the Jersey Amateur Radio Society clubhouse at La Moye on Wednesday 19 August at 7.30pm. On Sunday 9 August Blackmore Vale Amateur Radio Society is having a pitch at the Flight Refuelling Rally. Contact Tony G0GFL, on 01258 860741. On Monday 10 August Cornish Radio Amateur Club is having a picture show by Peter, G3WKP. Contact Steve, G7VOH, on 01209 844939. On Tuesday 11 August Blackmore Vale Amateur Radio Society is having a Main meeting. Contact Tony, G0GFL, on 01258 860741. On Tuesday 11 August Poldhu Amateur Radio Club is having a barbecue at the Marconi Centre. All are welcome, but please contact Keith, G0WYS, with numbers. Contact Keith Matthew, G0WYS, by email to

vickeith<at>globalnet.co.uk. On Wednesday 12 August Blackmore Vale Amateur Radio Society is having a committee meeting. Contact Tony G0GFL, on 01258 860741. On Wednesday 12 August Taunton and District Amateur Radio Club is on the air and holding a Morse class. Contact William, G3WNI, on 01823 666 234. On Wednesday 12 August Thornbury and South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Thursday 13 August South Bristol Amateur Radio Club is having a workshop on multimeters with G4RZY. Contact Len, G4RZY, on 01275 834 282. On Thursday 13 August Swindon and District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750. On Friday 14 August Torbay Amateur Radio Society is having an operating night. Contact Dave, G6FSP, by email to g6fsp<at>tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 10 August Gloucester Amateur Radio And Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 10 August Leicester DX Group is on the air. Contact Clive, M3CGH via the web at www.leicesterdx.co.uk. On Monday 10 August South Birmingham Radio Society is reviewing forthcoming contests and the equipment needed. Contact Don, on 0121 458 1603. On Monday 10 August South Normanton Alfreton and District Amateur Radio Club is having a fox hunt. Contact A J Higton, 2E1GWO, on 01773 783658. On Tuesday 11 August Derby and District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday 11 August Eagle Radio Group is having a talk on D-Star Repeaters by Steve, M1ERS. Contact Terry, G0SWS, on 01507 478590. On Tuesday 11 August Loughborough and District Amateur Radio Club is having an open forum on DAB radio. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 12 August Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. Contact Pam Rose, on 01427 788356. On Wednesday 12 August Midland Amateur Radio Society is having a rag chew and training classes. Contact Norman, G8BHE, on 01214 229 787. On Wednesday 12 August South Notts Amateur Radio Club is having a talk on Morse by G4NSP. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 12 August Telford and District Amateur Radio Society is discussing Society projects old and new. Contact Mike, G3JKX, on 01952 299 677. On Friday 14 August Bromsgrove and District Amateur Radio Club is having a committee meeting. Contact Chris, M0BQE, on 01905 776 869. On Friday 14 August Coventry Amateur Radio Society is having a fish and chip supper. Contact John, G8SEQ, on 07958 777363. On Friday 14 August Hucknall Rolls Royce Amateur Radio Club is having a general club meeting at 8pm. Contact Dave Wilde, G1YAI, by email to webmaster<at>hrrarc.com. On Friday 14 August South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Monday 10 August Angel Of The North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 10 August Bolton Wireless Club is having an introduction to Morse Code with Eric, G4FSN. Contact boltonwireless<at>gmail.com. On Monday 10 August Sheffield Amateur

Radio Club is making simple VHF and UHF antennas. Contact Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 10 August Thornton Cleveleys Amateur Radio Society is having wrestling madness with John, M3WAZ. Contact John Foster, M3WAZ, on 01253 399377. On Tuesday 11 August Isle Of Man Amateur Radio Society is having a talk on shack safety by Stephen Underwood. Contact Stuart Hill, GD0OUD, on 01624 613226. On Tuesday 11 August Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232. On Tuesday 11 August Otley Amateur Radio Society is having a rig familiarisation night. Contact Paul, 2E0PAK, on 07768 996370. On Tuesday 11 August Warrington Amateur Radio Club is having part 2 of the talk on Looe Island by Mike, M0ACK. Contact Roger, M0DWQ, on 07868 000 705. On Wednesday 12 August Goole Radio and Electronics Society is having a barbecue Night. Contact Ken, G6YYN, on 01757 638539. On Wednesday 12 August Hornsea Amateur Radio Club is having a talk by Tony, G0AZQ an aero subject. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Wednesday 12 August Mid-Cheshire Amateur Radio Society is performing tower maintenance and removing antennas. Contact Peter Paul Fox, G8HAV, on 01606 553401. On Thursday 13 August South Manchester Radio And Computer Club is having a talk on Windows 7 by Dave, G4UGM. Contact Ron, G3SVW, on 0161 969 3999. On Friday 14 August East Cleveland Amateur Radio Club is on the air. Contact Alistair, G4OLK, on 01642 475 671. On Friday 14 August Hornsea Amateur Radio Club is preparing for Driffield Steam Rally. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Friday 14 August Tynemouth Radio Club is preparing for Lighthouse Weekend. Contact Graham Errington, on 07812 172136. On Saturday 15 August Hornsea Amateur Radio Club is attending Driffield Steam Rally. Contact Gordon MacNaught, G3WOV, on 01377 240573.

NEWS FOR SCOTLAND On Tuesday 11 August Livingston and District Amateur Radio Society is having an operating evening. Contact Norman, on 07740 946192. On Wednesday 12 August Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905. On Thursday 13 August Aberdeen Amateur Radio Society is having a talk by Stan Sutherland, GM4BKV. Contact Lewis, GM4AJR, on 01224 575 663. On Friday 14 August Cockenzie and Port Seton Amateur Radio Club has its 16th annual junk night. Contact Bob, GM4UYZ, on 01875 811 723. On Saturday 15 August Aberdeen Amateur Radio Society commences its ILLW weekend event at Girdleness Lighthouse. Contact Lewis, GM4AJR, on 01224 575 663. On Saturday 15 August Ayr Amateur Radio Group commences its weekend activating Tunberry Head Lighthouse as part of ILLW. Contact Charlie, MM0GNS, on 01563 551704. On Saturday 15 August Cockenzie and Port Seton Amateur Radio Club is operating GB2LBN from Barns Ness for ILLW. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES On Monday 10 August Llanelli Amateur Radio Society is having a club raffle and social night. Contact Craig, MW0MXT, on 01269 840292. On Tuesday 11 August Marches Amateur Radio Society is having a talk by Pat, MW0WER, entitled "getting in touch". Contact Dave MW0AYM, on 01691 777242.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

==> THE ARRL TEACHERS INSTITUTE WRAPS UP SUCCESSFUL SUMMER SESSIONS

In 2004, the ARRL held its first Teachers Institute on Wireless
Technology <http://www.arrl.org/FandES/tbp/ti.html>. That summer, nine
teachers came from across the country to learn how to bring this
exciting technology back to their classrooms. Six years later, 93
teachers from 29 states attended eight sessions of the ARRL Teachers
Institute. "The ARRL Teachers Institute continues to be a resounding
success," said ARRL Education Program Coordinator Mark Spencer, WA8SME.
"These teachers, upon returning to their classrooms, will reach out to
```

approximately 3000 students, using new approaches to instructing the science of radio through the many hands-on activities that they learned about during the Teachers Institute."

This year, the eight sessions of the Teachers Institute were held at various venues in Arizona, California, Florida, Michigan, New Mexico and Ohio, with the last session taking place at ARRL Headquarters in Connecticut. "By holding the Teachers Institute sessions at various locations in the country, it gives them a national flavor," Spencer said. "This increased tempo of offerings was made possible with the addition of Miguel Enriquez, KD7RPP, and Nathan McCray, K9CPO, who joined me on the Teachers Institute instructor team."

Spencer said that a typical Teachers Institute session includes about 12 participants, with about half of those licensed amateurs. "The final section at Newington this year was unusual in that eight of the 11 participants were hams before the session," Spencer recounted, "but the three non-ham teachers studied for and passed their Technician licenses exams during the session, rounding out the roster with 100 percent hams!" The ARRL VEC expedited their applications so three new hams received their call signs that day. "These teachers had the unique experience of making their first ham radio contacts with the headquarters station W1AW, with the appropriate pomp and circumstance for such a momentous experience in a ham's career," Spencer said.

The ARRL Teachers Institutes provide a four-day, intensive in-service training opportunity for classroom teachers in basic electronics, the science of radio, bringing space technology into the classroom, microcontroller programming and basic robotics. For the first time, an advanced session of the Teachers Institute was added this summer. This session, made available to a few Teachers Institute graduates, included an expanded space in the classroom unit. This inaugural session, dubbed TI-II, focused on assembling and integrating the equipment and software required to setup a satellite Earth ground station, how to operate the ground stations to communicate with other hams via ham radio satellites, and finally how to intercept, copy, decode, interpret and use satellite telemetry in the classroom.

The Teachers Institute program is one component of the grant offerings within the Education and Technology Program (ETP) http://www.arrl.org/FandES/tbp/ti.html>. This portfolio of resources is made available to schools and school teachers to advance the integration of wireless technology literacy and ham radio into school curricula. The ETP is possible only because of the generous donations from those who share in the passion of ham radio <https://www.arrl.org/forms/development/donations/education/2008/>. The Dayton, Ohio session of the Teachers Institute was supported by the Dayton Amateur Radio Association (DARA) <http://www.w8bi.org/>. The cost of the equipment provided to the teachers during the TI-II was offset by the generous support of Yaesu <http://www.yaesu.com/>.

The success of the Teachers Institute is best told by the participants themselves:

* "I highly recommend this inspiring and practical course -- it covered everything from basic electronics to satellite operations to robotics in ways that are directly applicable to many grade levels and subject areas. What a fantastic way to integrate knowledge and get students inspired to learn!"

* "It made me realize that if we can get students interested in radio and electronics technology, there are no limits to what they can achieve and develop. The TI was an eye opener, even for a long time teacher like me. It made me excited to learn again."

* "This program is perfect for a teacher who wants to learn basic electronics and wireless technology. This is a great workshop to put on your resume and a great investment in you and your students."

* "I thought that I knew the Parallax BOE-BOT before the TI, but I learned more than I previously knew during the TI. Before the session, I would not have gotten my Technician class license; I did so only because of the encouragement of the instructor and my fellow TI participants."

* "This was a great program and very productive use of time. The pace was good for varying levels. I found exciting new ideas for use in the classroom. The most important thing for classrooms: Having Fun!"

* "I can't wait to implement the ideas in my classroom that were presented during the TI."

* "ARRL: Keep up the good work!"

Information on the 2010 sessions of the ARRL Teachers Institute on Wireless Technology will be available in February.

==> MEREDITH ATTWELL BAKER, MIGNON CLYBURN SWORN IN AS FCC COMMISSIONERS: NOW THERE ARE FIVE

The Federal Communications Commission now has its full complement of five Commissioners. On Friday, July 31, Meredith Attwell Baker joined Chairman Julius Genachowski, Robert McDowell and Michael Copps. On Monday, August 3, Mignon Clyburn came on board.

Baker was sworn in on July 31 by Chairman Genachowski in a private ceremony in the Chairman's office. "I am grateful to President Barack Obama for nominating me -- and the United States Senate for confirming me -- to this important position and I look forward to rolling up my sleeves and working on policies and programs that will help build a 21st century communications infrastructure that can provide sustained economic growth, opportunity and prosperity for the nation, and for all telecommunications users," Baker said. "The FCC staff is well known for their expertise, professionalism and dedication, and I look forward to working together on these important issues. I am excited to be joining Chairman Julius Genachowski, and Commissioners Michael Copps, Robert McDowell, and Mignon Clyburn to ensure that our communications networks

and technologies serve the nation's needs and improve the lives of all Americans"
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-292494A1.pdf>.

Clyburn was sworn into office at 11 AM on August 3 by Senior District Judge Matthew J. Perry Jr in her home state of South Carolina. "I am deeply honored that President Obama and the United States Senate have entrusted me with the privilege of serving as a Commissioner of the Federal Communications Commission," she said. "I look forward to working with the Administration, Congress, Chairman Genachowski, my fellow Commissioners and the incredibly talented FCC staff, to ensure that all Americans enjoy the tremendous benefits offered by modern communications. This is an exciting and challenging time in our nation's history. I am eager to hear from and work with all stakeholders to carry out, along with my colleagues, communications policies that protect consumers and encourage robust competition and innovation"
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-292513A1.pdf>.

Pointing out Baker's "broad and deep experience" and Clyburn's "years of state-level and private-sector experience," Chairman Genachowski welcomed both women to the FCC. "At this critical moment in history, I look forward to collaborating with my fellow Commissioners on ways that the agency can improve the lives of all Americans through communications."

Baker fills the unexpired term of fellow Republican and former Chairman Kevin J. Martin who resigned in January 2009; her term will expire June 30, 2011. Clyburn fills the unexpired term of Republican Deborah Taylor Tate, whose tenure as a Commissioner came to a close on January 3, 2009 when the Senate failed to confirm her nomination; Clyburn's term will expire June 30, 2012. Baker will join Robert McDowell as a Republican on the Commission. Chairman Julius Genachowski and Michael Copps are Democrats, as is Clyburn. Only three sitting Commissioners may be members of the same political party.

==> LOOK FOR THE SEPTEMBER ISSUE OF QST IN YOUR MAILBOX

The September issue of QST -- our annual Emergency Communications issue -- is jam-packed with all sorts of things that today's Amateur Radio operator needs, with a special focus on Public Service. From product reviews to experiments to contesting, the upcoming issue of QST has something for just about everyone.

Have you ever thought about becoming involved with Amateur Radio in your Section? ARRL Chief Operating Officer Harold Kramer, WJ1B, demystifies the ARRL Field Organization in his article "Your Place in the ARRL Field Organization." Mike Bryce, WB8VGE, knows that as hams, we need to be ready to go on a moment's notice. In his article "A Gel Cell Battery Charger for the Low Power Station," he tells how you can keep those batteries charged for the next time you get called into action. Bob Bruninga, WB4APR, has a proposal that builds on the groundwork of sending text messages via Amateur Radio in his article "Universal Ham

Radio Text Messaging Initiative."

QST Product Review Editor Mark Wilson, K1RO, reviews SPE's expert 1K-FA linear amplifier. According to Wilson, "With the SPE Expert 1K-FA, you can add power on 160 through 6 meters to your home or portable station. The built-in antenna tuner allows operation with a variety of antennas." QST Contributing Editor Phil Salas, AD5X, also takes a look at some antenna accessories from Array Solutions.

If you have been participating in phone contests for a while and are looking for a new challenge, CW contesting may be what you're looking for. But how does one new to CW -- or the owner of a rusty fist -- get started? ARRL Contest Branch Manager Sean Kutzko, KX9X, takes a look at that very question in "This Month in Contesting." The results of the 2009 ARRL International DX Phone Contest are in. Did you top your score from last year? How did your closest rival do? Also, find out about upcoming contests in Contest Corral.

Of course, there are all the columns and features you know and love in September QST: Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, ARRL VEC Honor Roll, Hamspeak and more. Look for your September issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <http://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment covers the month of July.

The ARRL Board of Directors held its 2009 Second Meeting July 17-18 in Windsor, Connecticut <http://www.arrl.org/news/stories/2009/07/24/10980/?nc=1>. The Board devoted the second day to reviewing and revising the ARRL Strategic Plan that was adopted in October 2006 <http://www.arrl.org/members-only/stratplan/ARRL_Strategic_Plan_October_2006.pdf>.

The Administration and Finance Committee and the Programs and Services Committee -- two standing committees of the ARRL Board of Directors -- met prior to the 2009 Second Meeting <http://www.arrl.org/news/stories/2009/07/10/10958/?nc=1>.

Three newly appointed Vice Directors -- Pacific Division Vice Director Jim Tiemstra, K6JAT, Southeastern Division Vice Director Jeff Beals, WA4AW, and West Gulf Division Vice Director John Thomason, WB5SYT -- attended an orientation session at ARRL HQ just before the Board meeting <http://www.arrl.org/news/stories/2009/07/16/10968/?nc=1>.

The 2008 ARRL Annual Report reviews the major events of the year, documenting the renewed growth of the ARRL and the activities of the

Amateur Radio Service. It is available online <http://www.arrl.org/announce/annualreport/> and in print.

HR 2160, The Amateur Radio Emergency Communications Enhancement Act of 2009, gained 11 new Congressional co-sponsors <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>.

QST Technical Editor Joel Hallas, W1ZR, prepared an expanded look at new products -- including new VHF and antenna-related equipment, as well as many categories of accessories -- introduced at the 2009 Dayton Hamvention <http://www.arrl.org/files/qst-binaries/QS0709NewatDayton.pdf>.

ARRL Technical Relations Manager Brennan Price, N4QX, attended the United States ITU Association (USITUA) and the US Working Party 5B (maritime, aeronautical and radiolocation) meetings. ARRL Technical Relations Specialist Jon Siverling, WB3ERA, attended meetings of US Study Group 1 (regulatory) and Working Party 7D (propagation).

W1AW/KL7 and NU1AW/KH6 represented the ARRL and IARU, joining more than 85 IARU HQ stations in the IARU HF World Championships <http://www.arrl.org/news/stories/2009/07/06/10947/?nc=1>.

Frank Piper, KI8GW, of Pickerington, was appointed Section Manager of the ARRL Ohio Section <http://www.arrl.org/?artid=9056>.

A special bonus section to help new amateurs choose a radio was added to the "ARRL Ham Radio License Manual" and made available for download to ARRL members <http://www.arrl.org/news/stories/2009/07/22/10975/?nc=1>.

W1AW, the Hiram Percy Maxim Memorial Station, in conjunction with WA6ZTY on the West Coast, conducted a summer Frequency Measuring Test <http://www.arrl.org/news/stories/2009/06/15/10884/?nc=1>.

ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, received reports of inappropriate language on 20 and 80 meters, a possible jamming signal on 20 meters, unlicensed hunters using 2 meters, as well as a continuous carrier on 2 meters.

ARRL Laboratory Manager Ed Hare, W1RFI, and Lab Engineer Mike Gruber, W1MG, held a telephone conference with Laura Smith and the FCC's Kansas City Field Office regarding a powerline noise case in that state.

ARRL Regulatory Information Branch Manager Dan Henderson, N1ND, together with Media and Public Relations Manager Allen Pitts, W1AGP, compiled an information packet for Division Legislative Action Chairs, Legislative Action Chairs and Legislative Action Assistants to use when speaking with Congressional members about Amateur Radio and HR 2160.

ARRL ARISS Program Manager Rosalie White, K1STO, attended the ARISS annual meeting in the Netherlands <http://www.rac.ca/ariss/oindex.htm>.

The ARRL Executive Committee approved eight Education and Technology Program grants.

==> SCOTT REDD, K0DQ: THE BIGGEST GUN OF ALL

Vice Admiral John Scott Redd, K0DQ (US Navy, retired) has, throughout his 36 year military career, helped to make the world a safer place. >From postings in Uruguay to Iraq to serving as Commander of the Navy's Fifth Fleet as a naval officer, to becoming Director of the National Counterterrorism Center (NCTC), Redd has served his country with distinction. Earlier this year, President George W. Bush presented him with the National Security Medal in a White House ceremony <http://www.arrl.org/news/stories/2009/01/27/10594/> for "his more than 40 years of exceptional service to the Nation, strengthening its intelligence capabilities and improving national security." President Bush called Redd "an innovator, a strategic thinker, an inspirational leader and a dedicated servant to the Nation, respected for his vision, courage and integrity." But intermingled in his Navy career was Amateur Radio. This year, Redd, an active DXer and contester, became the first person ever to win all six of the major HF contests: The ARRL International DX Contests (SSB and CW), the CQ World Wide Contests (SSB and CW) and the CQ Worked All Prefix (WPX) Contests (SSB and CW).

"Ham radio was my 'Internet' in the 1950s," he told the ARRL. "Growing up in a very small town (Sydney, Iowa, population 1000), ham radio was my window on the world that generated an interest in far-away places and a vision to do something beyond my home town. That turned out to be the US Navy, via the US Naval Academy. That changed my life. The Navy is a technological service and virtually everything in the military has a technical dimension. Electricity, electronics and especially, the electromagnetic spectrum, were key aspects of most of my seagoing tours and, indeed, even my later policy assignments. Being comfortable with technology -- having built kits, antennas and the like -- and being zapped with 110 ac more than a few times -- gave me a leg up."

Redd started out in 1954 as a DXer as K(N)0DQI; he had earned DXCC by the time he turned 13, "which I audaciously proclaimed on my QSL cards as the youngest in the world (no one ever objected!)," he quipped. "Climbing the DXCC Honor Roll died as a dream when I went to the Naval Academy in 1962, so the logical thing was to turn to DX contesting. I operated contests as a multi-operator from W3ADO for four years then, as CX2CO in 1967 CQWW in Uruguay as a Fulbright Scholar. That was my first World Championship, competing in the M/S [multi-operator/single transmitter] category; that was also my last multi-operator experience."

In the early 1970s, Redd was on assignment at the Mexican Naval Academy. While there, he was "contesting consistently as XE1IIJ (with a number of aliases, including 6D1AA, 4C5AA and 6J9AA). In the 1971/2 contest season, I managed to win four of the five major contests: Both modes of ARRL DX, CQWW Phone and WPX SSB (there was no WPX CW in those days). I placed third in the world in CQWW CW. That set me on a personal quest to win all five (later six) of the major DX contests."

Redd pointed out that one of his many contesting highlights was working 10,000 QSOs in the 1973 ARRL International DX Phone Contest: "This was before 5BDXCC and 10 meter Novice phone and it was the first time that had been done -- it was also the last time I did a phone contest to any useful effect. I think that stands as the all time two weekend ARRL DX phone record (it's sort of like Roger Maris breaking Babe Ruth's home run record -- it gets an asterisk)."

As his naval career progressed, he didn't have the chance to contest as much as he had before, "other than occasional contests from Lenny Chertok's W3GRF (now a Silent Key), QTH. Most were Top 10 finishes, but I only won the US once -- the ARRL DX CW in 1986. My next contesting opportunity was A92Q in 1995 when I was the Fifth Fleet Commander, homeported in Bahrain. By that time, there was a CW WPX and that contest was my first contest in almost a decade (and the first one using a computer to log)."

Six years later, after Redd retired, Jim Neiger, N6TJ, introduced him to Jacky Oduber, P43P, and "goaded me into going down to Aruba," he told the ARRL. "My first contest from Aruba was CQWW CW in 2001 as P40Q. I would classify this as a 're-learning experience,' but it resulted in a #5 finish in SOABHP [single operator, all band, high power]. Seven months later, I went back to Jacky's for WPX CW and won the World SOABHP as P41P. So I had now won the World in the SOAB category in five out of six of the majors, but I was still missing a CQWW CW win for the Grand Slam."

Calling the 2002 CQWW CW the "Year of Aruba" -- the three top scores in the contest came from there -- Scott placed second. "In 2003, I was going back into government and preparing to go to Iraq, so there was no contesting," he recounted. "In 2004, I headed back to Aruba for the CQWW CW, but I came up short as #3 WW in SOABHP. In spring of 2005 -- just after having been nominated by President Bush to be Director of the National Counterterrorism Center (NCTC) <http://www.nctc.gov/> -- I went back to Aruba and won CQ WPX CW in the Low Power category; I barely missed the SOAB LP all-time record. In the process, I found out I enjoyed the LP category. The next three years were completely driven by work at NCTC. I finally got back to contesting almost four years later when P40A's QTH was available for CQWW CW 2008. There were no amplifiers, so I entered SOABLP [single operator, all band, low power]: That resulted in the final piece of the puzzle falling into place."

Jeff Briggs, K1ZM, invited Redd to operate VY2ZM on Prince Edward Island for the ARRL DX CW Contest in February this year. "That was clearly right place (great low band antennas and near Europe) at right time (sunspot minimum), resulting in #1 W/VE, as well as top worldwide SOABHP," he told the ARRL.

"The 'bookends' for ARRL DX are almost four decades apart: The Mexican operations (winning the world on phone and CW in '72 and phone in '73) and, interestingly, winning W/VE from VY2ZM in this year's ARRL DX CW," he said. "That also turns out to have been the top worldwide score. In between, I've probably operated a dozen ARRL DX contests as W3GRF or,

more recently, W4RX (or K0DQ from W4RX's station), all near Washington, DC and at great disadvantage to the New Englanders. Most were Top 10, but the only one I won before this year was the 1986 one from W3GRF."

In 2008, Redd was inducted into the CQ Amateur Radio Hall of Fame <http://www.arrl.org/news/stories/2008/05/16/10100/>. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to Amateur Radio, and those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet.

Redd calls Amateur Radio "a magical hobby, even for me at 64. Although I would certainly have liked to have been more active over the years, absence did make the heart grow fonder and I still get a blast out of contesting, even though I feel like I'm always relearning old lessons which have receded in my subconscious."

==> FCC ISSUES CITATION TO WASHINGTON COMPANY FOR SELLING, IMPORTING UNAUTHORIZED RF DEVICES

On July 28, the FCC issued a Citation to The Spy Store <http://www.thespystore.com/> for marketing unauthorized radio frequency devices <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-1697A1.pdf>. According to the Commission, these devices were in violation of the Communications Act of 1934, As Amended and the Commission's Rules, as well as United States Customs and Border Patrol regulations.

On February 13, the Spectrum Enforcement Division of the Commission's Enforcement Bureau sent Spy Store a Letter of Inquiry, initiating an investigation. The FCC wanted to know if the Washington State company was marketing an unauthorized radio frequency device, specifically, the GPS-JM2 GPS Jammer. According to the Citation, the FCC observed that the device was marketed on the retailer's Web site on September 4, 2008. The device jams signals emitted by a GPS transmitter, disabling a receiver from finding the location.

Spy Store responded to the Letter of Inquiry on March 2, telling the FCC that they began selling the GPS-JM2 GPS Jammer on or about July 31, 2007; they have sold 69 units. In its reply, the company told the FCC that they began importing the devices beginning in 2007, with subsequent deliveries continuing into 2008, for a total of 90 units delivered. Spy Store told the FCC that "the importation of GPS-JM2 was discontinued once [they] became aware that the units were unlawful in the USA."

Even though Spy Store imported GPS-JM2 GPS Jammers on five different occasions, they did not file any FCC Form 740s for the imported units; before radio frequency devices may be imported to the United States, an FCC Form 740 (or the electronic equivalent) must be filed with the United States Customs and Border Patrol. The company admitted to the Commission that the device was not certified in accordance with FCC

Rules, but stated that the Chinese supplier advised them that "it was lawful to offer this unit for sale and as such, took no further efforts to determine if the device complied with the Rules."

The FCC noted that Spy Store explained that they "would not have offered, marketed or sold the GPS-JM2 GPS Jammer had [they] known it was an unlawful device." Spy Store also told the Commission that they no longer offer or market any other jamming devices and have ceased all marketing and sales of the GPS-JM2 GPS Jammer and have disposed all of the remaining units.

The FCC said "it appears that Spy Store violated Section 302(b) of the Act and Sections 2.803 and 15.205(a) of the Rules by marketing in the United States a radio frequency device not eligible for certification. It also appears that Spy Store violated Section 2.1203 of the Rules by importing the GPS-JM2 GPS Jammer without making the required import declaration."

Spy Store was warned that "if, after receipt of this citation, you violate the Communications Act or the Commission's Rules in any manner described herein, the Commission may impose monetary forfeitures not to exceed $16,000 for each such violation or each day of a continuing violation." The company was given 30 days to respond to the Citation either through a personal interview at the Commission's Field Office nearest to their place of business or a written statement. Spy Store was advised that any response should specify the actions that they are taking to ensure that they do not violate the Commission's Rules governing the marketing of radio frequency jamming devices in the future.

==>SOLAR UPDATE

Tad "Bring back the friendship of the Sun" Cook, K7RA, this week reports: We had some nice sunspot activity from July 3-10 -- and we were hoping for a return 27-28 days later -- but it never happened. Varying by latitude, the Sun rotates relative to Earth about every 27.5 days. If that same region was still active or the activity renewed, we might have seen something July 30-August 7, which is today. Instead, the quiet continues. Sunspot numbers for July 30-August 5 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 68, 68.7, 68.1, 68.1, 67.4, 65.8 and 66.2 with a mean of 67.5. The estimated planetary A indices were 3, 5, 4, 3, 10, 4 and 6 with a mean of 5. The estimated mid-latitude A indices were 2, 4, 3, 2, 7, 4 and 5 with a mean of 3.9. The predicted planetary A index for August 7-11 is 5, 5, 7, 5 and 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by William Allingham's "Song" <http://www.potw.org/archive/potw363.html>.

==>IN BRIEF:

* This Week on the Radio: This week, there is an NCCC Sprint Ladder on August 7. The WAE DX Contest (CW) and the Maryland-DC QSO Party are August 8-9. The SKCC Weekend Sprint is August 9. The MMMonVHF/DUBUS 144 MHz Meteorscatter Sprint Contest and the NAQCC Straight Key/Bug Sprint are August 12. Next week is the NCCC Sprint on August 14. The ARRL 10 GHz and Up Contest, the North American QSO Party (SSB) and the SARTG WW RTTY Contest are August 15-16. On August 15, look for another NCCC Sprint, as well as the Feld Hell Sprint. The New Jersey QSO Party is August 15-17 and the Run for the Bacon QRP Contest is August 17. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, August 23, 2009, for these online course sessions beginning on Friday, September 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* MFJ Acquires Cushcraft: On August 7, MFJ Enterprises <http://www.mfjenterprises.com/> announced they had purchased the Cushcraft Amateur Radio antennas product line from Missouri-based Laird Technologies <http://www.lairdtech.com/> effective July 31. According to MFJ, Cushcraft -- makers of HF/VHF/UHF vertical, beam and Yagi antennas for the Amateur Radio community -- will continue to be manufactured in Manchester, New Hampshire. "We are excited to have the Cushcraft Amateur Radio Antennas product line alongside our other five companies," said Martin F. Jue, President and founder of MFJ Enterprises, Inc. "This product line increases our ability to offer our customers a wide range of antenna options at different prices. Customers will be able to choose

from Cushcraft Amateur Radio antennas, Hy-gain and MFJ antennas through one source." MFJ purchased Hy-gain in 2000 the company also owns Ameritron, Mirage and Vectronics. Jue said that the Cushcraft line will bring more than 50 new products to MFJ's Amateur Radio product line. "We will add more new products to this antenna line and will continue the Cushcraft Amateur Radio antennas name long into the future. Cushcraft Amateur Radio antenna product customers will appreciate the continued and expected top-quality manufacturing of this product in New Hampshire and the MFJ commitment to superb after-the-sale service and tech support in Mississippi," said Jue. The 120 page 2010 MFJ catalog will include the entire Cushcraft Amateur Radio antennas product line. MFJ has set up a special customer support line -- 662-323-5803 -- to handle Cushcraft antenna product technical support, parts requests and customer services.

* Robert Wilson, AL7KK/VE7ZKK, Wins July QST Cover Plaque Award: The winner of the QST Cover Plaque Award for July is Robert Wilson, AL7KK/VE7ZKK, for his article "A High Gain Single Wire Beam." Congratulations, Robert! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the August issue by Monday, August 31.

* Get Ready for the Perseids!: On the night of August 11 and well into the next day, Earth will make its annual passage through the bulk of the debris shed by a comet known as Swift-Tuttle <http://en.wikipedia.org/wiki/109P/Swift-Tuttle>. Much of the debris is composed of dust-sized grains, but when these fragments come plunging into our atmosphere they can create a dazzling meteor display. Not only are the meteors fascinating to watch, they also leave short-lived streams of ionized gas in their wake. As hams have known for years, these meteor trails are excellent reflectors of radio waves. The Swift-Tuttle meteor showers are known as the Perseids <http://science.nasa.gov/headlines/y2009/31jul_perseids2009.htm> because they appear to come from a point in the sky that lies within the constellation Perseus. This year's shower is forecast to be especially active because we're about to pass through a somewhat thicker filament of dust that boiled off Swift-Tuttle in 1862. If you own a 6 or 2 meter SSB/CW transceiver, you can get in on the action, bouncing your signals off Perseid meteor trails and making quick meteor scatter contacts over hundreds of miles, and possibly even as much as 1200 miles <http://en.wikipedia.org/wiki/Meteor_scatter>. Meteor scatter operation is particularly easy on 6 meters where 100 W and an omnidirectional antenna will do the job. On 2 meters a directional antenna (such as a multielement Yagi) usually yields better results. Some meteor scatter operators prefer to use SSB, making rapid exchanges of signal reports and grid squares. In recent years digital meteor scatter has been increasing in popularity. With the free sound-card-based WSJT software suite by Joe Taylor, K1JT, it is possible to make digital meteor scatter contacts almost any time of the day or night, not just during annual showers <http://physics.princeton.edu/pulsar/K1JT/>. Most WSJT scatter

operators use a mode known as FSK441 and center their activities on calling frequencies at 50.260 and 144.140 MHz. They also announce their availability by using Web sites just as N0UK's Ping Jockey Central <http://www.pingjockey.net/cgi-bin/pingtalk>. So turn on your radio late Tuesday night and start listening. As the shower intensifies, you'll begin hearing bursts of signals. That's the time to grab the microphone (or keyboard) and get on the air!
==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Source record: 6433

I saw an Elecraft model KX1 at a friend's house yesterday and fell for it. It is cute as a bug.
However, I only work phone.

Does Elecraft or any other company make any equivalent (high quality, backpack size) transceiver for
phone rather than CW? Either kit form or prebuilt will be fine.

Thanks. That's a nice looking rig! Does it have any sort of built-in antenna tuner like the Elecraft? For outdoor hiking/emergency use, it would be nice if it could drive a random length
antenna.

Next Theory Examination

The next Theory Examination for the Amateur Station Licence will be held on Tuesday the 6th of October at 2p.m. in the ComReg Offices in Dublin. Places for the examination are limited and will, as usual, be allocated on a first come first served basis and will only be reserved on receipt of the examination fee. Intending candidates should forward the appropriate fee to Sean Nolan EI7CD, 12 Little Meadow, Pottery Road, Dunlaoghaire, Co. Dublin in order to reserve a place for the exam.

The fee is 50 Euro or 25 Euro for full-time registered students, repeat candidates and those who are retired, unemployed or have a disability. Cheques and Money Orders should be made payable to the IRTS. When forwarding the exam fee intending candidates should enclose their postal address as well as phone and e-mail contact details.

The closing date for applications to sit the examination, which will be strictly enforced, is Monday the 21st of September. Intending candidates should note that anyone who fails to produce a photo identity on the day of the examination will not be allowed to sit the examination. The photo ID can be a driving licence, a passport, an employment photo identity card or a student card containing a photograph. A national Garda photo ID would also be acceptable.

Sean EI7CDs address can also be found in the IRTS call book or in the call book section of the IRTS website at www.irts.ie Sean's e-mail address for any further enquiries is ei7cd at gofree dot indigo dot ie Also available on the Downloads section of the IRTS website are Examination Notes with a sample examination paper. Also, in the Radio Theory Links section on the website is some very useful information for those

studying for the examination.

The examination consists of a question paper of 60 multiple-choice questions divided into three main sections A, B and C and the time allowed is two hours. The pass mark is 60% and a pass is required in each of the three main sections of the paper. Intending candidates should note in particular, that in Section B of the paper National and International Rules and Operating Procedures- questions on the National Rules will be based on the new Wireless Telegraphy (Amateur Station Licence) Regulations 2009 which came into force on I June 2009.

These Regulations and other matters in relation to the operation of amateur stations can be found in the Amateur Station Licence Guidelines published by ComReg in Document 09/45 which is available on the Publications section of the ComReg website at www.comreg.ie

All 18 videos can be seen at http://www.batc.tv/

Space Station SSTV Active

The VC-H1 SSTV camera unit will run in auto mode (Robot-36 transmitting once every 3 minutes) and should be operational on 145.800 MHz from approximately 0800-1600 UTC each day.

TAPR now on Twitter

TAPR has been ham radio's pre-eminent digital voice and data technology group for over 25 years and it is now on Twitter under the username taprdigital

TAPR was a pioneer in developing packet radio technology and most recently has been a leader in the development of SDR (Software Defined Radios).

Shack Cleanup

Radio Shack is getting a marketing makeover. Starting August 6, the electronics retailer will change its name to 'The Shack,' a rebranding move designed to shed the last-century association with radio technology and embrace today's digital wireless world.

To celebrate the name change, Radio Shack will conduct a "Shack Summer Netogether," a live event featuring two 17-foot laptop computers in New York and San Francisco. Equipped with Web cams, the laptops will allow live video and audio exchanges between the two cities.

Tipperary Amateur Radio Group

The August meeting of the Tipperary Amatuer Radio Group will take place in Raheen House Hotel Raheen Road Clonmel on Thursday next the 13th at 8.00 pm, all are welcome.

Crossakiel Amateur Radio Association

C.A.R.A are holding their first club event, which is a field day on Sunday 16th August in Crossakiel. They hope to be active on 80m-2m and on 145.550 Simplex.

Please have a listen out for the EI4CARA club station on the bands. The Club meets every Wednesday at 8pm in the Welcome Wagon in Crossakiel. Everyone is welcome to attend.

Limerick Radio Club

On the 15th and 16th of August, members of Limerick Radio Club will be participating from Tarbert Island Lighthouse for the International Lighthouse Weekend, using the call-sign EI4TLH.

Club members, who intend taking part in the event should contact John EI6IW at QTHR or by e-mail to

�johne at gofree dot indigo dot ie�

International Lighthouse/Lightship Weekend 2009

More than 300 lighthouses in more than 51 countries -- from Argentina to Wales -- will be on the air for the 2009 International Lighthouse/Lightship Weekend.

The event, held for the 11th year in a row, takes place Saturday, August 15 0001 UTC-Sunday, August 16 2359 UTC. While not a contest, the ILLW is more of a QSO Party and Amateur Radio demonstration.

The ILLW aims to raise public awareness of lighthouses and lightships and the need for their preservation and restoration, promote Amateur Radio and foster international goodwill. Stations at more than 40 US lights are expected to be on the air for the event, and several stations will identify with special event call signs.

South Eastern Amateur Radio Group

The next general meeting will take place at 8.30 p.m. on Monday the 31st of August.

Please Note: Both Committee and General meetings take place on the last Monday of each month. Committee meetings take place at 8.00 p.m. and the general meeting follows at 8.30 p.m. General meetings are open to all members and visitors are very welcome.

AREN Net

Net's are held on the 7th and 21st of each Month. It is envisaged that the net on the 21st of each month will be a digital mode training net.

Rallies

C.R.C. Rally 2009

The Cork Radio Club is holding their Rally in the Montenotte Hotel in Cork on the 13th of September. Special rates for those who wish to stay overnight just mention Cork radio Club.

Food all day, plenty of parking & doors open at 11am. All the usual traders will be there.

Mayo Rally

The 2009 Mayo Rally will be held on Sunday November 22nd in Castlebar. The venue is The Welcome Inn Hotel,

Where the 2008 rally was held at short notice, and doors open at 11.00am.

Rally Director, Padraic Baynes, EI9JA, is now taking bookings for stands at the Rally. He can be contacted on 087 6957154. The hotel will be offering a Rally special deal for accommodation. Full details will be available soon.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to
�charlie dot Carolan at gmail dot com� Or by phone to 087-6265418 News can also be submitted via e-mail to
�newsteam at irts dot ie� for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday�s bulletin.

No, but a friend has and _loves_ his FT-817ND. A tuner could be made
very small; Dan's used to sell a QRP tuner kit that would work nicely.

I just found an LDG tuner designed specifically for the FT-817: it is the LDG Z-817. It's about
the same size as the FT-817 and runs off 4 AA batteries.

DX Bulletin No. 920
BID: $OPDX.920
August 10, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, K3LR, NG3K, K4UEE, N4AA & QRZ DX, K5XK, KH6BZF, AA7JV, K8YSE, Southgate Amateur Radio Club Web Site, DJ8NK, DL5ME, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA8CAC, F5NQL & UFT, HB9DLO, I1JQJ/IK1ADH & 425 DX News, IZ4AKS, LU1BCE, LZ1ZF, OD5NJ, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, S50U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VU2TS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-August, through Sunday, 9th-August there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V8, VE, VK, VP2V, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND. Ron, K5XK, updates OPDX that Rachid, 3B8FQ, will leave Mauritius by boat on Tuesday, August 11th, enroute for St. Brandon (AF-015). Rachid will operate solo as 3B7FQ from August 12th through the end of the month--and possibly a few extra days in early September. Look for him on all bands, 30-10 meters, although Rachid

expects 40 and 20 meters to be most productive. He will use both CW and SSB, as conditions allow. As in Rachid's earlier travels to 3B6 and 3B7, operating time will be shared with his primary mission of performing maintenance on the island's meteorological equipment. He expects to use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily. Rachid likes to use "the 8s" whenever possible on CW. Here are his anticipated frequencies:
CW - 7008, 10108, 14008, 18078, 21008, 24898 and 28008 kHz
SSB - 7050, 14191, 18141, 21241, 24941 and 28491 kHz

If future plans come together, Rachid may operate from 3B9 sometime after his return and hopes to operate from 3B6 again in November. QSL via K5XK, direct preferred.

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week that they have added one more operator to the crew. Uwe, DJ9HX, is the new added operator. Now with the fourth operator they will be able to run 4 stations simultaneously in order to serve the pile-up. They have also announced their callsign for the operation - 3D20CR. The callsign of this DXpedition was issued to commemorate a DXpedition 20 years ago when DK9KX as organizer and leader of a crew, which included today's member DJ9ON, visited this island for the first activation ever. The DXpedition is still looking for sponsors. The total amount of the operation is estimated at 64.000 USDs. For details/updates and on how to donate funds for this operation, please visit their Web page at:
http://www.conwayreef2009.de

3DA0, SWAZILAND. Only a few more days to work 3DA0DJ, 3DA0TB, 3DA0MH, 3DA0VA, 3DA0MM and 3DA0EL. Activity is expected to end August 11th. QSL via their home callsigns.

4J, AZERBAIJAN. Operators Gerard/F2VX and Yanick/FYFYD will be active as 4J/homecall, August 11-29th. Activity will be mainly HF bands using SSB. QSL via their home callsign, direct (SAE + postage) or by the French Ref-Bureau (please only this bureau).

4W, TIMOR-LESTE. No QSNs reported yet on Al, CT1GPQ, as 4W6AL from Timor Lorosae. He will be there until October 3rd. Remember, this is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@algarvedx.com Activity logs will be online (possibly daily) on: http://algarvedx.com

6W, SENEGAL. Stan, EI6DX, will be active as 6W/EI6DX from Somone which is located 70 km southeast of Dakar, between November 7-16th. He will concentrate on the lower bands and CW. Stan will take part in JA DX Contest. QSL via RX3RC, by the Bureau or direct. Look for updates at:
http://www.ei6dx.com/senegal

7P, LESOTHO (Update). You have until August 13th to work operators Pista/ HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK only via M0URX, others via their home callsigns. They will have a log search page after the conclusion of their operations. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net/7p8.html

A6, UNITED ARAB EMIRATES (Update). Philippe, F5LTB/9Q1TB, is now active on the air as A65BI thanks to Abdullah, A61Q, for the support he gave to obtain the necessary authorization from his landlord to erect an antenna on the roof of the building. His activity has been on 20 meters SSB at various times during the day. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40). QSL design for a standard QSL and an eQSL will be ready shortly. Watch QRZ.com for updates.

A9, BAHRAIN. Dave, EI3IO, will be leaving Ireland and will move to Bahrain for at least 2 years. He has not received his callsign yet but plans to be active on 160m (especially during the winter) through the VHF bands. Look for him on 20 meters starting in September. Hopefully more details will be forthcoming. Visit his Web page at: http://EI3IO.com

CQ NEWS. A press release by Richard Moseson, W2VU, Editor of CQ Amateur Radio, dated August 4th, states: "2008 CQ World Wide CW Contest Marks Major Milestone for K0DQ Becomes Possibly the Only Person Ever to Win All Six Major Ham Radio Contests -- Scott Redd, K0DQ, operating the 2008 CW weekend of the CQ World Wide DX Contest from Aruba as P40Q, racked up over a million more points than his closest competitor in the Single-Operator Low Power Class, and became perhaps the only person ever to win single-op world championships in all six major ham radio DX contests.
'I don't know of anyone else' who has won all the major contests, said CQWW Contest Director Bob Cox, K3EST, in announcing the results, which will be published in the September issue of 'CQ' magazine.
Scott had his first taste of contest victory back in 1966, as a young Navy officer posted to Uruguay and operating CX2CO in the phone weekend of the CQ World Wide DX Contest. Over the succeeding years, Scott worked his way through the Navy ranks to Vice Admiral and became Commander of the Fifth Fleet, then served as a civilian in the Iraq Coalition Provisional Authority and as Director of the National Counter terrorism Center before retiring in late 2007. But ham radio and contesting were never far away, and operating from Mexico as XE1IIJ in the early 1970s, Scott won single-op world championships in the CQWW Phone Contest, the ARRL DX Phone and CW Contests and the CQ WPX Phone Contest. Thirty years later, when his professional life permitted a little more hamming time, Scott added the WPX CW crown as P41P, operating from P43P's station in Aruba, in 2002. The only prize that eluded him -- until now -- was the CQWW CW.
'I've been trying like a son-of-a-gun to win (the) CQ World Wide CW,' Scott commented in a 2008 interview with 'CQ'. 'I've come in number two, I've come in number three, but I've never won that one.... so that's still my goal, every time I get close, in CQ World Wide CW, to win the world.'

When informed that he had finally achieved that goal, K0DQ said, 'I guess the message is if you keep at it long enough good things happen. In this case, four decades. It's been a great ride ... and it's still magic!'
CQ congratulates Scott -- already a member of the CQ Amateur Radio Hall of Fame, for his contesting achievements on top of all his other achievements."

CTU IN ENGLAND. Tim, K3LR, announces that if you missed CTU Dayton and CTU Italy this year - here is another chance to attend ConTest University (CTU in England) - this time hosted by Mark, M0DXR. CTU will be conducted during the RSGB 2009 Convention (October 9-11th; formerly unknown as HFC) on Saturday, October 10th. Complete details are available at the following Web pages at: http://www.contestuniversity.com/main/page_uk.html
http://www.rsgb.org/rsgbconvention/events_programme.php
The next CTU during the Hamvention in Dayton, Ohio, United States, will be on May 13, 2010. Details at:
http://www.contestuniversity.com/main/page_home.html

FJ, ST. BARTHELEMY (NA-146). Operators Gary/W2VQ and his son Paul/WQ2N will be active as FJ/W2VQ and FJ/WQ2N between August 18-25th. Activity will be on 80-6 meters using CW, SSB and RTTY (possible PSK31). They will be using only 100 watts into dipoles and beams. An online log will be available during and after the operation at:
http://www.logsearch.org/lsd/logsearch.php?Switch=46
They will be listening for JA/AS and EU a lot, so listen!

FO8, FRENCH POLYNESIA. Phil, F5PHW, who will be in Tahiti for the next two years starting this month, has received his new callsign on his 40th birthday - FO8RZ. He was on the air this past week using a vertical antenna. He was heard on 30 and 20 meters CW. He has other antennas that will be set up later (wires for 80-40m, and a triband beam 20/15/10m). Phil is still moving in, so they have a lot of things to do before being active on the radio. QSL via LoTW or via F8BPN, either direct or via the French Ref-Union Bureau. His Web page will be updated sometime soon at:
http://f5phw.chez.com

GB2/GB4/M0, ENGLAND. Members of Sands Amateur Radio Contest Group will be operating a number of special event stations on Saturday, August 15th, to celebrate the Galloways Society for the Blind's "25th Anniversary of the Cross Bay Walk" led by Queen's Guide Cedric Robinson MBE. The walk generally takes around 3 hours and needs the Queen's Guide to navigate between Arnside and Kents Bank safely because of the quicksands around the bay that have taken many lives over the years. The first appointment was in 1536. Cedric, who is the 25th appointed Queen's Guide to the Sands and local fisherman, has been leading the walks since 1963. The special callsigns to listen out for are:
GB2GSB - Located at Arnside Knott which overlooks Arnside and a good part of the walk.
M0SCG/M - Will be operating from the tractor which follows the walkers and can be used if anybody becomes too exhausted or ill during

the walk.
GB4GSB - Located at the end of the walk at Kents Bank.

A special certificate is offered for amateurs and SWLs who work any of the stations. To obtain a certificate, send an A4 SAE and a check for 2.50 (pounds) made out to SARCG, and send it to their QSL Manager G0VGS (see QRZ.com or: Ian Maude, 21 Colwyn Avenue, Bare, Morecambe, Lancs, LA4 6EQ. Once printing costs are covered, any money left over will be donated to the Galloways Society for the Blind. For more details about the walk, visit the following Web pages:
http://www.galloways.org.uk/main/pages/baywalk09.html
http://www.timetravel-britain.com/articles/country/sandwalker.shtml

IOTA NEWS.....
AF-019. Emilio/IZ1GAR will be active as IG9W from Lampedusa Island (African Italy) during the CQWW DX CW Contest (November 28-29th). He will concentrate on the lower bands prior to contest as IG9/IZIGAR. QSK via his home callsign.

EU-005. Steve, G0UIH, will be active as homecall/p from Piel Island (CU-005 for English Islands), August 14-16th. This island is the "Jewel in the Crown" of the Islands of Furness. The island has a history going back to the 11th century. Expect activity on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-044. Mario, DL5ME, will be active as LA2NK or LA/DL5ME from Northcape on the Island of Mageroya, August 13-16th. Activity will be on 40/30/20 meters using CW and SSB. QSL direct ONLY to DL5ME (address on QRZ.com).

EU-051. Giorgio, IZ4AKS, will be active as IE9X from the Island of Ustica (IIA PA-001, MIA MI-116) between August 16-21st. Activity will be on 40-10 meters (mainly SSB, but also RTTY and CW) with 100w and vertical antenna. QSL Policy: A special QSL in advance to all via Bureau.

EU-055. Operators Henk/PA3FMC, Ruud/PE1BTV and Hans/PH0V will be active as LA/homecall from Utvaer Island, August 10-18th. QSL via their home callsigns, direct or by the bureau.

EU-126. Mario, DL5ME, will be active as OH9AA/p from the Lappi Province Group for only a few hours on August 19th. Activity will be on 40/30/20 meters using CW and SSB. QSL direct ONLY to DL5ME (address on QRZ.com).

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from Samso Island (DIA JY-008, WLOTA 0726) between August 22nd and September 4th. Activity will be on all HF bands, mostly CW. QSL via DL2VFR, by the bureau or direct.

EU-174. Members of the J42ARET club will be active as SX8DI from Penna Island (GIOTA NAS-045, WLOTA 2124, WW Loc. KN10XH), one of the

Drenia Islands between August 28-31st. The group also plan to activate the lighthouse on Frini Island as SX8DI/LH. Operators mentioned are: Demetrius/SV2GWY, Angelo/SV2GWR, Cleanthis/SV2XI, Dimitris/SV7HRJ, Nick/SV7HVI, Themistokles/SW2HQF and Nikos/ SW2HVD. Activity will be on HF, VHF and UHF, and all modes. QSL via the Bureau, eQSL or direct (enclose 1 IRC or 2 GSs + SAE) to SV2GWY. For more information and log search, visit the Web page at: http://sx8di.blogspot.com

NA-230. (Update/Change) Cezar, VE3LYC, will attempt his most difficult operation to date: activating for the first time the Ottawa Islands (IOTA NA-230) group in Hudson Bay. Name of the specific island is not available at this time, but the dates have been announced, August 31st to September 3rd. The callsign will be VY0O. Cezar is still looking for financial support for this project. Information for donors as well as QSL information will be posted in due course on VY0O page at QRZ.com. For more information see OPDX.916.

OC-211. Operators Wally/VK6YS and Nigel/VK6NI plan to be active as VK6YS from Robertson Island, in the Pelsaert Group (WW Loc. OG71AC) between December 29th and January 4th, 2010. They are looking for up to two operators to join them. Please contact Wally at vk6ys@iinet.net.au if you are interested. More information will become available closer to the DXpediton date. Visit their Web site at: http://www.westozdx.net

SA-023. Operators Jose/PY6HD, Beto/PY6RT and Nilzo/PY6AWU will be active as ZZ6Z from Itaparica Island between August 14-16th. Activity will be SSB only on 80/40/20/17/15/10 meters. QSL via PY6HD, direct, LoTW or by the Bureau.

JD/O, OGASAWARA. Just a reminder that operators Makoto/JI5RPT (JD1BLY) and Yoshihi/JO1LVZ (JD1BNF) will be active from Chichijima Island (IOTA AS-031) between now and August 14th. Activity will be on 160-6 meters using the satellites, CW, SSB, Digi modes and 2m WSJT EME. QSL via their home callsigns. Log searches will be available on the following Web sites:
JD1BLY: http://www.ji5rpt.com/jd1/
JD1BNF: http://www.hattsan.com/

KH6BZF PROPAGATION FORECAST/REPORT (For July August 3-9th).....
Aug 10 AN SOLAR REFERENCE
Aug 11 AN ---------------
Aug 12 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 13 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 14 AN GEOMAGNETIC REFERENCE
Aug 15 AN ----------------------
Aug 16 AN QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less
ADDED NOTES BY LEE: Lee informs that "SpaceWeather.com" is reporting that

this year's Perseid meteor shower may be even better than usual, especially on the peak day of August 12th. The Web site is reporting that, "According to NASA's Meteoroid Environment Office, a filament of comet dust has drifted across Earth's path, and when Earth passes through it sometime between 0800-0900z (1-2 am PDT) on August 12th, the Perseid meteor rate could surge to twice its normal value. Check <http://spaceweather.com> for details and observing tips." The peak hourly rate could reach 200 meteors. Many hams who enjoy making meteor scatter contacts look forward to the Perseids each August, along with backyard astronomers who take advantage of the warm summer weather to sit outside late at night and watch the sky show.
MORE NOTES BY EDITOR: Cycle 24 Webinar - Well-known propagation expect Carl Luetzelschwab, K9LA, will be giving a Webinar presentation on Cycle 24, August 19th at 8 PM EDT (August 20th - 00:00 UTC). The Webinar is hosted by the Potomac Valley Radio Club (PVRC) and is free. All you have to do to register is go to <http://www.pvrc.org> and click on the Webinar link. You will receive an E-mail with additional details about the Webinar and login instructions.

KL7, ALASKA. Boris, N3SY, is expected to be active as KL7/N3SY from the National Park "Denali", between now and August 15th. Activity will be on 40-10 meters using a Yaesu FT-100D into dipoles and MFJ-1622 vertical 1.5m long. QSL via his home callsign (QRZ.com).

LIGHTHOUSE ACTIVITY/NEWS.....
Members of the Grupo DX Gran Canaria, Seccion Local URE Las Palmas (EA8URL), will activate La Entallada Lighthouse (ARLHS CAI 041 - Punta Lantailla) as AO8FLH on Fuerteventura Island (AF-004, DIE S-006, FEA D-2795, DME 35030, WLOTA LH-0883) in the Canary Islands during the International Lighthouse-Lightship Weekend (August 15-16th). Activity will be on 80-10 meters including 30/17/12m using CW, SSB and RTTY. Operators mentioned are: Marino/EA8DP (CW), Juan/EA8CAC (CW/RTTY/SSB), Jesus/EA8ANE (SSB/RTTY) and Federico/EA8AZM (SSB/RTTY). QSL via EA8AKN, by the Bureau or direct.

Operators Michel/HB9DLO, Pierre-Yves/HB9OMI, and Pierre/HB9SMU will be active as DL/HB9LH from Schleimunde Lighthouse (ARLHS FED-217, ILLW DE-0073) on Lotseninsel Island (Pilot Island)(German Island Award O-020; Grid Locator: JO54AQ) between now and August 16th. QSL via HB9DLO, by the Bureau or direct. For more info: http://www.hb9lh.ch

Members from the Radio Club Argentino will operate from Martin Garcia Island (SA-055), August 14-17th, and plan to activate its lighthouse during the 2009 International Lighthouse and Lightship Weekend (ILLW). The callsign to be used will be LR5D and activity will be on CW, SSB and FM, on 160-6 meters and 70cm. QSL via LU4AA, direct or by the Bureau. Updates and more info will be available at:
http://www.lu4aa.org/mgi2009.htm

Look for a special event activation of the Centenarian Kadalur Point Lighthouse (ILLW IN0002, ARLHS IND-013), located on the west coast of India, tp take place between now and August 16th, using the callsign

AT8LHC. Look for activity on all bands and modes, propagation permitting. QSL via VU2JHM, direct or by the bureau. Details of this lighthouse is available on: http://www.dgllnoida.gov.in/cochin/kadalur.html
ADDED NOTES: This lighthouse will be celebrating its 100th anniversary during the month of October. Also, look for activity on 40 and 20 meters on CW, SSB and the Digital modes, as well as VHF and Echolink, by the following individuals using their own callsigns: VU2JHM, VU2LU, VU2FI, VU2LX, VU2UR, VU2GUR, VU2KGN, VU2OJ or clubstation callsigns of VU2ARC, VU2IIH or VU2LCI. Lions Club of Bangalore North Club (#026596 that is District 324-D6) through its Lions Clubs International Amateur (Ham) Radio Club has lent their HF equipment and accessories. This activity is part of Bangalore Amateur Radio Club's Golden Jubliee and Hamfest India 2009.

NWR 2009. The KP1-5 Project, which brought you the 2009 Desecheo Island DXpedition, is pleased to announce that it is serving as national coordinator for Amateur Radio's observation of the "2009 National Wildlife Refuge Week", Sunday, October 12th to Saturday, October 18th, 2009. The goal is to combine your communication skills with your enjoyment of the outdoors to help others learn about the National Wildlife Refuge System. Only authorized, responsible access to refuges is sanctioned by this event. This year the National Wildlife Refuge System celebrates 106 years of conservation and quality recreation. Amateur Radio operators can help spread the word about the National Wildlife Refuge System by operating in or near a refuge during National Wildlife Refuge Week. For more details on this event, please visit the following Web page at: http://www.nwrweek-radio.info

OH0, ALAND ISLANDS. Alexander, DL4NO, is expected to be active as OH0/DL4NO from Finstoem on the main island of the Alands (EU-002) between August 10-21st. Activity will be limited because he is on holiday, but look for him on CW on the usual QRP frequencies for 40/30/20 meters mainly during his evening hours. He will be using a FT-817 and a GP antenna. QSL via his home callsign.

OH0, ALAND ISLAND (EU-002). Operators Ari/OH5DX, Tomi/OH6EI, Juha/OH6XX and Timo/OH6GLE will be active as OH0Z during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via W0MM.

PJ5, NETHERLANDS ANTILLES. Dave, AH6HY, will be active as PJ5/AH6HY from Sint Eustatius (NA-145) between September 26th and October 1st. Activity will be holiday style with operations on 40-10 meters, mostly SSB with some CW. QSL via AH6HY, by the bureau or direct.

QSL INFO AND NEWS.....
QSL FJ/VE3EY via VE3EY

5K0T QSL STATUS. George, AA7JV, reports that about 2000 QSLs so far have gone out since mid-July. A large batch of US/Canada bound cards was bulk-shipped to him last week and will be sent to their final destinations as soon as the package arrives. (It seems that mail from Hungary takes about 10 days to get to Florida.)

Photos and QSL route of the OD5WPX contest operation by Gabby, OD5NJ, are available at: http://www.qrz.com/db/OD5WPX/1249804149
Contest location was 1460m ASL from Gabby's summer home in a village called Aintoura el-Maten (population 500).

S50HQ QSL STATUS/CHANGE. It has been reported that S57XX is not handling QSL cards for S50HQ anymore! S50HQ QSL requests received via the bureau will receive a return card via the QSL bureau by Milos, S54G. If you wish to exchange QSL card direct, please use S54G's QRZ.com address. Cards with insufficient postage or no return envelope will be returned via the QSL Bureau. S50HQ 2009 log is also uploaded on "Logbook of The World" (LoTW). Feel free to match your log for digital certification.

TK8B LOGS. Laurent, F8BBL, is currently uploading his logs from his Corsica operation at: http://www.dx-cw.net/logsearch/logsearch.php
He will be there until August 15th.

George, AA7JV, reports that the VK9GMW QSL cards were received from the printer last weekend, and they will start shipping them by August 15th.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3XY5M, H6VA, JD1BMM, PZ5WP, S92LX, TL0A, V63MY and ZF2ZB

QSLS RECEIVED VIA THE BUREAU: YK9G

WFF ACTIVITY.....
(Update) Plamen, LZ3FM, plans to activate the Biosphere Reserve Kamchia (LZFF-011) during his holiday between August 11-18th. Callsign to be used will be LZ02WFF, not LZ01WFF/2. Equipment will be IC-746 plus a 4-band GP and dipole antennas. Activity will be on HF + 6m, mainly CW with some SSB. QSL via LZ1PJ, direct or by the Bureau. E-mail requests for Bureau cards are accepted (via lz1pj@bfra.org). Write QSO details and callsign worked, since Ivan, LZ1PJ, manages other callsigns too. PLEASE NOTE: LZ01WFF is used for activation for other WFF references by other operators. Ivan, LZ1PJ, will manage this activation only. For other activations listen to operator's instructions.

WFF enthusiasts (5 to 10 operators), plan to activate the Biosphere Reserve "Steneto" (LZFF-017) in the National Park "Central Balkan" (LZFF-001) between August 20-24th. Activity will be on all HF bands, as well as 6m and 2m, using CW and SSB from mountain hut "Dermenka" - 1504 meters A.S.L. (Grid Locator: KN22IR). QSL via LZ1ZF.

XR0, EASTER ISLAND. An international team of operators will be active as XR0YA from Rapa Nui between October 31st and November 15th. This will be a lite and small DXpedition with 6 operators. Operators mentioned are: Marco/CE6TBN, Leszek/NI1L, Aart/PA3C Zbig/SP7HOV, Stan/SQ8X and Victoria/SV2KBS. Although Easter Island is no longer among the "100 Top Most Wanted DXCC Entities", it is still most wanted on some bands such as 30 meters and any activity on this band is very seldom due to a fact a special, temporary license submitted by Chilean Ministry of Telecommunication is

obligatory. The group has obtained a license for all bands, and they decided to dedicate their DXpedition to 30 meters (CW section only! Digi-modes on 30m are not allowed in Chile), and 160, 80 and 40 meters. The group thanks the support from "Radio Club de Chile" to help obtain and have this unique opportunity to activate Rapa Nui on 30 meters. A QSL route has not been announced yet, but it will be shortly. They plan to use an "Online QSL Request System" (OQRS) for direct requests and also the standard QSLing via direct and bureau options. Their logs will be uploaded to the LoTW after the DXpedition after some period of time. They will NOT nor plan to use eQSL. For more details and update, visit the XR0YA Web site at: http://rapanui2009.org

These are fairly small and very light. You could build one for half
this price, and probably make it smaller.

2177. Best external speaker for SSB phone?

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-11 21:08:09 UTC
From: W4PHS <W4PHS@dontask.com>

No doubt there are 1000+ opinions on this, but what are some really clear external speakers for use
with SSB phone signals through my Yaesu FT-897? I'm 61 years old with high frequency hearing
impairment due to 40 years of sitting by computers, and I need all the help I can get in understanding voice over static.

I have seen several enthusiastic recommendations for the Peavey Impulse II mini monitor which is
fairly small and costs about $100. Does anyone have any experience with it?

Icom and Yaesu both make multi-hundred dollar external speakers that have gotten mixed reviews.

I have been using a SP-230. A Kenwood TS-830 matching station speaker. Has built in filters and radio 1/2 switch. The same circuit has been re-used for various different Kenwoods under different names and cabinets. The cabinets make all the difference and it would be really worth while for you to sit down at different speakers and radios to compare them with your particular ear. It's not uncommon for people to try several before finding something comfortable.

The speaker you mentioned will handle up to 200 W peak. That's about 2 orders of magnitude above what most transceivers put out. I'd be surprised if you could hear much of anything through it without a good external audio amplifier. Most speakers like that sacrifice efficiency to get wide frequency response - they respond way beyond the frequency content of ham radio signals, even those of the hi fi AMers. (Think broadband noise.)

There's an amplifier/speaker combination advertized in QST (I think) that you may find meets your needs. I don't recall the name of the product or company, but I'll try to locate it if someone else doesn't chime in.

I think Gap makes a pretty good noise-cancelling speaker; I don't have
one, but have seen and heard it in action.

Have you thought of active noise cancelling headphones/headset?

There is no speaker that wil be able to come close, and the difference is night and day.

Heil makes them. Perhaps others do as well. I have some expensive aviation ANC headsets and Heil's compares favorably given the proce.

SB DX @ WW < KB8NW $OPDX.920.1
Ohio/Penn DX Special Bulletin No. 920.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 920.1
BID: $OPDX.920.1
August 12, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and NC1L following DX information.

The following operation has been approved for DXCC:

7O1YGF ï¿½ Yemen

Operation from April 16, 2000 through April 26, 2000

After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:

* Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.

Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute.

With aging ears, the frequency response above 8 kHz is not considered by the medical trade. If you have a recognized HF imparement then what are we talking about? Above 1 or 2kHz? This is not so uncommon. There are several tricks you can use, your ears may be impared, but not your brain. For example, use one or more of the following:

1 - Use stereo HiFi headphones - also good for blocking out external noise and increasing concentration. Communications headphones have a restricted response, which is NOT what you want.

2 - Use your HiFi system graphic equalizer - works wonders with aging ears. Can make any speaker/headphone more suited to just your ears. People are throwing these things away at the moment.

3 - Although designed for CW use, a hi-pass filter feeding the left-hand channel and low-pass filter feeding the right-hand channel of stereo headphones/speakers also work wonders. It spreads the AF spectrum out as a frequency image across the viewing area in front of you. Each CW station can be heard in a different physical location. Cost is about $2 for the components.

Using this technique SSB can become more understandable, since CW and other interference is often positioned at very specific points in the stereo image and can be more easily ignored, just like advertising plackards on the motorway, or commercial breaks on the telly.

If you proof as to your brains ability to filter, then just try listing all the adverts you saw on the TV last night, or saw on the motorway. You probably saw 60+ on the TV, or 200+ if you went on a "shopping trip"

downtown, but if you can remember four of them then you are doing well.

DW

Why do people think big speakers need more power.
PA speakers are very efficient. It has NOTHING to do
with power in, and ALL to do with SPL with 1 watt in or sensitivity.

For a person with bad hearing, a horn type of the Peavey might improve
the sound. Probably will also do more damage. You NEVER want to use
a PA speaker for nearfield listening normally. You need
to be at least 10 feet back from the horn.

I would recommend using a nearfield monitor with a adjustable
response filtering to make the best listenable sound for bad ears.
You can also use headphones.

Amateur Radio Newsline(tm) Report 1670 - August 14 2009

Amateur Radio Newsline report number 1670 with a release date of Friday, August 14, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. A circus performer will be the next tourist in space. Will he also be the next ham radio operator on-orbit? Also, South Africa's next ham-sat is set for a mid-September launch, 2 meters proves to be a good band for DX, the vanity call sign fee is going up and ham radio will help to coordinate National Wildlife Refuge Week. All this and more on Amateur Radio Newsline(tm) report number 1670 coming your way right now.

HAM RADIO IN SPACE: CIRQUE DU SOLEIL FOUNDER TO BE NEXT TOURIST IN SPACE

A former stiltwalker and fire-eater will be the next mega-millionaire tourist to visit the International Space Station. This with word that Cirque du Soleil founder Guy Laliberte is shelling out a reported $35 million for his round-trip ticket aboard a Russian spacecraft to visit the orbiting outpost. Bill Pasternak, WA6ITF, has more:

--

Guy Laliberte will rocket into orbit from Kazakhstan at the end of September with an American astronaut and Russian cosmonaut as his travel mates. Like his predecessors, Laliberte will then spend more than a week at the space station.

At a news conference in Houston, Laliberte said that he will be like a kid in a candy store" and will be experimenting with zero-gravity tricks.

Liliberte explained that he is not a scientist, a doctor nor an engineer. Rather he sees himself as an artist and creator. As such he says that he will try to accomplish this mission with his creativity and what life has given him as a tool.

Laliberte assured reporters that he will not play with any fire in space, but he hopes to try some acrobatics in weightlessness and may teach his crewmates a card trick or two.

Lileberte described his life as a fairy tale and said watching men land on the moon 40 years ago on a black-and-white television in a campground in the middle of the forest was his inspiration. He said this taught him that all things are possible. Now he says that it's his turn to inspire the next generation.

What's not known is whether or not Laliberte will get his ham ticket and conduct ARISS contacts with those of us here on Mother Earth.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

For those of you who do not speak French, Cirque du Soleil translates into the Circus of the Sun. It's a truly amazing performance of acrobatic skill combined with dance and circus acts that once you see you will never forget. (Space Science Review)

**

HAM RADIO IN SPACE: SUMBANDILASAT TO LAUNCH JUNE 15

South Africa's latest ham radio satellite called SumbandilaSat is now due to launch on September 15th. According to the Southern African Amateur Radio Satellite Association website the bird is already on its way to the Baikonur Cosmodrome in Kazikstan from where it will be carried into orbit on board a Russian Soyuz launch vehicle.

The amateur radio payload on board SumbandilaSat is made up of an FM voice transponder with an uplink in the 2 meter band and a downlink in the 70 centimeters. It also carries a store and forward voice digipeater and a voice beacon. These will be operating in conjunction with the University of Stellenbosch Software Defined Radio project that will share the on-orbit VHF receiver and UHF transmitter.

SumbandilaSat will also carry a Very Low Frequency or V-L-F radio experiment from the University of KwaZulu-Natal. More on this South African ham radio in space project is on the World-Wide-Web at www.amsatsa.org.za. (AMSAT-ZA)

**

HAM RADIO IN SPACE: A $8000 PERSONAL HAMSAT

In the old days hams bought a kit to build a transmitter or a receiver. Now, in the 21st century we seem to have entered the age of the personal satellite with the introduction of Interorbital's TubeSat Personal Satellite Kit.

The new IOS TubeSat PS Kit is the low-cost alternative to the AMSAT-developed CubeSat. It has three-quarters of the mass (and volume of a CubeSat, but still offers plenty of room for most experiments or functions including those that enterprising ham radio groups might come up with. Perhapps a tiny D-Star repeater or linear translator. And

best of all, the price of the TubeSat kit includes the price of a launch into Low-Earth-Orbit on an IOS Neptune 30 launch vehicle.

There is one negative to the Tubesat concept. Since the these tiny satellites are placed into self-decaying orbits only 192 miles above the Earth's surface they will eventually fall back and burn up as they re-enter the atmosphere. On the other hand, being relatively short lived they will not contribute to any long-term build-up of orbital debris.

Launches are expected to begin in the fourth quarter of 2010. The total price of the TubeSat Kit including a placing it in orbit is only $8,000. More is on-line at http://spacefellowship.com/2009/08/01/interorbital-syatems-tubesat-personal- satellite-kit/ (VK4TJ)

**

RADIO LAW: VANITY CALL SIGN FEE RISING IN SEPTEMBER

The cost of a United States amateur radio vanity call sign is once again going up. On August 11th, the FCC announced that the cost of an vanity call will increase from $12.30 to $13.40 for its 10 year term. Now that notice has been published in the Federal Register, the increase will take effect in 30 days on September 10th. (ARRL, FCC)

**

RADIO LAW: ITS REALLY A MOBILE

A UK ham who thought he had found a novel way around local zoning restrictions is facing challenges from his neighbors. This, over 60 foot high telescoping tower complete with rotor and tri-band antenna mounted on a vehicle parked on his property.

Robert Dodson, G4RNK, is fighting calls to remove the tower that nests down to 27 feet from his back garden despite complaints from neighbors. Dodson claims he has not breached neighborhood planning regulations because the entire antenna system is mounted on a trailer,

Dodson was served an enforcement notice for its removal after he erected it without permission last September. At a planning inquiry on Wednesday, July 29th, Michael Matthews who is a lawyer representing Dodson outlined his grounds for appeal while senior enforcement officer Jamie Cooper upheld the authority's position. Both parties thrashed out legal issues surrounding the tower and argued whether it is a temporary or permanent structure, which would determine if it needed planning permission.

Also present at the hearing were several neighbors who called the mast an ï¿½eyesore' and claimed it interfered with their TV, radio and telephone signals. In rebuttal, Dodson said the entire installation had twice been tested and approved by U-K telecommunications regulator Ofcom.

A decision is expected to be made within the next month. (eHam.net)

**

ENFORCEMENT: UNLICENSED BROADCASTER DINGED $10000

The FCC has ordered Texas resident Radhames Severino to pay a $10,000 fine. This for allegedly operating of an unlicensed radio transmitter on the frequency 101.5 MHz in the Houston area.

In its forfeiture order adopted on August 5th, the FCC noted that on May 26th the Commission's Houston Resident Agent Office of the Enforcement Bureau had issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Severino for the alleged offense. To date, Severino has not filed a response to the order.

This case dates back to On October 23 and 25, 2006. That's when the FCC responded to a complaint about an unlicensed radio station in the Houston area. An agent from the Commission's Houston Office T-hunted the signal on 101.5 MHz to a building in the Houston area. On October 31, 2006, an agent from the Houston Office inspected the radio station located in suites K-M of the building, which was labeled as the home of the Iglesia Misionera Evangelistica Elohim church. The agent determined that Severino leased these suites, was responsible for the station, and was the pastor for the church.

On November 7, 2006, the Houston Office sent a formal Notice of Unlicensed Operation to Severino at his residence. The notice warned him that operation of an unlicensed radio station violated Section 301 of the Act and directed him to cease all unlicensed operations immediately. The letter also outlined the potential penalties for such a violation,.

But the FCC warning to Severino apparently went unheeded. On January 30, March 12, and October 15, 2008, agents from the Houston Office, again T-hunted the signal on 101.5 MHz to Severino leased suites. This in turn lead to the issuance of a $10,000 Notice of Apparent Liability to Severino to which he never responded. As a result, Severino was given the customary 30 days to pay or to file an appeal. (FCC)

THE SOCIAL SCENE: HUNTSVILLE HAMFEST VIDEO ON-LINE

If you want to be at this years Huntsville Hamfest but cannot make the trip Tom Medlin W5KUB, will be able to take you there vicariously. That's because Tom bringing it direct to your computer screen through the magic of streaming video over the Internet.

Tom tells Newsline that he will be going live Friday morning August 14th at 08:00 Central time. This, to broadcast the 2009 Huntsville Hamfest on his world wide internet site that this year will feature a chat room for hams to discuss the convention with others. Tom also plans to give away prizes to viewers almost every hour during this live event.

Included in this years coverage will be the presentation of the Amateur Radio Newsline Young Ham of the Year award to Andrew Koenig, KE5GDB. That takes place on Saturday afternoon, August 15th.

Tom's video streaming website is very easy to find. Simply type in w5kub.com or wa5kub.com to your web browser without the www and it should take you right these.

The bottom line: If you cannot make the trip to Huntsville this year, then tune in on w5kub.com and vicariously join in on the fun. (W5KUB)

SPECIAL REPORT: E SKIP ON 2 METERS

Friday, July 31st was an amazing day for DX. That is if you happened to have been on 2 meter SSB or Morse that day. Yes, we said 2 meters. Take a listen:

--

Actual contact audio: Hear it in the MP3 version of this report downloadable at www.arnewsline.org

--

That's Jacque Dupuy, N0IRS, in Kansas City, Missouri, making the kind of VHF contacts that those who limit their operation only to repeaters are missing out on. Heres more:

--

Actual contact audio: Hear it in the MP3 version of this report downloadable at www.arnewsline.org

--

The secret to working DX like this is to be using the right mode on the right frequency when the band is open with E skip. With many of today's repeaters employing tone access, the day of listening for an out of area station on your favorite machine is fast coming to an end. You need to have a receiver capable of CW and SSB reception and be monitoring on or near 144.200 MHz to know when the DX is in.

And for those of you who want to hear more of what K0IRS has worked on 2 meters, simply go to YouTube dot com and put his call in the search box. What you see and hear may make a lot of you want to buy a big 2

meter antenna and a VHF multi-mode rig. (ARNewsline(tm) with audio from N0IRS video)

**

RESCUE RADIO: OWENSBORO KY TRAINS TO EMCOMM HAMS

Local officials in Owensboro, Kentucky, are again turning to ham radio to solve some of the communication problems they encountered.

During that severe winter weather crisis cellphone service throughout the Owensboro area was disrupted, sometimes for days at a time. Landline phones were also affected, and communication problems were cited by multiple emergency response agencies as the biggest issue they faced.

But Owensboro is one community well acquainted with turning to ham radio in such situations thanks in great part to the late George Wilson, W4OYI. Long before he became President of the ARRL Wilson brought the concept of turning to radio amateurs for emergency assistance to the attention of city leaders.

That was several decades ago. Now, many other hams are following in George Wilson's steps including Bob Spears, AA4RL, who is a member and past president of the Owensboro Amateur Radio Club. He says that drawing on the experience of the amateur radio operators, emergency management officials decided to sponsor a class on amateur radio operation. The five-week session teaches the skills and rules needed to pass the Technician class amateur radio test.

Spears, who has been licensed since 1961 said in a recent newspaper interview that this educational series will be good for the community because it will provide more people who can be deployed with radios. Spears said that these new hams can serve as weather spotters as well as assisting the Red Cross assess damage. Having amateur radio operators throughout the county would give real-time, on-the-scene feedback to emergency managers and to officials with the National Weather Service office in Paducah.

Owensboro Kentucky has a long history of cooperation between rescue radio hams and city officials. This is just another example of how that tradition carries on. (ARNewsline(tm) and Published reports)

**

RESCUE RADIO: HAWAII HAMS WERE PREPATED FOR FELICIA

Hams in Hawaii were ready for a big storm that never arrived. This as the threat from hurricane Felicia was downgraded to a tropical depression and has now has passed.

Ron Hashiro, AH6RH, is the Hawaii State Civil Defense RACES coordinator. He says that in preparation for Felicia that daily nets were in operation. But as the storm approached and broke apart the

need for the Skywarn activation was cancelled.

Ron says that the daily State Civil Defense net was instead operated as an ARES net instead of a RACES activation. Because the threat did not materialize, RACES was not activated and this daily ARES net carried informational bulletins with revised frequencies and times as conditions warranted.

Hashiro says that it was a textbook example of coordination, information sharing and dissemination under the umbrella of ARES prior to activation to keep the amateur radio operators informed.

As an aside, Len Winkler, KB7LPW, who used to host the radio program Ham Radio and More now lives in Hawaii. He reports over Facebook that the area ended up with a total of 2" of rain but at the time of his posting on Wednesday, August 12th, they experienced some high winds that had began some 7 hours earlier. He reported that the winds were in excess of 35mph.and coming in from the West which is totally different than our normal. He added that his trees were not enjoying their swaying and that there were avocados everywhere. (AH6RH, KB7LPW)

**

RESCUE RADIO: MISSOURI HAM ASSISTS LOST HIKERS

A Houston, Missouri amateur radio operator played a role in aiding some lost hikers recently in the Paddy Creek area in northwest Texas County. On Saturday, August 1st, Richard Wood, KB0MPO, was monitoring a local repeater when he heard a call for help. The person was asking for assistance for himself and several hikers who became lost on the Paddy Creek Trail.

It appears that one o the hikers had his own ham radio equipment with him and found a local repeater frequency to call for help. The hikers described their location. Wood assessed the situation and gave directions to return to their campsite.

When some of the hikers decided it was too far to make the trip back, KB0MPO notified the sheriff's department to make a rescue. The hikers ultimately returned to their starting point without further incident. (KA0ADI)

**

RESCUE RADIO: CAR HORN BASED EMERGENCY ALERT SYSYEM PROPOSED IN GERMANY

In the past, Germany used sirens to warn the population in the streets against floods and other dangerous situations. Today, most sirens are gone having been dismantled after the Cold War.

Now, researchers of the Fraunhofer Institute for Technological Trend Analysis want the population to be warned of pending disasters by use of common car horns. In fact, they have applied for a patent of a

technology which allows the horns of parked cars to be activated in cases where such an immediate emergency natice to the Gerrman public is required..

The technology is based on the Germany's eCall emergency system, which new cars are going to be equipped with beginning in September 2010. The eCall system was developed at the initiative of the European Union Commission to help reduce the number of road traffic fatalities. It consists of a GPS sensor and a mobile phone component, which is activated only in case of an accident such as when airbags are triggered. The system then can transmit data such as the time and location of an accident and driving direction of the vehicle to an emergency call center.

The researchers soon realized that the eCall infrastructure can also be used to warn the population. Once the cars are equipped with a radio receiver, their horns can be triggered in case of disaster authorized civil protection agencies. This proposed new system is meant to complement rather than replace the other emergency alert options already in place in Germany many of which are broadcast based. More on this concept is on line http://www.sciencedaily.com/releases/2009/07/090720083423.htm (Science Daily)..

**

RADIO BUSINESS: MFJ ACQUIRES CUSHCRAFT AMATEUR ANTENNAS

In ham industry news, MFJ Enterprises, Inc., of Starkville, Mississippi has purchased Cushcraft Amateur Radio Antennas Product Line from Laird Technologies, St. Louis, Missouri. The sale was effective July 31, 2009 and MFJ has announced that Cushcraft products will continue to be manufactured in Manchester, New Hampshire.

According to MFJ Founder Martin Jue, K5FLU, Cushcraft Amateur Radio Antenna products have long been a popular source for a wide range of HF, VHF and UHF vertical, beam and yagi antennas for the amateur radio community. He says that the acquisition of Cushcraft Amateur Radio Antennas will bring over fifty new products to MFJ's amateur radio product line. Jue added that his company will add more new products to this antenna line and will continue the Cushcraft Amateur Radio Antennas name long into the future. Look for more information soon at www.mfjenterprises.com. (MFJ)

**

RADIO BUSINESS: RADIO SHACK TO BE KNOWN AS THE SHACK

And in case you have not heard the latest, Radio Shack will call itself the polite version of what hams have long called the chain. The Shack.

According to Chief Marketing Officer Lee Applbaum, customers, associates and even the investment community have long referred to

Radio Shack as 'The Shack. So says Applbaum the company has decided to embrace that fact and -- in his words not ours -- to share it with the world.

According to Applbaum customers see more of a focus on mobility and wireless products in the new advertising. He says that the company is contemporizing the way it wants people to think of the brand, rather than actually changing the official name of the company.

The word contemporizing does not seem to appear in any dictionary but we did find the words contemporize. It means to give a modern or contemporary character or setting or to update. It also means to place in or regard as belonging to the same age or time. (Published reports)

**

HAM HELP: PENNSYLVANIA HAM SEARCHING FOR ONE OF HIS OLD QSL CARDS

A Pennsylvania ham is looking for someone who has one of his old QSL cards so that he can recreate it and start using that design once again. Phil Lanse, K3IB, id that ham but the card he is looking for has his old K2IBP call sign on it.

Phil tells Newsline that he used those cards between 1953 and 1990 while he was very active on terrestrial VHF and EME from New Jersey. He says the card in question was printed by Richard "Brownie" Brown, W3CJI, who is now a silent key. The design featured Phil's K2IBP call in fluorescent blue letters outlined in black and black lettering on a fluorescent red background.

Phil says he would like to get a scan of one of his old cards so that he could have another print shop recreate it for him to use once again, If you can assist, please contact Phil by e-mail to l31nesep(at) epix (dot) net. He will be very grateful to anyone who can assist. (K3IB)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: ART HOUSHOLDER, K9TRG - S.K.

One of the hams who contributed mightily to the initial growth of FM in ham radio has become a silent key. Art Housholder, K9TRG, the founder of the Chicago-area based Spectronics passed away on Tuesday July 7th at age 82.

A a longtime resident of Elk Grove Village, Illinois, Art was one of those kids bitten by the amateur radio bug and soon became K9TRG. In the late 1960's his store, Spectronics was one of the centers where hams nationwide could purchase surplus land mobile two-way gear that they could convert to amateur radio use as mobile and fixed stations as well as repeaters.

Its unknown just how many repeaters started as used taxi and police radios that were recycled to ham radio through Spectronics, but the number had to have been into the hundreds if not thousands. In the process it also made the name Art Housholder and the call letters K9TRG a kind of early FM legend in the ham radio community.

Art Housholder was age 82 when he passed away at the Alexian Brothers Medical Center. A memorial was held on Saturday, July 11, at St. Michael the Archangel Cemetery in Palatine, Illinois. K9TRG leaves behind a legacy of helping to create a facet of ham radio that will likely live on for decades to come. (ARNewsline(tm))

EMERGING TECHNOLOGY: 6 IN 10 COMPANIES TO SKIP WINDOWS 7 FOR NOW

The upcoming release of Microsoft's Windows 7 operating system has the computer world buzzing but the long awaited replacement for Vista may not get the level of corporate sales that its developers are hoping for. David Black, KB4KCH, reports:

--

Six in 10 companies in a survey plan to skip the purchase of Microsoft Corp's Windows 7 computer operating system, many of them to pinch pennies and others over concern about compatibility with their existing applications.

Windows 7 will not be released until October 22nd, but has already garnered good reviews. This, in contrast to its disappointing current version known as Vista. Vista simply did not catch on with either consumers or the business world and many P-C makers opted to stay with the proven and popular Windows XP. Also, many companies rejected Windows Vista as unstable. For example, the chip maker Intel Corp, stayed with the older XP system.

So why will adoption of Windows 7 be slower than Mivrosoft expected? Many of the more than 1,000 companies that responded to a survey by ScriptLogic Corp say they have economized by cutting back on software updates and lack the resources to deploy Microsoft's latest offering. The survey found about 60 percent of those surveyed have no plans to deploy Windows 7. About 34 percent will deploy it by the end of 2010 and only 5.4 percent will deploy by the end of 2009

Forty-two percent said their biggest reason for avoiding Windows 7 was a "lack of time and resources. Another 39 percent of those surveyed said they had concern about the compatibility of Windows 7 with

existing applications.

--

ScriptLogic is a corporation that provides help to companies in managing their Microsoft Windows-based networks. It sent out 20,000 surveys to information technology administrators to learn the state of the market. (Technology OnLine)

**

EMERGING TECHNOLOGY: USB PORT PROTECTION FROM L-COM

A surge protector for your U-S-B ports. That's the latest product from a company called L-com that is offering its model AL-ECF504-AB. This is a USB 2.0 connector port resistant to power surges and shielded against electromagnetic as well as RF interference. The unit is available as both Type A and Type B connectors. More is on-line at www.L-com.com. (L-COM)

**

PUBLIC SERVICE: HAM RADIO TO COORDINATE NATIONAL WILDLIFE REFUGE WEEK

Ham radio is about to become involved with improving the environment. This with word that the KP1-5 Project, which sponsored the 2009 Desecheo Island DXpedition has announced that it will be serving as national coordinator for Amateur Radio's involvement in the 2009 National Wildlife Refuge Week from Sunday, October 12th to Saturday, October 18th.

The goal this year is to combine amateur radio's communication skills with ones enjoyment of the outdoors to help others learn about the National Wildlife Refuge System. Hams worldwide can help spread the word about the National Wildlife Refuge System by operating in or near a refuge during National Wildlife Refuge Week.

Only authorized, responsible access to refuges is sanctioned by this event. For more details please visit www.nwrweek-radio.info

By the way: This year the National Wildlife Refuge System celebrates 106 years of conservation and quality recreation in 2009. (Press release)

**

WORLDBEAT-UK: AMSAT-UK COLOQUIUM VIDEOS NOW ON LINE

In news from around the world, the videos of presentations at this years AMSAT-UK International Space Colloquium are now available to watch on the British Amateur Television Club website. All 18 sessions can be seen at www.batc.tv (Southgate)

**

WORLDBEAT-AUSTRALIA: NEW VK BANDPLANS AND TONE ACCESS PLANS RELEASED

And word that the Wireless Institute of Australia has released revised repeater access plans that specifically include CTCSS tones, Echolink and D-STAR frequencies.

Under the revised scheme 91.5 Hz is the new CTCSS tone for standard repeater activation in Australia. It replaces 123 Hz which is no longer recommended for future relay devices due to problems with false detecting. 141.3 or 146.2 Hz are to be used to activate links to repeaters on other VHF and UHF bands. 85.4 Hz will be used to activate links to other bands that some operators are not permitted to directly use.

The WIA has also revised band plans so as to include recommended frequencies for D-Star and Echolink simplex operation. Included is an interim plan for the new 2200 Meter or 135.7 to 137.8 kHz very low frequency band as well. (WIA News)

**

ON THE AIR: CELEBRATING A MUSEUM IN THE NETHERLANDS

On the air, listen out for PD55EA. That station will be on the air until August 28th to celebrate the 55th birthday of the "Ellert and Brammert" Museum in Schoonoord, the Netherlands.. They group will be active on 40, 20 and 10 meters using SSB and the digital modes. There may also be activity on 2 meters as well. QSL's will be sent automatically via the bureau. If you want to QSL direct, please send your QSL via PD7BZ. (DXNL)

**

DX

In DX, F2VX and FYFYD, will sign portable 4J from August 11th to 29th, from Azerbaijan using mainly H-F SSB. QSL via direct with an self addressed envelope plus postage or via the French Ref-Bureau only.

And T6AD will be on the air using mainly CW during his free time from Afghanistan until 22nd of August. QSL via K2AU.

W2LPL will be operational portable A25 from Botswana from August 16th to the 19th. Plans are to use SSB and PSK31 on 20 meters. QSL's go to W2LPL.

EI6DX, will be active as portable 6W between November 7th to the 16th from Somone, Senegal which is located about 70 km southeast of the city of Dakar. He will concentrate on the lower bands and CW. QSL to RX3RC, direct or via the bureau.

EI3IO says he is leaving Ireland and will move to Bahrain for at least 2 years. He has not yet received his callsign yet but plans to be active on 160 meters through the VHF bands. Listen for him on 20 meters starting in September. Hopefully more details will be

forthcoming at his Web page at http://EI3IO.com

Lastly, W2VQ and WQ2N using their own calls stroke FJ from St. Barthalamy between August 18th nto the 25th. Their operation will be on 80 through 6 meters using CW, SSB, RTTY and PSK31. An online log will be available during and after the operation.

(Above from various DX news sources.)

THAT FINAL ITEM: RADIO LAW: TEEN SUES AMAZON OVER 1984 BOOK DELETION

Radio transmission is what makes the Amazon Kindle electronic book work and its Amazon's use of radio to delete a book from the Kindle that has lead to legal action against the merchandising giant. This, as a 17 year old student from Michigan has filed a lawsuit against Amazon after it deleted a book he had purchased for his Kindle device. Jerry Gaul, KE7GGV, has the details:

--

The high school student, Justin D. Gawronski, filed suit in a Seattle, Washington court. He claims that Amazon forcibly recalled copies of George Orwell's "1984" in July after it was revealed that it was an unauthorized version. Gawronski's complaint alleges that he was reading "1984" over the summer for an advanced placement class and had to turn in notes called reflections on each hundred pages. Gawronski claims that with the loss of the digital book, his page count was thrown off and his notes were -- in his words -- "rendered useless because they no longer referenced the relevant parts of the book."

While buyers received refunds for the electronically recalled copies of the Orwell books, the fact that no advance notice has created an uproar against Amazon. The lawsuit, for one, alleges that Amazon did not make it clear enough to customers that remote book deletions were even a possibility. It also alleges that the company violated its own terms of use by radioing Gawronski work notes away, without giving him a chance to save it first.

For the Amateur Radio Newsline, I'm Jerry Gaule, KE7GGV.

--

Gawronski along with a California resident are seeking class action status for the suit. Amazon has so far declined to comment on the tort action filed against it. (Todays Technology and other published news reports)

SouthGate Amater Radio Club News are reporting that an ARES team are safe
after tyhoon disaster scare!

Welfare concerns about a Chinese Taipei Amateur Radio League emergency comms
group have been allayed, with the report that the team has made it to safe,
dry ground.

Ted Yu BV2OO, Solo Chen BM5ABU and K.L. Wu BM6AHR and two doctors and four
nurses flew by helicopter, amid rough turbulent weather, to reach Chin-Ho
surrounded by the worst floods in Taiwan in 50 years.

Quickly setting up the ham radio station equipment the ARES team began using the 40m band, with their situation report communications helping the rescue and recovery operation.

The team had to flee for their own safety when a lake broke its banks and threatened to inundate where they had set up. They made it to a cabbage field where they slept before resuming their emergency communications efforts to tell everyone they were 'alive and kicking'.

ARES was last known to be using 7.080MHz.

We,ve come a long way since the days this weekend in VK commemorates, the end of the hostilities of World War Two.

>From Morse to Digital Radio and all stops in between!

In the United Kingdom a very VERY special event station was on air last

weekend, and again NEXT weekend, call sign GB 1 SSB

This has been set up celebrating the 60th anniversary of the first British amateur radio station to use SSB.

GB1SSB next on air 22-23 August in honour of G2NX the first UK SSB Operator.

TELSTRA scoops two world records for technology trials with Nortel.

Telstra and Nortel successfully completed world-first trials of next generation 100 Gbps and 40 Gbps transmission over the longest distances ever attempted.

A continuous 2038 kilometre fibre optic link between Adelaide and Sydney was used for the 100 Gbps trial, while the 40 Gbps trial took place over 3370 kilometres on a looped-back section of the Sydney to Adelaide route.

Both trials used Nortel optical technology on existing Telstra fibre.

Both trials successfully used Nortel's Dense Wavelength Division Multiplexing (DWDM). DWDM is a technology used to increase the capacity and efficiency of fibre-based optical networks.

Telstra has deployed DWDM extensively throughout its inter-capital and regional networks but these world-first trials have demonstrated Nortel DWDM equipment on existing Telstra fibre infrastructure.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

A bright and sunny Sunday in Melbourne last weekend saw lots of smiles as Ark's Academy students sat their exams following the standard license course which was held over the last five weeks.

The Results were Six Students passed their Advanced License, Eleven their Standard and two Students passed regulations.

Congratulations to all students from the Arks Academy team, Instructors Lino, Ivy , Hannah ,Jim and John and Of course from the Assessor Team of Keith, Lionel , Peter and the "Examinator" John..

Well done everyone and we look forward to hearing all those new callsigns on the air before too much longer."

(John Fisher VK3ARK / VK3DQ / M0GJF)

On Saturday the 1st of August, the Cradle Coast Amateur Radio Club Inc held it's inaugural Examination assessments, this was held at the home of Keith Winkler VK7KW the clubs learning facilitator, also in attendance was the clubs newly indorsed examination assessor Vernon French VK7VF.

Two candidates sat for their Foundation Licence and passed with flying colours the candidates are Steven Lloyd who has applied for the callsign of VK7FXXX, and Hamish Carnegie who has applied for the callsign of VK7FHAM.

Both Steven and Hamish expressed how professional and relaxing the exams were conducted and thank the team for providing the service.

We look forward to hearing the new callsigns on air in the very near future and when you do please make contact and welcome them to this wonderful hobby of ours.

To all radio and electronic enthusiasts out there who listen to our bands and have thought you would like to become an Amateur Radio Operator then the Cradle Coast Amateur Radio Club can offer learning and examination facilities to anyone who wishes to have a go, you do not have to be a member of the club to use these facilities and all contacts and exam information is available on their web page but if you would like to become a member of this progressive active and open club you would be made most welcome, the membership application form and club rules are available to anyone from that web site.

To find that page google Cradle Mountain Amateur Radio Club or visit wia.org.au and check out the VK7 club pages.

(David, VK7EX, President, CCARC)

AMSAT-UK ANNOUNCES FUNCUBE

AMSAT-UK has announced a new amateur satellite project called FUNcube. This is an educational single cubesat project with the goal of educating young people about radio, space, physics and electronics.

FUNcube will support the educational science, technology, engineering, and math curricula and at the same time provide an additional resource for the Radio Society of Great Britain's GB4FUN Mobile Communications Center.

The target audience consists of primary and secondary school pupils and FUNcube will have a high power 145 MHz telemetry beacon that will provide a strong signal for the pupils to easily receive. It will also carry a UHF to VHF linear transponder that will have up to 1 watt and which can be used by radio amateurs worldwide for SSB and CW communications.

Amateur Radio Previews
August 2009

Nip down to your newsagent and get the August issue of Amateur Radio.

Look for the dramatic photo of a huge 26 metre dish on the front cover.

Lloyd Butler VK5BR is a regular contributor to Amateur Radio. He is back on page 5 with a simple little test meter to check if the currents in the two legs of a transmission line are in balance. Not only does Lloyd describe how to build and operate the meter, but he delivers a good bit of thoughtful theory about the ifs and buts surrrounding the performance of an RF transmission line.

WIA President Michael Owen VK3KI is using his wide-angle lens this month, taking an analytical look at the International Telecommunications Union (ITU) and the International Amateur Radio Union (IARU). (See page 3) The very existence of amateur radio relies on these two bodies, and the WIA has a vital role to play in the complex fabric of regional organizations that link back to them. Michael's grasp of how this all works, and could work better, is second to none. It is certainly complex, but it is required reading if you value the future of amateur radio.

The WIA turns 100 next year and a Centenary Committee is already planning a series of articles to record and celebrate the history of amateur radio. Peter Wolfenden VK3RV is appealing for articles, clippings and/or photos to be published in this series. Can you help?? Get all the details on page 4.

We always mention the regular columns which are presented every month in Amateur Radio. They are all written by experts in their fields and keep you up-to-date on your special interest. And there are also reports from all States on club activities - pages of them!

(Tom Potter VK3UBS)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

LAPTOPS AND NOTEBOOKS REPLACING DESK PC'S

The age of the desktop PC appears to be over. This as its more portable cousins, the laptop and notebook surge ahead with consumers clamouring for light-weight computers in funky designs for use at home, in cafes

and on the heir to work.

Not a single desktop model figured on online shopping portal Amazon.com's top 10 selling PC and hardware list the weekend before Christmas 2008. However seven laptop models made the list.

Those who watch trends in the computer industry say that this is yet another sign that the former dominance of desktop PCs is fading. The reason being that advances in wireless technology and lower prices make laptops and notebooks the preferred option for millions of PC users around the world.

MAJOR CHANGES IN TONGA

Major changes are taking place in amateur radio in Tonga. This, according to Paul Kidd, A-35-R-K, who tells the Ohio Penn DX Newsletter that he recently had a meeting with that nations radio Licensing Officer and the Technical Officer in the newly formed Department of Communications.

Amateur Radio Newsline's Don Carlson, KQ6FM, says that in the past, amateur radio licenses in Tonga have been managed and issued by a variety of different government agencies. That's now changed with the creation of the Department of Communications which is already building a website and plans to make license application forms available online.

For newcomers, a 'Novice' or some other type of entry level license may be created to encourage more activity. The formation of a club station and licensing classes, possibly through the Tonga Maritime Training Institute, was also discussed.

Licensing procedures for visiting operators and yachts in transit will be simplified, especially for those entering the country somewhere other than the capital. The new agency may make it possible for visitors to apply

on-line, however, they will still want to see an applicant in person before issuing a license.

As to call signs, A35 single letter suffix calls may soon be issued to resident Advanced Class licensees, and possibly to special event and contest operations as well.

Maybe most important of all, A35RK says that Tonga now has a government

Emergency Response Plan, and amateur radio participation in it is authorized. This, in conjunction with the Tonga Defense Force, the Tonga Meteorological Service, the Ministry of Civil Aviation, and the Tonga Red Cross. In all some very positive steps forward for ham radio in that nation.

K0DQ FIRST EVER TO WIN ALL MAJOR DX CONTESTS SINGLE OP

A McLean, Virginia ham operating the 2008 CW weekend of the CQ World Wide DX Contest has perhaps become the only person ever to win single-op world championships in all six major ham radio DX contests
John Scott Redd, K0DQ, on the air from Aruba as P40Q racked up over a

million more points than his closest competitor in the Single-Operator Low Power Class

Redd got his first taste of contest victory back in 1966 as a Navy officer posted to Uruguay and operating CX2CO in the phone weekend of the CQ World Wide DX Contest. Redd worked his way up through the Navy ranks to Vice

Admiral and became Commander of the Fifth Fleet. He then served as a civilian in the Iraq Coalition Provisional Authority and as Director of the National Counterterrorism Center before retiring in late 2007.

But ham radio and contesting were never far away, and operating from Mexico as XE1IIJ in the early 1970s, Redd won single-op world championships in the CQWW Phone Contest, the ARRL DX Phone and CW Contests and the CQ WPX Phone Contest. Thirty years later, when his professional life permitted a little more hamming time, he added the WPX CW crown as P41P, operating

from P43P's station in Aruba, in 2002. The only prize that eluded him was the CQWW CW. That is until now.

WEIRD AND WONDERFUL

Piddle Power

Urine-powered cars, homes and personal electronic devices could be available in six months with new technology developed by scientists from Ohio University.

Using a nickel-based electrode, the scientists can create large amounts of cheap hydrogen from urine that could be burned or used in fuel cells.

"One cow can provide enough energy to supply hot water for 19 houses," said Gerardine Botte, a professor at Ohio University developing the technology. "Soldiers in the field could carry their own fuel."

Chemically binding hydrogen to other elements, like oxygen to create water, makes it easier to store and transport, but releasing the hydrogen when it's needed usually requires financially prohibitive amounts of electricity.

By attaching hydrogen to another element, nitrogen, Botte and her colleagues realized that they can store hydrogen without the exotic environmental conditions, and then release it with less electricity, 0.037 Volts instead of the 1.23 Volts needed for water.

One molecule of urea, a major component of urine, contains four atoms of hydrogen bonded to two atoms of nitrogen. Stick a special nickel electrode into a pool of urine, apply an electrical current, and hydrogen gas is released.

A fuel cell, urine-powered vehicle could theoretically travel 90 miles per gallon.

"The waste products from say a chicken farm could be used to produce the energy needed to run the farm," for livestock farmers who are required by law to pool their animals' waste, large scale prototypes could turn that urine into power within six months.

Smaller versions likely won't be available until after that, so the average consumer probably shouldn't start saving their pee just yet.

SEANET - Conference - Korea 2009

The 37th annual SEANET Convention will be hosted for the first time in Korea.

The convention is truly a worthwhile endeavor as it provides the opportunity to meet face to face and strengthen the bonds of friendship and learn from each other through sharing and discussion of mutual interests.

The opportunity to attend and participate has given the organisers greater understanding of various peoples and cultures that they may not otherwise have known.

Some travelers may have concerns when visiting Korea with the current political climate as well as its proximity to other nations who have had SARS outbreaks in the past. However, everyone who travels to Korea comes to see it is a safe, warm, and welcoming city where tourists can comfortably enjoy sightseeing and walking throughout its cities, says HL1KDW Chae Do Sook Organizing Chairperson.

2009 SEANET Convention in Seoul, Korea

http://www.sabah.net.my/seanet/seanet_2009.htm

Today 16 August a Special Event Station with the call sign TC17EQ will participate in the Memorial Event for the tragic earthquake, which occurred in the town and region of Izmit (Turkey) on 17 August 1999.

The event will be attended by representatives of the countries that provided international assistance following this disaster 10 years ago. In recognition of their key role in emergency communications, the Turkish IARU Member Society, TRAC, has been invited to be part of the official program with a Special Event Station and with two of their emergency communication vehicles.

TC17EQ is expected to be qrv on 20m and 40m, primarily in SSB, mostly near the respective Center of Activity Frequencies for Emergency Communications, and on 30m in CW and PSK. For more details or for

skeds with HQS stations please contact TA1E, Aziz Sasa, <ta1e@ttmail.com>.

THALES INTRODUCES SDR LMR PORTABLE

The US Department of Homeland Security has picked 14 groups from across the USA to pilot an ambitious Multi-Band Radio project. This in an attempt to permit all responding units to talk with one another and with incident command no matter what frequency or mode of communication they use. Amateur Radio Newsline's Jeff Clark, K8JAC, says having a fully interoperable portable that is comparable to today's single band sets was the reason that the Department of Homeland Security Science and Technology Directorate in 2008 awarded a $6.2 million contract to Thales Communications.

Its job was to develop and demonstrate the first-ever portable radio prototype that lets emergency responders, police, fire-fighters, emergency medical personnel and others communicate with partner agencies, regardless of the radio band they operate on.

The result of that investment by the government is the Thales Liberty software defined multiband mobile radio which received FCC certification in April. The prototype is capable of operating in the primary public safety bands between 136-174 MHz, 380-520 MHz as well as in the 700 MHz and 800 MHz bands. And because it is software defined it can be reconfigured to operate in emerging spectrum that will be dedicated to emergency communications as well.

They are priced at priced at a hefty $4,000 to $6,000, each.

WW SPECIAL INTEREST GROUP --- MILITARY

MARINE CORPS BANS SOCIAL NETWORKING SITES

The U.S. Marine Corps has banned MySpace, Twitter, Facebook, and several other social media sites from its networks. The ban which is effective

immediately was instituted in response to a late July warning from U.S.

Strategic Command.

According to news reports the Strategic Command told the rest of the military it was considering a Defense Department-wide ban on the Web 2.0 sites. This, due to what the government says are network security concerns.

The Marine Corps says it will issue waivers to the Web 2.0 blockade if a "mission critical need" can be proven. They will continue to allow access to the military's internal "SNS-like services." But for most members of the Corps, access to the real, public social networks is now shut off for at least the next 12 months.

(Amateur Radio NewsLine)

Being our RD weekend and comming on on the heels of the past 2 weeks stories here on National News of "Winnie The War Winner", an ingenious radio built from cocoa tins, toothbrushes and an ashtray by a British engineer held in a German prison camp during World War Two is among exhibits at a major exhibition looking at the experiences of prisoners of war.

The story of how Captain Ernest Shackleton made the radio from odds and ends he scavenged while in captivity is told in 'Captured: The Extraordinary Life of Prisoners of War', which has just opened at the Imperial War Museum North in Manchester.

Shackleton was able to use a valve and some capacitors from a broken film projector and to make a regenerative receiver covering several wavebands with interchangeable coils made from toilet roll tubes.

Variable capacitor plates were made from Rowntree's cocoa tins rolled flat with a beer bottle and cut with scissors. The spindles were made from clinical thermometer cases.

Two toothbrush handles formed the insulation supports. The rectifier valve holder for the power supply was made from a Bakelite ash tray cut and drilled with a penknife.

The completed set, which ran on mains electricity taken from the lighting, was concealed under the floor and operated by knitting needles poked through cracks between the boards.

Used to listen to BBC and American broadcasts, it gave PoWs a link to the outside world to the point where they were often better informed than their guards about the progress of the war.

Of course not all communication during the war years was by radio, enter -- Aldis Lamps.

The following story is sourced to VK7WI A news and is a fascinating war-time story featuring Aldis lamps or blinkers those signalling lamps used to "blink" out code messages at short range usually at sea.

In 1944, Jack Cambell and Stephanie Batstone struck up a relationship using an unusual method of communication. They never met. Then Jack vanished. Fifty seven years later at the Imperial War Museum, with BBC reporter Sara Parker, they met face to face for the first time.

During Word War II, Jack Campbell was a signalman in the US Navy. For thirty days his ship was anchored off the Scottish coast in the Firth of Lorne near Oban. Life got a bit lonely on board, so Jack started up a conversation with the shore station - by Aldis lamp. An Aldis lamp was also known as a 'blinker' and was used to flash messages from ship to shore.

Stephanie Batstone, a trainee Wren, got 'talking' to Jack by Aldis lamp after he'd helped her out by passing messages onto another ship. Whilst Jack and Stephanie never saw each other, they struck up a relationship across the night waters. "You could say anything to a man on a ship, several miles off! You knew you'd probably never meet them!" remembers Stephanie, ""We were like two people on separate desert islands."

Then one morning, invasion in the air, Stephanie looked out across the sea, "The anchorage was completely empty. There were no ships at all. We asked around to find out where they'd gone." It was D-Day, and Allied naval forces were landing on the Northern Coast of France. "I felt he hadn't survived. We heard later that the ships were sunk. The invasion had started from Oban - and that's the big romance of it all."

Jack had written to Stephanie, and she had tried to contact him, but wartime has little respect for relationships or the postal service. Fifty years on Jack describes their exchanges as, "just a flirtation."

Fifty seven years later, Jack and Stephanie met for the first time. Stephanie had never married. Jack had, and it was his daughter Nicky, at Jack's request, who made contact with Stephanie on a visit to Britain.

"I told this story many times," says Jack, "imagine sitting five miles from somebody and carry on a conversation by light and never meeting them. It's thrilling after fifty-seven years to meet somebody I've never talked to."

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

News from the Gympie Communications & Electronics Group.

The Gympie EasyPal Digital and SSTV VHF Repeater system is now complete.
This gives the region an independent radio link that can receive, store
and forward on text, pictures and data files of any type without support
from the Internet. The final step of the project was to connect it to the
Internet which allows pictures received by the repeater to automatically
upload to the SSTV page on the Club's website. It also enables the

repeater to automatically download the latest local weather forecast, charts and animated Gympie weather radar picture from the BOM. These can all be called up for on-air replay via the repeater directory listing on 2 metres. The repeater's call-sign is VK4ZY and the frequency is 145.625 Mhz. Join us there for some fun pictures and discussion on Monday nights right after the GCEG club Net which is held at 7.30pm on 146.725 mhz.

APRS in the Gympie region is also functioning again with a digipeater VK4BNQ-1 filling some of the gaps between the Sunshine Coast and Maryborough. It has good coverage of the local Gympie region and will remain in operation until the main digipeater is running once again on Mt. Corella.

The group also held its AGM recently with the preveious committee of Bob VK4MR, Barry VK4KKN and Greg VK4FGDW being voted in for a second term.

The Gympie Communications and Electronics Group, Inc. holds its weekly net at 7.30 p.m. each Monday on VK4RCM, 146.725MHz.

GOLD COAST AMATEUR RADIO SOCIETY
http://www.goldcoastamateurradio.com
IRLP Node 6702

For the Gold Coast Amateur Radio Society I'm Kaye VK4VKS

On Saturday 22nd August there will be a Car Boot Sale commencing at 11.am the gates will be open at 10am to allow for set up.

The cost will be $5 per vehicle and after the Sale there will be a BBQ of, Onions Sausages and a roll for a cost of $3. All funds will go to the GARSI

You may bring your BBQ food and refreshments.

After this there will be a Show and Tell afternoon and I am sure that someone out there who has made something that they would like to share with radio friends.

Come along and enjoy the friendship of members and friends and best of all, ICE COMMUNICATIONS have advised they will be at this event!

Remember the Hamfest will be held on 14th November at the Albert Waterways Hall Broadbeach. The doors will open at 8.30am and table bookings are now available. If you would like to book then contact Marisa and all information is available on the GARSI website

Go to wia.org.au and look under CLUBS VK4

That is all for this week till next time this is Kaye VK4VKS

A WATCH WAS KEPT DURING THE DAY FOR AQUATIC LEVIATHANS AND
SEA TURTLES WITH A NUMBER OF GOOD SIGHTINGS MADE.

DURING SATURDAY NIGHT TURNS WERE TAKEN AT RADIO OPERATING,
ASTRONOMIC VIEWING AND BEING NICE TO THE LADIES WHO HAD BROUGHT
OVER THE TEA CANDLE POWERED CHOCOLATE FONDUE SET !

IN KEEPING WITH THE RD WEEKEND AND THE FACT THAT THE SITE WAS
A WORLD WAR TWO RADAR INSTALLATION, DINNER WAS IN THE FORM OF
M.R.E PACKS (THE FAMOUS MEALS READY TO EAT FROM THE US ARMY P.X.)

THE OPERATORS ARE LOOKING FORWARD TO A BEEFY CALLBACK SESSION
FOLLOWING THE NEWS TRANSMISSION AND HOPE TO BE BUSY ON ALL BANDS
UP TO 1-30PM, WHEN IT WILL BE TIME TO PACK UP AND HEAD BACK TO THE
ERCULES TO MAKE THE TIDE AND TRIP BACK TO TOWNSVILLE.

THIS TUESDAY AUGUST 18TH THE TARC SOCIAL EVENING WILL BE HAPPENING
AT THE CLUB ROOMS, ATOP SES HEADQUARTERS GREEN STREET WEST END
FROM 7-30PM. COME ALONG AND LEND A HELPING HAND TO PUT THE MAGAZINE OF
RENOWN, BACKSCATTER TOGETHER AND SOCIALISE WITH FELLOW HAMS. ALL WELCOME !

DID YOU MISS OUT ON THAT HOT RALLY AND RADIO ACTION LAST WEEKEND ?
FEAR NOT, AS COMMUNICATIONS SUPPORT CO-ORDINATOR BLUE VK4FBLU
HAS MORE GOLDEN OPPORTUNITIES FOR YOU TO PLAY WITH RADIOS IN THE FIELD.

NEXT WEEKEND THERE IS THE BLUEWATER HORSE ENDURANCE RIDE.
OPERATORS ARE NEEDED FROM MIDDAY SATURDAY UNTIL 4PM SUNDAY
TO PROVIDE COMMUNICATIONS SUPPORT FOR THE 5KM, 20KM, 40KM AND
80KM HORSE RIDES. YOU WILL GET TO TRY NEW THINGS IN THE FIELD, PLAY
DX WITH MINIMUM NOISE OR JUST STARGAZE WITH CLEAR NIGHT SKIES.

PLEASE CONTACT BLUE VK4FBLU PHONE 47754184 IF YOU CAN HELP WITH THE RIDE.

THE REGISTRATION DEADLINE IS DRAWING EVER NEARER FOR THE
NORTH QUEENSLAND AMATEUR RADIO CONVENTION.
THE CONVENTION IS BEING HELD FROM FRIDAY 18TH TO
SUNDAY 20TH SEPTEMBER, HOWEVER REGISTRATIONS CLOSE IN 12 DAYS ON
FRIDAY AUGUST 28TH. PLANNING IS WELL ADVANCED WITH VISITS,
DISPLAYS AND LECTURES. CONTACT THE TOWNSVILLE AMATEUR RADIO CLUB
AS SOON AS YOU CAN FOR CONVENTION INFORMATION AND A REGISTRATION FORM.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE, THIS IS DON
VK4FNQA FOR THE VERY BUSY TOWNSVILLE AMATEUR RADIO CLUB INC, AND
YOU ARE LISTENING TO QNEWS.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/
Redcliffe and District Radio Club

I'm Ray VK4CF back with news from the Redcliffe AR Club".

The club will be operating as a portable station VK4IZ this RD contest weekend & of course will be at Camp 6 Murrenbong, near Petrie. Club members have been camping over night from Friday to Sunday.

Shaun VK4FY has set up the new club website at
http://www.redclifferadioclub.org.au/

We invite you to have a look & offer your comments thoughts via our guest book.

>From the Caboolture Aircraft Open Day the club had many enquiries from amateurs who have let their licence slip and quite a few new people interested in joining the hobby. For the information of all intending visitors to the club here are a run down of club Monday Night General Activities

Where: Club House MacFarlane Park Klingner Rd Kippa Ring
(UBD Map 91 Ref G 1) , Time: 7.30 - 10.00ish

Program includes:
General discussion social and technical.
Business meeting second Monday of month.
A number of special demonstrations, technical talks take place on the year on third Monday of the month.
On the 4th Monday of every month is a fox hunt starting at 7.30pm everyone is welcome.
Club members and visitors welcome at all activities.

The club has also 2 unique awards for all amateurs. The Redcliffe City Award, that requires at least 5 contacts with Redcliffe club members and the TOBAR Award. This award is a tour around Australia by Amateur Radio and requires contacts starting and finishing in Redcliffe, and contacting other amateurs in the major cities and towns around this fine land.
For details of these awards please contact our secretary Peter, VK4TAA via the club web site

So until next week, for Redcliffe club I'm Ray VK4CF and you've been listening to QNEWS from VK4WIA.

GB2RS NEWS

Sunday 16th August 2009

The news headlines

* New callsigns available for Scotland

* Radio clubs wanted for art exhibition

* Daily news available from RSGB web site

Homecoming Scotland is an events programme celebrating Scotland's contributions to the world. In 2009, Scotland is celebrating the 250th anniversary of Robert Burns' birth, Scottish contributions to golf & whisky, plus Scotland's culture and heritage. Ofcom have made arrangements to enable licensed radio amateurs participate in the Homecoming Scotland celebrations. Individual qualifying licensees will be able to obtain a variation to their amateur radio licences, enabling them to use the Regional Secondary Locator A for Alba to identify their station as being situated in Scotland. This RSL will be available in addition to the existing identifier M, though only one RSL should be used in a callsign. The facility will not be valid for stations situated outside Scotland. Applications for the variation must be made on an individual basis at www.ofcom.org.uk/radiocomms/variation.

Artist and Filmmaker Esther Johnson is looking for three different amateur radio clubs based in the London area to set up an amateur radio station during an exhibition of her work on 23, 24 and 25 October 2009 in London. A different radio club is required for each day of the exhibition with volunteers to man the station throughout the day. The radio stations will accompany Johnson's 16mm film TUNE IN, made in 2006, which focuses on amateur radio. Johnson will also be exhibiting photography of radio enthusiasts alongside her film work. Further information on TUNE IN can be found at www.blanchepictures.com/films/tunein.htm. There is no fee available for this but it is a great opportunity for amateur radio to be visible to a wider audience, as well as being part of an unique arts event which will be well publicised. If your club is interested in taking part in this exhibition please contact Esther no later than Monday 14 September by e-mail to esther<at>blanchepictures.com.

The GB2RS news pages on the RSGB website have a brand new section of ever-changing news. There is now a news feed that shows interesting

stories involving amateur radio in the press both in the UK and internationally. Whether that's reports of amateur radio clubs taking part in public events, the work of RAYNET in the community of discussions of the technology involved, you can read about it on the news pages. Go to www.rsgb.org/news and scroll to the bottom of the page to see the latest news stories in the press.

Ofcom will be exhibiting at the National Hamfest on 2 and 3 October at the Newark & Notts Showground. This will give the visitors to the show, organised by the RSGB and Lincoln Short Wave Club, the chance to talk to Ofcom about any concerns they have affecting amateur radio. Visitors to the show will also have the opportunity to take their Morse Proficiency tests as the Region 13 team will have their Morse examiners available throughout the two days. Test speeds start at 5 words a minute and can go to 30 words per minute if the candidate wishes. Details of the National Hamfest can be found at www.nationalhamfest.co.uk.

2

Several members of the Yahoo-based Portable & Mobile Radio Group intend to have a mobile run to the lost village of Imber on Salisbury Plain today, Sunday 16 August. The QRA is IO81XF and Worked All Britain square is ST94 Wiltshire. They hope to operate mobile on 80, 40 and 20m. Frequency depends on the usual factors, but typically close to the recognised WAB frequencies plus or minus QRN. Times are approximate but likely to be between 11am and 2pm. The group website posting may provide further information http://groups.yahoo.com/group/portable-mobile-radio.

Some time ago, Brian Shearer, MM1HMV asked the RSGB QSL bureau if a new QSL sub manager could be found for the G0H series due to his increasing commitment to his valuable work with the Red Cross. We are pleased to advise listeners that Ken Barnett, G0HOF has taken up the challenge to serve his fellow G0H's and has already taken delivery of SAEs and outstanding cards, from Brian. Ken's contact details can be found on the RSGB members' website and at QRZ.com.

At the RSGB Convention, to be held from 9 to 11 October, there will be Forum where visitors will get the chance to discuss any ideas they may have to market amateur radio. Amateur radio in the UK needs more people to take part; from young to old, experienced and inexperienced alike if it is to prosper in the coming years. The hobby must continue to attract these new people so, in our current consumer-driven culture, we need to promote it in much better and more coordinated ways than we've been doing. We need to generate a 21st Century image and drive the amateur radio brand more into the public eye as a worthwhile hobby. This is what marketing is all about. Under the guidance of Alan Messenger, G0TLK, this Marketing Ideas Forum will enable active amateurs to air their ideas for what they think could be done to attract and keep new people into the hobby or to bounce around ideas suggested by others. It promises to be quite a lively discussion!

There is to be a 30m Multi Mode Weekend on 22 and 23 August to promote experimenting and using different digital modes 30m band. A number of digital mode groups will be participating this weekend so if you want to try out a mode you have thought about trying here is your chance to get on the 30m band and have a go. This is not a contest; there are no set times, no rules, no set exchanges and no winners. It is chance to try out a new band and a new mode, experiment and chat to those who are already using the band and have some fun. For more details of this event and other 30m activity, check www.30MDG.net.

Bishop Auckland ARC is coordinating the National Railways on the Air Weekend that will take place on 26 and 27 September. This date celebrates the anniversary of the first steam powered passenger railway. If you would like to take part by running a station, approach your nearest preserved railway, ask if they would they like to have an amateur radio station as part of their event to promote awareness of their railway. Once you have their agreement, apply for a special event licence in the usual way with Ofcom. When you have the details of the station, please register at www.barac.m0php.net. Many groups have already registered so listen out for those special event stations.

And now for the details of rallies and events for the coming week

The Andover Radio Club Boot Sale will take place on 23 August at Wildhern Village Hall and Playing field, SP11 0JE, which is just north of Andover just off the A343. Entry is £1.50 and there is plenty of parking available. Details from Martin, M0MWS, 01980 612070 or check out the website at www.arac.co.uk.

3

Now for the news of special events

GB111HP will be active for the rest of August. The special callsign is a tribute to Harry Patch, who passed away on 25 July, a few weeks after his 111th birthday. He was the oldest surviving World War I veteran living in the UK. QSL via G4PLY, either direct or via the bureau.

There will be a lot of stations on the air today, 16 August, for the second day of the International lighthouse and Lightship weekend. A list of worldwide entrants can be found on www.ILLW.net.

Today, 16 August, GB2PF will be on the air to coincide with Bolsover's Peter Fidler weekend. The station will be active between 9am and 6pm on 70cm, 2m & HF bands depending on conditions. All calls are welcome, whether local or DX.

Over the weekend 22 and 23 August, Marches ARS will be operating GB1SSB from the Old Racecourse, Oswestry to celebrate the 60th anniversary of the first British amateur station to use SSB. The station belonged to H. Woodhead, G2NX, who resided in the Oswestry area. The station will be operational on HF, VHF and UHF on phone and, hopefully, PSK31. Further details from Dave, MW0AYM on 01691 777242.

GB8CMC will be on the air from 23 to 30 August to commemorate the Coleshill Market Charter. The charter was awarded by King John on the 26th August 1207 on Church Hill in Coleshill, Warwickshire. The main bands of operation will be on 3.5 and 14MHz with SSB.

And now the HF DX news compiled from 425 DX News and other sources.

3B7FQ will be active from St. Brandon Island until the end of August. He will operate CW and SSB in his spare time and will use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily. QSL via K5XK, direct is preferred.

F2VX and F6FYD will be active as 4J/homecall from Azerbaijan until 29 August. They will operate SSB on the HF bands. QSL via their home calls, either direct or via the bureau.

5B/G4MKP will be active from Cyprus until 25 August. He will operate mainly CW on 80 through to 10 metres. QSL via M0URX.

C21TI will be active from Nauru, IOTA reference OC-031, until 23 August. Plans are to operate SSB and CW on 160 through to 6 metres. QSL via EA4ATI. Further information can be found at http://c21ti.madrono.net/index.html.

Now the contest news

The increasing availability of 70MHz across Europe could see some Sporadic-E DX contacts take place in the 70MHz Trophy, although it is a little late in the Sporadic-E season. The contest takes place today, 16 August, from 0900 to 1500.

On 18 August, the UHF Activity Contest takes place using the 1.3 and 2.3GHz bands. All modes are allowed and the exchange is signal report, serial number and locator.

4

Now the solar factual data for the period from the 3rd to the 9th of August, compiled by Neil Clarke, G0CAS on the 10th of August.

Solar activity was very low with no solar flares taking place. The solar disc was spotless everyday for the fourth consecutive week. Solar flux levels declined to 66 units on the 4th and the 5th. The average was 67 units. The 90 day solar flux average on the 9th was 69 units, the same level as last week. X-ray flux levels remained below the minimum reporting level everyday. Geomagnetic activity started at quiet levels but on the 6th a small coronal hole disturbance arrived. The Ap was 14 units. Quiet conditions returned for the remainder of the period. The average was Ap 7 units. At the ACE spacecraft solar wind speeds increased from 320 kilometres per second on the 4th to 530 on the 6th. Particle densities were above 10 particles per cubic centimetre from the 3rd to peak at 28 particles per cubic centimetre early on the 6th. Bz varied between minus and plus 3 nanoTeslas on the quiet days and between minus 14 and plus 13 nanoTeslas during the disturbance.

And finally the solar forecast. This week looks set for much of the same with the solar disc expected to be spotless on most days if not them all. Solar flux levels should be around the high 60's for most of the week. Geomagnetic activity is expected to be quiet today, however, later tomorrow or Tuesday the arrival of a coronal hole disturbance is expected to arrive. This should not last any longer than 48 hours and by next weekend quiet conditions should prevail again. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. The darkness hour lows should be about 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 24MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 0900 and 1800 hours UTC. The seasonal decline in this summer's sporadic-E season will continue this week with opening becoming less intense and of a shorter duration.

And that's all for this week from the propagation team.

5

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 16 August Chelmsford Amateur Radio Society is operating HF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008. ==> ARRL PRESIDENT HARRISON PRESENTS LEAGUE'S VIEWS ON DISTRACTED
DRIVING LAWS TO SAFETY ADVOCACY GROUP

To ensure that Amateur Radio is not an unintended victim of the growing
public debate over what to do about distracted drivers, ARRL President
Joel Harrison, W5ZN, has written a letter to the National Safety Council
(NSC) <http://www.nsc.org/>, highlighting issues regarding the use of
```

Amateur Radio emergency communications devices in vehicles <http://www.arrl.org/news/files/NSC_Letter7-30-09.pdf>. Many states have outlawed the use of cell phones while driving; some states with these laws have ambiguous wording (such as "mobile communication devices" or "mobile electronic devices") concerning the use of Amateur Radio while driving.

According to their Web site, the NSC is "on a mission" to "alert the American public that different kinds of distractions have different levels of crash risk. Talking on a cell phone and sending text messages are much higher risk activities that occur for longer durations and with more people than most other actions engaged in while driving." They also seek to "lead a change in our nation's cultural norms, so people come to view cell phone conversations and text messaging while driving as unsafe and socially unacceptable. Calling for a legislative ban on these activities is the first step in a long-term process to educate Americans to their risk and change the culture" <http://www.nsc.org/resources/issues/distracted_driving.aspx>.

Harrison explained to NSC President Janet Froetscher that Amateur Radio operators provide essential emergency communications when regular communications channels are disrupted by disaster: "Through formal agreements with federal agencies, such as the National Weather Service, FEMA and private relief organizations, the Amateur Radio volunteers protect lives using their own equipment without compensation. The ability of hams to communicate and help protect the lives of those in danger would be strictly hindered if the federal, state and local governments to not ensure that Amateur Radio operators can continue the use of their mobile radios while on the road."

According to ARRL Chief Executive Officer David Sumner, K1ZZ, it boils down to the difference between simplex -- when only one message can be sent in either direction at one time -- and duplex -- a communications mode, such as a telephone system, that provides simultaneous transmission and reception in both directions. Harrison, citing Sumner's 40-plus years of experience as an Amateur Radio operator, puts it this way: "Simplex, two-way radio operation is simply different than duplex, cell phone use. Two-way radio operation in moving vehicles has been going on for decades without highway safety being an issue. The fact that cell phones have come along does not change that."

Harrison attached a copy of the ARRL's Policy Statement on Mobile Amateur Radio Operation to the letter to the NSC. "Amateur Radio mobile operation is ubiquitous, and Amateur Radio emergency and public service communications, and other organized Amateur Radio communications activities and networks necessitate operation of equipment while some licensees are driving motor vehicles," the Policy Statement reads. "Two-way radio use is dissimilar from full-duplex cellular telephone communications because the operator spends little time actually transmitting; the time spent listening is more similar to, and arguably less distracting than, listening to a broadcast radio, CD or MP3 player.

There are no distinctions to be made between or among Amateur Radio, public safety land mobile radio, private land mobile radio or citizen's radio in terms of driver distraction. All are distinguishable from mobile cellular telephone communications in this respect. Nevertheless, ARRL encourages licensees to conduct Amateur communications from motor vehicles in a manner that does not detract from the safe and attentive operation of a motor vehicle at all times. See the Policy Statement on the ARRL Web site:
<http://www.arrl.org/govrelations/MobileAmateurRadioPolicyStatement.pdf>

==> ARRL PRESIDENT HARRISON PRESENTS LEAGUE'S VIEWS ON DISTRACTED DRIVING LAWS TO SAFETY ADVOCACY GROUP

To ensure that Amateur Radio is not an unintended victim of the growing public debate over what to do about distracted drivers, ARRL President Joel Harrison, W5ZN, has written a letter to the National Safety Council (NSC) <http://www.nsc.org/>, highlighting issues regarding the use of

Amateur Radio emergency communications devices in vehicles <http://www.arrl.org/news/files/NSC_Letter7-30-09.pdf>. Many states have outlawed the use of cell phones while driving; some states with these laws have ambiguous wording (such as "mobile communication devices" or "mobile electronic devices") concerning the use of Amateur Radio while driving.

According to their Web site, the NSC is "on a mission" to "alert the American public that different kinds of distractions have different levels of crash risk. Talking on a cell phone and sending text messages are much higher risk activities that occur for longer durations and with more people than most other actions engaged in while driving." They also seek to "lead a change in our nation's cultural norms, so people come to view cell phone conversations and text messaging while driving as unsafe and socially unacceptable. Calling for a legislative ban on these activities is the first step in a long-term process to educate Americans to their risk and change the culture" <http://www.nsc.org/resources/issues/distracted_driving.aspx>.

Harrison explained to NSC President Janet Froetscher that Amateur Radio operators provide essential emergency communications when regular communications channels are disrupted by disaster: "Through formal agreements with federal agencies, such as the National Weather Service, FEMA and private relief organizations, the Amateur Radio volunteers protect lives using their own equipment without compensation. The ability of hams to communicate and help protect the lives of those in danger would be strictly hindered if the federal, state and local governments to not ensure that Amateur Radio operators can continue the use of their mobile radios while on the road."

According to ARRL Chief Executive Officer David Sumner, K1ZZ, it boils down to the difference between simplex -- when only one message can be sent in either direction at one time -- and duplex -- a communications mode, such as a telephone system, that provides simultaneous transmission and reception in both directions. Harrison, citing Sumner's 40-plus years of experience as an Amateur Radio operator, puts it this way: "Simplex, two-way radio operation is simply different than duplex, cell phone use. Two-way radio operation in moving vehicles has been going on for decades without highway safety being an issue. The fact that cell phones have come along does not change that."

Harrison attached a copy of the ARRL's Policy Statement on Mobile Amateur Radio Operation to the letter to the NSC. "Amateur Radio mobile operation is ubiquitous, and Amateur Radio emergency and public service communications, and other organized Amateur Radio communications activities and networks necessitate operation of equipment while some licensees are driving motor vehicles," the Policy Statement reads. "Two-way radio use is dissimilar from full-duplex cellular telephone communications because the operator spends little time actually transmitting; the time spent listening is more similar to, and arguably less distracting than, listening to a broadcast radio, CD or MP3 player.

There are no distinctions to be made between or among Amateur Radio, public safety land mobile radio, private land mobile radio or citizen's radio in terms of driver distraction. All are distinguishable from mobile cellular telephone communications in this respect. Nevertheless, ARRL encourages licensees to conduct Amateur communications from motor vehicles in a manner that does not detract from the safe and attentive operation of a motor vehicle at all times. See the Policy Statement on the ARRL Web site: <http://www.arrl.org/govrelations/MobileAmateurRadioPolicyStatement.pdf> .

"The ARRL acknowledges numerous and increasing instances of state legislative proposals (and occasionally municipal ordinance proposals) to curb the use of cellular telephones while operating motor vehicles, ranging from prohibitions on hand-held telephones to prohibitions on all forms of electronic devices," the Policy Statement maintains. "These statutory proposals would supplement the more generalized motor vehicle code requirements that exist in various forms in virtually all States, which require operators of motor vehicles to pay full time and attention to the operation of the vehicle while driving. ARRL understands that driver inattention is a leading cause of automobile accidents, and it is not unreasonable to be concerned about substantial distractions to drivers of motor vehicles."

Saying that the League understands that driver inattention is a leading cause of automobile accidents, "it is not unreasonable to be concerned about substantial distractions to drivers of motor vehicles. Given the necessity of unrestricted mobile Amateur Radio communications in order for the benefits of Amateur Radio to the public to continue to be realized," the policy statement reads, "the ARRL urges state and municipal legislators considering restrictions on mobile cellular telephone operation to (I) narrowly define the class of devices included in the regulation so that the class includes only full duplex wireless telephones and related hand-held or portable equipment; or alternatively (II) specifically identify licensed Amateur Radio operation as an excluded service."

"The ARRL is aware of no evidence that [mobile] operation contributes to driver inattention," the Policy Statement asserts. "Quite the contrary: Radio amateurs are public service-minded individuals who utilize their radio-equipped motor vehicles to assist others, and they are focused on driving in the execution of that function."

==> ARRL RESPONDS TO FCC'S PROPOSED ALLOCATION FOR MEDICAL DEVICES IN 70 CM BAND

ARRL General Counsel Chris Imlay, W3KD, on behalf of the ARRL, filed comments <http://www.arrl.org/news/files/MannFoundationDocket_09-36Comments08_11_09.pdf> on August 11 regarding a Notice of Proposed Rule Making (NPRM), ET Docket 09-36, issued by the FCC in March 2009 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-09-20A1.pdf>. In

the NPRM, the FCC proposed to allocate spectrum and adopt service and technical rules for the utilization of new implanted medical devices that operate on 413-457 MHz (70 cm). According to the Commission, these devices -- called implanted neuromuscular microstimulators -- would greatly expand the use of functional electric stimulation to restore sensation, mobility and function to those persons with paralyzed limbs and organs; they would be implanted in a patient and function as wireless broadband medical micro-power networks (MMNs). These devices would be used on the 70 cm band on a secondary basis as part of the Medical Data Radiocommunication Service in Part 95 of the FCC rules. The Amateur Radio Service has a secondary allocation in the 70 cm band.

Researchers with the Alfred Mann Foundation -- a leading medical research organization located in Santa Clarita, California <http://www.aemf.org/> -- have developed a wireless medical micro-power network to tie together tiny devices implanted in victims of paralysis, creating an artificial nervous system to restore sensation, mobility, and function to paralyzed limbs and organs. "The Mann Foundation argues that the frequency range just above 400 MHz is optimum for their application, which requires no more than 1 mW of RF spread across about 5 MHz of bandwidth," ARRL Chief Executive Officer David Sumner, K1ZZ, wrote in "It Seems to Us," published in the June 2009 issue of QST <http://www.arrl.org/news/features/2009/06/01/10784/>. "However, recognizing the presence of a variety of incumbent radio services in that range, specifically including the amateur service, they have proposed four channels for flexibility in avoiding localized interference. Two of the four channels are 426-432 and 438-444 MHz; the other two are above and below the 420-450 MHz band."

In its comments to the FCC regarding the NPRM, the ARRL said it believes that the choice of frequency bands for MMNs as proposed is "unfortunate and unnecessary" and that "the WMTS [Wireless Medical Telemetry Service] offers a far more suitable solution than does the 413-457 MHz band for MMNs."

Sumner, in his editorial, said that the FCC's proposed rules raise two concerns: "First and foremost, the devices would be required to accept interference only from stations authorized to operate on a primary basis. The Mann Foundation has assured us that amateur stations will not cause its system to malfunction, so we see no reason why this cannot be reflected in the rules, even though our allocation is on a secondary basis. Second, while the Mann Foundation researchers appear to have done their homework, others who try to take advantage of the new rules may not be as rigorous."

The ARRL asserts in its comments that due to redundant interference rejection design, the devices developed by the Alfred Mann Foundation "appear to have some reasonable prospect of avoiding the disastrous consequences of RF interference to implanted MMNs." The ARRL stressed, however, that the FCC should not permit the marketing of MMNs or any similar device in the 420-450 MHz band: "(1) unless and until thorough

RF interference susceptibility testing is conducted on the AMF devices relative to high power Amateur Radio equipment; (2) at parameters other than those inherent in the Mann system, which incorporates notably redundant interference rejection design characteristics; and (3) without very specific patient notifications and labeling of the body-worn MCUs [Master Control Units] and other portable components which provide firm assurance that the devices will not malfunction in the presence of RF fields from authorized radio services in the same bands."

The ARRL did acknowledge that it thought the Commission to be correct when it stated in the NPRM that "[g]iven the low transmitter power and duty cycle limits that would typically be used by either the implanted MMN device or the external MCU, we expect that the risk of interference from MMNs to incumbent operations in these frequency bands would be negligibly small." The ARRL pointed out, however, that no testing has been done to verify this conclusion and "such testing should be concluded and the results analyzed before this anticipatory conclusion can be relied upon."

In its comments, the ARRL made note of the fact that there is Part 90 spectrum above 450 MHz available for low-power biomedical telemetry, but "the Alfred Mann Foundation argues that bands between 450 and 470 MHz are unsuitable due to the fact that the band is 'congested and populated with commercial, high-power transmitters that could preclude reliable operation of lower-power, wireless medical implant devices.' This, the ARRL said, "is a very worrisome contention, and not the argument that should be made by the proponent of a new service that is secondary to other incumbent licensees. ARRL contends that if the 450-470 MHz band hosts services that are incompatible with reliable operation of MMNs, then the 420-450 MHz band, and especially the segment proposed for MMNs at 438-444 MHz is equally incompatible with MMNs."

Pointing out that Amateur Radio television transmitters and repeaters and FM voice repeater input and outputs operate in this segment in particular, "the potential for interference to MMNs is on the same order, or worse, than would be the case if MMNs were to operate in the Part 90 biomedical telemetry band between 450 and 470 MHz," the ARRL told the FCC. "In the segment 426-432 MHz, amateur television stations transmit on a wide bandwidth basis. Amateur Radio stations are permitted to operate at power levels up to 1500 W PEP output, and the RF environment at 420-450 MHz, with primary government radiolocation facilities and highpower amateur facilities is no more conducive to reliable MMN operation than would be the 450-470 MHz band."

The ARRL also voiced concerns that nowhere in the NPRM does it mention what the allocation status of MMNs would be relative to the Amateur Radio Service. Though the Alfred Mann Foundation has proposed that MMNs would be secondary to incumbent licensed operations in the subject bands, the Amateur Service is presently secondary to government radiolocation in this band; this represents a cooperative sharing arrangement that is satisfactory to both government agencies and the

Amateur Service, the League contends.

"While it is presumed that the proposal is for MMNs to be secondary to both government radiolocation and to the Amateur Service (as opposed to Amateur stations and MMNs being co-secondary) this is not clear from the NPRM," the ARRL maintained. "Because the interference susceptibility of MMN devices generally is not known, it would be improper to create a co-secondary allocation for MMNs anywhere in the 420-450 MHz band at this time. The Amateur Service has a practical inability to protect patients wearing RF susceptible MMNs from interference from ongoing amateur operations in the 420-450 MHz band, and therefore all MMN operation is going to have to be conditioned on the ability to withstand and operate in the presence of such high-power signals, and thus subordinate in allocation status to the Amateur Service. Unless this interference rejection capability is demonstrated by MMN proponents in advance, the devices should not be allowed to operate anywhere in the 420-450 MHz band."

Imlay and ARRL Technical Relations Manager Brennan Price, N4QX, met with the Alfred Mann Foundation in February 2009, but Imlay said that so far, they have not responded to the ARRL's request to "cooperate in a firm statement that their devices would not malfunction in the presence of nearby RF signals from Amateur Radio stations. Failing that, these comments reflect our continuing concern about the effect on implant patients from unpredictably close Amateur Radio station operations. Other radio services affected, both above and below the 430-450 MHz band, are taking similar positions."

==> ARRL EXECUTIVE COMMITTEE APPROVES EIGHT EDUCATION & TECHNOLOGY PROGRAM GRANTS

In July 2009, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP) <http://www.arrl.org/FandES/tbp/>, awarding nearly $9000 to eight schools. More than 370 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology <http://www.arrl.org/FandES/tbp/ti.html>. The Executive Committee reviews applications for equipment and resource grants twice each year.

ETP Grants
ETP grants consist of Amateur Radio equipment, enabling the school to set up a station. Schools may receive activity kits in addition to station equipment. The following schools recently received ETP grants:

Bob Jones High School, Madison, Alabama: One teacher from this school -- and another seven from the school's district -- attended the ARRL Teachers Institute this summer. The grant application proposed a basic Amateur Radio station to implement what these teachers learned during the Teachers Institute. The proposal detailed a long range plan with incremental steps; this basic station set-up is the first step to school

district-wide programs within numerous schools in the district.

Armada Middle School, Armada, Michigan: The program articulated in this grant application is the typical entry level program that includes Amateur Radio as an extracurricular activity, and asks for a basic Amateur Radio station. The instructors plan to mainstream the program as they gain experience and student support.

Hidden Valley High School, Roanoke, Virginia: This grant application asks for a basic Amateur Radio station. As the school gains experience with ham radio in the classroom, their program will be refined. Their application requests a basic station set up and has plans for future expansion.

Progress Grants
In order for a school to be considered for a Progress Grant, it must already be an ETP School. If a teacher attends a session of the Teachers Institute, that school is automatically considered an ETP School. The following schools received Progress Grants:

West Pines Elementary School, Greenville, Tennessee: The lead teacher -- a graduate of the Teachers Institute -- wants to integrate the weather satellite system that was demonstrated during the Teachers Institute. This will be used as a beginning to expand the program to include space in the classroom content.

Morris County School of Technology, Denville, New Jersey: The lead teacher is a graduate of the Teachers Institute, but has moved to this school since that time. He would like to integrate the weather satellite system that was demonstrated during the Teachers Institute as a beginning to expand the program to include space in the classroom content.

Highland Middle School, Beaver Falls, Pennsylvania: The lead teacher is a graduate of the Teachers Institute and wants to integrate the weather satellite system that was demonstrated during the Teachers Institute as a beginning to expand his program to include space in the classroom content.

Sister Lakes Elementary School, Dowagiac, Michigan: The lead teacher, a graduate of the Teachers Institute, was selected to participate in the inaugural Teachers Institute II this summer. He has proven to be a strong advocate for integrating ham radio not only in his previous school assignment as a teacher, but also in his current position as a school administrator. He is requesting the equipment resources to develop the Mars Lander simulation that is demonstrated during the Teachers Institute.

Livingston High School, Livingston, New Jersey: The lead teacher for this program is a recent Teachers Institute graduate. He wants to expand the use of the activity board resources he learned about during the Institute into his regular curriculum.

Nichols Junior High School, Arlington, Texas: The lead teacher is a graduate of the Teachers Institute and wants to integrate the weather satellite system that was demonstrated during the Teachers Institute as a beginning to expand his program to include space in the classroom content.

A goal of the ARRL Education & Technology Program is to improve the quality of education by providing an educationally sound curriculum that employs Amateur Radio to integrate technology, math, science, geography and language arts with core curricula. Amateur Radio and an understanding of radio science are keys to building Wireless Technology Literacy, another important objective.

==> QEX: LOOK FOR THE SEPTEMBER/OCTOBER 2009 ISSUE

The September/October issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss <http://www.arrl.org/qex>.

Richard Chapman, KC4IFB, shows how to use the Arduino prototyping board to design a project, and then gives us a lesson in programming the microprocessor to "Build a Low-Cost Iambic Keyer Using Open-Source Hardware." W. G. Moneysmith, W4NFR, was a new repeater trustee needing a duplexer for a 70 cm repeater. He presents his solution in "A Homecrafted Duplexer for the 70 Centimeter Band."

Robert Zimmerman, VE3RKZ, describes one of his recent antenna experiments in "An Easily Erected 20 Meter Antenna for Emergency Use." Mike Hamel, WO1U, discusses "Phase Controlled Differential Drive for EER Amplifiers" in this presentation about envelope elimination and restoration as a way to achieve linear operation with high efficiency (such as Class E) amplifiers.

Gary Steinbaugh, AF8L, presents Part 4 of "A Cybernetic Sinusoidal Synthesizer." In this installment, Gary describes an RF power level control module for the synthesizer, and concludes with a 53.3 MHz low phase noise synthesizer using the 10 MHz reference signal. Bob Miller, KE6F, explains how you can use a surplus rubidium oscillator to build an "Atomic Frequency Reference for Your Shack." He presents information about the stability and accuracy of rubidium oscillators, as well as a number of practical applications for such a reference.

Would you like to write for QEX? It pays $50/printed page. Get more information and an Author's Guide <http://www.arrl.org/qex/#aguide>. If you prefer postal mail, send a business-size self-addressed, stamped envelope to QEX Author's Guide, c/o Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111-1494. QEX is edited by Larry Wolfgang, WR1B <lwolfgang@arrl.org>, and is published bimonthly. The subscription rate (6 issues) for ARRL members in the US is $24. For First Class US delivery, it's $37; in Canada and internationally by airmail it's $31. Nonmembers add $12 to these rates. Subscribe to QEX today <http://www.arrl.org/qex>.

==> CUTTING EDGE ARRL CONTEST RUNS THIS WEEKEND

If you enjoy the technical side of Amateur Radio and being on the cutting edge, you might want to take a look at the microwave bands. This weekend gives you a perfect chance to explore this portion of the radio spectrum with the ARRL 10 GHz and Up Contest <http://www.arrl.org/contests/rules/2009/10-GHz.html>.

There are two weekends of activity: August 15 and 16, and again on September 19 and 20. The contest period for both weekends starts at 6 AM local time Saturday and runs until Midnight local time Sunday. QSO points are awarded based on the distance of a QSO, and operating from several locations during the contest period is not only allowed, it's encouraged! SSB is the mode commonly used, although there is some CW used as well. Power levels are relatively low compared to HF; most stations run several hundred milliwatts. A station running a few watts is considered a "Big Gun." Antennas are usually dishes, like those used for receiving satellite TV.

Many QSOs are completed on the microwave bands by bouncing signals off of other objects, such as mountains, buildings, even raindrops! You can also get lucky and catch a good tropospheric opening; in the 2007 contest, a QSO of 907.2 miles was made on 10 GHz on the NA West Coast between California and Mexico.

If you have a person in your area active on the microwave bands, ask if you can tag along and observe. If you live in an area that has a microwave club, such as the North Texas Microwave Society, the North East Weak Signal Group, the Mt Airy VHF Club and several others, find out what their members are doing for the contest. Elmering is a big part of the microwave groups and they are only too happy to introduce their fun to you.

Exploring different facets of Amateur Radio gives you the opportunity to see what others enjoy and why they enjoy it. You might be missing out on something you would really like. Think outside the box and try something new!
==> AMATEUR RADIO STATION WX4NHC FEATURED IN NATIONAL COMMERCIAL

WX4NHC, the Amateur Radio Station at the National Hurricane Center (NHC) <http://www.wx4nhc.org/>, is featured in a 60 second radio spot for Duracell batteries. The commercial, which begins airing this month, highlights the efforts of an all-volunteer army of ham radio operators for WX4NHC. Narrated by actor Jeff Bridges, it describes the important role that radio amateurs play during severe weather conditions -- enabling communications with emergency medical teams, police and fire departments -- when the power goes out. The narration underscores the importance of a reliable battery to power the portable ham radios, which are crucial to WX4NHC's work. Listen to the spot here: <http://www.arrl.org/news/files/HURRICANE_60_PREPAREDNESS_MIX.MP3>.

"This commercial is being played nationally during hurricane season and will help promote awareness of Amateur Radio and the public service we do to provide emergency communications, especially during and after hurricanes, when we have experienced complete electrical and

conventional communications blackouts for periods of days and weeks," WX4NHC Assistant Coordinator Julio Ripoll, WD4R, told the ARRL.

Ripoll said that he and WX4NHC Amateur Radio Coordinator John McHugh, K4AG, worked with the ACME Marketing Firm and Duracell for several weeks to help produce the radio commercial. "It captures the essence of Amateur Radio volunteer public service and the important role of Amateur Radio performs during emergency communications in 30 seconds," Ripoll said. "The President and Creative Director of ACME and the Duracell national representative also flew down to Miami and received a tour of NHC and of the WX4NHC station where they learned about our many modes of communications, including our portable VHF/UHF radios and other portable battery operated equipment."

"With this new spot, we are helping to showcase the important contributions made by the Miami ham radio operators," said Duracell's Bob Jacobs. "These heroic teams are working to save the lives of others. When storms strike, the radio operators are donating their time to make sure communications stay intact, facing intense pressures and dangerous conditions to those in need. We're proud that our batteries can help power these life-saving efforts."

==> 7O1YGF OPERATION APPROVED FOR DXCC CREDIT

On August 12, ARRL DXCC Manager Bill Moore, NC1L, announced that after more than eight years, the 7O1YGF operation in 2000 from Yemen <http://www.arrl.org/news/stories/2002/08/15/2/?nc=1> has been approved for DXCC credit. Moore cited a review of "recently received information," as well as "additional dialogue" with the leader of the 7O1YGF DXpedition, as reasons for the approval. Because so much time has passed since the DXpedition, Moore asked that those amateurs seeking credit for 7OYGF follow certain procedures.

If you are seeking credit for 7O1YGF only:
* If you live in the US, send only the 7O1YGF QSL card with your application to DXCC; enclose a self-addressed, stamped envelope. If you live outside the US, please enclose return postage, so we may return the card to you. DXCC will then process the card. Applicants will not be charged a submission fee.
* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC Desk for processing. Again, there will be no submission fee if this is a single card submission; however, you still must fill out an application form.

If you are submitting 7O1YGF with other QSL cards:
* Applicants may include their 7O1YGF QSL card with their next QSL card submission and it will be handled as usual.

Moore said that the DXCC Desk will work with the 7O1YGF team to use Logbook of the World (LoTW) <http://www.arrl.org/lotw>, if possible. "Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009," Moore reminded DXers. "We encourage

applicants to handle this sooner, rather than waiting until the last minute."

==>SOLAR UPDATE

Tad "The fair haired Sun rises in the sky" Cook, K7RA, this week reports: Another quiet week on the Sun. Last week on Earth we neglected to mention the Perseids meteor shower, which peaked this week on August 12-13. A nice statistical display from the International Meteor Organization is at <http://www.imo.net/live/perseids2009/.> A look at <http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html> on August 13 showed possible heightened geomagnetic activity returning around August 18-19, with a planetary A index of 20 and 12, respectively. Sunspot numbers for August 6 through 12 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 66.8, 67.8, 67, 67.2, 67.1, 66.6 and 66.5 with a mean of 67. Estimated planetary A indices were 14, 8, 4, 8, 4, 4 and 5 with a mean of 6.7. Estimated mid-latitude A indices were 8, 8, 2, 6, 3, 2 and 2 with a mean of 4.4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Rhonda Baker's "August Sun" <http://www.poemhunter.com/poem/august-sun/>.

==>IN BRIEF:

* This Week on the Radio: This week, there is an NCCC Sprint on August 14. The ARRL 10 GHz and Up Contest and the North American QSO Party (SSB) are August 15-16. On August 15, look for another NCCC Sprint, as well as the Feld Hell Sprint. The New Jersey QSO Party is August 15-17 and the Run for the Bacon QRP Contest is August 17. Next week, there is another NCCC Sprint on August 21. Check out the Hawaii QSO Party and the Ohio QSO Party on August 22-23. The SKCC Sprint is on August 26. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, August 23, 2009, for these online course sessions beginning on Friday, September 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a

Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* RadioShack Rebranding Itself as The Shack: In early August, a RadioShack Corporation news release touted its new branding: THE SHACK. The stated purpose: THE SHACK is friendlier-sounding and less "corporate" than RadioShack <http://ir.radioshackcorporation.com/releasedetail.cfm?ReleaseID=400656>.

* FCC: Vanity Call Sign Fees to Increase September 10: On August 11, the FCC announced that the cost of an Amateur Radio vanity call sign will increase $1.10, from $12.30 to $13.40. Now that notice of the increase has been published in the "Federal Register" <http://edocket.access.gpo.gov/2009/pdf/E9-19104.pdf>, the increase will take effect in 30 days, September 10, 2009. The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term. The notice in the August 11, 2009 Federal Register, entitled "Assessment and Collection of Regulatory Fees for Fiscal Year 2009," includes regulatory fees; these fees are expected to recover a total of $341,875,000 during FY2009, encompassing all the Services the FCC regulates. For more information, see the recent ARRLWeb article, "FCC Looks to Raise Vanity Call Sign Fees for Second Consecutive Year" <http://www.arrl.org/news/stories/2009/05/18/10825/?nc=1>.

* Mickey "Santa Claus" Hicks, WO6T (SK): Mickey Hicks, WO6T <http://www.wo6t.com/> -- known to many amateurs and their children as Santa Claus -- passed away Sunday, August 9. He was 79. For the past 38 years, Hicks, a ham for almost 50 years and a long-time ARRL member and Amateur Radio instructor, would get on the air for 10 days each December as W6S (Whiskers-6-Santa). ARRL Youth Editor Duncan MacLachlan, KU0DM, profiled Hicks in December 2008 <http://www.arrl.org/news/features/2008/12/01/10479/>: "The Amateur Radio community has been quick to embrace the W6S operation. Mickey says that the first year operating as W6S was 'a hit with the operators of all ages and their children.' Mickey noted that most children are a bit apprehensive of talking over the radio, let alone to Santa! Hicks told the ARRL in 2001 that his Santa's Workshop has been a great ham radio recruiting tool <http://www.arrl.org/news/stories/2001/12/21/3/?nc=1>.

One of his most memorable experiences was when a young girl he'd once spoken with on the air as Santa came by with her ham ticket in hand to thank him in person for getting her interested. "I had tears in my eyes, of course," he said. -- Thanks to "The Daily DX" <http://www.dailydx.com/> for providing some information for this story

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org
==>Editorial questions or comments: S. Khrystyne Keane, K1SFA, k1sfa@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

2191. RE driving distracted

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-15 17:38:17 UTC
From: JB <nospam@goofball.net>
Message-ID: <doChm.2157$nh2.1953@nwrddc02.gnilink.net>
Source record: 6455

Note: I post this here after several edits for clarity, flow and to avoid injuring the sensitivity of anyone. And because I feel it is completely relevant and to the point of the matter. It lays no traps and seeks no confrontation. Only discussion on a very serious matter.
I realize that the laws of other jurisdictions might be different from mine. The reader should consider that in some places, voting, questioning a law or proposed law or it's application may be against the law so the reader should not read or view where he might be in violation.

> Yes, certainly simplex and duplex are different.
>
> But what the ARRL is saying is that there is a fundamental difference
> between communicating using mobile radio and communicating using a cell
> phone. Sumner is using the terms "simplex" and "duplex" to describe
> this. Since "simplex" and "duplex" are not common words generally used
> by the public, I conclude that he has picked them primarily to control
> the discussion. Rather than admit that they don't understand what the
> words mean, many people will just say, "Sure".
>
> The issue is distraction to a driver. It makes no difference whether
> you can hear the other person while you're talking. Whether you're
> using a cell phone or a mobile radio, you're having a conversation with
> another person and fiddling with the actual equipment -- flipping open a
> cell phone to answer a call, or changing the frequency on the ham
> transceiver. In fact, there are a whole lot more buttons to push and
> potential distractions with the transceiver than with the cell phone.
>
> If cell phone use while driving is an activity that needs to be
> discouraged, then mobile radio operation while driving should also be
> discouraged because they both result in distraction. To say, "The
> driver isn't distracted because he can't hear the other person while
> he's talking" is not logical. Saying it using fancy words like
> "simplex" and "duplex" does not make it more valid.
>
> 73, [name and call censored]

On what are you basing your conclusions?

If you say "studies show", I submit that cell phone usage studies and experiments are obviously there to prove someone's point, and indeed getting someone to do more than they are able to, will always show distraction. I submit that newer hands-free technologies need re-study to see what safety improvements have made over the handset technology.

I live in the land where everything is against the law because someone once exercised poor judgment and blamed misfortune on some inanimate object as the culprit. Here, any tragedy is an opportunity to outlaw something and be elected for "change". Here, cigarettes were first banned, the Corvair was used to bring about legislation to cuddle us in the cars we now all drive, with mandatory safety and emissions equipment that now exceeds the worth of the car. Gun Control reached a fevered pitch that although legally the 2nd Amendment still exists, safety standards for manufacturing guns far exceeds the technology available. Still, cars have not been completely banned, nor have stairs, swimming pools or coat hangers. One wonders when this will actually happen since so many women and children have been senselessly maimed and killed by them. Environmentalists who by the way often use cell phones, have been trying to outlaw cell towers as radiation hazards.

You have made many statements, without offering support. Perhaps you are simply relating your own comfort level with your skills and make assumptions of others. This is a natural leap to conclusion brought about by not realizing how different we all are.

So I will relate my own experience for anecdote.

The difference about simplex and duplex might be psychologically significant to some people, but I have not noticed it personally. I have not fully studied the ARRL finding.

For many years, I operated a fully duplexed amateur remote base system with wide area autopatch dialing. My mobile link radio was modified to be able to transmit and receive at the same time, with a 3db cut in speaker volume on transmit. Control was accomplished by 16 button full sized pad in a housing just below the dash. I found that phone conversations were quite natural and didn't require taking my eyes from the road at all. Dialing long strings of control codes was a problem for me though, and I completely abandoned that operation while in motion. I attribute the problem to a combination of the need to recall and assemble the command sequence and my lack of being able to do the key pad entry without looking, I would simply have to pull over to change the system configuration or initiate a phone call. The one button hang-up command was no problem though because I knew where it was without looking. I did know others though, who knew the 16 button keypad well enough to punch up a string without looking and never had a problem with that.

My experience with handsets, though is another matter. They significantly reduce the head motion, as one listens to the earpiece. This I found to be an unacceptable situation and so used a standard noise canceling mobile microphone in my duplex operations. In addition to the mic PTT, the transmitter could be continuous keyed by a toggle switch on the control pad. I could simply drop the mic in my lap and it would be as if I had put the other party on hold.

It may not necessarily be simplex vs. duplex, but duplex utilizing a handset that increases the risk. Certainly I have noticed that anyone who took

their eyes off the road to fiddle with buttons, had near misses and moments of anxiety. I have found that with people I would ride with that scared me when using a regular cell phone handset, no longer did after getting a bluetooth earpiece with voice recognition.

Your conclusion that they both result in distraction is an oversimplification.
Neither activity results in significant distraction when done properly. ANY activity results in distraction when done improperly. The issue of distraction whether inside or outside the vehicle lies solely with the judgment, skill and initiative of the driver.

Any driver who does not drive well or has problems focusing on their driving is a hazard. Any driver who drives erratically should be investigated
for any impairment in their judgment or skill, and there are many laws already out there. If there is ANY particular skill level issue (no one is perfect) it must be addressed by the individual either by limiting certain activities, ingenuity and/or training. The law cannot account for every possible misuse of any object. We are certainly a long way from full automation of the driving experience where everyone can just ride in the back and if there is a problem, the car simply notifies you it is pulling over. I fear though, such a thing would never come to pass because the manufacturer would then be completely accountable for all possibilities.

We shouldn't be passing bad laws to get even with other laws.
Nor should we feed the imagination of "yes men" voters who simply follow a thing rather than taking control of their (our) own destiny. That mindset can't be satisfied even if we are all in chains for our safety.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 16th August 2009

IRTS Committee Meeting

The next meeting of the IRTS Committee takes place next Saturday in Port Laoise. Affiliated Club's are reminded that they are entitled to send a club representative to the meeting.

Amongst the items on the agenda for consideration is the possibility of holding some committee meetings in Athlone rather than Port Laoise to facilitate Clubs in the West and North West.

If your club has an opinion on this proposal please attend or convey your feelings to a committee member.

Next Theory Examination

The 21st of September is the closing date for applications to sit the next Theory Examination for an Amateur Station Licence which will be held on Tuesday the 6th of October at 2p.m. in the ComReg Offices in Dublin. To reserve a place at the exam intending candidates should forward the appropriate fee to Sean Nolan EI7CD, 12 Little Meadow, Pottery Road, Dunlaoghaire, Co. Dublin.

The fee is 50 Euro or 25 Euro for full-time registered students, repeat candidates and those who are retired, unemployed or have a disability. Cheques and Money Orders should be made payable to the IRTS. When forwarding the exam fee intending candidates should enclose their postal address as well as phone and e-mail contact details. Sean's e-mail address for any further enquiries is ei7cd at gofree dot indigo dot ie

Intending candidates should note in particular, that in Section B of the paper National and International Rules and Operating Procedures- questions on the

National Rules will be based on the new Wireless Telegraphy (Amateur Station Licence) Regulations 2009 which came into force on I June 2009. These Regulations and other matters in relation to the operation of amateur stations can be found in the ‘Amateur Station Licence Guidelines’ published by ComReg in Document 09/45 which is available on the ‘Publications’ section of the ComReg website at www.comreg.ie

There is also some very useful information available under ‘Radio Theory’ in the ‘Links’ section of the IRTS website at www.irts.ie

---

IRTS 2m Counties Contest

Sunday the 30th of August is the date for the Autumn 2m counties contest. It takes place between 14.00 and 16.00 local. The full rules are available on the IRTS website under the contest tab.

This contest does have a good number of Portable entries and the would be glad of any contacts on the day. As most people have some type of 2m rig please try to be active and give away some points on the day.

70cms Activity Hour

To try to promote activity and see if it is worthwhile to run a 70cms Counties contest. We will be having a 70cms activity hour following the 2m contest on Sunday the 30th August. Both FM and SSB stations will be welcome and both Calling channels will be monitored.432.2 for SSB and 433.5 for FM users.

We look forward to hearing many portable and fixed stations on the day.

Dave Court EI3IO

Dave will be moving to Bahrain (A9) on 28 August, initially for a period of 2 years. No call-sign information is available as yet. However you may find Dave on 20m in A9 from September onwards, depending on the time it takes to obtain residency etc.

A QTH has been chosen which appears to be good for all bands 160m to VHF. Subject to licensing restrictions, Dave plans to be QRV on most MF, HF and low VHF bands. Equipment being taken includes an Elecraft K3 transceiver, Acom 1000 amplifier, yagis for 14 MHz to

70 MHz and an 18 metre Spider Beam fibre glass support for MF and low HF verticals.

It should be noted that 600m, 60m, 6m and 4m are currently not available in A9. EI3IO will still be QRV from Ireland during the next few years, during vacation trips to the family home in Shankill, where family members will still be resident. The Dublin DX Cluster EI7SDX will also remain QRV with internet access only - click http://shandx.ath.cx/cgi-bin/ei7sdx.cgi or telnet://EI7SDX.ath.cx:7300 for access."

---

30 Meter Multi-Mode Weekend August 22-23

The Amateur radio 10 MHz (30 metre) band will be alive with digital signals during the multi-mode weekend on August 22-23

The objective is to promote experimenting and using different digital modes on unique 30 Meter Band. A number of digital mode groups will be participating this weekend so if you wanted to try out a mode you have thought about trying here is your chance to get on the 30 Meter Band to try those digital modes and/or try a digital modes software that includes multiple digital modes.

This is NOT a contest.. no set times.. no rules.. no exchanges.. no winners other than those that participate with casual use of the 30 Meter Band to experiment, rag chew, DX and have some fun!

Crossakiel Amateur Radio Association

C.A.R.A are holding their first club event, which is a field day on Sunday 16th August in Crossakiel. They hope to be active on 80m-2m and on 145.550 Simplex from 10am-10pm

Please have a listen out for the EI4CARA club station on the bands. The Club meets every Wednesday at 8pm in the Welcome Wagon in Crossakiel. Everyone is welcome to attend.

The Mayo Roscommon Galway Experimenter Radio Group

The MRG experimenter Radio Group VHF/UHF SSB Challenge 2009 will take place between 15.00hrs &#65533; 18.00hrs (local time) on Sunday 6th September.

Fixed section: 144Mhz & 432Mhz (SSB only)

Portable section 144Mhz & 432Mhz. (SSB only)

Any EI/GI operator holding an amateur/experimenter licence can participate. Closing date for logs is October 4h 2009. Please forward completed logs to ei2mrg /at/ yahoo.com Trophies will be presented to the winners of the fixed and portable sections later in the year. A full copy of the rules can be had by visiting www.geocities.com/ei2mrg/

Limerick Radio Club

On the 15th and 16th of August, members of Limerick Radio Club will be participating from Tarbert Island Lighthouse for the International Lighthouse Weekend, using the call sign EI4TLH.

Club members, who intend taking part in the event should contact John EI6IW at QTHR or by e-mail to
johne at gofree dot indigo dot ie

South Eastern Amateur Radio Group

The next general meeting will take place at 8.30 p.m. on Monday the 31st of August.

Please Note: Both Committee and General meetings take place on the last Monday of each month. Committee meetings take place at 8.00 p.m. and the general meeting follows at 8.30 p.m. General meetings are open to all members and visitors are very welcome.

AREN Net

It is envisaged that the net on the 21st of each month will be a digital mode training net.

DX News

7O1YGF Yemen approved for DXCC

The following operation has been approved for DXCC:
7O1YGF Yemen. Operation from April 16, 2000 through April 26, 2000.

After reviewing recently received information regarding the 7O1YGF operation and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Rallies

For Full details of upcoming Rallies please check the IRTS Web page.

This week in History

1877 Thomas A. Edison finished figuring out his first phonograph.

1893 France is first country to introduce car registration plates.

1907 The first taxicab took to the streets of New York City.

1919 E.Fisk demos radiotelephony for the first time in Sydney, Australia.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to
�charlie dot Carolan at gmail dot com� Or by phone to 087-6265418 News can also be submitted via e-mail to
�newsteam at irts dot ie� for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday�s bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, NC1L, NJ1Q, WV2B, K3GV, K3IXD, N3SL, NG3K, K4VUD, N4AA & QRZ DX, W4QN, K5WW, K5XK, KH6BZF, N7RO, K8YSE, W8EH, AL5A/JH0MGJ, A35RK, CM2IR, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PHW, GM4FDM, HB9EDM, I1JQJ/IK1ADH & 425 DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), ZL1DK and ZL2CQ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-August, through Sunday, 16th-August there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, JA, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND. Ron, K5XK, updates OPDX that Rachid, 3B8FQ, has departed Mauritius for St. Brandon Island (AF-015) on Tuesday last week and was expected to be active as 3B7FQ on Wednesday, August 12th, after arriving around 0200z. However, as of press time no QSNs have been reported. According to Ron, barring unforeseen circumstances, Rachid now expects to extend his trip, operating until sometime on September 3rd,

when the ship departs for 3B8. Remember, operating time will be shared with Rachid's maintenance responsibilities at the St. Brandon meteorological station. Look for him on all bands, 30-10 meters, although Rachid expects 40 and 20 meters to be most productive. See OPDX.920 for suggested frequencies. He will use both CW and SSB, as conditions allow. Courtesy of Carl, K9LA, the following propagation predictions for August HF conditions to North America, Europe, and Japan, were made available (all times UTC):

Area	80m	40m	30m	20m	17m	15m
NA	....	1300-1700	2000-0400	0200-0500	1300-1700	....
	2100-0300					
EU	1600-0200	1300-0400	1300-0400	0300-0700	0700-1600	0400-1900
	1000-2300					
JA	1300-0100	1100-0200	1000-0300	0100-2200	0200-1700	0200-1400

NO PROPAGATION for NA on 12 and 10 meters
EU - 12m (0700-1500) and 10m (1100-1200)
JA - 12m (0400-1200) and 10m (0600-1000)

QSL all of Rachid's operations via K5XK, direct preferred, as indicated on QRZ.com

5B, CYPRUS (Update). Terence, G4MKP, will be active as 5B/G4MKP from Tsada village near Pafos between August 14-25th. Activity will be mainly CW/RTTY on 80-10 meters. Look for him during the mornings and evenings on CW/RTTY, and if he can figure out how to do it, SSB also. Suggested CW frequencies are around 7010, 14010, 21010 and 28020 kHz. RTTY anywhere in the band segment. QSL via M0URX, direct or via E-mail request for a bureau QSL. LoTW will be uploaded after the operation.

5Z, KENYA. Ernie, W8EH, informs OPDX that his brother Steve, W8SMH, has just received his Kenyan license. He will active from Nairobi, Kenya, for the next 3 years. His Kenyan callsign is 5Z4/W8SMH. Steve is on assignment with the Salvation Army as second in command at their headquarters in Nairobi. His travel schedule may limit his operating, and he is a rookie at DX operations (So please be patient!). His other limiting factor is that Nairobi is experiencing power shortages and as a result they are doing rolling blackouts 2 or 3 days a week in his area. His equipment is an Icom IC-718, dipoles and a multiband vertical. QSL direct to his home callsign (QRZ.com) with an IRC or SASE. Logs will be uploaded to LoTW and eQSL. His blog is at: http://howardskenyanadventures.blogspot.com/ Kenyan club site: http://www.qsl.net/arsk

9H, MALTA (EU-023). Wim, PA2AM, will be active as 9H3DZ between September 4-14th. Activity will be active mostly on 30/17/12 meters using CW and RTTY. QSL via his home callsign.

A3, TONGA (News). OPDX contacted Paul, A35RK, this past week to make sure Paul and his family were not on board the "Princess Ashika" which capsized last Wednesday, 86km northeast of the Tongan capital of Nuku'alofa. Some 93 people are presumed drowned after being trapped in the vessel. Paul informed OPDX that "We're all OK, but the whole

country is dressing in mourning clothes. The search team found the wreck yesterday, using sonar, but its too deep (110M) to dive to it. I don't know if there will be a further attempt to recover the remains of the 94 souls trapped on board. I'm not sure where you folks in the States are getting the news, but we're looking at: http://www.matangitonga.to http://www.nzherald.co.nz
Again, we appreciate your concern."
ADDED NOTES FROM PAUL (August 16th): Paul states that he just got a telephone call from Dave, W6ZL, and here's what he said:
"He arrived in Nuku'alofa late last night. He will only be able to stay in Tonga until Tuesday, August 18th, departing at 10am.

He said that it was pouring rain and the power was out, so he didn't know if he could get an antenna up and get on the air today. If he isn't QRV today, then A35KL won't be QRV at all this trip.

Dave said that he was only able to make 1 contact as YJ0ZL. The Tanna Island generator only ran for a couple of hours per day.

Dave said that he will be back in Tonga later this year, but he has no definite return date set."

C2, NAURU. By the time you read this the C21TI DXpedition by Dani, EA4ATI/9M2TI, and should be on the air until August 23rd. According to his Web page, Dani seems to be alone on this operation. The Web page states he will be staying at the "OD-N Aiwo Hotel", were previous DX-peditions have operated from, and he asks for patience especially on CW where he is not an expert. There is a chance he may meet C21RK. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
60m - 5403.05 (SSB)
6m - 50.115 MHz (CW/SSB)
QSL via EA4ATI (see details on QRZ.com or the Web below). Look for possible updates on the Web page at: http://c21ti.madrono.net/index.html

C6, BAHAMAS. Once again operators Pete/W2GJ, Ed/K3IXD, Dallas/W3PP and Randy/K4QO will operate as C6APR in the CQWW DX SSB Contest (October 24-25th) as a Multi-Operator/Two-Transmitters (M/2) entry from the Crooked Island Lodge (Grid FL22), Crooked Island, The Bahamas. The team will be active from October 22-26th. Before and after the contest, look for C6AQO on HF CW and SSB, and C6AXD on HF RTTY. Both C6AQO and C6AXD will be on 160-10 meters including the 30/17/12m bands. All the QSOs are good for IOTA NA-113 and ARLHS lighthouse BAH-005. All QSLs via K3IXD.

CM1, CUBA. Fred, CM2IR, informs OPDX that he has been working tropospheric ducts on VHF (145.500 MHz) from Cuba (IOTA NA-015, GRID LOC: EL83TC) since August 11th and will continue until August 20th. He is using a collinear antenna and 50 watts. QSL is preferred DIRECT (1 USD or IRC) using the QRZ.com address.

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 28-29th) as a Single-Op/ All-Band entry. All QSOs will be uploaded into LoTW or QSL via CT1BOH direct. See his station at: http://www.qsl.net/ct1boh

DXCC NEWS. If you missed special OPDX bulletin (OPDX.920.1) Bill Moore, NC1L, Awards Branch Manager, reports that the following operations are approved for DXCC credit:
7O1YGF ï¿½ Yemen; Operation from April 16-26th, 2000; See special details in OPDX.920.1 or visit the DXCC's Awards Weblog at:
http://www.arrl.org/blog/Century%20Club%20Awards
ZS8T - Prince Edward & Marion Island; Recent operation conducted by ZS6GCM

FO8, FRENCH POLYNESIA (Update). As reported last week Phil, F5PHW, who will be in Tahiti for the next two years starting this month, has received his new callsign on his 40th birthday - FO8RZ. Phil informed OPDX this past week that he has installed the HF6V (GP) antenna last week and plans to be active on 80-10 meters using CW. He states that propagation is very poor especially to Europe and Asia, and he has worked mostly North America stations on 30/20/15 meters. Phil will install a 3 elements beam 6 meters up at the end of August and a dipole for 80/40m. He adds, "I have many trees in the garden, so it's difficult to find a good place for antenna. The online log is 'OK' on my Web site <http://f5phw.chez.com/> and it will be updated every week or more. QSL is now 'OK' on LoTW. I received the authorization from ARRL yesterday (August 14th). The log will be sent every week or more to LoTW. QSL is also 'OK' via F8BPN, either direct or via the French Ref-Union Bureau. QSLs are not printed yet."

GA/MA/2A, SCOTLAND (Special Prefix). Look for some Scottish amateurs to use a special prefix until November 30th, to celebrate "The Year of Homecoming". Only Scottish amateurs can replace the letter "M" in their prefix for the letter "A" (for ALBA) after they apply for a callsign variation (ex. GM4FDM = GA4FDM, GM4AGL = GA4AGL, 2M0AAW = 2A0AAW... etc.).
To celebrate Homecoming Scotland 2009, have a look at:
http://www.homecomingscotland.com

HB9, SWITZERLAND (Special Event). Members of the Tera Radio Club (HB9OK) <http://www.hb9ok.ch> will be activating the special callsign HB9VELO during the month of September. Activity will be on all HF bands using CW, SSB, PSK and RTTY. QSL Manager is HB9OCR. Their activity is to promote the cycling "UCI Road World Championships" being held in Mendrisio between September 23-27th. For more details, see: http://www.mendrisio09.ch
The Tera Radio Club is organizing an award; more details are expected.

HL9, SOUTH KOREA. Mike, KE7WRJ, will be here for over 2 months starting September 9th. He plans to be active as HL9QST no later than the 11th. His tentative schedule is to operate from 4 different locations in South Korea as follows: September 10-12th: Seoul
September 14-24th: Camp Casey
September 25th-October 18th: Camp Humphreys
October 19-29th: Camp Carroll
October 30th-November 13th: Seoul

Activity will be on 40-10 meters, depending on the propagation, using CW and SSB. Look for him to be in both the Extra and General portions of the bands. His Equipment will consist of a 5000A by Flex Radio, a 3 element Yagi in a Bag from Super Antennas. QSL via KE7WRJ.

INTERESTING WEB SITE OF THE WEEK! "Club Log" is a web-based application which uses a database to analyzes amateur radio log files which are uploaded in the common ADIF format. Using the logs, it is possible to build band-mode league tables of amateurs' QSOs, provide efficient log search tools and create most wanted lists for DXCC entities (both over all time and in recent history, or by mode for example). Also, "Club Log" can give back to its users the ability to find "wanted" DX spots, and other analysis of their logs which might be hard to do with normal logging software. More information at: http://www.clublog.org

IOTA NEWS.....
EU-011. Kevan, 2E0WMG, will be active from St. Agnes, Scilly Isles (WAB SV80), September 22-23rd. Activity will be on 80/40/20 meters SSB only. QSL via his home callsign, direct or by the Bureau.

EU-038. Operators Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA LH 0043) between October 16-22nd. Activity will be on the HF bands, propagation permitting. QSL via their home callsigns, the Bureau is preferred.

EU-088. Bernd, DL8AAV, will be active as OZ/DL8AAV/p from Laeso Island (DIA NK-003) between September 14-26th. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

EU-174. Kostas, SV2MAC, will be active as SV2MAC/8 from Samothraki Island between now and August 30th. Activity will be on the HF bands. QSL via his home callsign.

NA-010. Duane, WV2B (VA1ZZ), informs OPDX that he will be active from Cape Breton Island between August 17-23rd. He will activate as many lighthouses and Canadian Islands Award islands as possible during his visit. Suggested frequencies are: between 14260-14270 and 7180-7190 kHz. On August 24th, Duane will visit Sable Island (CY0) for a day trip, however authorities will not give him permission to bring radio equipment.

NA-029. George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (CIA PE-001) between September 1-28th. Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via his home callsign, direct or by the Bureau.

NA-067. Alan, WD4AC, will be active as WD4AC/p from Core Banks between August 19-22nd. Activity will be concentrated on 20 meters. QSL direct to his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For August 17-23rd).....
Aug 17 AN SOLAR REFERENCE

Aug 18 AN ----------
Aug 19 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 20 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 21 AN GEOMAGNETIC REFERENCE
Aug 22 AN ----------
Aug 23 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ACTIVITY/NEWS.....
Members of the Associacao de Radioamadores da Vila de Moscavide (ARVM)
signed CT1RVM/p during ILLW 2009, for the first time from within the
premises of Forte de Santa Marta in Cascais (ILLW PT-0006, ARLHS POR052).
This activity is also valid for the Portuguese Lighthouse Award (DFP
FES06) and the Portuguese Castles and Fortresses Award (DCFP-F097).
QSL will be sent 100% via the Bureau to confirm all contacts. Visit
their Web page at: http://www.arvm.org/index.illw2009.html

Members of the Radio Club of Panama (HP1RCP) and Panama Canal Amateur
Radio Association (PCARA) activated the Miraflores Lock's Lighthouse
(PAN-030) in the Panama Canal using the special callsign H81L during
the ILLW this past weekend. QSL via HP1RCP. Visit the following Web
page to see a picture of the lighthouse at:
http://www.geocities.com/canallights2000/miraflorespics.html

Members of the "LIGHTHOUSE AMATEUR RADIO ALLIANCE" operated during the
ILLW this past weekend from "Station J", the WWII designation of the
JUPITER INLET LIGHT HOUSE (USA-025). The callsign was K4LRA. QSL via
K4LRA, using the QRZ.com address, or W4TBB.

Members of the Papakura Radio Club Inc have participated in the Inter-
national Lighthouse/lightship Weekend with the callsign ZL6LH. Since
1998 they have almost always been at a different location. This past
weekend they were active from East Cape Lighthouse. Look for a video
to be on the Web linked to: http://www.qsl.net/zl1vk
QSL via ZL1VK, by the Bureau or direct to: Papakura Radio Club,
PO Box 72-397, Papakura, New Zealand. Visit their ZL6LH Web page
at: http://www.qsl.net/zl1vk/ZL6LHIndex.html

PA09, NETHERLANDS (Special Event). Fred, PA0FAW, will use the special
event callsign PA09WSF until August 30th. Activity is to celebrate the
"World Statues Festival" in Arnhem <http://www.worldstatues.nl/> which
takes place between August 29-30th. A special QSL will be issued and
will be available via the Bureau, direct, e-qsl and LoTW, and of course
SWLs 100%.

QSL INFO AND NEWS.....
5R8KD QSL STATUS. Wayne, W5KDJ, reports that he has received 2000
cards from UX5UO and will start working on the 325 SASEs he has received.

7O1YGF QSLS. It has been reported that those who still need a 7O1YGF QSL can send their request to August, DJ3XD. August was the original QSL Manager for all CW QSOs. However, he will now handle SSB and RTTY QSOs as well. It was also announced that the 7O1YGF logs are expected to be uploaded to LoTW within a couple of weeks.

IRC AVAILABLE. Dick, N7RO, has some IRCs for sale at 1.50 USDs while the supply lasts. You can E-mail him to assure that he still has some left. His E-mail address is: n7ro@arrl.net

NO LONGER THE QSL MANAGER. Erik, K5WW, advised OPDX readers that as of August 15, 2009, he is no longer QSL Manager for P40L (and P4/W6LD).

ONLINE LOGS AVAILABLE. A log search for BA4ALC/4, BA7IO/4, BA8AG/4, BD4QH/4, BD7JSQ/4 and BG4ENK/4 from Hengsha Island (AS-136) is now available at: http://www.qrz.cn/2009hengsha

PIRATE ALERT. Paul, ZL2CQ, reports that a PIRATE station on 80m was active this past weekend signing ZL2BHE/mm, calling CQ, giving his name as Peter on a commercial fishing boat and operating around 3630-3700 kHz. The callsign actually belongs to David Walker in Wellington, NZ. Paul personally knows this family.

ZK2V QSL STATUS. The ZK2V team is in the process of finalizing the QSL design for the ZK2V QSL and expects to have cards in hand in about 6 weeks. Please be patient and do NOT re-QSL.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: CE9/K2ARB, CT1ANO, CT3FQ, CT4NH, CU3EQ, D44TXO, EA1GAR, EA8YT, EI7IX, EX8M, G4DEZ, GM4NFC, GM4WJA, HZ1FS/P, I4EAT, MM0AMW, ON4IQ, P43A, RG9A, UK9AA, V29JKV, VK9GMW, VY0A, WP2B and XW1B

QSLS RECEIVED VIA THE BUREAU: None reported this week!

TA3, TURKEY (Special Event). Members of the Izmir Konak Branch of TRAC, which is the biggest HAM club in Turkey, will be active as TA3KM during the 78th Izmir International Fair between August 28th and September 6th. The club will be there to promote amateur radio activities. Activity will be on all HF bands using CW, SSB and RTTY, between 1300-2000z. For more details, visit the following links:
Izmir International Fair: http://ief.izfas.com.tr
TRAC Izmir Konak Branch web page: http://www.ta3km.org

VU, INDIA. Charly, VU3CHE (K4VUD), will be in India in September. He informs OPDX that his on-the-air plans are not yet determined. Stay tuned!

WH0, MARIANA ISLANDS. Kuro, AL5A (JH0MGJ), will be active as AL5A/WH0 from Saipan Island (OC-086), Northern Mariana Islands (KH0), between August 28-31st. Activity will be on 80-6 meters. He plans to listen especially for "weak" European stations. QSL direct to JA7JEC. Send Bureau QSLs to the JARL Bureau to JH0MGJ.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and NC1L following DX information.

The logs for 7O1YGF have now been uploaded to LoTW. Please follow this procedure if you want to claim credit:

As with paper applications if you submitted 7O1YGF in the past and had it rejected, we will accept an e-application via LoTW and you will not be charged a submission fee for 7O1YGF only.

Make sure you have uploaded your QSOs. DXCC cannot open and search the logs for your QSO since doing this will not show the match that is required for a LoTW confirmation;

Access your account and begin the application process;

If you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;

Complete the application (all 4 parts) and DXCC will place your e-application on the list for processing;

Special note for 7O1YGF applications ONLY: On Part 4 of the LoTW application click "Payment by mail" This step is VERY important to assure proper handling. If you clicked on part one any QSOs other than 7O1YGF you must make proper payment.

Again: The above is ONLY for 7O1YGF submissions. Applications with other QSOs will be handled, and charged, as a regular submission.

DXCC will not acknowledge completion of the application. When finished, your numbers in LoTW will reflect the completion of your e-application.

If you achieve Honor Roll or Top of the Honor Roll from this submission and you would like to order the wall plaque, you can send me an e-mail

or fax your order or send the order form by regular mail.

73 es DX!

RAC Bulletin 2009-026E - New BC/YK Section Manager Elected.
2009-08-19

Congratulations to Drew Watson, VA7DR, who was recently
elected British Columbia/Yukon Section Manager for a
two-year term of office that will begin on November 1, 2009.
He ran unopposed, eliminating the need for a balloted
election. Incumbent Section Manager Mike Hale, VE7DXD, did
not stand for nomination.

Congratulations are extended to Drew on his election, as well
as thanks to him and to Mike for their volunteer service to
the RAC Field Organization and to the Section.

Doug Mercer VO1DTM

Amateur Radio Newsline(tm) Report 1671 - August 21 2009

(Please note that this is an extended Newsline report running 32 minutes and containing 3 breaks. Thank you.)

Amateur Radio Newsline report number 1671 with a release date of Friday, August 21, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Two hams reported safe after a terrorist bomb blast in Kabul. We have one of them here with the story. Also, the ARRL DXCC Desk says yes to the 2000 Yemen, GAREC 09 to take place in Tokyo, a move in Congress to ban all texting while driving and the FCC starts to tweet. All this and more on Amateur Radio Newsline(tm) report number 1671 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: TWO HAMS SAFE FOLLOWING KABUL BLAST

Two hams are safe after a bomb blast rips through a crowded area in Kabul, Afghanastan. One of them is Steve Herman, T6AD, who is a news reporter on assignment in Kabul. He has this report:

--

First off I can report that both Jim McLaughlin, T6AF, and this reporter are fine following the suicide car bombing here in Kabul at 08:30 local time on Saturday, August 15th. Sadly, that blast did kill at least seven people and injured nearly 100.

In my case I was at my hotel a few miles away when the explosion occurred. I'm a news correspondent by profession and as you might guess, I did what any newsman would do in a situation like this. I quickly began filing news reports, in my case for the Voice of America.

Jim McLaughlin, T6AF, lives a lot closer to the explosion than I do. He reports a couple of windows in his residence adjacent to the US Embassy, were blown out but his shack is fine. Thankfully, he was not there at the time.

Ironically Jim and I had held our first eyeball QSO only 24 hours earlier. In fact, we met very close to the spot where the bomb went off. That was near the front gate of NATO's military headquarters in the Afghan capital. As far as we know, we may be the only two hams who are actually on the air from this war torn nation.

In Kabul, Afghanistan, I'm Steve Herman, T6AD, for the Amateur Radio Newsline.

--

Steve adds that like true hams, by the end of the day, both he and Jim were back on the air. In Steve's case he operates using a Yaesu FT-897 at 100 watts into a G5RV antenna just above what he calls a hot tin roof. You can usually find him on 15, 20, 30 and 40 meters operating either CW and PSK. Steve adds that the noise level in Kabul is nearly always S9 and that most signals are very weak. Because of this he says that your patience in making a QSO happen is very much appreciated. (T6AD, ARNewsline(tm))

**

BREAKING DX NEWS: 2000 YEMEN OPERATION GRANTED DXCC STATUS

Its taken almost a decade but the ARRL DXCC Desk has finally approved the 7O1YGF April 16 through April 26, 2000 operation from Yemen for DXCC accreditation. According to a release from Awards Branch Manager Bill Moore, NC1L, after reviewing recently received information regarding the operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Moore says that considering the length of time that has passed since this operation, he is asking that DXCC participants who would like to claim credit for 7O1YGF follow one of two options. The first is to send their 7O1YGF card by itself to DXCC with a SASE, or return postage if outside the United States. The DXCC will process the card and applicants will not be charged a submission fee.

The alternative is to bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission but you must fill out an application form.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. However 7O1YGF cards included with other cards will be handled as part of a normal submission and a normal fee will apply.

And less we forget. The cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31st. We will have more DX related news later on in this weeks Newsline report. (ARRL)

**

RESCUE RADIO: GAREC-2009 AUGUST 24 AND 25

The Fifth Global Amateur Radio Emergency Communications Conference, will be held on August 24thnand 25th in Tokyo, Japan. Norm Seeley, KI7UP, has more:

--

Hosted this year by the Japan Amateur Radio League, the theme of the 2009 Global Amateur Radio Emergency Communications or GAREC Conference will be "Emergency Communications across Borders." As such, the program will include presentations regarding amateur radio operations during disasters that occurred since last year's conference. There will also be discussions concerning new developments in communications and technology and their application in ham radio emergency communications.

Holding the conference in Tokyo also marks the first time at a Global Amateur Radio Emergency Communications will have taken place in ITU Region 3. The first and the second conferences were in Finland in ITU Region 1. The third was here in the USA in Huntsville, Alabama in ITU Region 2. Then it was back to Region 1 in 2008 for the fourth that was held in Germany.

By the way, for those interested in some heavy rescue radio related reading, the proceedings of the 2005, 2006, 2007, and 2008 conferences can be found at the Global Amateur Radio Emergency Communications website. A link to it is in this weeks printed Newsline report.

Reporting from Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.

--

GAREC 2009 is being held in conjunction with the Japan Amateur Radio League's annual Tokyo Ham Fair. Having these rescue radio gatherings annually has become an important factor in developing world standardization of ham radio communications in times of across borders or global emergency communications needs. More is on-line at www.rientola.fi/oh3ag/garec/ (Southgate)

**

RADIO REGULATION: FCC STARTS BLOGGING AND TWEETING

Back in the United States, the FCC is now blogging and tweeting. As a result of Chairman Julius Genachowski stated goal that expansion of broadband internet access is at the top of his list of priorities, the regulatory agency has created an on-line blog and has opened a Twitter account as ways of better keeping the public informed on what it is doing on a day to day and hour to hour basis

Both services began on Tuesday, August 18th. In his first post on the new blog Chairman Genachowski stated that the feedback, ideas, and discussions generated will be critical in developing the best possible National Broadband plan possible for the nation. He added that be believes that the new FCC blog demonstrates that the Internet is changing and expanding the way Americans communicate. This, providing them with what he sees as unparalleled access to information.

In conjunction with the blog the FCC is also now operating an account on the Twitter social networking site. Its account that can be

accessed at @fccdotgov.

Its believed that the FCC will use Twitter tweets to help promote new initiatives and at the same time press for public involvement on these issues. Tweets are the 140 character messages that Twitter allows. What's not likely is a two-way dialogue between the FCC and others using Twitter. At least the FCC is not following any other Twitter accounts at this time. (FCC and published news reports)

RADIO LAW: SEPTEMBER MEETING IN DC TO DISCUSS TEXTING WHILE MOBILE

A national ban against texting and possibly other forms of communication while mobile could be in the nations future. This with word that Transportation Secretary Ray LaHood plans to assemble a group of experts to figure out what to do about drivers who use cell phones and do texting while behind the wheel. Bruce Tennant, K6PZW, reports:

--

In an August 4th release Transportation Secretary Ray LaHood says that he intends to gather safety advocates, law enforcement and transportation officials, members of Congress and scholars who have studied distracted driving for a summit meeting in September in Washington D.C.. In his statement Secretary LaHood said that everyone knows that text messaging while driving is dangerous and the government is going to do something about it.

While no mention was made regarding the use of two-way radio while driving a vehicle this should be of concern to hams who like to operate mobile in motion. If some sort of federal ban on the use of electronic communications devices while driving does come about it could easily be broad based and all inclusive. This in turn could place hams, CB operators and other two-way radio users in the position of having to seek after the fact exemptions to continue the operations they have safely performed for years.

As we go to air there are fourteen states plus the District of Columbia that have passed laws banning text messaging while driving. Also, many states require the use of hands free devices to use cellular voice telephones while in motion although most have specific exemptions included for federally licensed ham radio operators.

LaHood indicates that that summit meeting will present several recommendations for specific actions to address the problem of distracted drivers on a national level. For ham radio it means keeping a close eye one the outcome and any laws that such a gathering of experts might recommend.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

And in a related development ARRL President Joel Harrison, W5ZN, has written a letter to the National Safety Council To ensure that Amateur Radio is not an unintended victim of the growing public debate over what to do about distracted drivers. In his note to NSC President Janet Froetscher, Harrison explained that Amateur Radio operators provide essential emergency communications when regular communications channels are disrupted by disaster. Harrison noted that the ability of hams to communicate and help protect the lives of those in danger would be strictly hindered if the federal, state and local governments to not ensure that amateur radio operators can continue the use of their mobile radios while on the road. (Published news report and ARRL)

**

RESCUE RADIO: NEW HAM RADIO HOTLINE IN INDIA

Ham radio based rescue radio continues to grow in India. Its latest expansion is a new joint agreement announced on Wednesday, August 12th between the Amateur Radio Society of India and the Indian Red Cross Society to establish a radio hotline. It was inaugurated by Governor of Karnataka, and is located on the premises of the Red Cross Society.

The facility installed at the station includes, high frequency and VHF radios and antennas that can be used for local, as well as long distance communications. The station has been assigned the call VU2ZH by the Ministry of Communication, Government of India.

According to the society, ham radio operators in India have provided communication links during the Indian Ocean tsunami, Latur earthquake, Koyna dam disaster and during numerous floods and hurricanes, in the recent past.

(Deccan Hearald)

**

RESCUE RADIO: NHC HAM STATION FEATURED IN NATIONAL DURACELL COMMERCIAL

WX4NHC, the Amateur Radio Station at the National Hurricane Center is featured in a 60 second radio spot for Duracell batteries. The commercial, which begins airing this month, highlights the efforts of the volunteers who man and assist the ham radio operations for National Hurricane Center station WX4NHC.

With a voice over by actor Jeff Bridges, the spot describes the important role that radio amateurs play during severe weather conditions by enabling communications with police and fire departments along with other first responders when electrical service and telephones go away. The narration underscores the importance of a reliable battery to power the portable ham radio gear which the spot describes as essential to the work of WX4NHC.

The commercial is being played nationally during hurricane season. It should help promote awareness of the vital public service role played by amateur radio. You can hear the new Duracell ham radio spot at the link found at www dot arnewsline dot org

**

THE SOCIAL SCENE: A REVIEW OF THE ARRL SW DIVISION CONVENTION

Turning to the ham radio social scene, the August 15th one day convention in Santa Barbara, California, that took the place of the usual 3 day ARRL Southwestern Division show that was almost cancelled earlier this year appears to have been more than a mild success. According to Dave Bell,, W6AQ, about 500 or so drove from sweltering Los Angeles and other areas to the seashore community with 450 signed up for the famed Santa Barbara barbecue lunch alone.

Not a lot of big name exhibitors but some important names were there. These included Ham Radio Outlet, Vertex-Standard Yaesu, and Elecraft. In fact Elecraft showed their new P3 Pan-Adapter for the first time. W6AQ was told that the techs at Elecraft literally finished putting together this prototype at 2 AM in the morning and then drove all the way down from Aptos California to be in Santa Barbara in time for the gates to open.

The ARRL was represented by Southwestern Division Director Dick Norton, N6AA, Vice Director Marty Woll, N6VI and Washington attorney Christopher D. Imlay, W3KD. And while small by comparison to any past ARRL Southwestern Division Convention that anyone can remember, nobody is complaining. In fact there are at least 500 hams who are singing the praises of the Santa Barbara Amateur Radio Club which heroically stepped forward and picked up the pieces at the last minute, when the original sponsoring group pulled out. Or put another way, sometimes the best things come in the smallest packages.

(W6AQ)

**

NAMES IN THE NEWS: BOB HEIL K9EID TO PERFORM ORGAN CONCERT IN SACRAMENTO

Some names in the news. First up is ham radio's "Mr. Audio," Bob Heil, K9EID. Bob will perform in concert on the Mighty Wurlitzer theatre pipe organ at the California Auto Museum in Sacramento, California on Sunday, September 27th. The performance starts at 2 p.m. Pacific

Daylight Time and is free with a paid museum admission fee.

As some of you may know, Bob learned the art of playing theater organ a student of legendary organist Stan Kann. In making the announcement of the upcoming concert Bob says that he has always loved the rich, pretty sounds of the Wurlitzer. Now he is looking forward to sharing the experience with both his amateur radio friends and his theater organ fans in the Sacramento area.

Again the concert is free with a paid admission to the museum. For more information, call (916) 442-6802 or take your web browser to www dot sierrachapteratos dot org.

(CGC)

**

NAMES IN THE NEWS: THREE NEW ARRL SM'S ELECTED

Los Angeles, California has a new ARRL Section Manager. This with word that David Greenhut, N6HD, of Woodland Hills, has been elected to that post after beating out 11 term incumbent Phineas Icenbice, W6BF. Greenhut received 838 votes while Icenbice garnered only 149.

Meantime in South Texas, Lee H. Cooper, W6LHC, was elected Section Manager with 647 votes. Challengers Lou Everett, Sr, WA5LOU, received 601 votes and Gary Tangrady, K5GST, of San Antonio, received 142. Cooper will be taking on the Section Manager's role from Ray Taylor, N5NAV, of San Antonio. Section Manager since 1997, Taylor decided not to run for another term.

And Georgia will be getting a new Section Manager starting on October 1st. This as Eugene "Gene" Clark, W4AYK steps into the position taking over from Susan Swiderski, AF4FO, who has been Section Manager since 2002. Swiderski, who is the co-recipient of this year's Joe Knight Distinguished Service Award, decided not to run for another term of office. Clark has been the Georgia Section Emergency Coordinator for the last year and was a District Emergency Coordinator prior to that appointment.

RADIO AWARDS: OMIK SCHOLARSHIP FUND SURPASSESW $100,000 AWARDED

The OMIK Radio Scholarship Fund has now surpassed $100,000.00 in educational monies awarded. This with word from Richard Reese, WA8DBW, that the fund presented a $1000 check to Caitlin Grey of Wadsworth, Ohio, to help defray her future education costs.

Reese says that Caitlin Grey was the top recipient selected from a nationwide list of applicants. She graduated with honors from Wadsworth High School in May of 2009. While attending, she was involved in her Student Council, the National Honor Society, and several important projects. She was also a member of the yearbook staff and a varsity cheerleader an academic and athletic letterman and received the United States Achievement Academy award of excellence in a foreign language.

The OMIK Scholarship Fund is a separate organization of the OMIK Amateur Radio Association, Inc. The fund was established to manage and administer the OMIK sponsored scholarship program. According WA8DBW, the Fund's goal is to provide financial assistance to deserving youth who are pursuing education beyond high school.

**

NAMES IN THE NEWS: FAR SCHOLARSHIP WINNERS ANNOUNCED

And the Foundation for Amateur Radio has announced the list of recipients for the 2009 through 2010 academic year scholarship awards. Topping the list is 2008 Amateur Radio Newsline Young Ham of the Year Emily Stewart, KC0PTL, of Leavenworth, Kansas. Emily will be receiving a $1000 grant from the Ralph V. "Andy" Anderson, K0NL, Memorial Scholarship which is one of many administered by the foundation.

A complete list of all the recipients of this latest series of Foundation for Amateur Radio administered scholarship grants can be found on the front newspage at QRZ.com. We at the Amateur Radio congratulate Emily and all of this years scholarship award winners and thank the Foundation for Amateur Radio for its ongoing work to make these educational grants available each year.

**

HAM RADIO IN SPACE: NEW ON-LINE HAMSAT MAP

A map showing the current satellite location for most of the amateur satellites are now available on the AMSAT web site. From the AMSAT front page, use the left hand side navigation, go to the 'Satellite Information' navigation box, then select 'Satellite Status. Next click on an underlined satellite name in the left hand column. This will display a satellite summary, scroll to the bottom of the page and there will be a map showing the current location of that satellite and the illuminated and dark portions of the earth. This feature can be used for a quick check of the satellite's location or to verify that your tracking program was setup correctly. W2GPS and N2YO are the duo who have provided this useful new feature. (WA4SXM)

**

RADIO AND SPACE: AIR FOCE PERMITS AMSAT TO CONTINUE KEPS

AMSAT North America has received approval from the Air Force Space Command to continue re-distribution of Keplerian elements data sourced from the Space Track website.. This means that the AMSAT Keplerian Elements in verbose format and the 2-line format can be freely distributed by those who receive them from AMSAT. The agreement covers the period of April 1, 2009 to April 1, 2010. (WA5QGD, ANS)

**

HAM RADIO IN SPACE: AMSAT-UK COLOQUIUM VIDEOS NOW ON LINE

Videos of the presentations at this years AMSAT-UK International Space Colloquium are now available to watch on the British Amateur Television Club website. All 18 sessions can be seen at www.batc.tv (Southgate)

**

WORLDBEAT: OFCOM SAYS OK TO SPECIAL EVENT SCOTLAND LOCATOR

U-K telecommunications regulator Ofcom will permit Scottish hams to participate in the upcoming Homecoming Scotland celebrations. Individual qualifying licensees will be able to obtain a special temporary authority enabling them to use the Regional Secondary Locator of the letter A for Alba to identify their station as being situated in Scotland. This locator will be available in addition to the existing identifier M, though only one locator should be used in a callsign. The permit to do this will not be valid for stations situated outside Scotland. Homecoming Scotland is an event celebrating that nations contributions to the world. (Southgate)

**

ON THE AIR: 30 METER MULTI-MODE WEEKEND

August 22nd to the 23rd has been designated as 30 Meter Multi-Mode Weekend. The objective is to promote experimenting and using different digital modes on unique 30 Meter Band. A number of digital mode groups will be participating this weekend so if you wanted to try out a mode you have thought about trying here is your chance to get on the 30 Meter Band to try those digital modes and/or try a digital modes software that includes multiple digital modes, More information is at www.hamspots.net/30 (KB9UMT)

**

BREAK 3

>From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ON THE AIR: VHF ACROSS THE ATLANTIC

Meantime if you want to try your luck DXing VHF across the Atlantic pond, be aware that Sunday, August 30th is the date for the Ireland's Autumn 2 Meter Counties Contest. This event takes place between 14.00 and 16.00 local time in Ireland. The full rules are available on the IRTS website under the contest tab. QSL any stations you work as directed by them on the air. DX

In DX, word that G4MKP, will be active stroke 5B from Cypress through August 25th. His activity will be mainly CW and RTTY on 80 through 10 meters. Look for him during the mornings and evenings on or around 7.010, 14.010, 21.010 and 28.020 MHz running Morse. His RTTY anywhere in the band segment. QSL via M0URX, direct or via E-mail request for a bureau QSL.

PA2AM, will be active as 9H3DZ from Malta between September 4th to the 14th. His operation will be active mostly on 30, 17 and 12 meters using CW and RTTY. QSL via his home callsign.

3B7FQ will be active from St. Brandon Island until the end of August. He will operate CW and SSB in his spare time and will use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily. QSL via K5XK. He says that direct is preferred.

F2VX and F6FYD will be active portable 4J from Azerbaijan until August 29th. August. They will operate SSB on the HF bands. QSL via their home calls, either direct or via the bureau.

Lastly, W8SMH has just received his Kenyan license and will active portable 5Z4 from Nairobi for the next 3 years. Steve is on assignment with the Salvation Army as second in command at their headquarters in Nairobi. His travel schedule may limit his operating, and he is a rookie at DX operations so please be patient. His other limiting factor is that Nairobi is experiencing power shortages and as a result they are doing rolling blackouts 2 or 3 days a week in his area. Steve's equipment is an Icom IC-718, dipoles and a multi-band vertical. QSL direct to his home callsign on QRZ.com with an IRC or SASE.

(Above from various DX News sources)

**

THAT FINAL ITEM: ANDREW KOENIG RESENTED WITH 2009 YHOTY AWARD

And finally this week its time to celebrate the achievements of another of the nations young radio amateurs. His name is Andrew Koenig, callsign KE5GDB, and on Saturday, August 15th he was introduced at the Huntsville Hamfest as the 2009 Amateur Radio Newsline Young Ham of the Year. Don Wilbanks, AE5DW, represented Amateur Radio Newsline at the

presentation and also has this report:

--

While the tropics were heating up in the Atlantic and the Gulf of
Mexico it was brilliant sunshine in Huntsville Alabama, where we
honored a brilliant young man as the recipient of the 2009 Young Ham Of
The Year award, Andrew Koenig, KE5GDB. Andrew is a 15 year old rising
star in the ham radio and space radio world. He not only helped set up
a successful ARISS school contact but he also helps train astronauts in
the ins & outs of talking to students participating in these contacts
at the Johnson Space Center in his hometown of Houston, Texas. He has
also helped in the maintenance and moderation of W5KUB's chat room on
his hamfest video website. He's an engaging young man who is going
places. But he didn't do it alone:

--

Award presentation audio. Hear it by downloading the MP3 version of
this weeks newscast at www.arnewsline.org.

--

Of course, we weren't alone in this either. Corporate sponsor CQ
publishing's Rich Moseson, W2VU on what it takes to win this award:

--

Award presentation audio. Hear it by downloading the MP3 version of
this weeks newscast at www.arnewsline.org.

--

Rich presented Andrew with a week at Spacecamp courtesy of CQ Magazine
as well as copies of all of their other publications. But that's not
all. Yeasu's Dennis Motschenbacher, K7BV:

--

Award presentation audio. Hear it by downloading the MP3 version of
this weeks newscast at www.arnewsline.org.

--

Next up was Heil Sound's Chip Margelli, K7JA.

--

Award presentation audio. Hear it by downloading the MP3 version of
this weeks newscast at www.arnewsline.org.

--

Chip of course pulling out his cellphone making reference to his
now-famous appearance on the Tonight Show with Jay Leno. Next up was
Greg Sarratt, W4OZK, ARRL Southeastern Division Director with

congratulations for Andrew:

--

Award presentation audio. Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

I dedicated this years award in the memory of a great friend to Newsline, Sandy Donahue, W4RU who passed away in May of this year. Sandy was instrumental in getting the award to Huntsville some 15 years ago and served as a greeter, taxi service or whatever we needed him to do for the winner. Sandy was a friend to all and we at the Amateur Radio Newsline miss him very much. Again, congratulations to Andrew Koenig, KE5GDB, your 2009 Young Ham Of The Year.

Thanks again to our corporate sponsors, CQ Publishing, Vertex Standard Yaesu, Heil Sound, Dave Bell W6AQ for the fine plaque, and Charlie Emerson, N4OKL and all at the Huntsville Hamfest for having us. We'll see you again next year on the third weekend in August for the 2010 Young Ham Of The Year award.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW.

--

Between Santa Barbara and Huntsville it was two great ham radio conventions and one very happy teenage ham. (AE5DW, ARNewsline(tm), YHOTY)

GB2RS NEWS

Sunday 23rd August 2009

The news headlines

* VU2ZH ready as an emergency comms station

* APRS from 30km up

* Cushcraft bought by MFJ

The Amateur Radio Society of India has signed a memorandum of understanding with the Indian Red Cross Society, Bangalore and an amateur radio station with the callsign VU2ZH. It will be inaugurated on 12 October by the Governor of Karnataka State. The station will be available as a club station in Bangalore for amateurs and will also serve as an emergency communications station. The station is accessible 24-7 and will also have emergency power. It has HF and VHF capability. Efforts are being made to replicate this elsewhere in India.

Passepartout3 is a stratospheric balloon that is a collaborative project by the Austrian space forum and the Austrian Radio Amateur Association. It will be carrying an APRS digipeater with the special callsign OE0S. The start is planned for Saturday, 22 August at 0800UTC from locator JN77RB, although that may be delayed until 23 August in the case of bad weather. Passepartout3 will be active on 144.390MHz, OE9HFV, APRS beacon every minute and 432.500MHz, OE0S, APRS digipeater and beacon. The planned maximum height will be more than 30km and the maximum area within direct sight will have a radius of more than 600km. More information is available on the internet, put Passepartout3 into your favourite search engine.

MFJ Enterprises has announced that the company has purchased Cushcraft Amateur Radio Antennas. Cushcraft products will continue to be manufactured in Manchester, New Hampshire. The acquisition will bring over fifty new products to MFJ's amateur radio product line. Look for more information at www.mfjenterprises.com.

Many RSGB committees will be exhibiting at the National Hamfest on 2 and 3 October at the Newark & Notts Showground. This will give the visitors to the show, organised by the RSGB and Lincoln Short Wave Club, the chance to talk about all aspects of amateur radio from planning to EMC and propagation to IOTA. We're also able to tell you that RadioWorld have joined the list of traders attending the show. Details of the National Hamfest can be found at

www.nationalhamfest.co.uk.

Steve Hartley, G0FUW, and his team are about to start their next Foundation course in Bath. The classes will run from 3 September to 15 October between 7 and 9pm each week. An Intermediate course will follow on starting on 5 November, with another Bath Buildathon planned for January 2010. Advanced training will begin in February, aiming for the June exam. Anyone interested in joining in should contact Steve on 01225 464394 between 7 and 9pm weekdays or via e-mail g0fuw<at>tiscali.co.uk

The Mid Cornwall Beacon and Repeater Group are in the process of transferring all their beacons and repeaters to a new mast at the same location. The GB3NC 2m repeater and the GB3MCB beacons on 6m, 4m, 2m and 70cm are all now operating successfully from the new mast. Between the 24 August and 30 September it is intended to move the 23cm GB3MCB beacon, the GB3HB 70cm repeater and the GB3NQ 23cm TV repeater to the new mast, and there will be some interruptions to these services during this period. Up to date details on the operational status of the beacons and repeaters can be found on the Group's website www.mcbarg.co.uk. The Group would like to thank everyone for their patience whilst these changes are taking place and special thanks to everyone for their donations, which are making all these changes possible.

SSTL & DMCii, two companies involved in satellite development, are scheduled to be featured on Discovery Channel's How Do They Do It? programme on 26th August at 8pm. The programme showcases a wide variety of technology and inventions from around the world and explains how things work.

And now for the details of rallies and events for the coming week

The Andover Radio Club Boot Sale will take place today, 23 August, at Wildhern Village Hall and Playing field, SP11 0JE, which is just north of Andover just off the A343. Entry is £1.50 and there is plenty of parking available. Details from Martin, M0MWS, 01980-612070 or check out the website www.arac.co.uk.

On 29 August, the Rugby Radio Rally will take place at Stanford Hall, Lutterworth LE17 6DH. Doors open at 10am. More information on 07759 684411.

Bank Holiday Sunday, 30 August, sees the Milton Keynes ARS 51st£ Annual Rally take place at Holne Chase School, Buckingham Road, Bletchley MK3 5HP. Doors open from 9am to 4pm. Details from Mike, G3LFR on 07866 673192.

The Huntingdonshire ARS Bank Holiday Monday Rally takes place on 31 August at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and there will be a Bring & Buy as well as the usual trade stands and an RSGB bookstall. More from Julie, M1JUL, on 07905

052127.

The annual Telford Hamfest now takes place on Sunday, 6th September at Enginuity, the hands-on engineering museum, in Coalbrookdale, Telford, Shropshire TF87DQ. The usual traders will be in attendance. Also lectures by GEO, the weather satellite group. Doors open at 10am and there's on site catering and two pubs very close by, one with a very good restaurant. The museum also has a cafeteria. A reduced price admission to the Enginuity Museum is available. There's also much to see and do nearby where iron engineering on a large scale first began, including the first Iron Bridge, the Tar Tunnel, Coalport china works, Tile museum, Victorian Town, the Museum of Iron and more. More information from Mike, G3JKX on 01952 299677 or Martyn, G3UKV on 01952 255416.

Now for the news of special events

On the air, listen out for PD55EA. That station will be on the air until 28 August to celebrate the 55th birthday of the Ellert and Brammert Museum in the Netherlands. They group will be active on 40, 20 and 10m using SSB and the digital modes. There may also be activity on 2m as well. QSL's will be sent automatically via the bureau. If you want to QSL direct, please send your QSL via PD7BZ.

PA09WSF, will be on the air until 30 August to celebrate the World Statues Festival, that is held in Arnhem on 29 and 30 August. This is a living Statues Festval and a special QSL card will be available via bureau or direct.

GB2HA will be on the air on 29 and 30 August on 80, 40, 20 and 2m. This is one of the activities of the HMS Hood Association.

Lincoln Short Wave Club have been given permission to operate GB2CWP from inside Just Jane', the Lancaster bomber operated by Lincolnshire Aviation Heritage Centre at East Kirkby, Lincolnshire. The station will be on the air on 5 September. Modern equipment will be used in the Lancaster for safety and practicality, however, when the aircraft is taxiing, the team will operate GB2CWPs T1154 and R1155 from the museum shack. Special QSL cards will be available for all stations working GB2CWP from the aircraft.

July was the first month of activating GB50ATG for the 50th anniversary of the British Amateur Radio & Teledata Group. Roger, G3LDI, managed to work around 400 stations. Even though we are still at a minimum as far as propagation is concerned, lots of JA stations were worked, but few USA stations. Arthur, G1XKZ, has taken over using GB50ATG until the end of August. He has already made lots of contacts in the SARTG contest and will be as active as he can on both RTTY and PSK. At the end of August, the call will be passed on again, this time to John, GW4SKA.

GB2WZ will be operated by the Weston-super-Mare Radio Society on 29 to 31 August from the Westonzoyland Pumping Station near Bridgwater, Somerset.

And now the HF DX news compiled from 425 DX News and other sources.

J42ARET will be on the air from one of the Drenia islands from 28 to 31 August. These are six uninhabited islands off the coast of Greece. More details on http://SX8DI.blogspot.com. The Scandinavian Young Ladies Radio, is organising the annual International YL meeting in Oslo, Noway, between 3 and 6 September. A special callsign LA1SYL will be put on the air. Following, the meeting, a YL group will sign JW1SYL from Swalbard. For both operations, QSL via YL op's information. More information : www.sylra.is/.

Rachid, 3B8FQ [425DXN 953] was expected to arrive to St. Brandon (AF-015) around 2 UTC on 12 August. Barring unforeseen circumstances, he now expects to extend his stay on the island, and to be operate as 3B7FQ until sometime on 3 September. Operating time will be shared with Rachid's maintenance responsibilities at the local meteorological station. QSL via K5XK, direct preferred. [TNX K5XK]

CT8/DL7JAN and CT8/DL2IX will be active from Faial, which is IOTA reference EU-175, in the Azores until 31 August. They will operate CW, SSB and RTTY on 80 to 6m. QSL via their home calls, direct or via the bureau.

FJ/W2VQ and FJ/WQ2N will be active from St. Barthelemy, which is IOTA reference NA-146, until 25 August. They plan to operate CW, SSB, RTTY and possibly PSK31 on 80 to 6m. QSL both calls via WQ2N.

Now the contest news

On 26 August the 80m Club Sprint takes place between 1900 and 2030 on SSB. The idea is to work everyone, but remember that once you have called CQ and made a QSO you have to QSY. The exchange is serial number and name.

The 50MHz UK Activity Contest takes place on 25 August from 1900 to 2130. Using all modes, the exchange is signal report, serial number and locator.

On 30 August the IRTS 2m Counties Contest is on between 1300 and 1500. >From the UK you shouldn't need to make many QSOs to win the Outside EI category, although if there's a GI active he'll probably get top spot. The exchange is signal report, serial number and EI and GI also give county.

Now the solar factual data for the period from the 10th to the 16th of August, compiled by Neil Clarke, G0CAS on the 17th of August.

We start this week with the latest monthly smoothed sunspot numbers which are for November, December and January and are 1.8, 1.7 and 1.8. This could suggest that solar minimum as been reached in December 2008. However, several more monthly figures are required before this will be confirmed. The present 37 day spell without sunspots could drag this figure lower. As always, we will just have to wait and see.

The solar disc was spotless everyday. The current stretch of spotless days on the 17th is now 37 days. Solar activity was very low. Solar flux levels increased very slightly from 67 units to 69 by the 16th. The average was 68. The 90 day solar flux average on the 16th was 68 units, that's one unit down on last week. X-ray flux levels remained below the minimum level everyday. Geomagnetic activity was quiet everyday. The most disturbed day was the 12th and the 13th with an Ap index of only 5 units. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds gradually decline from 400 kilometres per second to 260 by the 16th. Particle densities remained below 10 particles per cubic centimetre for most of the time. Bz showed little variation with the quiet geomagnetic field and only varied between minus 4 and plus 4 nanoTeslas at worst.

And finally the solar forecast. This week solar activity is expected to continue at very low levels. The solar disc could be spotless on most days. Solar flux levels should be in the high 60's for all of the coming week. Geomagnetic activity is expected to be at quiet levels everyday. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. The darkness hour lows should be about 11MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 18MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0900 and 1300 hours UTC. Sporadic-E is expected to take place on some days, saying that, openings should be brief as we head towards the end of this summers season.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 23 August Andover Radio Amateurs Club is holding their Boot Sale at Wildhern. Contact Martin, M0MWS, on 0777 618 1646. On Sunday 23 August Chelmsford Amateur Radio Society is operating VHF from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008. On Monday 24 August Felixstowe and District Amateur Radio Society is having a club net. Contact Paul, G4YQC, by email to pjw<at>btinternet.com. On Tuesday 25 August Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 25 August Horndean and District Amateur Radio Club is having a talk on microcontrollers by

Ashfaq Juna. Contact Stuart, G0FYX, on 023 9247 2846. On Wednesday 26 August Dover Radio Club is having a barbecue at the QTH of G4IMP and G4RJZ. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 26 August Farnborough and District Radio Society is having a talk by local historian Mary Bennet. Contact Derek, G3OFA, by email to mail<at>fdrs.org.uk. On Wednesday 26 August Newbury and District Amateur Radio Society is having a video show. Contact Richard, G3ZGC, on 01635 46241. On Wednesday 26 August Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 26 August Peterborough and District Amateur Radio Club is having an al fresco barbecue and on the air evening. Contact David Howlett, M0VTG, by email to padarc<at>tesco.net. On Thursday 27 August Bittern DX Group is making final plans for SSB Field Day and Transmission 2009. Contact Keith, G0GFQ, on 01263 588 506. On Thursday 27 August Edgware and District Radio Society is discussing the autumn programme. Contact Mike, G4RNW, on 020 8950 0658. On Thursday 27 August Huntingdonshire Amateur Radio Society is having an informal evening. Contact Gerald, G8AKL, on 01487 740794. On Friday 28 August Cambridge and District Amateur Radio Club is having a shack evening. Contact David Leary, G8JKV on 01223 355254. On Friday 28 August Itchen Valley Amateur Radio Club is having a talk on satellites by Noel Mathews, G8GTZ. Contact Charlie, M0WYM, on 02380 439560. On Friday 28 August Wimbledon and District Amateur Radio Society is having a VHF direction finding contest. Contact Jim, M0CON, on 020 8874 7456.

NEWS FOR THE SOUTH-WEST On Tuesday 25 August Blackmore Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony G0GFL, on 01258 860741. On Wednesday 26 August Taunton and District Amateur Radio Club is operating the club station and having a Morse class. Contact William, G3WNI, on 01823 666 234. On Wednesday 26 August Thornbury and South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Thursday 27 August South Bristol Amateur Radio Club is on the air. Contact Len, G4RZY, on 01275 834 282. On Thursday 27 August Swindon and District Amateur Radio Club Is having a natter night. Contact Den, M0ACM, on 07810 317750. On Thursday 27 August Yeovil Amateur Radio Club is on the air and having a committee meeting. Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk. On Friday 28 August Cornish Radio Amateur Club commences its weekend event, operating the August Volkswagen Jamboree Station. Contact Steve, G7VOH, on 01209 844939. On Friday 28 August Torbay Amateur Radio Society is having an operating night. Contact Dave, G6FSP, by email to g6fsp<at>tars.org.uk.

NEWS FOR THE MIDLANDS Listeners in the Lincoln area may remember that Bill Felton G3XZF used to read the GB2RS news on 145.525MHz FM on Sunday mornings. He has now volunteered to do so again starting at 10.30am this Sunday. He would however like another volunteer, who must be an RSGB member, to act as a reserve reader when he is not available. In the meantime Jim Stevenson G0EJQ, the RSGB Regional Manager for the East Midlands, has kindly agreed to assist with some of the readings.

Volunteers should contact Gordon Adams G3LEQ, the GB2RS News Manager, for more details on 01 565 652 652. On Monday 24 August Gloucester Amateur Radio And Electronics Society is not meeting because the school is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 24 August Hastings Electronic & Radio Club is having a social evening discussion and question time. Contact Gordon, on 01424 431 909. On Monday 24 August Leicester DX Group is having a talk by Gaz M3PCB about an antenna analyser . Contact Clive, M3CGH via the web at www.leicesterdx.co.uk. On Monday 24 August South Birmingham Radio Society is having a barbecue outside, weather permitting. Contact Don, on 0121 458 1603. On Monday 24 August South Normanton Alfreton and District Amateur Radio Club is on the air at Crich Stand. Contact A J Higton, 2E1GWO, on 01773 783658. On Tuesday 25 August Derby and District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday 25 August Loughborough and District Amateur Radio Club is having a practical evening. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 26 August Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. Contact Pam Rose, on 01427 788356. On Wednesday 26 August Midland Amateur Radio Society Club is on the air and having an equipment check. Contact Norman, G8BHE, on 01214 229 787. On Wednesday 26 August South Notts Amateur Radio Club is having a talk on Morse by G4NSP. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 26 August Telford and District Amateur Radio Society is having an organisation and briefing meeting for Hamfest. Contact Mike, G3JKX, on 01952 299 677. On Friday 28 August Bromsgrove and District Amateur Radio Club is planning its winter programme. Contact Chris, M0BQE, on 01905 776 869. On Friday 28 August Coventry Amateur Radio Society is operating 6m, 4m and satellites. Contact John, G8SEQ, on 07958 777363. On Friday 28 August Hucknall Rolls Royce Amateur Radio Club is making final preparations for the Moorgreen Country show. Contact Dave Wilde, G1YAI, on webmaster<at>hrrarc.com. On Friday 28 August South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603. On Saturday 29 August Welland Valley Amateur Radio Society is attending the Rugby car boot sale. Contact Peter D Rivers, G4XEX, on 01858 432105. On Sunday 30 August Hucknall Rolls Royce Amateur Radio Club will have a stand at the Moorgreen Country Show. Contact Dave Wilde, G1YAI, by email to webmaster<at>hrrarc.com.

NEWS FOR THE NORTH OF ENGLAND Since July 1994 Clive Reynolds G8EQZ has been reading GB2RS News from Hull on 145.525MHz FM at 10.00hours. He is the only reader for this schedule, but needs a volunteer to take on the occasional readings when he is not available. Any RSGB member in the Hull area, who might consider volunteering, is asked to contact the GB2RS News Manager, Gordon Adams G3LEQ, on 01 565 652 652 for more information. Clive has also advised the RSGB that he has acquired recently his late Father's callsign G3GJA, and will be using this in future during his news nets. On Monday 24 August Angel Of The North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 24 August Bolton Wireless Club is having a 2m DF

hunt at the Britannia Hotel at 7:30pm. Contact boltonwireless<at>gmail.com. On Monday 24 August Sheffield Amateur Radio Club is having a video presentation on the VK/ZL trip by Peter, G3PHO. Contact Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 24 August South Manchester Radio And Computer Club is holding its monthly technical forum. Contact Ron, G3SVW, on 0161 969 3999. On Monday 24 August Thornton Cleveleys Amateur Radio Society is having a CW night with Ken, G3RFH. Contact John Foster, M3WAZ, on 01253 399377. On Tuesday 25 August Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232. On Tuesday 25 August Otley Amateur Radio Society is contesting the 50MHz activity night from the Shack, all welcome. Contact Paul, 2E0PAK, on 07768 996370. On Tuesday 25 August Warrington Amateur Radio Club is having a talk on unusual homebrew antennas by Ron, W6WO. Contact Roger, M0DWQ, on 07868 000 705. On Wednesday 26 August Goole Radio and Electronics Society is having a social evening. Contact Ken, G6YYN, on 01757 638539. On Wednesday 26 August Hornsea Amateur Radio Club is having an activity night. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Wednesday 26 August Mid-Cheshire Amateur Radio Society ia having an on-air antenna testing night. Contact Peter Paul Fox, G8HAV, on 01606553401. On Thursday 27 August South Manchester Radio And Computer Club is having an update on sun spot cycle 24 by Ron, G3SVW. Contact Ron, G3SVW, on 0161 969 3999. On Friday 28 August East Cleveland Amateur Radio Club is on the air. Contact Alistair, G4OLK, on 01642 475 671. On Friday 28 August Tynemouth Radio Club is having an operating night with technical topics and a Morse Class. Contact Graham Errington, 07812 172136. On Sunday 30 August Blyth Radio Club is operating G4VKY from 10 amto 4pm. Contact K Stewart, G0TWV, on 01670 545261.

NEWS FOR SCOTLAND Scottish radio amateurs are reminded about the variation to their licence available for Homecoming Scotland. Individual qualifying licensees will be able to obtain a variation to their amateur radio licences, enabling them to use the Regional Secondary Locator A for Alba to identify their station as being situated in Scotland. This RSL will be available in addition to the existing identifier M, though only one RSL should be used in a callsign. The facility will not be valid for stations situated outside Scotland. Applications for the variation must be made on an individual basis at www.ofcom.org.uk/radiocomms/variation. On Tuesday 25 August Livingston and District Amateur Radio Society is having Morse Code Practice. Contact Norman, on 07740 946192. On Wednesday 26 August Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905. On Thursday 27 August Aberdeen Amateur Radio Society is on the air and having a construction evening. Contact Lewis, GM4AJR, on 01224 575 663.

NEWS FOR WALES On Monday 24 August Llanelli Amateur Radio Society is having a junk sale and social night. Contact Craig, MW0MXT, on 01269 840292.

==> SANTA CRUZ HAMS PROVIDE SUPPORT DURING WILDFIRES

As wildfires threaten the central California coast near Santa Cruz -- located between San Jose and Monterey -- area radio amateurs have been providing support to law enforcement and fire authorities. According to Santa Cruz County Public Information Officer Bill Conklin, AF6OH, the Santa Cruz County Emergency Operations Center requested support from ARES on Wednesday, August 12: "We activated and established an informal Net to provide fire support resources." Just two days later, Governor Arnold Schwarzenegger declared a State of Emergency for Santa Cruz County.

On Thursday, three amateurs staffed the County's Emergency Operations Center for the ARES Net, beginning at 5 AM and going for 16 hours. Monterey County ARES District Emergency Coordinator Dave Burbidge, W6IIQ, also helped to provide coverage.

"Once we were activated, about 30 amateurs signed in to a Resource Net on a local repeater managed by Bob Wolbert, K6XX," Conklin said. "These hams were assigned various duties, including providing support for animal rescue operations. Some were assigned to specific locations in order to support law enforcement and fire authorities. The Santa Cruz Chapter of the American Red Cross initiated staffing and evacuation centers on Wednesday night, and we deployed the ARES Step-Van to support a shelter in Davenport, about 15 miles north of Santa Cruz on Highway 1. Due to the low volume of shelter clients, these facilities did not require further staffing by local ARES team members."

Officials declared a mandatory evacuation in the affected area on Thursday, namely for the towns of Swanton and Bonny Doon; an estimated 2500 people were evacuated from their homes. On Sunday, officials allowed residents from Bonny Doon who had been evacuated to return to their homes, but warned them to be on a state of alert and to be ready to move as needed.

Dubbed the Lockheed Fire, the blaze was 90 percent contained on Friday, August 21. More than 7500 acres are affected by the blaze; the cause of the fire is under investigation. Approximately 2000 firefighters -- equipped with almost 300 fire engines, 14 helicopters, 30 bulldozers, six air tankers and 21 water tenders -- were trying to get the fires under last weekend. As of August 21, there are 1595 fire personnel on site with 125 engines and five helicopters. To date, no homes have been destroyed by the fire, but 13 outbuildings were burned to the ground. The damage is estimated at $21.4 million.

Conklin said that the Santa Cruz County Equine Rescue Team was activated in response to the fire, providing large animal rescue support. "In the past year, many members of the team received their Amateur Radio license," he explained. "They were instrumental in organizing and rescuing horses, llamas, alpacas, goats, sheep, chickens and ducks, as well as arranging transport for 100 head of cattle. Working in conjunction with County of Santa Cruz County Animal Services, they were able to transport and relocate the animals to safety at two sites within the county."

Volunteers staged an equine and large animal rescue at the cement plant in Davenport. A shelter for smaller animals was established at the Santa Cruz County Fairgrounds in Watsonville, about 15 miles south of the City of Santa Cruz.

The weather continues to be a major concern, as do the steep terrain and limited access to the fire's perimeter, Conklin said: "Conditions continue to be very fluid and may change quickly based on weather factors. Firefighters will continue to construct fire line around the perimeter of the fire." Governor Schwarzenegger visited the Fire

Operations Center in Watsonville and thanked all of the firefighters for their assistance.

"Once again, Amateur Radio and ARES proved to be an essential resource in times of emergency," Conklin said. "The citizens of Santa Cruz County are fortunate to have this trained, technical resource available to provide these essential communications resources."

==> HURRICANE BILL DOWNGRADED TO CATEGORY 2; AMATEUR RADIO HURRICANE NETS READY

Now that Tropical Storms Ana and Claudette have dissipated, Hurricane Bill -- downgraded from a Category 4 storm to a Category 2 storm -- is churning its way across the Atlantic with sustained winds near 110 miles per hour. Even though the storm's projected path does not make landfall in the US, hams affiliated with the Hurricane Watch Net (HWN) and the VoIP Hurricane Net (VoIPWX) are ready to provide communications support.

Hurricane Watch Net

As Bill approached, HWN Manager Dave Lefavour, W7GOX, told the ARRL that Net members are "limbering up their microphones and checking their antennas. We're all very carefully watching the storm. We could activate sometime during the next few days, based on the forecast tracks and intensity. We always ask all of our Amateur Radio friends and any new stations that might have data for us in the Atlantic, Caribbean, the Gulf of Mexico and the Gulf coastal areas to dust off their weather instruments. We'll probably need to establish communications with them very soon."

The HWN -- operating on 14.325 MHz -- relays real-time weather observations to WX4NHC <http://www.wx4nhc.org/> at the National Hurricane Center (NHC) <http://www.nhc.noaa.gov/>. "We want all of our reporting stations, especially those closer to the US, to keep in mind that we're also prepared to operate the HWN on 7.168 MHz or 3.668 MHz," Lefavour explained. "If propagation is such that we cannot maintain contact with reporting stations on 14.325 MHz, we'll open a Net on one or the other of those frequencies. Plans are to try 40 meters first, with 80 meters as our last choice of bands."

Lefavour encouraged hams to monitor the HWN Web site <http://www.hwn.org/> for Net activation plans: "We have placed data products from the NHC on the HWN Web site, including maps and charts of tropical storm activity."

VoIP Hurricane Net

The VoIP Hurricane Net -- which meets weekly during the hurricane season months of June-November and monthly from December-May -- has also been monitored Tropical Storms Ana and Claudette last week and is closely monitoring the progress of Hurricane Bill this week <http://www.voipwx.net/>.

"We are continuing to closely monitor the storm's progress," said VoIP Hurricane Net Director of Operations Rob Macedo, KD1CY. "Since 2002, we have been gathering surface reports to help WX4NHC save lives," he said. "The Net activates whenever there is a landfalling hurricane and will review any and all sources to gather surface data for WX4NHC as required."

The weekly VoIPWX Net had a surge in activity last week as Tropical Storms Ana, Bill and Claudette formed almost right on top of each other. Macedo told the ARRL that hams, many of whom are in hurricane-prone areas, were informed of the advisories for each tropical system. "The Net also informally activated as Claudette made landfall as a tropical storm in the Florida Panhandle," he explained. "The VoIP Hurricane Net Activation Policy <http://www.voipwx.net/node/235> is to activate during hurricanes, but will sometimes activate in the event of strong tropical storms that are near hurricane strength."

The VoIP Hurricane Net meets every Saturday evening at 8 PM EDT (0000 UTC Sunday) on the *WX-TALK* EchoLink Conference Node: 7203/IRLP Reflector 9219 system. When hurricanes threaten land, the Net meets and stays active as long as required on the system with listen-only EchoLink conferences and IRLP systems and streaming audio systems available.

>From the National Hurricane Center

At 1800 UTC on Friday, August 21, the center of Hurricane Bill was located about 290 miles (465 km) south-southwest of Bermuda and about 695 miles southeast of Cape Hatteras, North Carolina. Bill is moving toward the northwest at a speed near 18 MPH (30 km/hr). This track is expected to continue through Saturday. The core of Hurricane Bill is expected to pass over open waters between Bermuda and the East Coast of the United States early Saturday. Large swells generated by this hurricane are affecting Puerto Rico, Hispaniola, the Bahamas and Bermuda, moving to East Coast of the US and the Atlantic Maritimes of Canada during the next day or two. These swells will likely cause extremely dangerous surf and life-threatening rip currents.

The Bermuda Weather Service has issued a hurricane watch and a tropical storm warning for Bermuda. A hurricane watch means that hurricane conditions are possible within the watch area, generally within 36 hours.

==> HPM/140 BIRTHDAY CELEBRATION EVENT COMING NEXT MONTH

The Hiram Percy Maxim Birthday celebration is back! This year, the ARRL is honoring the 140th anniversary of the birth of the League's first president and cofounder. Hiram Percy Maxim, W1AW, was born September 2, 1869 and died February 17, 1936, in a Colorado hospital of complications stemming from a throat infection; his widow died just nine days later.

The operating event is open to all amateurs, and the goal is straightforward: Find the stations adding /140 to their call signs, and contact as many as possible during the event period, September 2-9. Who is eligible to sign /140? ARRL members who hold ARRL appointments, ARRL

elected volunteers (such as ARRL Directors and Section Managers), ARRL Life Members, ARRL Headquarters staff and VEs, AECs, QSL bureau workers and awards managers (who are ARRL members). The complete list of eligible positions can be found on page 20 of the September 2009 issue of QST. If you work at least 25 /140 stations, an attractive certificate can be yours! The certificate can be endorsed in increments of 25 QSOs, up to 100.

Time Period: 0000 UTC September 2 until 2400 UTC September 9.

Exchange: All stations signing /140 send RS(T), their appointment and their name; others send RS(T) and their name.

Eligibility: All amateur stations may participate. ARRL Life Members, and those persons holding ARRL appointments, elected positions or ARRL HQ staff, may add /140 to their call signs for the duration of the celebration. Volunteer Examiners, Assistant Emergency Coordinators, QSL Bureau workers, Registered Instructors and Awards Managers who are ARRL members are also invited to participate.

Miscellaneous: /140 stations may be contacted on any band or mode for credit. You can work a station once per band and mode. Repeater contacts are valid for credit, but please be considerate of the users during a repeater's busy periods. All /140 stations are encouraged to be as active as possible on local repeaters and nets. The certificate is available for making at least 25 contacts with /140 stations, with endorsement increments of 25, and a maximum endorsement of 100. To receive the award, send in a log extract with the date, time, band, call sign worked and exchange for each /140 contact. Include your name, call sign and address, and tell us how many /140 stations you worked. Mail everything to HPM/140 Celebration, c/o W1AW, 225 Main St, Newington, CT 06111-1494. You can also send in your entry on a disk or CD in regular text format. All entries must be accompanied by a check or money order for $5 (US) payable to ARRL. Please make sure your entry is postmarked by October 9, 2009.

==> ARRL SECTION MANAGER ELECTION RESULTS

Of the nine Sections holding Section Manager elections this month, three will be getting new Section Managers: Los Angeles, South Texas and Georgia. The Sacramento Valley, Eastern Washington, Colorado, Western Washington, West Virginia and San Francisco Sections will keep their incumbent Section Managers. The new terms of office start October 1, 2009. Ballots were counted at ARRL Headquarters on Tuesday, August 18.

In Los Angeles, David Greenhut, N6HD, of Woodland Hills, was elected as the new Section Manager with 838 votes. He defeated incumbent Phineas Icenbice, W6BF, who received 149 votes. Icenbice has been the Los Angeles Section Manager for 11 straight terms of office since October 1, 1987. Greenhut, a licensed radio amateur for 35 years, has a strong interest in ARES and emergency communications; he has served as the District Emergency Coordinator for the Northwest District of the Los

Angeles County since 2006.

With 647 votes, Lee H. Cooper, W6LHC, of Leander, was elected Section Manager of the South Texas Section. Challengers Lou Everett, Sr, WA5LOU, of Kennard, received 601 votes and Gary Tangrady, K5GST, of San Antonio, received 142 votes. Cooper, presently the South Texas Section Public Information Coordinator, is active in emergency communications, representing ARES on the newly formed State Communications Coordination Group. He was also the Travis County Emergency Coordinator from 2000-2004. Cooper will be taking on the Section Manager's role from Ray Taylor, N5NAV, of San Antonio. Section Manager since 1997, Taylor decided not to run for another term of office.

In Georgia, Eugene "Gene" Clark, W4AYK, of Albany, will be stepping into the Section Manger's position. He will be taking over from Susan Swiderski, AF4FO, who has been Section Manager since 2002. Swiderski, co-recipient of this year's Joe Knight Distinguished Service Award, decided not to run for another term of office. Clark has been the Georgia Section Emergency Coordinator for the last year and was a District Emergency Coordinator prior to that appointment.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next two year terms of office beginning October 1, 2009: Ron Murdock, W6KJ, Sacramento Valley; Mark Tharp, KB7HDX, Eastern Washington; Jeff Ryan, K0RM, Colorado; Jim Pace, K7CEX, Western Washington; Ann Rinehart, KA8ZGY, West Virginia; and Bill Hillendahl, KH6GJV, San Francisco.

==> THE LOCAL CLUB RESOURCE

Norm Fusaro, W3IZ, shares his views on how clubs play an important role in Amateur Radio. Fusaro is Assistant Manager of the ARRL's Membership and Volunteer Programs Department. He is also the ARRL Affiliated Club/Mentor Program Supervisor.

I am very fortunate to be in a position at ARRL which allows me significant interaction with our members. It is very fulfilling to be able to put a smile on someone's face by helping them find a solution to their problem, regardless of the complexity. Sometimes it is not possible to be as helpful over the telephone or with e-mail, so I will try to direct the individual to a local club where they may be able to get some side-by-side coaching. The local radio club is without a doubt the place where most of us received our ham radio education. The club is where we learned the jargon and techno-speak used on the air and where we met folks to emulate and folks whom we swore we would never be like. Everything that we know about ham radio that didn't come from a book was probably learned at club meetings or late night Field Day chats over burnt coffee. Personally, I have made many longtime friendships from my involvement in local radio clubs and I am sure many others can say this as well.

Clubs, by definition, are groups of like-minded people who share a common interest. In reality a club is an eclectic assembly of individuals, each with a unique perspective of their activity. The dynamic of a club is no different than that of a large family. Think of your last family get-together and then take a look at your radio club. If everybody was the same, life would be very boring. In every club, there is the usual cast of characters who add their distinctive flavors to the stew and make things interesting. It is diversity that makes a club work well. I have seen that no matter how varied the personalities are in a club, most of these personalities are also eager to help. Helping each other is characteristic of radio amateurs.

How often have you experienced something like this? Two hams will be in QSO -- perhaps discussing an antenna installation or radio repair -- when another radio operator will break in with a helpful suggestion. This situation may have happened to you, or you may have even been the breaking station. The same thing happens (or should happen) at club meetings. If you need help with something, the closest resource is your local club. On the surface, the club may appear to be dysfunctional, but once you are involved, you will find that it is actually very productive.

The Pareto principle, commonly known as the 80-20 rule is a simple expression that 80 percent of the effects come from 20 percent of the causes. As applied in the business world, this would be 80 percent of the sales are driven by 20 percent of the customers. In a club, the percentages may be slightly different, but the fact remains that a small percentage of the membership is responsible for making things happen.

This is not to suggest that 80 percent of the members do not participate, but without a "sparkplug," some things would never get started. These people are the doers. The doers don't take no for an answer and are always willing to take on more responsibility. But where is the fun in jump-starting a project without someone telling you it would never work? Of course, it would be much more fun without the negative comments, but that goes against human nature. Ever since man tried to open a coconut with a rock, someone was right beside him offering a thousand excuses why it won't work: "You'll smash your thumb." "The rock will break." "You should invent a wheel and roll it over the coconut." "Let's just eat the bananas." The cynics of the world are an essential part of society -- and of our clubs. They challenge us and make us work harder to prove them wrong. Learn to accept these people but never let them distract you from moving forward.

You only get as much from a club as you put into it. A majority of the club bashers tend to be long time hams with a "been there, done that" attitude, asking what a club has to offer them for them. To borrow from President John F. Kennedy, "ask what you can do for your club." Of course, we took more than we had to offer when we were younger and inexperienced. But over the years, we have gathered knowledge that we can share with the newcomers. Based upon my countless interactions with hams of all levels of experience, the novice has much to offer the

old-timer, even if it is just reliving the joy of discovery. The local radio club has something for everybody who is willing to get involved.

Don't know where you local club is? Use the ARRL Affiliated Club search <http://www.arrl.org/FandES/field/club/clubsearch.phtml>. You can reach Fusaro by e-mail <w3iz@arrl.org>.

==> ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update (a bi-weekly contest newsletter), the ARES E-Letter (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, just to name a few.

You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service to members, letting them know when their membership and license are due to expire.

Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==>SOLAR UPDATE

Tad "Suspended in the blinding, sunlit blue" Cook, K7RA, this week reports: The quiet Sun continues to baffle us. If there are no sunspots today -- and I don't expect any to emerge -- this will be the 42nd day in a row with no sunspots; July 10 was the last day we saw any spots. There is really no way to predict when the next sunspot will appear. If we see no sunspots through the end of the month, then nearly 80 percent of 2009 so far will have been spotless. Sunspot numbers for August 13-19 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 67.2, 67.6, 68.1, 68.8, 68.1, 67.4 and 67.1 with a mean of 67.8. The estimated planetary A indices were 5, 4, 3, 3, 3, 4 and 10 with a mean of 4.6. The estimated mid-latitude A indices were 3, 2, 1, 0, 2, 2 and 8 with a mean of 2.6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Dana Gioia's "California Hills in August" <http://www.danagioia.net/poems/californiahills.htm>.

==>IN BRIEF:

* This Week on the Radio: This week, look for an NCCC Sprint on August 21. Check out the Hawaii QSO Party and the Ohio QSO Party on August 22-23. The SKCC Sprint is on August 26. Next week, there is another NCCC Sprint on August 28. The Kansas QSO Party is August 29-30. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, August 23, 2009, for these online course sessions beginning on Friday, September 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* 7O1YGF Now on Logbook of The World: ARRL DXCC Manager Bill Moore, NC1L reports that the logs for the 2000 DXpedition to Yemen, 7O1YGF, have been uploaded to Logbook of The World (LoTW) <http://www.arrl.org/lotw>. Last week, Moore announced that after more than an eight year delay, the DXCC Desk approved the operation after a review of "recently received information," as well as "additional dialogue" with the DXpedition leader <http://www.arrl.org/news/stories/2009/08/12/11022/?nc=1>.
Moore outlined the process to receive credit via LoTW for 7O1YGF:
* As with paper applications, if you submitted 7O1YGF in the past and had it rejected, we will accept an e-application via LoTW; you will not be charged a submission fee for the 7O1YGF submission only.
* Make sure you have uploaded your QSOs. DXCC cannot open and search the logs for your QSO, since doing this will not show the match that is required for an LoTW confirmation.
* Access your account and begin the application process.
* If you select only 7O1YGF QSOs, you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs, a regular submission fee will apply;
* Complete the application (all four parts) and DXCC will place your e-application on the list for processing.

* A special note for 7O1YGF applications only: On Part 4 of the LoTW application, click "Payment by mail." This step is very important to assure proper handling. If you clicked on Part 1 for any QSOs other than 7O1YGF you must make proper payment. This is only for 7O1YGF submissions. Applications with other QSOs will be handled and charged as a regular submission.
* DXCC will not acknowledge completion of the application. When finished, your numbers in LoTW will reflect the completion of your e-application.
* If you achieve Honor Roll or Top of the Honor Roll from this submission and you would like to order the wall plaque, send Moore an e-mail <dxcc@arrl.org>, or you can fax your order or send the order form by regular mail.

* FCC Blogs, Twitters: On Tuesday, August 18, the Federal Communication jumped on the technological bandwagon and began "Twittering." Twitter <http://twitter.com/> allows text-based posts of up to 140 characters displayed on the author's profile page and delivered to the author's subscribers; to date, the FCC's Twitter page has almost 1900 followers. The FCC has also started a blog called Blogband <http://blog.broadband.gov/>. According to Chairman Julius Genachowski (who made the first post), "Blogband is part of the FCC's commitment to an open and participatory process. Blogband will keep people up-to-date about the work the FCC is doing and the progress we're making. But we want it to be a two-way conversation." Readers may leave comments after each post, but comments will be monitored during normal business hours and will be reviewed as "speedily as possible" before posting. "As this blog demonstrates, the Internet is changing and expanding the way Americans communicate, providing them with unparalleled access to information." Genachowski wrote. "So visit Blogband often to keep up with the latest news and -- more importantly -- get involved." The FCC pointed out that commenting in the blog "is not a substitute for submitting a formal comment in the record of a specific Commission proceeding." Find the FCC's Twitter page at <http://twitter.com/fccdotgov>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

G7VJR has established a rather neat on-line application for those who like
to "slice-and-dice" their logs to learn things about their operations that
aren't always evident in traditional logging programs.

You upload your log in ADIF, and then use any of several tools to analyze
it. Free.

This is not another LoTW or eQSL, but a handy supplement to them.

You have offered no independent research to back up your conclusions so
as is true with most of what is written about this topic your post is
heat without light. Many of those who allege that their driving is not
impaired by the use of audio communications devices are unwilling to
look at their actual performance objectively. More importantly they
lack the tools to do so.

In a study done by the University of Maryland's school of industrial
safety not one subject performed as well while using a full duplex audio
intercom during driving in a simulator as they did without the need to
use that intercom. The conversation consisted of an investigative

assistant asking questions and the driver providing answers. In absolute terms many of the participants still demonstrated adequate vehicle control and response to unexpected events while being questioned when compared with previous simulated driving studies focussed only on the driving task in that they were in the median range of all drivers tested on the driving task alone. In no case was the drivers performance as good as it was with no conversational challenge. Many subjects remained barely in the median range of all drivers tested when the intercom task was added in spite of having well above median driving scores without the additional task. The intercoms used were single ear piece intercom headsets that are routinely worn by emergency vehicle operators during non emergency operation of the vehicle. When operating in emergency response mode the second ear piece is rotated into position to protect the operators hearing from the audible emergency warning devices. That mode was not used in the testing and the second ear piece was detached and put aside during these tests. All of the test subjects were college students who's hearing and vision met the standards for entry into the fire and rescue service published in the National Fire Protection Association Standard 1582 (Standard on Medical Requirements for Fire Fighters). The studies designers were interested in whether such testing would provide solid evidence of the need for a driver, other than the chief officer, for chief officers vehicles when the officer was responding to an incident. The questions tested the test subjects comprehension of information in both a previously read pre plan of the property to which the test subject was driving and information just heard over the audio link about the same situation from recordings of first arriving units on scene reports and request for orders that they had heard while driving. The emergency driving tasks was not simulated because the researchers did not have a baseline of performance to compare from previous studies as they did with the routine driving task.

I think I can guess what objectives will be raised.
1. The conversational tasks was not representative of other telephone conversations.
2. The intercom headsets are not sufficiently similar to Cellular or Personal Communications Service (PCS) telephones.

Please allow me to point out that a high challenge simulated conversation may well be a similar distraction to a high stress or highly emotional telephone conversation.

I also cannot see how using a slightly heavier hands free device discredits the difference in performance of all subjects tested. These were all young people with good reflexes, at least fair driving skills, and medically tested hearing and vision. Anyone who's performance on the baseline driving task was not within or above the median range on a standard bell curve was not used as a test subject for the study.

It is a completely legitimate exercise of the police power of the State to prohibit behavior that exposes persons other than the actor in question to an increased risk of serious injury or death. There is no longer any doubt that using a verbal communications device while driving degrades the drivers performance as a motor vehicle operator to a measurable degree. The arguments against regulation of the use of communications devices while driving are very similar to those posed against the use of smoking materials in spaces shared with others. The smokers personal freedom is indeed curtailed but it is the states duty to protect it's citizens from the irresponsible acts of other citizens. The State does not have a duty to protect you from your own actions but that is not what we are talking about here.

I could tell you how often we hear a mobile telephone still on in the wreckage when we are disassembling what's left of their automobile from around a driver but you would just dismiss it as anecdotal. Still it is too dammed often.
--

Volunteers play a vital role in our local communities, and volunteering

is even more important in these challenging economic times. Volunteers
donate their time, skills and understanding to our most vulnerable and
disadvantaged Australians, including the homeless, children at risk, and
older Australians. In times of disaster, volunteers are out in force
helping people in need and assisting communities to recover.

These are the opening words of the brochure outlining the guide lines
for volunteer community grants from the Commonwealth Department of
Families, Housing, Community Services and Indiginous Affairs, for 2009.

This is a program aimed at supporting community organisations and the
volunteers that they engage and applications close on 25 September this year.

vg2009@fahcsia.gov.au

This scheme is currently being considered by the members of GCEG, Inc
and here is a way for all clubs who meet the criteria to be able to fund
items to assist their members.

GCEG conducts its weekly net on the Mt Corella repeater, VK4RCM,
146.725MHz at 7.30 p.m. each Monday.

Lighthouse Weekend and RD Contest

SCARC participated in both of these recent events and we had many new F calls and soon to be F calls on the air over the weekend. Wayne VK4WS coordinated the RD contest from the clubrooms while Leicester VK4ALH was in charge of the old Caloundra lighthouse activation. At the lighthouse we were lucky enough to have a skyhook for our 40 and 80, antenna provided by a nearby resident on the 8th floor of an apartment building.

Sunfest 2009

The Sunshine Coast Amateur Radio club will be holding their Annual Sunfest on Saturday September 12th at the same place as last year which is the Woombye School of Arts Hall Blackall Street Woombye. UBD Map 66 F 12

For a table please contact Harry VK4TK on 0409488025 or via email vk4tk@dodo.com.au

Book early so you don't miss out.

There will be 25 tables of new and preloved goodies, a door prize and raffles throughout the day.

Tables are $15.00 and this includes 2 entry tickets. Normal Admission price is $5.00 a head.

The "Kitchen" will be running as usual with hot and cold food and drinks.

Until next time, this is Gordon VK4VP.

WIANEWS for week commencing Aug 23 2009

Hello, I am Tina VK5TMC, President of ALARA, with Shirley VK5YL, Lesley VK5HLS and Marilyn VK3DMS. ALARA is an Australian association for women interested in radio. We have a weekly net on Monday nights at 1000 UTC on 3.580 +or- for any YL who wishes to join us and many states have monthly lunches plus other events. Further information can be found on the web page at www.alara.org.au

---

Amateur Radio Station WX4NHC Featured in National USA Commercial

WX4NHC, the Amateur Radio Station at the National Hurricane Center (NHC) in Miami, Florida, is featured in a 60 second radio spot for Duracell batteries. The commercial, which begins airing this month, highlights the efforts of an all-volunteer army of ham radio operators for WX4NHC.

Narrated by actor Jeff Bridges, it describes the important role that radio amateurs play during severe weather conditions -- enabling communications with

emergency medical teams, police and fire departments -- when the power goes out. The narration underscores the importance of a reliable battery to power the portable ham radios, which are crucial to WX4NHC's work.

Now we are going to play this, and no it's not being played as a commercial, but played to show all of Australia the height that Ham Radio is thought of in OTHER parts of our worlds... so if your upset by hearing an advert from the USA... insert beep where required!

With this new spot, we are helping to showcase the important contributions made by the Miami ham radio operators," said Duracell's Bob Jacobs.

These heroic teams are working to save the lives of others.

When storms strike, the radio operators are donating their time to make sure communications stay intact, facing intense pressures and dangerous conditions to those in need. We're proud that our batteries can help power these life-saving efforts."

The first formal gathering of Community Broadcasting technologists held in Australia, called Technorama 2009 happens NEXT month

"Skilling and technology support is a major challenge for community broadcasters.

Technorama 2009 is the first step, being held from
Friday 4th September -Sunday 6th September in Melbourne.

Where do I find more information?
Download program and registration from www.cbaa.org.au, click on Technorama tab at the left

Use the CBAA discussion Technorama forums for latest information or to ask questions.

All station technologists, engineers, managers, sector suppliers of tech services and equipment. Anyone that contributes to technology decisions, or techs wishing to get involved Australia wide, are invited to attend.

Get in Early with your registration.

This is VK3FFFM"

Does your Amateur Radio Club have its details on the WIA website?

Are they up to date?

The 2010 Callbook is now in preparation, and whatever your Club has on the website, that's what the Callbook will publish.

If an update is needed, please do it NOW!!!!!

Send a message to an alien

An Australian science magazine is offering we inhabitants of the third planet from the Sun the chance to send text messages to aliens!

Thanks to a special project launched by Cosmos, Earthlings will be soon able to send a free message to the nearest earth-like planet, Gliese 581d.

The project, supported by the Australian government, is part of National Science Week.

Anyone who wishes to do so can send a message using the Hello From Earth website but it closes today August 23.

www.hellofromearth.net/

The inhabitants of Gliese 581d - if they exist - will only receive the messages in December 2029!

Australia's Science Minister Kim Carr was quoted by media as saying that the project would help people "discover the limitless possibilities of science," giving people an "opportunity to contact other intelligent life forms".

Gliese 581d, eight times the size of Earth and 20 light years away, was located in April 2007. Scientists later discovered that the planet is within the habitable zone where liquid water, and therefore, life, could exist.

The web sure has some interesting text messages ready to be sent!

"Hi There: Sorry about the Outer Limits;
hope you enjoyed I Love Lucy.
Have you got all our missing socks?
Love, Earth
Fred Mason
Roberts Creek, Australia'

and

"You are cordially invited to an Interplanetary BBQ. 6.00pm, 4th October, 2452 at my place.
BYO Meat and Beer.
RSVP: Year 2100
Cheers
Daniel Edmonds
Melbourne"

John VK4JKL was correct when he sent our editor Graham VK4BB this message, so to "read all about it" make sure you do get the text edition.

"Graham, I know you have said you don't like links to news events, but the following link is mandatory reading for any HAM or RF junkie, I tracked it down from mention in the latest ACMAsphere Issue 44

www.comlaw.gov.au/ComLaw/legislation/legislativeinstrumentcompilation1.nsf/0/58DA61C0685CFB85CA2575ED0032C733/$file/RadcomLIPDClassLic2000.pdf>

HAMS ACROSS AUSTRALIA.

All Hams who took part in the RD across Australia last weekend, listen up!

Peter Harding VK4OD, RD Contest Manager has advised he has already received some 70 Logs by Electronic means.

The first 2 arrived from ZL land, the rest from locals.

He also commented that he was VERY disappointed that NONE of the clubs or re-broadcasters on the VHF & UHF repeaters in and around the Brisbane region played the 30 Minute Opening address.

He has asked that we remind everyone to send their Electronic logs to rdlogs@wia.org.au

Quality upgrade training available

The track record of four years confirms that the Amateur Radio Victoria Standard Licence Bridging Course is highly successful - just ask anyone who has done it.

A targeted course to bridge the knowledge of Foundation Licensees up to the Standard Licence theory level, is designed and conducted by lecturer Kevin Luxford VK3DAP.

It runs over five Wednesday nights in September plus a revision Saturday, and assessments on a Sunday, all at the Amateur Radio Victoria office, 40g Victory Boulevard, Ashburton.

Enrolments are filling quickly. For more information contact Barry Robinson VK3PV on 0428 516 001 or email vk3pv@amateurradio.com.au

VK3RMM D-STAR gateway launched

The D-STAR on Mt Macedon north-west of Melbourne has now been connected to the D-STAR internet gateway enabling it to be linked to many other similar repeaters.

Amateur Radio Victoria switched on the gateway last Tuesday for the 2-metre and 70-centimetre repeaters after tapping into what is optionally very limited internet broadband access at the site.

Thanks to Richard Hoskins VK3JFK who set-up the software, initialised and tested the modem, and Ross Pittard VK3CE, Barry Robinson VK3PV who completed the installation work and ICOM Australia for providing the repeater equipment.

VK4kal Gordon reminds those planning on attending the CHARC AGM in Emerald the deadline of 20th Sept for accomadation is fast approaching.

Accomodation is dormitory, 12 seperate rooms and those coming must bring their own bedding + pillow, howver a mattress will be supplied!

Sounds like a mini DX-Pedition!!

Costs are set by the Deptartment of Education.

Day visitors $ 6.60

O/niters $ 13.20 per person per nite.

Oh and you will also need your own cutlery!

Also remember for those arriving from 4pm on 25th you have to bring your own meals as there are no supplies at the Camp.

Those intending to come, let vk4kal know. Details are on the text edtions.

HAMTESTS INTERNATIONAL TO LAUNCH IN THE USA

After successfully running the UK-only Hamtests.co.uk for just over 3 years, HamTests International is launching world-wide starting in the Use with the Technician, General and Amateur Extra license levels.

Each randomly generated test will have the same question pools as real tests.

HamTests International will also feature its 10 questions in 10 minutes technique. This is a quick practice designed for when you don't have the time to take a full practice test. It tests your ability to answer questions quickly and thoroughly so that you can ace the real exam on test day.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Tokyo Ham Fair Aug 22-23

The JARL Tokyo Ham Fair takes place on August 22-23, 2009.

It is probably the largest Amateur Radio event in the world, with over 29,000 people attending last year.

Among those at the event this year will be William, PE1RAH, who will be demonstrating his 435/145 MHz linear transponder that is designed to fit in a CubeSat.

D-STAR operation from the Ham Fair:

JP1YJJ A and JP1YJJ B will be QRV along with 8J1A on DSTAR from the Ham Fest You can now "One Touch" or call sign capture JH Stations calling.

To Initiate a call to Ham Fair SET UR=/JP1YJJA or =/JP1YJJB -

Santa Claus Silent Key

Mickey Hicks, WO6T known to many amateurs and their children as Santa Claus passed away Sunday, August 9.

He was 79.

For the past 38 years, Hicks, a ham for almost 50 years, would get on the air for 10 days each December as W6S (Whiskers-6-Santa).

ARRL Youth Editor Duncan MacLachlan, KU0DM, profiled Hicks in December 2008 "The Amateur Radio community has been quick to embrace the W6S operation. Mickey says that the first year operating as W6S was 'a hit with the operators of all ages and their children.'

Mickey noted that most children are a bit apprehensive of talking over the radio, let alone to Santa! Hicks told the ARRL in 2001 that his Santa's Workshop has been a great ham radio recruiting tool.

One of his most memorable experiences was when a young girl he'd once spoken with on the air as Santa came by with her ham ticket in hand to thank him in person for getting her interested. "I had tears in my eyes, he said."

"The Daily DX"

CIRQUE DU SOLEIL FOUNDER TO BE NEXT TOURIST IN SPACE

A former stiltwalker and fire-eater will be the next mega-millionaire tourist to visit the International Space Station. This with word that Cirque du Soleil founder Guy Laliberte is shelling out a reported $35 million for his round-trip ticket aboard a Russian spacecraft to visit the orbiting outpost. Bill Pasternak, WA6ITF, the editor of famed Amateur Radio Newsline says Guy Laliberte will rocket into orbit from Kazakhstan at the end of September with an American astronaut and Russian cosmonaut as his travel mates.

Liliberte explained that he is not a scientist, a doctor nor an engineer. Rather he sees himself as an artist and creator. As such he

says that he will try to accomplish this mission with his creativity and what life has given him as a tool.

What's not known is whether or not Laliberte will get his ham ticket and conduct ARISS contacts with those of us here on Mother Earth.

For those of you who do not speak French, Cirque du Soleil translates into the Circus of the Sun. It's a truly amazing performance of acrobatic skill combined with dance and circus acts that once you see you will never forget.

SUMBANDILASAT TO LAUNCH JUNE 15

South Africa's latest ham radio satellite called SumbandilaSat is now due to launch on September 15th. According to the Southern African Amateur

Radio Satellite Association website the bird is already on its way to the Cosmodrome in Kazikstan from where it will be carried into orbit on board a Russian Soyuz launch vehicle.

The amateur radio payload on board SumbandilaSat is made up of an FM voice transponder with an uplink in the 2 meter band and a downlink in the 70

centimeters. It also carries a store and forward voice digipeater and a
voice beacon.

SumbandilaSat will also carry a Very Low Frequency or V-L-F radio experiment.

(www.amsatsa.org.za)

New satellite location maps available

A map showing the current satellite location for most of the
amateur satellites are now available on the AMSAT web site.

>From the AMSAT front page, go to the 'Satellite Information' navigation box,
then select 'Satellite Status'. Next click on an underlined satellite name
this will display a satellite summary, scroll to the bottom of the page and
there will be a map showing the current location of that satellite and the
illuminated and dark portions of the earth.

This feature can be used for a quick check of the satellite's
location or to verify that your tracking program was setup correctly.

CAR HORN BASED EMERGENCY ALERT SYSYEM PROPOSED IN GERMANY

In the past, Germany used sirens to warn the population in the streets

against floods and other dangerous situations. Today, most sirens are gone
having been dismantled after the Cold War.

Now, researchers want the population to be warned of pending disasters by use
of common car horns. In fact, they have applied for a patent of a technology
which allows the horns of parked cars to be activated in cases where such
an immediate emergency natice to the German public is required..

The technology is based on the Germany's eCall emergency system, which new
cars are going to be equipped with beginning in September 2010.
The eCall system was developed to help reduce the number of road traffic
fatalities. It consists of a GPS sensor and a mobile phone component, which
is activated only in case of an accident such as when airbags are triggered.

The system then can transmit data such as the time and location of an accident
and driving direction of the vehicle to an emergency call center.

Celebrating 'Homecoming 2009' through Amateur Radio

2009 is the year of 'Homecoming' in Scotland.

It is a year-long celebration aimed at attracting the Scottish Diaspora as well as those interested in Scottish traditions to Scotland. Numerous events have been and continue to be held throughout Scotland this year.

Amateur Radio in Scotland is playing a part in Homecoming.

Regulators Ofcom have agreed to special prefixes to be used by Radio Amateurs in Scotland until 30th November 2009.

The prefixes will be GA, MA and 2A .

The A replacing the M in their prefix

(A to represent Alba the Gaelic name for Scotland).

Gordon 2M0XGP plans to be on-the-air for the event using the special callsign 2 A ï¿½ XGP.

A special prefix QSL card will be available to anyone, either QSLing direct (enclosing an SASE) or via the fast and easy way of uploading your QSL card and log to www.hrdlog.net

Only QSOs logged under 2Aï¿½XGP will be eligible for the limited edition QSL card. QSO details will be checked and if correct, a QSL card will be sent direct.

The following operation has been approved for DXCC:

7O1YGF - Yemen. Operation from April 16, 2000 through April 26, 2000

After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow these options:

Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally.

==========

THANK you to Shirley VK5YL, Lesley VK5HLS and Marilyn VK3DMS for helping with this week's broadcast. We hope to hear you in the ALARA contest next weekend Saturday 29th August 2009 at 0600 hours UTC (4pm EST) to Sunday 30th August 2009 at 1159 hours UTC (9.59pm EST)

I'm Tina VK5TMC - WIANews - we've reported...YOU decide.

WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB and read by members of ALARA on behalf of the National WIA.

2202. G5RV near power lines?

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-22 08:40:58 UTC
From: john <john.miller188@onetel.net>
Message-ID: <4a8faf1b@212.67.96.135>
Source record: 6466

Hi all

I am a new member and new to the hobby. I am getting myself all set up slowly and will be starting my foundation studies soon!

With the kit i have bought (from a silent key) was a new G5RV which i would like to use.

My question is we have electricity supply wires running at about eaves height and parallel to them between us and the neighbours, and about 8-10ft out. I am unsure as to where to run the G5, would it be better at 90% to them down the garden?- parallel with them across the garden? Over/under? I would just like to avoid any interference issues if possible, or maybe we should just move!!

Any help would be much appreciatted.

Cheers
John

Hello John.

The interference issue can be determined by trying a range of positions for the G5RV.

The more important issue is to ensure that there is no way that the G5RV and the power cables can come into contact nor that anything could bridge the two lots of wires. Consider not only the wires in normal use but also consider what happens if a wire breaks or comes free of a mounting point.

73, Roger.

If you don't believe me, that is a choice you make. Just as you cite the University of Maryland study. My own study is no less valid simply because it is based in experience and personal knowledge rather than a well funded hypothetical. You don't state that you were actually involved with the study somehow. My personal study did not involve the use of a headset, it involved the use of a duplexed mobile radio with a standard mobile mic and speaker vs. a telephone handset option and was essentially ongoing for

several years. My although my observation of those who used a BluTooth type headset showed significantly lowered distraction than a handset pressed to the ear and even less than wired headsets in some cases due to the possible entanglement of wiring.

You cite in the experiment, the test subjects were REQUIRED TO DIVIDE THEIR ATTENTION by being TASKED by the duplex conversation. This was my warning at the start of my post! How many of the test subjects simply turned off the distraction? In any valid test, the driver has the option to say "I can't talk now" and terminate the distraction. This is assumed to be an option in all real life situations. I hope no one would argue that deliberately requiring the driver to be distracted would be a good thing.

And this leads us to another great worry and challenge: Emergency response drivers and the distractions they have to deal with. I am somewhat familiar with that having been involved with technical details of commercial, aircraft, and public safety mobile communications. The answer is not to serially outlaw everything, but to find technical solutions that don't require outlawing motor vehicles entirely for being inherently unsafe.

It could be a conclusion of the Maryland study that all potential drivers under the age of 30 be restricted to computer simulations until they learn how to drive.

This would be heat only to a pure resistance.

I would have to go and look it up the standard, but I wouldn't want them
anywhere near each other that one could blow down on the other or even a
tree branch between them, nor would I want to be on a ladder and fall on the
power line. Running them parallel would induce a lot of RF on the AC line
and make problems for the neighbors. I moved to have a better radio site.

John
Never over and never under. If it can be mounted on a parallel line but
not beside the power lines that would be best, I would think, as it
would minimize coupling of the signal into the power lines and power
line noise into the antenna. I'm no ASCII artist but what I have in
mind would look like this.

Next Theory Examination

The 21st of September is the closing date for applications to sit the next Theory Examination for an Amateur Station Licence which will be held on Tuesday the 6th of October at 2p.m in the ComReg Offices in Dublin. To reserve a place at the exam intending candidates should forward the appropriate fee to Sean Nolan EI7CD, 12 Little Meadow, Pottery Road, Dunlaoghaire, Co. Dublin.

The fee is 50 Euro or 25 Euro for full-time registered students, repeat candidates and those who are retired, unemployed or have a disability. Cheques and Money Orders should be made payable to the IRTS. When forwarding the exam fee intending candidates should enclose their postal address as well as phone and e-mail contact details. Sean's e-mail address for any further enquiries is ei7cd at gofree dot indigo dot ie

Intending candidates should note in particular, that in Section B of the paper National and International Rules and Operating Procedures- questions on the National Rules will be based on the new Wireless Telegraphy (Amateur Station Licence) Regulations 2009 which came into force on I June 2009. These Regulations and other matters in relation to the operation of amateur stations can be found in the Amateur Station Licence Guidelines published by ComReg in Document 09/45 which is available on the Publications section of the ComReg website at www.comreg.ie

There is also some very useful information available under Radio Theory in the Links section of the IRTS website at www.irts.ie

---

IRTS 2m Counties Contest

Next Sunday the 30th of August is the date for the Autumn 2m counties contest. It takes place between 14.00 and 16.00 local. The full rules are available on the IRTS website under the contest tab.

70cms Activity Hour

To try to promote activity and see if it is worthwhile to run a 70cms Counties contest. We will be having a 70cms activity hour following the 2m contest on Sunday the 30th August. Both FM and SSB stations will be welcome and both Calling channels will be monitored.432.2 for SSB and 433.5 for FM users.

We look forward to hearing many portable and fixed stations on the day.

3DA0SS Swaziland

David, GI4FUM, has returned from Swaziland and reports that the 3DA0SS expedition was a big success. Around 20,000 QSOs were made, many of them on the data modes. The International Scout Camp was also a great success with the scouts learning many new development skills.

The IRTS committee, with the agreement of the CQIR Contest sponsor, Dargle Builders Limited, agreed that the excess in the contest fund which amounted to more than 1,000 Euro, should be donated to the Swazi scouts towards the cost of providing clean water at their campsite.

While David was there, the new pump was installed and commissioned and clean water is now available for all the camp needs. Following the AFRI75 expedition to Swaziland and the resultant publicity for the Scout Project there, many individual Society members donated monies for projects at the campsite. We are happy to act as a conduit for any such funding and if you are interested in helping you should contact Paul EI2CA or David GI4FUM.

ARRL Celebration

This year, the ARRL is honouring the 140th anniversary of the birth of the League's first president and cofounder. Hiram Percy Maxim, W1AW, was born on 2nd September 1869.

The operating event is open to all amateurs, and the goal is straightforward: Find the stations adding /140

to their call signs, and contact as many as possible during the event period from 2-9th September. The /140 will be signed by any ARRL member who holds and ARRL appointment.

There will be a Certificate available for anyone who works at least 25 of the /140 Celebration stations

Time Period: 0000 UTC September 2 until 2400 UTC September 9.

Exchange: All stations signing /140 send RS(T), their appointment and their name; others send RS(T) and their name. More details and deadline application on www.arrl.org

---

Dave Court EI3IO

Dave will be moving to Bahrain (A9) on 28 August, initially for a period of 2 years. No call-sign information is available as yet. However you may find Dave on 20m in A9 from September onwards, depending on the time it takes to obtain residency etc.

A QTH has been chosen which appears to be good for all bands 160m to VHF. Subject to licensing restrictions, Dave plans to be QRV on most MF, HF and low VHF bands. Equipment being taken includes an Elecraft K3 transceiver, Acom 1000 amplifier, yagis for 14 MHz to 70 MHz and an 18 metre Spider Beam fibre glass support for MF and low HF verticals.

It should be noted that 600m, 60m, 6m and 4m are currently not available in A9. EI3IO will still be QRV from Ireland during the next few years, during vacation trips to the family home in Shankill, where family members will still be resident. The Dublin DX Cluster EI7SDX will also remain QRV with internet access only - click http://shandx.ath.cx/cgi-bin/ei7sdx.cgi or telnet://EI7SDX.ath.cx:7300 for access."

MFJ ACQUIRES CUSHCRAFT AMATEUR ANTENNAS

In industry news, MFJ Enterprises, Inc., of Starkville, Mississippi has purchased the Cushcraft Amateur Radio Antennas Product Line from Laird Technologies, St. Louis, Missouri.

The sale was effective July 31, 2009 and MFJ has announced that Cushcraft products will continue to be manufactured in Manchester, New Hampshire.

---

30 Meter Multi-Mode Weekend

This weekend, the Amateur radio 10 MHz (30 metre) band will be alive with digital signals during the multi-mode weekend.

The objective is to promote experimenting and using different digital modes on unique 30 Meter Band. A number of digital mode groups will be participating this weekend so if you wanted to try out a mode you have thought about trying here is your chance to get on the 30 Meter Band to try those digital modes and/or try a digital mode software that includes multiple digital modes.

This is NOT a contest.. no set times.. no rules.. no exchanges.. no winners other than those that participate with casual use of the 30 Meter Band to experiment, rag chew, DX and have some fun!

Crossakiel Amateur Radio Association

C.A.R.A would like to thank all the stations that made their first club event a success. The Club meets every Wednesday at 8pm in the Welcome Wagon in Crossakiel. Everyone is welcome to attend.

This week in History

1919 George Fisk of AWA does first radio 'broadcast' in OZ.

1932 The British Broadcasting Corporation (BBC) began its first experimental TV broadcast in England.

Items mentioned in the IRTS Radio news are of a general, educational or informative nature, there is no guarantee that stations mentioned can be heard or worked.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to

�charlie dot Carolan at gmail dot com� Or by phone to 087-6265418

News can also be submitted via e-mail to

�newsteam at irts dot ie�

for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in

order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 922
BID: $OPDX.922
August 24, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, N4GN, AA5UK, KH6BZF, K7BV, AF8C, K8YSE, DK8JB, DL2VFR, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1JQJ/IK1ADH & 425 DX News, JI5RPT, MM0DFV, OK3AA, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA3J, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and YO2DFA for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-August, through Sunday, 23rd-August there were 201 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TK, TL, TN, TR, TY, UA, UA2, UA9, UK, UN, UR, V5, V6, V7, V8, VE, VK, VP2V, VP8, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Operators Jacek/SP5EAQ and Jacek/SP5DRH will be active as 3D2MJ and 3D2KJ, respectively, from Viti Levu (OC-016), starting October 1st for four weeks. Activity will be on all bands, but with an emphasis on the lower bands. They plan to use two stations with small amps and vertical antennas. QSL via their home callsigns.

4W, TIMOR-LESTE. Currently, two operators are active from here. Al, CT1GPQ, now active as 4W6AL, will be there until October 3rd. Remember, this is "NOT A DXpedition"! CT1GPQ is in Timor-Leste with a medical team and radio operations will take place only during his spare time. He was heard this past weekend on 20 meters CW at various times between 0800-1300z. QSL via Toze, CT1GFK. Online log is now available at: http://algarvedx.com
Second operator is Chris, VK4FR, now active as 4W6FR, will be there until mid-October. He is also on a work assignment. Chris was heard this past weekend mainly on 30 and 20 meters using PSK31. QSL 4W6FR via VK4FW.

5B, CYPRUS (New IPA Op!). Gab, HA3JB, will be active as 5B/HG3IPA between September 25th and October 2nd. This is a new IPA activation and is valid for HA-IPARC Award (Hungarian International Police Association). Find IPARC Award info at: http://www.ha3jb.com/award.html
Gab plans to be in the CQWW RTTY Contest (September 26-27th). Online log will be available on his Web page at: http://www.ha3jb.com
ADDED NOTE: Gab reports, "I'm very sorry that the 3A/HG3IPA expedition was postponed due to technical reasons."

9H, MALTA. Members of the Dutch Society of Radio Amateurs (VRZA) will once again be active using their special callsign 9H9PA from Qawra between September 5-28th. Activity will be on 80-6 meters using CW, SSB and the Digital modes. QSL via PB9ZR, by the Bureau or direct to: Ruben van der Zwet, Van Speykstraat 238, 2161 VT Lisse, The Netherlands. NO IRC coupons, they are not valid anymore in the Netherlands (2 USDs only). PLEASE NOTE: Operators will also operate under their individual callsigns. The following callsigns were mentioned: 9H3AB (QSL via PA1SL), 9H3DZ (QSL via PA2AM), 9H3FD (QSL via PA3FHR), 9H3ON (QSL via PG9W), 9H3S (QSL via PA3HGP), 9H3X (QSL via PE1NGF), 9H3YM (QSL via PE1OFJ) and 9H3ZR (QSL via PB9ZR).

9M6, EAST MALAYSIA. Operators Miki, JJ2CJB/AC2AI will be active as 9M6/JJ2CJB from "Langkah Syabas Beach Resort" located near the city of Kota Kinabalu on the Island of Borneo (OC-088) for the CQWW DX SSB Contest (October 24-25th). He plans to run 400 watts into a Force12 C4 beam. QSL via LoTW, e-QSL or the JA Bureau.

AH0, MARIANA ISLANDS. Kuny/W1FPU (7L1FPU) and his nine-year son Yoshiki/ KH0UA (JF1UCV), Tomo/N2QP (JQ1OCR), his wife Yuri/KE7TWK, Hajime/AH0BR and Moto/W1NDE will be active from the Mariana Islands between September 4-7th. Activity will include a Multi/Multi entry in the All Asian DX SSB Contest (September 5-6th) as AH0BT. QSL via 7L1FPU, by the Bureau and direct.

EA6, BALEARIC ISLANDS (EU-004). Adrian, AA5UK, will be active as EA6/AA5UK from Ibiza (JM09tb), October 14-29th. Activity will be holiday style on 160-10 meters using mostly SSB and various Digital modes. Also, look for satellite activity on various birds. He will also be active during CQWW DX SSB Contest (October 24-25th). QSL via his home callsign, by the bureau, LoTW or eQSL.

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader, announced this past week (on August 19th) that "the Glorioso 2009 team has in hand the flight tickets from Paris CdG to the St. Denis Reunion Island airport. The departure is scheduled on September 11th and the return on October 8th. The information about the French Forces Transall flight from Saint Denis to Grande Glorieuse will be published as soon as the FASZOI Hq will have confirmed them. (FASZOI = French Armed Forces for the South Indian Ocean Zone) The stay on Grand Glorieuse is considered having about three weeks length. All the gear has been picked up and is now ready packed on pallets to be sent to the Reunion island in the next few days. Thanks especially for that to the Provins ARC, F6KOP members Serge, F6AML and Frank, F4AJQ." For more details and updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr

HL9, SOUTH KOREA (Update/Attention PFX Hunters!). Mike, KE7WRJ, will be here for over 2 months starting September 9th. He plans to be active as HL9QST, September 10th, but no later than 11th. This is a rare prefix only assigned to U.S. Service members assigned to Korea. His tentative schedule is to operate from 4 different locations in South Korea as follows: September 10-12th: Seoul
September 14-24th: Camp Casey
September 25th-October 18th: Camp Humphreys
October 19-29th: Camp Carroll
October 30th-November 13th: Seoul
Activity will be on 40-10 meters, depending on the propagation, using CW and SSB. Operations will be at least 8 hours a day during the week and longer over the weekends. Look for him to be in both the Extra and General portions of the bands. His equipment will consist of a 5000A by Flex Radio, a "3 element Yagi in a Bag" from Super Antennas. QSL via KE7WRJ, direct or LoTW.

IOTA NEWS.....
EU-008. Operators Ivan/G3IZD, Nick/G0HIK and Norman/G7MRL will be active as GM3IZD, GM0HIK and GM7MRL, repsectively, from the Isle of Islay (IOSA NH22, SCOTIA CS25, WLOTA L-1826) between September 12-18th. Activity will be on all HF bands, pro-pagation permitting. QSL direct only to each operator's home callsign.

EU-125. Michael, DK5NA, will be active as 5Q5NA from Romo Island (NS-001 for the Danish islands award) between September 6-25th. Activity will be on all bands, propagation permitting. QSL via his home callsign, bureau is preferred.

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from the Vesborg Fyr Lighthouse (DEN-046) on Samsoe Island (DIA JY-008) between now and September 4th. Activity will be mostly CW on all HF bands. He was spotted this past weekend on 30 meters. QSL via DL2VFR, by the bureau or direct. DO NOT QSL via the OZ Bureau!

OC-127. Reports indicate that operators Mike/KM9D (H44MY) and Jan/KF4TUG (H44TO) are now lying anchor at Tesauma, Rennell Island. They might be active soon. QSL via OM2SA.

JD/O, OGASAWARA. Operators Makoto/JI5RPT (JD1BLY) and Taka/JO2JDJ (JD1BLP) will be active from Chichijima Island (IOTA AS-031) between September 19-22nd. Activity will be on 40-6 meters using the satellites, CW, SSB and Digi modes. QSL via their home callsigns. Log search for JD1BLY will be available on the following Web site: http://www.ji5rpt.com/jd1/

KH2, GUAM. Operators George/K6SV and Dennis/K7BV will be active from Guam signing their respective callsign/KH2 between August 25-28th (JA time). Activity will be CW/SSB on the HF bands and 6 meters from the WH2DX rental QTH <http://www.wh2dx.com/>. QSL via K6HRO.

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press release number 6 dated August 22nd (edited): "The K4M team has passed two important milestones this week. First we are pleased to present our transportation to Midway on October 9th, 2009. The team has chartered the G1 with the callsign N8E as shown (or will be available) on K4M Web page at: http://www.midway2009.com/kh4news.html (picture taken on Palmyra)
Secondly, all radios, computers, antennas, coax, and the rest of the tons of gear have left Hawaii on a supply ship to Midway and will wait for the team there.
Fundraising continues on our Web site, <http://www.midway2009.com/> .
If you haven't visited it in a while stop by and help support our effort.
All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXpedition.
This month we are highlighting three more team members. You can read all their history at: http://www.midway2009.com/meettheops5.html "

KH6BZF PROPAGATION FORECAST/REPORT (For August 24-30th).....
Aug 24 AN SOLAR REFERENCE
Aug 25 AN ---------------
Aug 26 HN AN - Above Normal/Geomagnetic Level is QUIET
Aug 27 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 28 AN GEOMAGNETIC REFERENCE
Aug 29 AN ----------------------
Aug 30 AN QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Operators Theo/PA1TK, Kees/PA5WT and Rob/PA3GVI will be active as LX/homecall between September 4-7th. Look for Kees and Rob to focus on the HF bands between 80-10 meters using CW and SSB. While Theo operates in the IARU VHF Contest on 144 MHz (2m). QSL via their home callsigns.

MOBILE DXPEDITION (Ops Needed!). OPDX received the following interesting report this past week stating:
"Three-to-six month mobile DX expedition via restored 1971 VW van from Mexico to Tierra del Fuego... beginning plus-or-minus November-December '09.
- Men and women wanted for arduous journey
- Low price

- High drama
- From the searing heat of the Amazon jungle to the bitter cold of windswept Cape Horn
- Safe return anticipated
- Honor and recognition among hams worldwide

For more information, please E-mail gorvonj4@frontiernet.net
or phone/fax K0GMO John Croonquist 406-837-0525."

P29, PAPUA NEW GUINEA. Allan, VK2GR, will be active as P29CW from the Western Province between September and December. Activity will be only during his spare time because he is there working with "Australian Doctors International" (ADI - <http://www.adi.org.au>). Due to the limited availability of power, Allan may not be active on the many field trips during his stay. QSL direct to Tommy, VK2IR, with 3 USDs or new IRCs. PLEASE NOTE: DO NOT send QSLs to the Papua New Guinea address.

PSK CONTEST. The European PSK Club (EPC) has the honor to invite the radio amateurs all over the world to participate in the "2009 CIS DX QPSK63 Contest" (September 19-20th). This year's contest is being handled completely by the EPC. They would like to invite you to take part in the contest, the rules and other information can be found on the Web site at: http://www.cisdx.srars.org
Please check the rules as there are important changes. It is strictly a QPSK63 contest now, no other modes are allowed. The maximum output power is 100 watts. Georgia has been removed from the CIS Regions List. Moldova now has only 4 regions (MD01, MD02, MD03, and MD04). Kyrgyzstan has new additional territorial unit - Osh City (KG09). Please do not confuse this list with their EU Areas list, this is a completely different story.
"All the very best and see you all in the Contest! 73!"...
European PSK Club
CIS DX QPSK63 Contest Committee
www.cisdx.srars.org
epc@scotham.net

QSL INFO AND NEWS.....
Franz, DK1II (ex-7O1YGF), announced this past week (August 17th) that he uploaded the 7O1YGF log to LoTW. He states, "Thanks to Bernd, DF3CB, for helping with the log conversion!"

CLEARING THE CONFUSION (ON FEE SUBMISSION) FOR THE 7O1YGF QSL! Wayne Mills, N7NG, reported this week: "There appears to be some confusion over the fees charged for submitting 7O1YGF cards. Here's the story, verified by Ms. Sharon Taratula at ARRL:
THERE IS NO 12.00 USDs APPLICATION FEE FOR SUBMITTING ONLY 7O1YGF CARDS VIA A LOTW APPLICATION.
This fact was mentioned in the release, but perhaps it was not entirely clear:
'If you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;'

The fees mentioned above are both credit fees and DXCC application fees. Just IGNORE any fees reported on your application as long as you don't submit anything other than 7O1YGF credits." 73, Wayne, N7NG

MORE 7O1YGF SUBMISSION CLARIFICATION. Bill Moore, NC1L, Awards Branch Manager, reported on Friday, August 21st: "The 7O1YGF-ONLY submission is free. LoTW notes a submission fee (automatically) and I have no control over this. When I process the submission the fee is waived. The 'payment by mail' notation is to avoid having the fee being charged, accidentally. If you click 'payment by mail' you do not need to enter your credit card information.
Note: This free submission offer will end on December 31, 2009. After this, applicants can include 7O1YGF with their regular 2010 submission."

7P8AO QSL POLICY. Pista, HA5AO (one of the operators of the 7P8AO Lesotho operation), states: "I will send my QSL cards of my Lesotho operation for direct request, only. Please send SAE with 2 USDs and up. Please no IRCs. All the cash will be transferred to the Leratong Community Centre, Roma, Lesotho, to support the orphans and vulnerable children. I will upload the QSOs to the LoTW when I receive your direct request, only. The expenses of printing the cards and the post fee of the return QSL card will be covered by my own. Thank you for your kind understanding, and hoping your support." For more details, see: http://ha5ao.novolab.hu

ET3JA BUREAU QSLS. Milan, OK3AA, the QSL Manager for Josef, ET3JA (OK1XV), informs OPDX that by the time you read this, ET3JA will have finished his job in Ethiopia and should be QRT. He is expected to start working on QSLs (this week) that were received by the Bureau.

IRCS FOR SALE. OPDX: John, K1XN, (from the GoList) informs OPDX that he has several bundles of IRCs for sale *CHEAP* while they last. All are stamped and have an expiration date of Dec 31, 2009. Serious inquiries can E-mail him at: golist@gmail.com

K5D QSL STATUS go to:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/qsls.htm

QSL OH7QR/M via Erkki's home callsign, direct or by the Bureau. He was active from Hailuoto (Hailuoto, EU-184, WLOTA L-0580) this past week.

TA3J/7 AND TA7KI QSL STATUS. Berkin, TA3J, reports that the TA3J/7 and TA7KI QSL cards for the ARI 2009 and 2009 CQ WPX9CW Contests have been sent out direct on August 17th. QSLs for Bureau cards will be sent in September.

TK8B LOGS (Update). Laurent, F8BBL, has uploaded his logs to the following Web page from his recent TK8B and TK8B/P Corsica operation (which included EU-014, EU-104, EU-164 and TK/TK-112) at:
http://www.dx-cw.net/logsearch/logsearch.php
Also, a video is available at: http://www.youtube.com/watch?v=SHYDPTeyZdk

QSLS VIA LOTW: 5K0T, 5R8KD, 6W1RW, 7O1YGF, 7P8MM, 7P8OK, CT1ILT, D93I, EK6TA, F6KNB, KH7Q, LX8RTTY, NU1AW/KH6, W1C, ZF1A, ZM4G and ZP6CW

QSLS RECEIVED VIA MAIL: 4U1UN, 5J0BV, 5K0T, 7O1YGF, AX0BP, C37NL, CP1FF, EA8CQS, HD2M, IL7G, LZ2009KM, TO5E, TZ6EI, V29JKV, V63MY and ZC4RAF

QSLS RECEIVED VIA THE BUREAU: 3B7C, 4K9W, 4O60BH, 5R8RJ, 5Z1A, 6W7I, 9A/VE3ZIK, 9K2CQ, A25SL, AM1TDH, AO5EH, AO5MB, C52C, CO6WD, CU1F, CX4AAJ, DA0T, DE1KDC, DF0COC, DJ9JY, DL1CWI, DL2008DKT, DL40RRDXA, DL50DARX, E21YDP, EG5FUV, EI5GUB, EI0CZ, ER0FEL, ES5JR, ES90Z, EW1IP, EW5HQ, FG/F5OJU, FJ/G3TXF, FO/N6JA, G4MR, HB2008FS, HB9FS, HG9X, HK3JJH/HK0B, HP2/CX2AM, HP3FTD, HQ2A, HQ9L, IB0CW, IK2DZN, IK2FIQ, J3/DL7VOG, J6/DL7AFS, J75RZ, LA2MOA, LZ7HQ, OH0/PA3BAG, OH0X, OJ0MI, OM3CAQ, OX3DB, OX3KQ, OX5AA, P33W, PA143ITU, PA6BF, PA7KG, PT7CB, PY7VI, PZ5XX, RA1QQ/p, RA3AJ, RA9LI/9, RK1QWB, RK3IWT/p, RT6A, RW1AI/MM, RX3FS, RZ6AZZ/p, SA7AUH, SF700BF, SG3U, SK3W, SN0MTB, SP3SLO, SP4TXI, SV9/DJ7RJ, SV9/IZ4DPV, T88CJ, TC3EC, TF/DL2VFR, TF/LA9SM, TG9ANM, TK/F5TVG, TO5RZ, TU2/F5LDY, TX1A, UE4FCR, UE6LHT, UR5FEL/p, V25OP, V25WJ, V26H, VA6AK, VP2EFB, VP2MRM, VP2MVX, YO8RIJ, YU8/OH2R and YW0DX

SN120, POLAND (Special Event). Look for special event station SN120OSP to be active between now and October 31st. Activity will be on all bands and modes. Operations are to celebrate the 120th anniversary of the auxiliary fire brigade of the Polish City "Gorowo Ilaweckie". QSL via SP4CUF.

SPECIAL EVENT. The ARRL announced that the Hiram Percy Maxim Birthday celebration is back! This year, the ARRL is honoring the 140th anniversary of the birth of the League's first president and co-founder. Hiram Percy Maxim, W1AW, was born September 2, 1869 and died February 17, 1936. The special event is open to all amateurs, and the goal is to work the stations adding /140 to their callsigns, and contact as many as possible during the event period, September 2-9th. A special certificate is available for making at least 25 contacts with /140 stations, with endorsement increments of 25, and a maximum endorsement of 100. Who is eligible to sign /140? ARRL members who hold ARRL appointments, ARRL elected volunteers (such as ARRL Directors and Section Managers), ARRL Life Members, ARRL Headquarters staff and VEs, AECs, QSL bureau workers and awards managers (who are ARRL members). The complete list of eligible positions can be found on page 20 of the September 2009 issue of QST. For more details, read ARRL Letter (Aug. 21st, Vol. 28, No. 33) or go to the ARRL Web page at: http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1

T31, CENTRAL KIRIBATI. Craig, N3BQR, will be on a research trip to Phoenix Island (OC-043) and expects to be active as T31AA between September 10-25th. Part of his research will involve Craig trying to land on at least six of the eight islands in the chain, although this is subject to local sea state conditions. Activity is expected on 20 meters SSB using vertical and/or dipole. QSL route to be announced later.

TI5, COSTA RICA. Operators Lewis/WW4LL and Andrei/EW1AR/NP3D will be active as TI5/homecall between September 23-28th. Activity will be on all bands using RTTY, SSB, and perhaps some CW. QSL via LoTW, also direct per QRZ.com address.

XW, LAOS. Bruce, XW1B, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/All-Band entry. QSL via E21EIC.

YO DX CONTEST 2009. Ovidiu, YO2DFA, informs OPDX that he is the Contest
Manager of the 2009 YO DX Contest this year. He would also like to inform
all the OPDX readers that the contest takes place August 29-30th. The
YO DX Contest rules could be found at:
http://www.yodx.ro/en/hf-contest/rules
The 2008 results of last year's contest can also be found at:
http://www.yodx.ro/en/hf-contest/2008
Official sponsor's list can be found at:
http://www.yodx.ro/en/hf-contest/list-of-sponsors
Ovidiu states, "Please inform your readers that all the participants
which will fulfill the necessary conditions during the contest will
receive a free YO BZ AWARD (I-st Classe)."

ZK2, NIUE. Koji, JM1CAX (ex-D2NX), will be active as ZK2NX between
September 19-25th. Activity should be on all bands, especially 30/17/12
meters, mostly CW, but some SSB. QSL via JM1CAX, by the Bureau or direct.

Amateur Radio Newsline(tm) Report 1672 - August 28 2009

Amateur Radio Newsline report number 1672 with a release date of
Friday, August 28, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. A study says that sunspots seem to be
disappearing. Will they stay away for good? Also, a new a microwave
contact distance record is set in New Zealand, uncoordinated digital
audio repeaters are found to be interfering with ham radio satellites
and an editorial in QST warns against amateur radio's emergency
communications capability being used improperly. All this and more on
Amateur Radio Newsline(tm) report number 1672 coming your way right
now.

(Billboard Cart Here)

RADIO WAVES: TWO ASTRONOMERS PREDICT SUNSPOTS WILL SOON COMPLETELY
DISAPPEAR

Are sunspots disappearing for good? Two solar researchers say this is
the case. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Most hams users know that there is a direct correlation between
sunspots and high frequency propagation conditions. In general, the
more sunspots there are, the more DX you will be able to work. This
usually happens in 11 year cycles with the last solar maximum having
taken place in 2000.

The current Solar Cycle which is Cycle 24 should peak in roughly next
year in 2010. Only one problem. There have been few sunspots this
year and very little easy to work DX. And now there may be an answer
as to why.

Spaceweather.com reports that astronomers Bill Livingston and Matt Penn
of the National Solar Observatory in Tucson, Arizona, have found that
sunspot magnetic fields are definitely waning. Not only that. They
say that sunspots could completely disappear within decades.

Livingston and Penn have been measuring solar magnetism since 1992.
Their technique is based on a complex system called the Zeeman
splitting of infrared spectral lines emitted by iron atoms in the
vicinity of sunspots. They reached their conclusion by extrapolating
their already collected data into the future.

But Spaceweather also says not to count out sunspots just yet. It notes that while the data of Livingston and Penn is widely thought to be correct, that any far reaching extrapolations may be premature. It says that this type of measurement is relatively new, and the data reaches back less than 17 years. In the end it appears as if the giant solar disk we call the sun is the only one who holds the answers to the future of its spots and how good DX will be in the coming years.

In Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.

--

And a bit of an astro physics lesson before we leave this story. For those not aware, sunspots are made of magnetism. In other words a sunspot is not matter but rather a strong magnetic field that appears dark because it blocks the upward flow of heat from the sun's fiery depths. Spaceweather says that without magnetism, there would be no sunspots. (Spaceweather, others)

**

RADIO RECORDS: NEW ZL 3 CM RECORD SET

A new record for a microwave contact has been established down-under. This with word that an April 1st SSB voice contact on 10.368 GHz between ZL1TPH in Cape Reinga and ZL2IP operating from North Egmont has been confirmed under New Zealand Association of Radio Transmitters Society rules.

The distance between the two hams was 551 Kilometers and its considered as being a new New Zealand milestone record. It is also believed to be the longest terrestrial distance contact ever recorded on the 3 centimeter band made to date. (NZART, Southgate)

**

RADIO LAW: NO MORE Q SUFFIX CALLS IN SOUTH AFRICA

South Africa's telecommunications regulator ICASA has confirmed that it has blocked the further issuance of any ham radio call with suffixes that are part of the Q codes and will also not issue a call with the suffix SOS.

Its reported that only a few South African hams and one club call sign are in the now unused Q-code group. When these call signs are no longer in use they will also be added to the blocked list. South African hams who have call signs with Q-code suffixes are being urged to apply for a call sign change. (SARL)

**

RADIO LAW: UNCOORDINATED D-STAR REPEATERS IN ITU REGION 1 INTERFERING WITH HAMSATS

D-Star repeaters in I-T-U Region 1 operating uncoordinated in the Amateur Satellite band are reportedly playing havoc with ham radio satellite communications worldwide. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

ITU Region one is made up of Europe, Africa, the Middle East west of the Persian Gulf including Iraq, the former Soviet Union and Mongolia. The problem came to light with the recent publication of the International Amateur Radio Union Region 1 VHF/UHF/Microwave newsletter. It details the interference problems being caused by uncoordinated D-Star repeaters operating in the band segments reserved for Amateur Satellite operations.

The newsletter says a recent planning conference recognized the frequency needs for digital voice, and the bandplans were adjusted accordingly. In other words there are now specific spectral parcels in I-T-U Region One where repeaters using digital voice technology are to operate and no place else.

But the story goes on to note that the rising number of D-Star users in some countries has lead to what it terms as uncoordinated growth. It also notes reports that D-Star repeaters are operating in the 2 meter protected satellite segment.

The newsletter condemns these operations calling them deplorable. It goes on to note that hams complain about interference in the satellite segment caused by pirate operators and illegal telephone systems, while jamming the satellite segment themselves with uncoordinated digital voice repeater operations. It also notes that what it terms as irregular repeater shifts or input to output separation is yet also another source of interference to other ham radio operations.

IARU Region 1 is now laying down the proverbial gauntlet. It says that whenever a new D-Star repeater is to be set up, it must operate on a coordinated frequency pair. This, even if this means that an existing analogue repeater has to be switched off for this purpose.

Michael Kastelic, OE1MCU, who edits the IARU Region 1 VHF/UHF/Microwave newsletter takes it even a step further. He is urgently requesting that all Region 1 VHF managers monitor the developments in their countries and to use their influence to remedy the situation as required. And while he does not say it in these specific terms Kastelic seems to be suggesting that if an uncoordinated D-Star repeater shows up in the amateur satellite subband it may be time to have government telecommunications regulators for the nation its in, order it off the air.

No word from if any of the uncoordinated repeaters targeted by this editorial have or will voluntarily comply and move out of the amateur satellite band.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

In many ways it appears as if the popularity of D-Star in some parts of the world is such that its literally going through the same growing pains that analog FM repeaters saw in the late 1960's through the early 1970's. You can read more on-line at www.iaru-r1.org/index.php?option=com_remository&Itemid3&func=select &id=6 (IARU, Southgate)

D-STAR NEWS: FIRST EVER NON-ICOM D-STAR REPEATER JOINS G2 NETWORK

Meantime, David Lake, G4ULF, and members of the Ashdown Forest Repeater Group have the first non-Icom D-Star repeater in coordinated prototype operation in the United Kingdom. The GB7MH repeater hardware is a modified Tait T800 repeater operating in full GMSK mode with the D-Star standard 6.25 KHz bandwidth. The repeater uses the GMSK Node Adapter developed by Satoshi Yasuda, 7M3TJZ, in Japan.

With the cooperation and support of the Trust Server Team in Texas, the repeater GB7MH is connected to the G2 network. It is running popular software including the DPLUS module developed by Robin Cutshaw, AA4RC. It also can run Pete Loveall, AE5PL's DSTARMONITOR code unmodified.

The repeater is usually connected to REF005A and is capable of full callsign routing to and from the live G2 network. It provides station updates and includes a self-service registration page similar to the Icom registration.

The GB7MH D-Star system is currently undergoing rigorous testing to ensure the integrity of the worldwide G2 network. The software will not be made available until testing has been completed. You can follow the developments of this first ever non-Icom D-Star repeater at t http://g4ulf.blogspot.com. (Georgia D-Star, QRZ.com)

RADIO RULES: PECUNIARY INTEREST - A QST EDITORIAL BY K1ZZ

Whether or not you are a member of the ARRL, the editorial in the September issue of QST Magazine is must reading for any radio amateur

who is even remotely concerned over the rising problem of ham radio being used for things its was never intended. We are talking about the attempt to commercialize the hobby by some cities, towns and employers under the guise of it being emergency preparedness. Bill Pasternak, WA6ITF, is in our newsroom with more:

--

Titled "It Seems To Us: Pecuniary Interest" the editorial was penned by ARRL Executive Officer Dave Sumner, K1ZZ. In it he takes a close look at the level to which ham radio emergency communications has matured to where its looked upon as being among the most reliable in the world. And because of this, there are some who would exploit it as a way to have an emergency communications or public service network available and on call at little or no cost to a given business or municipality.

Indeed, Sumner cites one case of a medical worker who objected to the FCC interpretation of rule 97.113(a)(3). This when that unnamed worker was told that employees cannot transmit communications on behalf of the hospital while on duty.

Sumner's editorial says that the ARRL Board of Directors is already looking at the problem, but he really implies that it is the nations ham community that must think carefully about what its being asked to do by municipalities, service providers and employers before signing on. K1ZZ notes that there are other radio services designated for the purpose of routine business communications and warns that ham radio must not permit itself to be exploited by those who are to frugal to use them.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

"It Seems To Us: Pecuniary Interest" can be found on page 9 of the September issue of QST. Reading it aloud and discussing it might make for an excellent program for your next radio club meeting. (ARNewsline(tm) based on K1ZZ editorial)

**

HAM RADIO FUTURE: HAS CONTESTING REACHED ITS PEAK

Another article worth reading and discussing is titled Has Contesting Reached Its Peak appearing in the still available August issue of CQ Magazine. In it author John Dorr, K1AR, notes that even with a decline in the overall number of licensed radio amateurs world-wide that interest in radio sporting or contesting is at an all time high. Dorr's article looks into the likely reason for this interesting trend and postulates on what the future may be. It's a good read for anyone with an interest in radio sports or the overall future of our hobby. (ARNewsline(tm))

**

ENFORCEMENT: MALL RADIO JAMMER BONDY FINED $24,000 AND PUT ON 2 YEARS PROBATION

And yet another follow-up on the strange case of a man who tried to jam a mall security operation off of its assigned frequencies. A California State Court has put 25 year old radio jammer Kevin William Bondy on two years of probation, fined him $24,000, and ordered him to forfeit his radio gear.

According to the Ventura County Star newspaper, the sentence was imposed by Superior Court Judge Edward Brodie as part of a plea agreement. This after Bondy pleaded no contest on Thursday, August 20th to a misdemeanor charge making annoying phone calls in connection with an incident that happened last spring.

As you my recall, Bondy was caught by an FCC agent and local police officers while interfering with the radio operations at The Oaks Shopping Center in Thousand Oaks, California. Reports say that Bondy had demanded that the mall's security officers turn their radio frequencies to him and threatened to jam all of the malls radio communications unless his demand was met.

After he was caught the FCC issued its own $24,000 Notice of Apparent Liability to Monetary Forfeiture to Bondy. This for what it termed as his apparent, willful and repeated violation of the Commission's Rules by engaging in unlicensed radio operation, intentional interference to licensed radio operations and failing to allow an inspection of his radio equipment by Commission personnel. That order has since been affirmed.

Bottom line: Bondy has to pay $24,000 to the Federal government and another $24,000 to the state of California. This, with the latter keeping track of him over the next 24 months. (CGC)

**

RADIO LAW: CONGRESS MAY ALLOW CELLPHONE JAMMING IN PRISONS

States may soon seek permission to legally jam wireless cell phones in prisons to stop inmates from organizing crimes from behind bars. This, under a under a measure recently approved by a Senate committee.

The bipartisan measure is being sponsored by Senator Kay Bailey Hutchison of Texas and Maryland's Senator Barbara Mikulski as its Democratic co-sponsor. The Senate Commerce, Science, and Transportation Committee has endorsed the measure and has now sent it to the full Senate for consideration.

Law enforcement officials nationwide have long called for a change in the current law, which doesn't allow states to interfere with cell phone transmissions. The new legislation would require the FCC to consider all available technologies that could be used to block unauthorized wireless communications in correctional facilities.

If signed into law, the legislation would allow states to petition the FCC for permission to use wireless cell phone jamming technology. However critics contend that cell phone jamming could interfere with emergency response and legitimate cell phone use near prisons. (Published news reports)

**

RADIO LAW: LACK OF GLOBAL DEMAND ENDS MOST COPPER THEFTS

It wasn't long ago when we were reporting that the theft of copper and other conductive metals was rampant. Power lines were cut down for their copper content, pipes in buildings under construction were ripped away, and wiring was disappearing.

But that's no longer the case as the global recession has resulted in a drop in demand for most metals with copper among the hardest hit.

The price of copper reached an all-time high in mid-2008 of more than $4 per pound on the world market, with the greatest demand from China. That price then plummeted to $1.50 per pound shortly after the global economic recession began last fall. This makes it not very profitable for a thief to risk his or her life for less than the price of a hot dog from a street vendor.

Add to this newly enacted laws like one in California that requires scrap metal dealers buying bulk metal to get a photo ID from anyone bringing in the items and to delay payment for three days. It also requires recyclers to photograph the items, pay only by check and take the seller's thumbprint. (Union-Tribune)

**

RESCUE RADIO: PAINT ON PHOTOVOLTAIC SOLAR CELLS HOLD PROMISE FOR ENCOMM

Science Daily reports that solar cells could soon be produced more cheaply using nanoparticle inks that allow them to be printed like newspaper or painted onto the sides of buildings or rooftops. This to absorb sunlight and produce electric power.

The article cites the work of University of Texas chemical engineer Brian Korgel. Korgel is hoping to cut the cost of producing high output solar cells to one tenth of their current price by replacing the standard manufacturing process for solar cells.

Right now photovoltaic cells are made using a gas phase depositing system that must be carried out in a vacuum chamber and requiring high temperatures. For the past two years, Korgel and his team have been working on this low-cost, nanomaterials solution to photovoltaics manufacturing. He believes that nanomaterial inks could be printed onto a surface using a roll-to-roll process on a plastic substrate or stainless steel. Because of this the prospect of being able to paint the inks onto a rooftop or building is not far fetched as one might at first believe.

His team has so far developed solar-cell prototypes with efficiencies at one percent but notes they need to be about 10 percent. He says that if he can get the level to the 10 percent mark, then there's real potential for commercialization. He says that then you could see this new production technique being used in three to five years. For hams involved in public service and emergency communications work, such a source of sunlight power used to charge battery banks would mean communications could continue even if the power mains we out of service for an extended period of time.

Funding for the research comes from the National Science Foundation, the Welch Foundation and the Air Force Research Laboratory. The complete story is at www.sciencedaily.com/releases/2009/08/090824115907.htm (Science Daily)

**

A SIGN OF THE TIMES: ONCE BUSY UK PACKET NODE TO CLOSE

Call it a sign of the times. The GB7NT packet radio node is to close due to an ever dwindling numbers and the often thankless task of maintaining the equipment.

The GB7NT packet radio node first came on the air in October 1993 and has been providing a service to radio amateurs in the South-East Wales area for almost seventeen years. But the use of Packet as a direct or forwarding messaging system has been on the downslide for years, supplanted by e-mail over the Internet.

Now, Steve Cole, GW4BLE, the SysOp GB7NT says that he will close the node unless there is shown to be sufficient enthusiasm for it to remain on-air. He says that currently most former the daily users of the service are now using other non-radio means to access DX Cluster information. (GW4BLE, Southgate)

**

THE SOCIAL SCENE: ILLW 2009 DEEMED AN OVERWHELMING SUCCESS

The International Lighthouse and Lightship Weekend held on August 15th and 16th had an all time record 442 registrations from 50 countries. The event began in 1995 in Scotland as the Northern Lighthouses Award for ham radio operators, and went international event two years later.

Alaska was a first this year with an entry for Sentinel Island. Germany listed 55 lighthouses, Australia 49, USA 47, and England 43. Malaysia celebrated its lighthouse weekend with nine lighthouses. The Azores, Balearic Islands, Egypt, Slovenia, Panama were some of the smaller countries represented with one entry from each. The initial tally shows participation by lighthouses and Lightships worldwide up some 10% over 2008. (Amateur Radio Victoria)

**

THE SOCIAL SCENE: CELEBRATING HPM AT AGE 140

And back in the United States the ARRL has announced that the Hiram Percy Maxim Birthday celebration is back this year honoring the 140th anniversary of the birth of the League's first president and co-founder who held the call letters W1AW. The special event is open to all amateurs, and the goal is to work the stations adding /140 to their callsigns, and contact as many as possible during the event period, September 2nd to the 9th. A special certificate is available for making at least 25 contacts with endorsement increments of 25, and a maximum endorsement of 100. More information can be found in the September issue of QST magazine. (ARRL)

EMERGING TECHNOLOGY: THE LATEST DTV CONVERSION STATS

Almost everyone in the United States who watches television can now see it digitally. Again, Amateur Radio Newsline's Don Wilbanks, AE5DW, has the latest numbers:

--

The A.C. Nielsen data survey company now reports that as of Wednesday, July 29th that 98.9% of United States homes are able to receive digital television signals. This is a gain of 229,000 homes in the last two weeks of July and 1.3 million homes since the week of the June 12 digital television transition.

Among the 56 local markets that Nielsen measures there are 32 markets not far behind with less than 1% of TV households completely unready. Albuquerque and Santa Fe New Mexico at 3.5% each continue to have the highest percentage of homes that cannot receive digital signals from full powered U.S. television stations. In fact, the markets with the most households unable to receive digital television tend to be in the Western United States. That's where cable availability is lower than to the East.

--

The report did not say how long it might be before the remaining 1.2% without digital converters or a pay service will take to get on board with DTV. (TV Tech)

WORLDBEAT: VK RADIO ANALOG STATIONS WANT GOVERNMENT JAMMING OF DIGITAL

Legal jamming on the broadcast band. That's what some analogue FM radio stations in the Australian city of Geelong are asking their telecommunications regulator to do. This, because they fear their listeners will be lured to tune into the new digital transmission stations in near-by Melbourne.

Grant Broadcasters Pty Ltd which operate two FM stations in Geelong has called on the Australian Communications and Media Authority to jam the Melbourne signals. They say this is needed is because there will be a considerable time delay in extending digital radio to Geelong and other regional areas and they do not want to loose listenership in the meantime.

The government owned broadcasters ABC and SBS are obviously opposed to their digital signals being denied to Geelong or anyplace else. The Australian Communications and Media Authority says that it is considering options for the introduction of what it terms as coverage management systems to stop the fortuitous digital radio coverage.

According to news reports, if the proposed jamming of the digital broadcasts does go ahead it would need to be funded by broadcasters claiming the need for market protection. (VK3PC)

HAM RADIO IN SPACE: SUITSAT 2 NOW ARISSAT-1

The SuitSat-2 project now has a new name to go with its new shape. Its now known as ARISSat-1.

ARISS Chairman Gaston Bertels, ON4WF, the announced the new name for the satellite project last week. The team is now moving ahead using the same hardware that was to fly in the Russian spacesuit that got tossed away into space.

The ARISSat-1 team is re-configuring some of the modules to fit into the new space structure being designed by Bob Davis, KF4KSS and his crew. No date as to when ARISSat-1 will be tossed into orbit from the ISS. (AMSAT)

**

ON THE AIR: TEXAS CLUB TO ACTIVATE WILLOW ISLAND ON SEPT 5

On the air, the Tri-County Amateur Radio Club of North Texas, will activate for the first time as WC5C from Willow Island located in Lake Worth, Tarrant County, Texas. The operation will take place on September 5th mainly be on 40 and 20 meter SSB but they will QSY to accommodate stations on other High Frequency bands or modes. In addition to SSB, PSK31 and CW will both be available.

Willow Island is primarily Tanglewood and poison ivy with some wildlife. The club will access the island by boat, canoe and kayak. Primary hours of operation will be 1400 UTC to 2200 UTC, but possibly continuing into the night depending on conditions.

A commemorative QSL card will be sent to all contacts acknowledging them as remote participants in the first activation of Willow Island. Return cards from all who make contact will be appreciated by the club so as qualify the island for future status. (Southgate)

**

ON THE AIR: THE 2009 EUROPEAN PSK CONTEST

And the European PSK Club is inviting hams world wide to take part in the 2009 CIS DX QPSK63 Contest. The event is slated for September 19th and 20th. Contest, rules and other information can be found on the Web at www.cisdx.srars.org (Southgate)

**

DX

In DX, word that SP5EAQ and -SP5DRH will be active as 3D2MJ and 3D2KJ, respectively, from Viti Levu, Fiji for four starting October 1st. Their operation will be on all bands, but with an emphasis on the lower high frequency bands. They plan to use two stations with small amps and vertical antennas. QSL via their home callsigns.

Currently, two operators are active from here. CT1GPQ, now active from Timor Leste as 4W6AL, will be there until October 3rd. He is there with a medical team and radio operations will take place only during his spare time. QSL via CT1GFK.

Also on from Timor Leste is VK4FR active as 4W6FR. He will be there until mid-October on a work assignment. He is believed to be operating on 30 and 20 meters using PSK31. QSL 4W6FR via VK4FW.

HA3JB, will be active portable 5B from Cyprus through October 2nd. This is a new Hungarian International Police Association activation and is valid for HA-IPARC Award. QSL as directed on the air.

AC2AI will be active as 9M6 stroke JJ2CJB from the Langkah Syabas Beach Resort on the Island of Borneo for the CQWW DX SSB Contest on October 24th and 25th. He plans to run 400 watts into a Force12 C4 beam. QSL via LoTW, e-QSL or the JA Bureau.

PA1TK, PA5WT and PA3GVI will be on the air from Luxembourg stroke LX between September 4th to the 7th. Look for Kees and Rob to focus on 80-10 meters using CW and SSB while Theo operates in the IARU VHF Contest on 2 meters. QSL via their home callsigns.

Lastly, AA5UK, will be active portable EA6 from Ibiza in the Baleric Islands from October 14th to the 29th. His operation will be holiday style on 160 through 10 meters using mostly SSB and various Digital modes. Also, look for satellite activity on various birds. QSL via his home callsign, via the bureau, LoTW or eQSL.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE STORY OF THE MAN WHO TRAINS ASTRONAUTS TO BE HAMS

And finally this week, since 1983 many orbital space missions have taken along amateur radio gear. The first ham in space was Owen Garriott, W5LFL. He was followed by Tony England, W0ORE, after which ham radio in space was formalized. First, under the title of the Shuttle Amateur Radio Experiment or SAREX and today as ARISS or Amateur Radio on the International Space Station. And with amateur radio a part of the astronauts training, someone on the ground has to teach them. Recently, Amateur Radio Newsline's Mark Abramowicz, NT3V, had a chance to meet and talk with the man who really is the ham behind the ham radio operators in space: Nick Lance, KC5KBO:

--

Do you remember where you were when NASA embarked on the Apollo space program that culminated with U.S. astronauts landing on and exploring the moon? Nick Lance, KC5KBO, does.

He joined NASA at the Johnson Space Center in Houston at the time of Apollo 7 in the late 1960s. He was there through that historic Apollo 11 mission and worked for some 40 years for the space agency until his retirement Aug. 1.

"The first 17 years I worked in advanced life support - that's where we developed the hardware and technology to keep the astronaut alive and comfortable," Lance recalls. "And, since that time I've been in many different roles in the program and project management, including program management for the international space station way back in the mid-80s to 90s, and other roles in the engineering directorate."

But in the mid-1990s, Lance says his friend, astronaut Marsha Ivins, came to him with a proposal. She has flown on five space shuttle missions and is currently assigned to the Constellation branch of the astronaut office.

"She said if you could teach ham radio to your young kids - my son got his license when he was 7 - that I could teach it to astronauts, too, probably," Lance says. "So we developed a course, an accelerated course because their time is valuable. And, were able to teach them, in probably at the time, maybe six hours when there were about 900 questions in the Technician question pool.

"And now that there are less questions, we can do that in about three hours for the current crew.

That was at least 10 years ago, Lance says, and a lot of astronauts have gotten their ham ticket thanks to his efforts as their Elmer.

"Well, we've probably licensed - I'm going to guess - in the 50 range or so, probably anybody with a Kilo Charlie or Kilo Delta or Kilo Echo 5 call sign has gone through the radio class that we provide there," Lance says. "There are some crewmen who have not gone up yet and hopefully they'll get a chance to before the space station program is

over."

And, Lance says his classes have attracted more than just the astronauts.

"We had several classes of astronauts who brought their wives and their children in to so they could all learn together," Lance says. "It was a good opportunity because some of the crew wanted to talk to their family from space, too. "And that afforded them the opportunity to do those direct contacts."

Lance says once licensed and aboard the space station on missions, the astronauts enjoy getting on the amateur radio spectrum talking to school students as well as regular hams around the globe.

"Well, a lot of them do like to participate in the ARISS program, get to talk to people on the ground. It's a neat way to be in contact, in direct contact with the supporting public."

Lance says he's pleased with the feedback he's gotten over the years from inside as well as outside NASA.

"It's great to hear that other people have the opportunity now to talk to an astronaut, something that, you know, was heretofore reserved for capsule communicators," Lance says. "But now it opens it up to anybody with a two-watt hand-held. So that's really heartening to know that I had a small part in doing that."

And, despite his recent retirement, Lance says he will voluntarily continue his work training the next generation of astronauts to get their ham tickets.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Ocean City, MD.

--

That's only a small part of what KC5KBO has to tell. You can hear Mark's complete 8 minute interview with him on our website under Special Reports. We think that you will enjoy the story that Nick has to tell. (NT3V, ARNewsline)

GB2RS NEWS

Sunday 30th August 2009

The news headlines

* Radio China to leave the amateur only segment of 7MHz band

* RSGB Board and Regional Council announcement

* Enigma Weekend at Bletchley Park

The IARU Region 1 website reports that Radio China is to stop broadcasting on five frequencies in the 7.1 to 7.2MHz range. The Chinese authorities have made frequency adjustments midway during the A09 broadcasting schedule and it affects all transmissions that were previously operating in the new exclusive worldwide amateur radio service band of 7.1-7.2MHz.

The formal announcement of the RSGB Board and Regional Council elections 2009 can be found on the RSGB Members only website. The deadline for returning paperwork is 30 October.

Over the weekend 5 and 6 September, Bletchley Park in Buckinghamshire will be marking the 70th anniversary of the arrival of Alan Turing and Gordon Welchman at Bletchley Park with an Enigma Weekend. Their usual Enigma exhibits will multiply when over 70 more previously top-secret machines from all around the world will be on display. Another highlight will be a talk on Saturday 5 September by Prof. Tom Perera, W1YP, entitled The U- Boat Menace and the Enigma. He will have an exhibit of his discs and various Enigma machines too. Bletchley Park is open from 10.30am each day and entry costs £10 per adult, which entitles you to visit as many times as you like for 12 months.

The G5RP Trophy is an annual award to encourage newcomers to HF DXing. However, the award is not limited to youngsters or the newly-licensed: the HF DX bug can bite at any age or after many years of experience on other bands. If you are an established HF DXer and want to recommend someone to be awarded the G5RP Trophy for 2009, now is the time to send in your nomination. Your nominee should be an up-and-coming HF DXer who has made rapid progress between July 2008 and June 2009 and has some real achievements to show, for example, a good total of new countries worked or some serious HF DXpedition activity. This prestigious award will be presented this year at the RSGB Convention on 9 to 11 October. Please send your nominations to John Gould, G3WKL, QTHR, or by e-mail to g3wkl@btinternet.com to arrive no later than Friday 11th September.

Another African pirate net is active on 14.0021MHz, daily at 1800UTC or later. The IARU Region 1 ask that amateurs observe and report to DK2OM, the Coordinator IARUMS Region 1. Check out the IARU Region 1 website for ways to contact DK2OM. GB7NL is now operational as a 70cm D-Star Repeater located at the Norman Lockyer Observatory. The receive frequency is 439.4626MHz and the transmit frequency is 430.4625MHz. It is sited at locator IO80JQ, which is at 200m ASL and provides coverage across East Devon, mid Devon, west Dorset, much of south Devon and into the Channel Islands.

To try to promote 70cm activity and see if it is worthwhile to run a 70cm Counties Contest, the Irish Radio Transmitters Society will be having a 70cm activity hour following the 2m contest today, 30 August. Both FM and SSB stations will be welcome and both Calling channels will be monitored.432.2 for SSB and 433.5MHz for FM users.

At the Chiltern DX Club AGM, Chairman for the past nine years, John Butcher, G3LAS stood down. He was presented with a commemorative plaque to honour of his services to CDXC. The new committee for 2009/2010 was elected and details can be found on the CDXC website. CDXC is the UK's largest group of HF, DX and contest-oriented radio amateurs with a membership of almost 750. It promotes good operating both in DXing and Contesting and offers financial support to major DXpeditions.

Today, 30 August, Cray Valley Radio Society plan to operate from Shooter's Hill which is the highest part of South London. The garden of the Bull Public House has been made available and the activity is part of a three day Bank Holiday Festival. Operation will be on 2m and 80, 40 and 20m between 12 noon and 8pm local time using the callsign GB4SH. Details are available on the CVRS website and on QRZ.COM with views of the locality.

On 16 September Southampton Amateur Radio Club is holding a reunion of past and present members. The club dates back before the World War II and over the years has gone through some changes. If you are or have been a member or would like to join the club please go along to the reunion night from 7pm onwards at the Lordshill Community Centre, Andromeda Road, Lordshill SO16 8BB. For more information contact Malcolm, G0WFQ on 023 8042 8113.

And now for the details of rallies and events for the coming week

Today, Bank Holiday Sunday, 30 August, sees the Milton Keynes ARS 51st Annual Rally take place at Holne Chase School, Buckingham Road, Bletchley MK3 5HP. Doors open from 9am to 4pm. Details from Mike, G3LFR on 07866 673192.

The Huntingdonshire ARS Bank Holiday Monday Rally takes place tomorrow, 31 August, at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and there will be a Bring & Buy as well as the usual trade stands and an RSGB bookstall. More from Julie, M1JUL, on 07905 052127. The annual Telford Hamfest place on Sunday, 6 September, at Enginuity, the hands-on engineering museum, in Coalbrookdale,

Telford, Shropshire TF87DQ. The usual traders will be in attendance. Also lectures by GEO, the weather satellite group. Doors open at 10am and there's on site catering and two pubs very close by, one with a very good restaurant. The museum also has a cafeteria. A reduced price admission to the Enginuity Museum is available. There's also much to see and do nearby where iron engineering on a large scale first began, including the first Iron Bridge, the Tar Tunnel, Coalport china works, Tile museum, Victorian Town, the Museum of Iron and more. More information from Mike, G3JKX on 01952 299677 or Martyn, G3UKV on 01952 255416.

Now for the news of special events On Tuesday, 1 September, GB1WT will be on the air from 9am at Wickham, Hampshire, commemorating over 200 years of the Admiralty shutter telegraph system.

Lincoln Short Wave Club have been given permission to operate a radio station from inside 'Just Jane', the Lancaster bomber operated by Lincolnshire Aviation Heritage Centre at East Kirkby, Lincolnshire using the callsign GB2SWW. The station will be put on the air on Saturday 5 September to commemorate the 70th anniversary of the declaration of World War Two. They will also be using the callsign GB2CWP, the callsign of the Aviation Centre's Radio Museum. Modern equipment will be used in the Lancaster for safety and practicality, however, when the aircraft is taxiing the team will operate GB2CWPs T1154 and R1155 from the museum shack. Special QSL cards will be available for all stations working GB2CWP from the aircraft.

HB9VELO will be on the air throughout September to mark the UCI Road World Championships taking place in Mendrisio, Switzerland. They plan to use SSB, CW, PSK and RTTY on all bands. The QSL manager is HB9OCR.

Craven Radio Amateur Group will be active from Bancroft Mill Engine in Barnoldswick, Lancashire today, 30 August, using the callsign GB0BME from around 0900UTC. They plan to be active on 80 to 10m as well as VHF and UHF. QSL will be by the bureau or direct and further details about the station are available on QRZ.COM.

It is hoped that the Orkney Wireless Museum Amateur Radio Station will be in operation from its premises at Kiln Corner, Kirkwall between Thursday 3 September and Wednesday 9 September during the 19th Orkney International Science Festival. Probable operating periods will be weekdays and Sunday afternoons between 2.30 and 4.30pm and Saturday morning between 10 am and 12.30pm. Operation will be primarily on HF SSB.

On 5 and 6 September, Brickfields ARS will be operating a special event station from the grounds of Wolverton Manor on the Isle of Wight under the callsign GB4AC. The club will be QRV mainly on 80m and 40m HF and also 2m VHF FM. QSL cards will be sent to all stations worked via the bureau or may be requested directly via the club callsign G0BAR enclosing a SAE and the cost of the return postage. GB4ASC will be on the air for the Festival of Arts and Crafts at All Saints Church

Creeksea over the Bank Holiday Weekend, 29 to 31 August between 10am and 5pm each day. The station is located at JO01jp and they will be active on most HF bands using SSB, PSK31 and RTTY. The callsign will also be active until 22 September for the Churches and Chapels on the Air event.

And now the HF DX news compiled from 425 DX News and other sources.

PA2AM, will be active as 9H3DZ from Malta between 4 and 14 September. His operation will be active mostly on 30, 17 and 12m using CW and RTTY. Please QSL via his home callsign.

>From 4 to 7 September AH0BT will be active from the Marianas Island. Please QSL either direct or via the bureau via 7L1FPU.

SV5/PA1WLB will be active from Kos, which is IOTA reference EU-001, until 6 September. The locator is KM36OV. For more information check out qrz.com for PA1WLB.

A team of amateurs will be active from the Aland Islands, which is IOTA reference EU 002, until 12 September. They will be working a mix of SSb, CW and RTTY on the preferred bands of 10, 15, 17 and 20m. Please QSL direct or via the bureau to the relevant home calls of OH0JWL, DF6FL or DL9ZE.

Now the contest news

Today, 30 August, the IRTS 2m Counties Contest is on between 1300 and 1500. From the UK you shouldn't need to make many QSOs to win the Outside EI category, although if there's a GI active he'll probably get top spot. The exchange is signal report, serial number and EI and GI also give county.

On HF, the ever-popular RSGB HF event SSB Field Day on 5 and 6 September. Region 1 HF Field Day coincides, which means there will be numerous Continental European portables active as well. If you want to give some points away from home, it's a quick-fire exchange of signal report and serial number.

On VHF, there's the RSGB 144MHz Trophy Contest on 5 and 6 September. There are five sections to enter, depending on whether a station is single- or multi-op, fixed or portable, and 6-hour or 24-hour. In the 24-hour sections some big QSO totals are made by the top stations, even under flat conditions.

The final three hours of the 144MHz Trophy Contest coincides with the first three hours of the fifth and final 2m Backpackers Contest of 2009. This continues for one hour after the 2m Trophy finishes. In that hour, after the QRM level on the band has subsided, low power portables who might otherwise get swamped by QRM find it easier to work other low power portables. This year, the ARRL is honouring the 140th anniversary of the birth of the League's first president and cofounder. Hiram Percy Maxim, W1AW, was born on 2nd September 1869. The operating event is

open to all amateurs, and the goal is straightforward: Find the stations adding /140 to their callsigns, and contact as many as possible during the event period from 2 to 9 September. The /140 will be signed by any ARRL member who holds and ARRL appointment. There will be a Certificate available for anyone who works at least 25 of the /140 Celebration stations. More details and deadline application on www.arrl.org

Now the solar factual data for the period from the 17th to the 23rd of August, compiled by Neil Clarke, G0CAS on the 24th of August.

That's another week when the solar disc was spotless everyday. In total that's 44 days since the last sunspot group was visible. This is the seventh longest period on record with no spots visible on consecutive days. Solar activity was very low. Solar flux levels remained in the high 60's everyday and averaged 67 units. The 90 day solar flux on the 23rd was 67 units. That's one unit down on last week and is the lowest level so far for this minimum. X-ray flux levels remained below the minimum reporting level throughout. Geomagnetic activity started at quiet levels but on the 19th, slightly later than forecast a coronal hole disturbance arrived and lasted for two days. The Ap index was 10 and 11 units on the 19th and the 20 respectively. The average was Ap 6 units. Solar wind data measured at the ACE spacecraft saw solar wind speeds increase from 270 kilometres per second to 590 by the 20th. Particle densities increased to 20 particles per cubic centimetre on the 19th. Bz varied between minus 4 and plus 5 nanoTeslas on the quiet days and between minus 10 and plus 8 nanoTeslas on the 19th. Even though this was quite a mild disturbance VHF aurora was reported on the afternoon of the 19th and the evening of the 21st, reaching northern Scotland at times.

And finally the solar forecast. This week looks set to continue like the last few with the solar disc void of any sunspots. However, when spots do appear again it will be with very little notice and almost impossible to predict. Solar activity is expected to be at very low levels. Solar flux levels should be in the mid to high 60's. Geomagnetic activity in general should be at quiet level, however, around midweek a small coronal hole disturbance could take place but its impact should be minimal. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. The darkness hour lows are expected to be around 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of about 19MHz. The optimum working frequency with a 90 per cent success rate will be around 15MHz. The best time to try this path will be between 1400 and 2100 hours UTC. Isolated sporadic-E openings should take place during the coming week.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA Poole Radio Society will be running an Advanced Course starting on Friday 4 September. Sessions will take place on Friday evenings. Contact Alan Walker G4UWS on 01202 732912 for more details. On Monday 31 August Huntingdonshire Amateur Radio Society is holding the HARS Rally. Contact Gerald, G8AKL, on 01487 740794. On Tuesday 1 September Andover Radio Amateurs Club is having a talk on army communications. Contact Martin, M0MWS, on 0777 618 1646. On Tuesday 1 September Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 1 September Chelmsford Amateur Radio Society is having a talk on D-Star by Murray Niman, G6JYB and Clive Ward, G1EUC. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 1 September Horndean and District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846. On Tuesday 1 September King's Lynn Amateur Radio Club is running a special event station with callsign GB0PHS for Park High School. Contact Ray, G3RSV, by email to ral- g3rsv@supanet.com. On Wednesday 2 September Bracknell Amateur Radio Club is having a 2 metre local net. Contact Paul, M3XPR, by email to pryan@max.co.uk. On Wednesday 2 September Dover Radio Club is having a pub nosh and natter night. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk. On Wednesday 2 September Fareham and District Amateur Radio Club is having a presentation by Jackie Walsh entitled Simple Choice Presentation Techniques. Contact Derek Clarkson, G4JLP, on 01329 823405. On Wednesday 2 September Norfolk Amateur Radio Club is having a visit by Mark Francis, G0GBY, from Waters and Stanton. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 2 September Southdown Amateur Radio Society is operating at Hailsham. Contact John, G3DQY, on 01424 424 319. On Wednesday 2 September Worthing and District Amateur Radio Club is planning for SSB field day. Contact Roy, G4GPX, on 01903 753 893. On Thursday 3 September Cray Valley Radio Society is having a talk by Dave, M0BGR on health and safety for the radio amateur. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 3 September Horsham Amateur Radio Club is having a talk by Stephen McCulloch, G4TPO on networks and Viruses. Details on the web at www.harc.org.uk. On Thursday 3 September King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Friday 4 September Cambridge and District Amateur Radio Club continues its series of talks on C programming. Contact David Leary, G8JKV on 01223 355254. On Friday 4 September Crystal Palace Radio and Electronics Club fun is having a quiz night. Contact Bob, G3OOU, on 01737 552 170. On Friday 4 September Wey Valley Amateur Radio Group is having a member's equipment sale. Details on the web at www.weyvalleyarg.org.uk. On Saturday 5 September Basingstoke

Amateur Radio Club commences its weekend event, taking part in SSB field day. Contact Clive, G4ODM, on 01256 326050. On Saturday 5 September Brede Steam Amateur Radio Society is at the bunker. Contact Steve, on 01424 720815. On Saturday 5 September Cambridge and District Amateur Radio Club is taking part in the 144MHz Trophy Contest Weekend. Contact David Leary, G8JKV on 01223 355254. On Saturday 5 September Worthing and District Amateur Radio Club commences its weekend of operating in SSB field day. Contact Roy, G4GPX, on 01903 753 893. On Sunday 6 September Norfolk Amateur Radio Club is taking part in the Police Gala Day and SSB field day. Contact Chris Danby, G0DWV, on 01603 419204.

NEWS FOR THE SOUTH-WEST On Monday 31 August City of Bristol RSGB Group is having a talk by Ian Foulkes MA on Operation Bodyguard the overall Allied strategic deception plan leading to the invasion of Normandy in 1944. Contact Robin, G3TKF on 01225 420442. On Tuesday 1 September West Devon Radio Club is having a quiz on radio and general knowledge. Contact Jules Cuddy, M1AGY, on 01752291588. On Wednesday 2 September Cornish Radio Amateur Club is having its main meeting. Contact Steve, G7VOH, on 01209 844939. On Wednesday 2 September Exmouth Amateur Radio Club is having part 1 of a talk on antennas Tony, M0THJ. Contact Mike, G1GZG, on 01395 274172. On Wednesday 2 September Taunton and District Amateur Radio Club is preparing for NFD. Contact William, G3WNI, on 01823 666 234. On Wednesday 2 September Thornbury and South Gloucestershire Amateur Radio Club is holding a construction evening with Peter, G4OST. Contact Tony, G0WMB, on 01454 417048. On Thursday 3 September South Bristol Amateur Radio Club is having a talk on broadband internet operation by G7PKJ. Contact Len, G4RZY, on 01275 834 282. On Thursday 3 September Swindon and District Amateur Radio Club is preparing for HF SSB field day. Contact Den, M0ACM, on 07810 317750. On Thursday 3 September Yeovil Amateur Radio Club is having a WW11 evening of domestic and military radio. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk. On Friday 4 September Saltash & District Amateur Radio Club will be holding a Constructors Contest. Bring along your latest construction project. Visitors are welcome. For further details contact Brian, M0BHG on 01752 844321 On Friday 4 September Torbay Amateur Radio Society is having a natter night. Contact Dave, G6FSP, by email to g6fsp@tars.org.uk. On Saturday 5 September Taunton and District Amateur Radio Club commences its weekend operating in the SSB NFD. Contact William, G3WNI, on 01823 666 234.

NEWS FOR THE MIDLANDS On Saturday 12 September, South Derbyshire and Ashby Wolds Amateur Radio Group is running a Foundation course and exam. Contact Lewis, G4CRT, on 01283 760842 if you are interested. On Sunday 30 and Monday 31 August Hucknall Rolls Royce Amateur Radio Club will have a stand at the Moorgreen Country Show. Contact Dave Wilde, G1YAI, by email to webmaster@hrrarc.com. On Monday 31 August Gloucester Amateur Radio And Electronics Society is operating from Crickley Hill Escarpment. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 31 August Leicester DX Group is doing antenna maintenance. Contact Clive, M3CGH via the web at www.leicesterdx.co.uk. On Monday 31 August

South Birmingham Radio Society is closed. Contact Don, on 0121 458 1603. On Monday 31 August South Normanton Alfreton and District Amateur Radio Club is closed. Contact A J Higton, 2E1GWO, on 01773 783658. On Tuesday 1 September Derby and District Amateur Radio Society is having a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk. On Tuesday 1 September Loughborough and District Amateur Radio Club is having an internet connection night. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 2 September Lincoln Short-Wave Club is making final arrangements for SSB Field Day. Contact Pam Rose, on 01427 788356. On Wednesday 2 September Midland Amateur Radio Society is having an open meeting and running training classes. Contact Norman, G8BHE, on 01214 229 787. On Wednesday 2 September South Notts Amateur Radio Club is having a talk on software defined radio by M0XIK. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 2 September Telford and District Amateur Radio Society is having an open house on the air evening. Contact Mike, G3JKX, on 01952 299 677. On Thursday 3 September Lowestoft and District Pye Amateur Radio Club is having a club night. Contact Phil, G0JSG, on 01502 585448. On Thursday 3 September Salop Amateur Radio Club is holding a Natter Night/Social Evening at the Peacock, which is located by the Column Shrewsbury.

On Friday 4 September Bromsgrove and District Amateur Radio Club is having Morse practice. Contact Chris, M0BQE, on 01905 776 869. On Friday 4 September Coventry Amateur Radio Society is looking at its archives. Contact John, G8SEQ, on 07958 777363. On Friday 4 September Nunsfield House Amateur Radio Group is having a talk on long distance photography of animals by Ken Frankcom. Contact Ken Frankcom, G3OCA, on 01332 720976. On Friday 4 September South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603. On Saturday 5 September Lowestoft and District Pye Amateur Radio Club SSB Field Day and barbecue. Contact Phil, G0JSG, on 01502585448, phillip.holden@virgin.net. On Saturday 5 September Telford and District Amateur Radio Society is setting up for the Telford Hamfest at Enginuity, which takes place on Sunday 6 September. Contact Mike, G3JKX, on 01952 299 677. On Saturday 5 September Worcester Radio Amateurs Association commences its weekend event, taking part in the SSB field day contest. Contact Leslie Coyne, M3WRZ, on 01905 764320. On Sunday 6 September Midland Amateur Radio Society Club visiting the Telford Rally. Contact Norman, G8BHE, on 01214 229 787. On Sunday 6 September South Birmingham Radio Society Club has a stand at the Telford Rally. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Sunday 30 August Blyth Radio Club is operating G4VKY from 10am to 4pm. Contact K Stewart, G0TWV, on 01670 545261. On Monday 31 August Angel Of The North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 0191 4770036. On Tuesday 1 September Chester and District Radio Society is having a presentation by Roger Howells on NHS communications. Contact Barbara Green on 0151 339 9183. On Tuesday 1 September Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232. On Tuesday 1 September Otley Amateur Radio Society is taking part in

the 144MHz Club Contest from the shack. Contact Paul, 2E0PAK, on 07768 996370. On Tuesday 1 September Stockport Radio Society is having a presentation on the GM2T IOTA DXpedition by Jim Barlow, G3VOU. Contact Nigel Roscoe, on 0161 428 8413. On Wednesday 2 September Hornsea Amateur Radio Club is preparing for SSB Field Day. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Wednesday 2 September Mid-Cheshire Amateur Radio Society is on the air. Contact Peter Paul Fox, G8HAV, on 01606 553401. On Thursday 3 September South Manchester Radio And Computer Club is having a talk by Ged, G8RSI on war-time radio, 70 Years on. Contact Ron, G3SVW, on 0161 969 3999. On Friday 4 September East Cleveland Amateur Radio Club is having a radio components catalogues evening. Contact Alistair, G4OLK, on 01642 475 671. On Friday 4 September Tynemouth Radio Club is looking at the Moxon antenna for 70cm SSB. Contact Graham Errington, 07812 172136. On Saturday 5 September Hornsea Amateur Radio Club is taking part in SSB field day. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Saturday 5 September Mexborough and District Amateur Radio Society is taking part in HF field day at Phoenix Park. Contact Sharon, M0BOH, by email to M0BOH@aol.com.

NEWS FOR SCOTLAND On Tuesday 1 September Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192. On Wednesday 2 September Kingdom Amateur Radio Society Club is having a shack night. Contact Brian, MM0XBD, on 01383 738905. On Thursday 3 September Aberdeen Amateur Radio Society s having a junk sale. Contact Lewis, GM4AJR, on 01224 575 663. On Friday 4 September Cockenzie and Port Seton Amateur Radio Club is having a normal club night. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES Swansea ARS will be running a coach trip from South Wales to the Leicester Amateur Radio Society Show at Loughborough University on Saturday 12th September. For details or to reserve a seat, please contact Roger, GW4HSH on 01792 404422 On Monday 31 August Llanelli Amateur Radio Society is closed due to the bank holiday. Contact Craig, MW0MXT, on 01269 840292.

2222. The ARRL Letter, Vol 28, No 34 (Friday, August 28, 2009)

The ARRL Letter
Vol. 28, No. 34
August 28, 2009
****

IN THIS EDITION:

* + FCC to Utilities: Don't Look to Hams to Pay for Your Testing
* + Hurricane Bill Passes New England, Finds Newfoundland
* + ARRL Vice Director Elections Set for November
* + Space Shuttle Discovery: Three Hams on Board
* + SuitSat-2 Now Called ARISSat-1
* + South African Hams to Put ZS10WCS On the Air Before, During World Cup
* Solar Update
* IN BRIEF:
This Week on the Radio
ARRL Continuing Education Course Registration
+ 2009 Field Day Logs Received, Posted Online
+ Kansas QSO Party Back on the Air for 2009

+Available on ARRL Audio News <http://www.arrl.org/arrlletter/audio/>

==> FCC TO UTILITIES: DON'T LOOK TO HAMS TO PAY FOR YOUR TESTING

In a case that goes back more than 10 years, the FCC has told a Pennsylvania utility that the utility is responsible for paying for "efforts to locate and correct instances of [power line] noise" <http://www.fcc.gov/eb/AmateurActions/files/Duque09_08_07_5108.pdf>. At least one amateur has been complaining to the FCC since 2000 regarding harmful radio interference possibly caused by power line equipment maintained by Pittsburgh's Duquesne Light Company (DLC) <http://www.duquesnelight.com/>.

Bob Thacker, K3GT, of Allison Park, Pennsylvania -- a suburb just northeast of Pittsburgh -- first noticed harmful interference back in

1996. He told the ARRL that DLC would come out and fix things, but that he would soon hear noise again. After a few years of this, he complained to the FCC, and in 2005, the FCC notified DLC of the complaint. A month later, DLC responded to the FCC, detailing their efforts to resolve the matter and indicated that the most recent complaint was the result of changed conditions, not the continuation of an old problem.

According to the FCC, DLC again communicated with the FCC in a letter dated June 2, 2005, explaining the efforts they had taken to repair three lightning arrestors. During the latter half of 2005 and into 2006, Thacker continued to experience interference and continued to report these instances to DLC, requesting that DLC correct the problems. In 2007, he located a specific pole as one source of noise and advised a Mr Luther of DLC of this fact; Mr Luther advised Thacker that he would submit a work order.

In March 2008, DLC contacted Thacker, indicating that it had swept the area where the suspected pole was located and discovered no noise. DLC indicated that the noise source was a neon light. Finally, DLC stated that it had spent "significant amounts of time and money" attempting to address his concerns and that DLC would require him to pay for any additional efforts to locate and correct instances of noise.

Special Counsel for Amateur Enforcement Laura Smith responded to DLC in July of this year, saying "Such a response is not acceptable." She spelled out what she called "the most important rules relating to radio and television interference from incidental radiators," specifically:

47 CFR, Section 15.5: General Conditions of Operation <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr15.5.pdf>; 47 CFR, Section 15.13: Incidental Radiators <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr15.13.pdf>, and 47 CFR Section 15.15: General Technical Requirements <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr15.15.pdf>.

"Given the fact this case has been ongoing for quite some time without resolution and DLC has had ample time to locate the instances of interference and make the necessary repairs," Smith told the utility, "you are directed to respond to [me] within 60 days of receipt of this letter, detailing what steps you have taken to resolve the remaining instances of interference that are reported as being caused by your equipment. Should the remaining interference problems not be resolved within those 60 days, DLC will be required to provide [me] with a status update every two weeks going forward as to what progress, if any, has been made to resolve the matter."

ARRL Lab Engineer and power line noise expert Mike Gruber, W1MG, was pleased with Smith's decision, and said that amateurs should not be made to pay fees to the utilities to test for harmful interference by the same utilities. "It is not the responsibility of an Amateur Radio operator to track down and get rid of power line noise -- that's the utilities' job. I am pleased with the precedent that Laura Smith and the

FCC have set here. Now maybe more utilities will take power line noise interference more seriously in the future."

==> HURRICANE BILL PASSES NEW ENGLAND, FINDS NEWFOUNDLAND

Along Coastal New England and the Canadian Maritimes, residents boarded up windows in preparation for Hurricane Bill. Even though the storm -- eventually downgraded from Category 4 to Category 1 -- was considerably weaker than it had been when it was in the Caribbean earlier last week, those who live and work in the region were not taking any chances. To assist the National Hurricane Center (NHC) <http://www.nhc.noaa.gov/> in tracking the storm, hams with the Hurricane Watch Net and the VoIP Hurricane Net relayed traffic and spotting reports to WX4NHC, the Amateur Radio Station at the NHC <http://www.wx4nhc.org/>.

"For the second year in a row -- last year with Hurricane Kyle, and now Hurricane Bill -- the Amateur Radio operators in the Canadian Maritimes proved their skills at supporting the needs of the hurricane centers and in passing information vital to the public's safety," said ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD. "We know that should even more severe tropical events impact that area, the hams will be ready with this increasing experience of late, and we will be ready to support them."

Bill's top-sustained winds fell from 105 MPH on Friday night to just 85 MPH by Sunday morning. But as the storm's wind speed dissipated, its size didn't: The diameter of tropical storm-force winds stretched 550 miles, the distance from Atlanta to Washington, DC. During the early hours of Sunday morning, Bill's center of circulation passed about 160 miles to the east-southeast of Nantucket, Massachusetts, its closest approach to the United States. There were wind gusts ranging from 25-35 MPH along the eastern coast of Massachusetts and a few bands of rain swept northward across Cape Cod, but not enough to cause any flooding.

The VoIP Hurricane Net (VoIP Net) <http://www.voipwx.net/> activated at 4 AM EDT on Sunday, August 23, wrapping up at 6 PM that evening. "Nova Scotia amateurs relayed a significant number of reports to WX4NHC via the Net," said Director of Operations for the VoIP Hurricane Net Rob Macedo, KD1CY. "They described tropical storm force conditions and pockets of wind damage, including a few coastal road washouts from storm surge but the region was spared hurricane force winds. This is likely because of Bill's track parallel to the coast, just south of the province. The highest wind gusts were in the 45-55 MPH range over land."

Macedo said that during the weekly VoIP Net on Saturday evening, Net Control conducted a special roll call, lining up Canadian stations from the affected area: "Martin Thomas, VE1AUZ, was the key liaison station monitoring the local VHF/UHF repeaters, feeding the information to the VoIP Hurricane Net. Several other Canadian stations also relayed reports, including Geoff Wilson, VE1GW, and Frank Leslie, VE1FWL. VE1EMX, an official station for the Municipality of the County of Cumberland's Emergency Measures Organization, was also on the air. More

than a dozen Canadian stations were connected into the VoIP Hurricane Net during the height of Bill's impact on the Maritimes. This is our second time in two years working with Canadian amateurs and amateurs affiliated with Radio Amateurs Canada and they did a terrific job once again."

RAC Vice President of Field Services Doug Mercer, VO1DTM, told the ARRL that he, Newfoundland Section Emergency Coordinator Rendyl Godwin, VO1RYL, and four District Emergency Coordinators were "actively passing traffic hourly to the Hurricane Watch Net since 1200 UTC [Sunday]."

Hurricane Watch Net (HWN) <http://www.hwn.org/> Manager Dave Lefavour, W7GOX, told the ARRL that they received an activation request from WX4NHC, their first activation of the 2009 hurricane season: "We opened the Net at 8 AM EDT on Sunday, August 23 on 14.325 MHz, and operated continuously until 7 PM. We had a successful spring recruiting campaign that brought several new members to the Net, and Hurricane Bill allowed us to introduce them to our Net protocols. It's one thing to read about how we do things, but there is no substitute for experience. Conditions on 20 meters were difficult, but with the additional members added to our roster, we were able to maintain communications with our Canadian reporting stations. Kudos to three hams -- Derek King, VE1AWT, David Myrick, VO1VCE, and Fredrick Snow, VO1FJS -- are in order, as they were stalwarts during this HWN session, providing timely information that we relayed to the National Hurricane Center in Miami. By the end of the day, 22 HWN members had participated in the Net."

Lefavour thanked all amateurs who kept the 20 meter frequency clear so they could support WX4NHC. "With the unpredictable shifts in propagation on the 20 meter band, and considering the conditions under which these folks are operating, the signals of our reporting stations are often weak," he said. "This was certainly the case for Sunday's Net session."

WX4NHC Assistant Coordinator Julio Ripoll, WD4R, thanked the hams who supported the operation: "I would like to echo my thanks to everyone for making the effort to support our friends in Canada during Hurricane Bill. It was truly an international effort with Net Controls from many parts of the US and as far away as Germany. The highest wind reports that I saw come in came from Sable Island with a population of five people and 300 wild horses."

Ripoll singled out five Canadian hams "who truly deserve special mention for their extra efforts and long hours relaying reports: Martin Thomas, VE1AUZ; Joseph Wilson, VE1GW; Frank Leslie, VE1FWL; James Hannon, VE1EMX, and Fredrick Snow, VO1FJS."

"Bill opened the 2009 hurricane season for us," HWN's Lefavour said. "We hope that we are not needed for the rest of the year, but the peak of the hurricane season is yet to come. We're ready."

==> ARRL VICE DIRECTOR ELECTIONS SET FOR NOVEMBER

Responding to solicitations in the July and August issues of QST, ARRL members in the Central, Hudson, New England, Northwestern and Roanoke Divisions have nominated 11 candidates for the 10 positions of Director and Vice Director of each of the five divisions. Seven incumbents have been declared elected without opposition, while there will be balloting for Vice Director in the Central and Roanoke Divisions; ballots will be counted on Friday, November 20, 2009, and those elected will serve three-year terms beginning at noon on January 1, 2010.

The ARRL Ethics and Elections Committee has reviewed and confirmed the eligibility of all 11 candidates and has declared the following re-elected: Central Division Director George R. Isely, W9GIG; Hudson Division Director Frank Fallon, N2FF, and Vice Director Joyce Birmingham, KA2ANF; New England Division Director Tom Frenaye, K1KI, and Vice Director Mike Raisbeck, K1TWF; Northwestern Division Director Jim Fenstermaker, K9JF, and Roanoke Division Director Dennis Bodson, W4PWF. The rules state that if a candidate is running unopposed, he or she shall be declared the winner without balloting. No one from the Northwestern Division requested a petition form for the Vice Director position, so that position will become vacant at noon on January 1, 2010; William J. Sawders, K7ZM, is the current Northwestern Division Vice Director. The ARRL President is empowered by the ARRL Articles of Association and Bylaws to appoint someone to fill the vacant position.

Roanoke Division Vice Director Patricia Hensley, N4ROS, decided not to seek another term. Nominated to succeed her are South Carolina Section Manager James F. Boehner, N2ZZ, of Aiken, and former West Virginia Section Manager Hal Turley, W8HC, of Huntington.

In the Central Division, incumbent Vice Director Howard S. Huntington, K9KM, of Hawthorn Woods, Illinois, is being challenged by VHF/UHF Advisory Committee (VUAC) Chairman Kermit Carlson, W9XA, of Batavia, Illinois.

The policies of the League are established by 15 Directors who are elected to the Board on a geographical basis to represent their divisions and constituents. These 15 Directors serve three year terms, with five standing for election each year. Vice Directors, who succeed the Director in the event of a mid-term vacancy and serve as Director at any Board meeting the Director is unable to attend, are elected at the same time.

Full members of the ARRL in the Central and Roanoke Divisions will be mailed ballots in late September. To receive a ballot you must be a member as of September 10. To be counted, ballots must be returned so as to be received at ARRL HQ no later than noon Eastern Standard Time on Friday, November 20. The count will be conducted on that date under the supervision of three tellers and a certified public accountant.

Absentee ballots are available to those ARRL full members licensed by the FCC but temporarily residing outside of the US. Members overseas who arrange to be listed as full members in an appropriate Division prior to September 10, 2009, will be able to vote this year where elections are

being held. Even within the US, full members temporarily living outside the ARRL Division they consider home may have voting privileges by notifying the ARRL Secretary prior to September 10, 2009, giving their current QST address and the reason another Division is considered home.

==> SPACE SHUTTLE DISCOVERY: THREE HAMS ON BOARD

Tuesday's launch of the Space Shuttle Discovery (STS-128) <http://www.nasa.gov/mission_pages/shuttle/shuttlemissions/sts128/index.html> was scuttled when thunderstorms -- including a lightning strike just five miles from the launch pad -- popped up unexpectedly Monday evening, continuing into Tuesday morning. With plans to reschedule the launch the next day, NASA technicians found problems with the shuttle's fill and drain valves. Discovery is now scheduled to launch into space at 11:59 PM (EDT) on Friday, August 28, carrying a crew of seven astronauts, including three radio amateurs.

Commanded by Frederick W. "Rick" Sturckow and piloted by Kevin A. Ford, Discovery is poised to blast off on a 13 day mission to deliver more than 7 tons of supplies, science racks and equipment, as well as additional environmental hardware to sustain six crew members on the International Space Station (ISS). The shuttle also has a crew of five Mission Specialists: Jose Hernandez, KE5DAV; Nicole Stott, KE5GJN; Christer Fuglesang, SA0AFS/KE5CGR; Patrick G. Forrester, and John D. "Danny" Olivas.

When Discovery undocks from the ISS, Stott will be left behind in the orbital outpost. Timothy Kopra, KE5UDN -- who has been on the ISS since July -- will return to Earth on the shuttle. Kopra's departure and Stott's arrival makes for six astronauts on board the ISS, and all but one are licensed radio amateurs: Commander Gennady Padalka, RN3DT; Flight Engineer Michael Barratt, KD5MIJ; Flight Engineer Frank DeWinne, ON1DWN; Flight Engineer Robert Thirsk, VA3CSA, and Flight Engineer Roman Romanenko.

Stott -- who holds a BS in aeronautical engineering from Embry-Riddle Aeronautical University and a master's degree in engineering management from the University of Central Florida -- joined NASA in 1988 as an Operations Engineer in the Orbiter Processing Facility (OPF) at the Kennedy Space Center (KSC) in Florida. Soon after, she was detailed to the Director of Shuttle Processing as part of a two-person team tasked with assessing the overall efficiency of shuttle processing flows and implementing tools for measuring the effectiveness of improvements. During her time at KSC, Stott also held a variety of positions within NASA Shuttle Processing, including Vehicle Operations Engineer, NASA Convoy Commander, Shuttle Flow Director for Endeavour and Orbiter Project Engineer for Columbia. In 1998, she joined the Johnson Space Center team in Houston as a member of the NASA Aircraft Operations Division, where she served as a Flight Simulation Engineer on the Shuttle Training Aircraft.

Selected as a mission specialist by NASA in July 2000, Stott reported for astronaut candidate training the next month. Following the completion of two years of training and evaluation, she was assigned technical duties in the Astronaut Office Station Operations Branch, where she performed crew evaluations of station payloads. She also worked as a support astronaut for the Expedition 10 crew. In April 2006, she was a crew member on the NEEMO 9 mission (NASA Extreme Environment Mission Operations) where she lived and worked with a six-person crew for 18 days on the Aquarius undersea research habitat.

In a NASA pre-flight interview, Stott said that while on board the ISS, the crew will "be continuing the final assembly of the space station, and also moving more actively into the utilization phase of station, with the science and research that will be going on." Her primary responsibility on the ISS will be "to maintain the U.S. systems as well as the payloads that are on the US side, and that also includes the Japanese Experiment Module and the Columbus experiment module. And I think one of the really cool things about Expedition 20 and 21 is that we'll be a six person crew on board the station at that time."

STS-128 marks the first spaceflight for Hernandez, a native of Stockton, California. Selected as a NASA astronaut in 2004, he completed his initial training in February 2006. While on Discovery, he is slated to perform robotic operations to inspect Discovery after launch and assist with cargo transfer from the shuttle to ISS. Hernandez holds a BSEE in electrical engineering from the University of the Pacific and a master's degree in electrical and computer engineering from the University of California Santa Barbara.

Fuglesang, from Sweden, is an astronaut with the European Space Agency (ESA); he flew as a mission specialist and conducted three spacewalks on STS-116 in 2006. He was selected to join the ESA astronaut corps in 1992 and began training at NASA's Johnson Space Center in Houston in 1996. Fuglesang has a master's degree in engineering physics from the Royal Institute of Technology and a PhD in experimental particle physics from the University of Stockholm.

NASA has said that if Discovery is not launched by Sunday, the mission would have to be delayed until mid-October to provide launch opportunities for other spacecraft, including a Russian crew capsule and an unmanned Japanese cargo ship destined to visit the ISS. If NASA decides workers have to make repairs, that could mean a weeks-long delay.

Stott is scheduled to return to Earth on the Space Shuttle Atlantis (STS-129) <http://www.nasa.gov/mission_pages/shuttle/shuttlemissions/sts129/index.html>, set to launch in November 2009. -- NASA provided the information for this article

==> SUITSAT-2 NOW CALLED ARISSAT-1

The SuitSat-2 project -- an Amateur Radio satellite housed in a Russian spacesuit -- now has a new name to go with a new shape: ARISSat-1. On Wednesday, August 19, Amateur Radio on the International Space Station (ARISS) <http://www.rac.ca/ariss/oindex.htm> Chairman Gaston Bertels, ON4WF, announced the new name for the satellite and project. According to ARRL ARISS Program Manager Rosalie White, K1STO, the project team is moving ahead, using the same hardware that was to fly in the Russian Orlan suit. Russia will continue to call the satellite Radioskaf-2, so ARISS is designating it ARISSat-1/Radioskaf-2.

Plans to launch a second SuitSat-spacesuit-turned-satellite were the subject of discussions and presentations at the November 2006 AMSAT Space Symposium and ARISS International Delegates' meeting. Despite a weaker-than-anticipated 2 meter signal, SuitSat-1 sparked the imagination of students and the general public and turned into a public relations bonanza for Amateur Radio <http://www.arrl.org/ARISS/Suitsat.pdf>. ARISS hopes to capitalize on the concept by building an even better SuitSat that will include ham radio transponders. The SuitSat.org Web site <http://www.suitsat.org/> attracted nearly 10 million hits during the SuitSat-1 mission. Designated by AMSAT as AO-54, SuitSat-1 remained in operation for more than two weeks, easily outlasting initial predictions that it would transmit for about a week. SuitSat-1 re-entered and burned up in Earth's atmosphere in September 2006. ARISSat-1/Radioskaf-2 is expected to be live for at least six months.

Due to storage considerations, the two surplus Orlan space suits in storage on the ISS were discarded via the Progress Cargo Vessel earlier this year. One of these suits was to be used to house the electronics for the upcoming SuitSat-2 mission; the batteries were to be mounted inside the suit, solar panels attached to the extremities with the electronics, video cameras and antenna mounted on the helmet by the ISS crew prior to deployment during an extra-vehicular activity (EVA), commonly called a spacewalk. The removal of the Orlan space suits from ISS removes the "Suit" component of the deployment and the new name reflects the change in configuration.

White told the ARRL that the ARISSat-1/Radioskaf-2 team, through Gould Smith, WA4SXM, made the final decision for the satellite to be square, with solar panels on all 6 sides. "The team is mounting a 70 cm quarter-wave whip on the bottom and a 2 meter quarter wave whip on the top," she said. "All of the hardware and software goes inside the square, and cameras go on the outside." The experiment being developed by Russia's Kursk State University is expected to be integrated into the electronics once the US-produced equipment is delivered to Russia this fall.

AMSAT <http://www.amsat.org/> and ARISS pointed out that the importance of this project to both organizations is not diminished. "ARISS sees this mission as an important component of education outreach, as it will provide an opportunity for students around the world to listen for recorded greetings from space, as well as learn about tracking

spacecraft in orbit," White said.

The ARISSat-1/Radioskaf-2 transmitter and receiver will be based on a Software Defined Transponder (SDX) system. It will consist of two major components: The RF Module and the Digital Signal Processor (DSP) module. In the RF module, there will be an up converter that receives a signal from the DSP module as a 10.7 MHz intermediate frequency RF signal with a 50 kHz bandwidth, and up converts it to 145 MHz signal of 50 kHz bandwidth centered on 145.9375 MHz. The receiver is a down converter with a 50 kHz bandwidth centered on 437.6125 MHz. The output of the receiver is a 10.7 MHz RF signal with a bandwidth of 50 kHz. The DSP processor receives the 10.7 MHz signal from the receiver down converter and processes it and outputs a 10.7 MHz signal to the transmitter up converter. The DSP can also inject signals such as the CW ID, telemetry, audio and packet signals as determined by the software on the DSP.

AMSAT calls the deployment of the SDX "a critical milestone" for the organization. "This upcoming flight provides an opportunity to flight test the next generation of spacecraft hardware," Bertels said. "Lessons learned from this deployment will be applied to future flight opportunities as AMSAT moves towards a 'modularization approach' to spacecraft development with the expectation the future spacecraft missions will utilize a derivative of SDX and the associated hardware."

The ARISS International Team has been informed that there is still space available for shipment of the ARISSat-1/Radioskaf-2 electronics on the projected cargo flight to the ISS in January 2010, and the extra-vehicular activity scheduled for April 2010 still has a SuitSat-2 deployment on the schedule.

==> SOUTH AFRICAN HAMS TO PUT ZS10WCS ON THE AIR BEFORE, DURING WORLD CUP

With World Cup soccer coming to South Africa in 2010, hams in that country will commemorate the event starting in September 2009 with a special call sign: ZS10WCS. According to the South African Radio League (SARL) <http://www.sarl.org.za/>, that country's IARU Member-Society, the call sign will be used in two ways: In the months leading up to the Word Cup, to be held June 11-July 11, 2010, and for times during the event itself. SARL is requiring that clubs selected to use ZS10WCS before the event be on the air on weekends, Friday night through Sunday night. Clubs using the special call sign during the World Cup are expected to be on the air each day.

SARL will supply the special event QSL cards, and requests for direct QSLs will be handled by the SARL QSL bureau. Direct QSLs must include a self-addressed envelope and one IRC or US $1. Amateurs may also QSL via e-mail <wcs@sarl.org.za>, but those hams sending an e-mail QSL will only receive an e-mail QSL in return, and not the commemorative printed QSL.

When the World Cup was in Germany in 2006, 38 different special event stations were on the air to celebrate the event. From May 13-July 16, 26

special district stations (DQ2006A to DQ2006Z) and 12 special stadium stations (such as DR2006B and DR2006C) at the various venues were on the air. The Deutsche Amateur Radio Club (DARC) offered a gold, silver and bronze award for contacting each station; there is no word if SARL will offer an award in 2010. -- Some information provided by SARL

==>SOLAR UPDATE

Tad "The Sun just touched the morning" Cook, K7RA, this week reports: Sunspot numbers for August 20-26 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 67.6, 66.4, 66.6, 67.3, 67.6, 67.1 and 67.3 with a mean of 67.1. The estimated planetary A indices were 11, 8, 5, 5, 3, 3 and 4 with a mean of 5.6. The estimated mid-latitude A indices were 8, 6, 3, 3, 1, 2 and 4 with a mean of 3.9. Geophysical Institute Prague predicts quiet to unsettled conditions August 28, quiet August 29-30, quiet to unsettled August 31, September 1 quiet, quiet to unsettled September 2 and active conditions on September 3. NOAA and the US Air Force predict the planetary A index for August 28-September 6 at 5, 7, 10, 7, 5, 12, 7, 5, 8 and 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Emily Dickinson's "The Sun Just Touched the Morning"
<http://www.quotesandpoem.com/poems/poeticworks/Dickinson/Complete_Poems:_Nature_-_1/5>.

==>IN BRIEF:

* This Week on the Radio: This week, look for an NCCC Sprint on August 28. The Kansas QSO Party is August 29-30. Next week is the All Asia Contest and Colorado QSO Party on September 5-6. The Tennessee QSO Party is September 6-7. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, April 6, 2009, for these online course sessions beginning on Friday, April 18, 2009: XXXXXX. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times

convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* 2009 Field Day Logs Received, Posted Online: All 2009 Field Day logs that have been received have been posted to the Claimed Scores page on the ARRL Web site <http://www.arrl.org/contests/claimed>. They reflect all applications sent from the b4h.net Web applet, as well as those received via the US Postal Service and usable electronic submissions sent via regular e-mail (non-Web applet submissions). If you find an error in your listing, or your entry is missing, please contact ARRL Field Day Manager Dan Henderson, N1ND, via e-mail <dhenderson@arrl.org> or by phone at 860-594-0236. If your entry is listed as needing more information, please contact Kathy Allison, KA1RWY, via e-mail <kallison@arrl.org> or by phone at 860-594-0295. She has all of the entries received and can determine what specifically is missing from those entries with problems.

* Kansas QSO Party Back on the Air for 2009: This weekend offers an opportunity to work rarely activated Kansas counties -- all 105 of them!The Kansas QSO Party <http://www.ksqsoparty.org/> returns to the airwaves for the first time since 2002, making it possible to put the Kansas state flag on your Year of the State QSO Party certificate <http://www.arrl.org/awards/ysqso>. The contest begins at 1400 UTC Saturday, August 29 and runs throughout the weekend.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from ARRL HQ. To subscribe, unsubscribe or change your address for
e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. (Check "Temporarily disable all
automatically sent email" to temporarily stop all e-mail deliveries.)
Then, click on "Submit modification" to make selections effective.
(NOTE: HQ staff members cannot change your e-mail delivery address. You
must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

WIA Queensland Advisory Committee Chairman, Don Wilschefski VK4BY has put out the annual invitation for the WIA Queensland Club's President's lunch with Michael Owen and Vice President Ewan Mcleod.

Sunday 15th November at the Geebung- Zillmere RSL club.

As in previous years, the intention is for one or two representatives from each radio club in the state to attend.

To reserve your place, please email Don
qac@wia.org.au

PODCASTS

Hello everybody, I'm Bryan VK3HXR with a couple of words about the WIA National News Podcast.

That's right podcast.

A podcast is simply an audio file distributed somewhat automatically via RSS.

And 'RSS' is a system where programs query a small summary file on websites rather than you, the user, loading the whole website every time you want to check if there's anything new.

Think of it as "email for audio". The software checks every so often in the background and when there's a new episode it downloads it and notifies you it's ready to play.

So, why is this so good? Well, just about every web browser, email client and music playing software knows how to download podcasts and if you subscribe to the WIA News Podcast you'll get the newest news bulletin as soon as it's uploaded!

So if you want to listen to the freshest Amateur Radio news on any MP3 player while you're mowing the lawn, to burn it to a CD and listen to it on your way to work in the morning or play it in the background between DX contacts in the wee hours of the morning, the WIA News Podcast is yours, any time you want it.

Now the MP3 file has been available for a while and has always been used by the HF, repeater and IRLP broadcasters. If you're involved with putting the news to air, you'll love the new system, especially if you're writing automation scripts. Every episode is now uniquely named with the date in the title and there are command line podcatchers (like 'hpodder') to make your life easier. No more wondering if the downloaded wianews_128.mp3 file is the most current one - you'll know it is.

So head over to the wia.org.au website and you'll find the podcast link on the News Broadcast Page in the News and Events section. And if you're an iTunes user, you'll find it in the iTunes Podcast Directory by searching for 'Wireless Institute'.

Give it a go this week and never miss the news again!

'hpodder' commandline podcatcher (linux/posix & OSX)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Oct 10 - 11 will see Foundation License training & examinations for all grades conducted by S.R.A.G. in VK5.

Foundation license training on Saturday with examinations for all grades on the Sunday.

Please ring Paul Hoffmann on 0418803177
email network@internode.on.net

Rating of juniors in Russia

S.R.R. has founded a rating of radio amateurs - juniors, whose age does not exceed 19 years.

The rating is the competition points scored within a year.

The junior in every contest receives a certain quantity of points for performance. Points for different contests then develop.

Following the results of a year the best young radio sportsman and the best team of young sportsmen of Russia is defined.

According to preliminary data some 50 young radio fans will participate

SWISS ARISS contact successful

Saturday 22 August saw Swiss Girl and Boy Scouts establish a radio contact with E.S.A. astronaut Frank De Winne, ON 1 DWN, on board the International Space Station.

The international year of astronomy inspired a few scout/guides to create a special scout event, the Astrocamp 2009, where participants from 5 to 20 years will earn scout qualifications in astronomy and space technology, communication technologies, journalism and public relation.

Held over 3 Saturdays, some 100 are expected to qualify.

The contact coordinator Rolf HB9TSO and his technical team set up a satellite station with automatic antenna tracking as well as a backup vertical antenna.

Astronaut Frank De Winne answered 12 questions in the time slot.
He explained for example that the astronauts onboard the ISS always have the meal together sitting around the table and discussing what happened during the day.

ARNEWSLINE ANNOUNCES 2009 YHOTY WINNER: ANDREW KOENIG, KE5GDB

A 15 year old from Houston, Texas, has been selected as the 2009 Amateur Radio Newsline Young Ham of the Year. This, based on his dedication to public service as well as working to bring kids, teens and adults into the hobby.

The Life Scout, who is just shy of his 16th birthday, is working to earn the Eagle rank and was ecstatic to learn he had been chosen for special recognition by Newsline.

Andrew Koenig, KE5GDB, received his award at the 2009 Huntsville Hamfest at the Von Braun Centre, Alabama.

CALIFORNIA TEACHER TURNING OUT SCHOOL AGE HAMS

Amateur radio is finding a receptive young audience among some California school age youngsters. This, according to an article in the Los Angeles Times who says that teenagers in one Los Angeles middle school have been discovering shortwave radio and getting their ham radio licenses all thanks to science teacher Karl Beutel, KE6MAO.

Some 75 teenagers have already become licensed amateur radio operators!

You can read the LA Times story at

www.latimes.com/news/local/la-me-teen-radio25-2009jul25,0,1740751.story?\track=rss

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

SOUTH AFRICA - NO MORE Q CODE SUFFIXES

I.C.A.S.A. has confirmed that the authority has blocked call sign suffixes that are part of the Q codes and SOS. A few amateurs' and one club call sign are in the Q-code group. When these call signs are no longer used, they will also be added to the blocked list.
Radio amateurs who have call signs with Q-code suffixes are urged to apply for a change in call sign.

USA UNCERTIFIED VIDEO TRANSMITTER

The FCC has issued an official Citation to Hobby Lobby International for marketing what the agency terms as non-compliant radio frequency devices. According to the Commission, these devices called Pilot View FPV 2400 video transmitter exceeded the maximum radiated power limit for a Part 15 device.

Back on March 5th, the FCC's Spectrum Enforcement Division sent Hobby Lobby International a Letter of Inquiry asking if the Tennessee company was marketing an unauthorized radio frequency device through its website. The

company responded by telling the FCC that they began selling the Pilot

View FPV 2400 video transmitter in May of 2008 and so far had sold 109

units of the device in the United States. Hobby Lobby also noted that the Australian manufacturer of the transmitter had represented to them that the device was FCC compliant.

The company was then told by the FCC that future violations of this sort could lead to monetary forfeitures of up to $16,000 for each violation or each DAY a violation continued.

USA - BROADCASTER FINED FOR AVIATION BAND INTERFERENCE

The FCC has affirmed a $4000 fine issued against California based Playa Del Sol Broadcasters. This after it determined that a broadcast translator at its transmit site was causing interference to three frequencies in the aviation band. Bruce Tennant, K6PZW, from Amateur Radio NewsLine reports a complaint of interference regarding the aviation frequency of 122.875 MHz.

This was identified as having the same audio as station KRCK on 97.7 MHz in Mecca, California. That's a station licensed to Playa del Sol

On March 13, 2008, an agent from the San Diego Office travelled to the Indian Wells and was able to detect the audio of KRCK on three separate

frequencies in the VHF aviation band. These were 109.5 MHz, 122.2 MHz, and 136.1 MHz. The agent also determined that the three signals were emanating from the KRCK studio.

Playa del Sol Broadcasting was given the customary 30 days to pay or to

file an appeal.

==========

RSGB NEWS FROM G4NJH

VU2ZH ready for emergencies in India

The Amateur Radio Society of India has signed a memorandum of understanding with the Indian Red Cross Society, Bangalore and an amateur radio station with the callsign VU2ZH.

It will be inaugurated on 12th October by the Governor of Karnataka State. The station will be available as a club station in Bangalore for amateurs and will also serve as an emergency communications station. The station is accessible 24 hours a day and will also have emergency power. It has HF and VHF capability.

Efforts are being made to replicate this elsewhere in India.

==========

NEWS FROM ARNEWSLINE

TWO HAMS SAFE FOLLOWING KABUL BLAST

Two hams are safe after a bomb blast rips through a crowded area in Kabul, Afghanistan. One of them is Steve Herman, T6AD, who is a news reporter on assignment in Kabul, 2nd is Jim McLaughlin, T6AF.

This occurred Saturday, August 15th. Sadly, that blast did kill at least seven people and injured nearly 100.

"In my case I was at my hotel a few miles away when the explosion occurred. I'm a news correspondent by profession and as you might guess, I did what any newsman would do in a situation like this. I quickly began filing news reports, in my case for the Voice of America.

Jim McLaughlin, T6AF, lives a lot closer to the explosion than I do. He reports a couple of windows in his residence adjacent to the US Embassy, were blown out but his shack is fine. Thankfully, he was not there at the time.

Ironically Jim and I had held our first eyeball QSO only 24 hours earlier. In fact, we met very close to the spot where the bomb went off. That was near the front gate of NATO's military headquarters in the Afghan capital. As far as we know, we may be the only two hams who are actually on the air from this war torn nation.

In Kabul, Afghanistan, I'm Steve Herman, T6AD, for the Amateur Radio Newsline.

==========

WEIRD AND WONDERFUL

A practical example of the Emergency feature on the FT-60R

After testing the Emergency feature of the FT-60R, a web poster has created the following for your enjoyment. Please... enjoy.

>From the manual:

"Use this feature if you are out on a walk and want a quick way of alerting a family member to a dangerous situation. The alarm sound may discourage an attacker and allow you to escape."

Mr. Ham : "It's a lovely day for a walk."

Attacker: "I'm going to attack you."

Mr. Ham : "Wait right there, Mr. Attacker while I unlock my FT-60R keypad, place it in VFO mode, set the volume to maximum, and hold down the Emergency key shortcut for 2 seconds."

FT-60R: *blink, blink, blink* *beep, beep, beep*

Mr. Ham: "Ah ha! Now Mr. Attacker, my blinking LCD display and DTMF keypad will blind you while the beeping sound will disorient you."

Attacker: "Oh no!"

Mr. Ham: "In 60 seconds, my FT-60R will also send SOS de CALLSIGN via CW
on the UHF calling frequency and any amateur radio operator within
1/2 mile who both knows the frequency of and is monitoring the
UHF calling frequency will hear *beep, beep* on his radio too.

He will then return home and either retrieve his UHF direction
finding go-kit or improvise some from the ARRL Handbook. When he
returns and locates my position, he will then call the authorities
and inform them of my situation."

Attacker: "I am discouraged."

Thanks Nick! (tongue in cheek)

March 21-22 John Moyle Field Day

Peter Harding VK4OD the RD Contest Manager says RD logs are coming in fast
BUT many operators have selected the wrong operating category.

"for instance, they have selected the OPEN category when in fact they have
only operated in Voice mode, and in other instances they selected Phone when
all their contacts they made were in CW, little mistakes like this, could,
very well cost them a winning situation.

Another common misuse of the Computer logging programs is that they generated
a .TXT file instead of the .CSV format. In order to check the logs I need to
print out all the Electronic logs and lets say when they are in .TXT format
that someone that has 300 to 400 points can run into 20 or so pages, whereas
in .CSV format we are down to 6 to 7 pages, thus saving costly Paper and Inks,
Something to bear in mind for the future.

To those that have NOT yet logged their logs please remember you only have to
last Mail Monday the 15th September for them to reach me, and PLEASE send your
Electronic logs to rdlogs@wia.org.au in order that the other scrutineers also
receive your logs".

Westlakes Cup on September 19 is another Westlakes Amateur Radio Club Contest.

2 sections, open, for Standard and Advanced and, F call, for Foundation class.

Full details can be found on Westlakes Homepage www.westlakesarc.org.au

The Spring Field Day (UHF-VHF VK) will be held on November 28/29, later in the month than in past years. An ideal time to spend a balmy weekend on a hilltop! We are told more details are on the WIA contest page.

WIRELESS WEATHER

Are sunspots normal this cycle?

This week my eye caught some reporting by two scientists from the US National Solar Observatory, William Livingston and Matthew Penn, whose paper in the journal of the American Geophysical Union asks and answers the question, "Are Sunspots Different During This Solar Minimum?"

Quoting their paper, "Something is unusual about the current sunspot cycle. The current minimum has been unusually long, and with more than 670 days without sunspots through June 2009, the number of spotless days has not been equalled since 1933. The solar wind is reported to be in a uniquely low energy state since space measurements began nearly 40 ago."

They ask, "Why is a lack of sunspot activity interesting?" when mention the Maunder Minimum, a period of 70 years "from 1645 to 1715, [when] the Sun entered a period of low activity... [that] could explain the low temperatures recorded in Europe during the Little Ice Age."

Using a telescope at Kitt Peak in Arizona, "the observations showed that the magnetic strength in sunspots were decreasing with time, independent of the sunspot cycle. A simple linear extrapolation of these data suggests that sunspots might completely vanish by 2015."

They also say that, "although the Sun's magnetic polarity has reversed and the new solar cycle has been detected, most of the new cycle's spots have been 'pores' [tiny sunspots] without penumbrae." The penumbra is the filamented edge of the sunspot where the magnetic force lines run across the

surface, rather than the darker, central umbra where the lines are largely vertical.

Livingston and Penn say that, "Recent observations of small spots suggest that the relationship between umbral magnetic field strength and infrared intensity... has remained constant. This reveals that sunspots seen currently still follow the same infrared intensity and magnetic field strength relationship seen in previous years. Instead, magnetically weaker sunspots are seen more frequently now in conjunction with high infrared intensities."

This means that, "the vigour of sunspots, in terms of magnetic intensity, has greatly diminished..." and data "shows the decrease in field strength now found with respect to time (1992-2009), which still shows a linear trend of the solar cycle."

Livingston and Penn say, with characteristic scientific restraint, "whether this is an omen of long-term sunspot decline, analogous of the [70 year] Maunder Minimum, remains to be seen."

For WIA National News, I'm Peter Ellis VK1PE

BROADCAST MONITORING SWL AND SCANNER NEWS
aus_scanner@yahoogroups.com
http://www.scanaustralia.bigpondhosting.com
www.scanvictoria.com
www.tinyurl.com/BITS-026 (A receiver located in NY USA)

Chinese authorities have made frequency adjustments midway during A09, affecting all transmissions which were previously operating in the new exclusive worldwide amateur radio service band 7100-7200 kHz.

These regional services are affected:

Xizang Peoples' Broadcasting Service - Lhasa

Broadcasts on 7125 and 7170 have been moved to 7255 and 7450:
7255 (replacing 7125)
Tibetan 7450 (replacing 7170)

Broadcasts on 7120, 7155 and 7195 have been moved to 11975, 7230 and 7205:
11975 (replacing 7120)
7230 (replacing 7155)
7205 (replacing 7195)

(Reported by DF5SX and DJ9KR and sourced to iaru monitoring service)

4,500 Thai radio stations register to go legal

More than 4,500 community radio stations in Thailand have registered under a National Telecommunications Commission scheme to become legal broadcasters.

About 95 percent of the country's community radio stations signed up for the 300-day trial licence.

Stations which did not register by last Monday's deadline but continued to operate are now considered illegal.

It is interesting to note While the Thai Radio Commission could not shut down stations that failed to register, it could take action against them for illegal broadcasting. The NTC could file complaints with the police against stations which operate without a licence and charge them for the unlicensed use of transmitters and radio frequencies.

Community stations which have registered under the scheme can broadcast for 300 days but their programme content must not incite political unrest and violence, offend the monarchy or disrupt social morals.

CHIRP D-STAR programming software

Radio Amateurs have developed a extensive range of open-source and freeware radio communications software.

One example of this is CHIRP, a Windows/Linux/MacOSX program that can program ICOM D-STAR radios.

CHIRP is a cross-platform, cross-radio programming tool.

It works on Windows and Linux (and soon, MacOSX). It can program all of the ICOM D-STAR (or D-STAR-capable) radios and exchange data between them.

CHIRP also supports limited operation with the Icom ID-RP D-STAR DV and DD repeaters.

Written by Chris Comollattie VK4VKR
news for ar magazine to qtc@wia.org.au

Hello Everyone, this is Wireless Institute of Australia, Queensland Advisory Committee chairman Don Wilschefski VK4BY.

I am pleased to advise that the WIA Queensland Club President's lunch will be held again this year. WIA President Michael Owen and Vice President Ewan Mcleod will be attending and will address the group after lunch.

The lunch will be held on Sunday 15th November at the Geebung- Zillmere RSL club. The Geebung Zillmere RSL club is in Newman Road Geebung. The doors will open at 11:00am and a set lunch will be served at 12:30pm. The meal will be an alternating roast beef and roast chicken meal, that will be served to the tables. Cost for the meal is $15- per person.

The Wireless Institute of Australia will pay the cost of the room hire. There will also be a bar service.

To reserve your place, please email Don Wilschefski VK4BY at qac@wia.org.au

Special dietary requirements can be catered for. If you are arriving by plane or train please advise, and transport to the venue may be organised.

As in previous years, the intention is for one or two representatives from each radio club to attend, where possible. This is a good opportunity to discuss issues with the President and Vice President of the WIA.

Numbers will be required by Monday 9th November.

I look forward to seeing you there.

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

The unseasonal hot weather has made life interesting throughout Queensland, to say the least. However, there has been one outcome around the Wide Bay area which has yet to be exploited by many operators. The weather systems have been producing quite an amount of ducting, at 2m.

Last Sunday evening I was able to have a QSO with Paul, VK4FPWA on the Bundaberg City Repeater. Paul is in Maryborough and, of course, my QTH is Gootchie. Later I was able to talk with Harvey, VK4AHW from Buderim North on the Hervey Bay Repeater. Although I was able to key the Gladstone Repeater, I couldn't get a response from any one; similarly Rockhampton repeater was giving a strong return signal.

For the many new operators who may have never experienced the phenomonon of ducting, it is exciting to find signals travelling hundreds of kilometres. The great thing for foundation licencees is that 5 or 10W

is more than adequate to work DX at VHF.

This is a great incentive to get the gear "on air" for the summer season with the possibility of transequitorial contacts on 10m, and the fun

of the chase on the 6m, 2m and 70cm bands.

Good DX! Geoff Emery vk4zpp

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/
Redcliffe and District Radio Club

I'm Ray VK4CF with news from the Redcliffe AR Club.

Firstly, it is with sadness I report that club secretary Peter VK4TAA lost his father suddenly last weekend. The club wishes to express its sadness to Peter and his family and hopes to see Peter back in the club quite soon.

Last Monday night's meeting included the usual 4 th Monday night included a fox hunt but this time the hunt was conducted on a local large tree and grass area near the club. The coolness of the evening assisted the running but mostly walking members to find the fox. There were no visits from the local constabulary

James VK4TJF is currently looking for a suitable electrically quite location with some height within about 1-2 hours drive from Redcliffe so he can set up portable station to enter some of the international DX contests. The site needs high trees and good take off possibly on a hill. If you know a promising site please contact James via the club website.

It has been good to hear Gary, VK4FGAZ, from Stanthorpe on the club's 80 metre net for the last couple of Sunday nights and also during the week as well. The doublet antenna is certainly working well into Redcliffe and Gary is able to hear many signals thanks to a very quiet location.

A reminder that the club conducts a trivia contest every Wednesday night commencing at 7.30 pm on the club's 70 cm repeater. Join in and for an hour try to beat the quiz master. Please don't forget to insert a 91.5 Hz dtmf
tone to access the repeater.

So until next week, for Redcliffe club I'm Ray VK4CF and you've been listening to QNEWS from VK4WIA.

SARL NEWS SUNDAY 23 AUGUST 2009

You are listening to ZS6SRL, the official radio station of the South Afri-can Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

In the news today

ANOTHER BACAR LAUNCH

SUMBANDILASAT LAUNCH STILL ON TRACK FOR 15 SEPTEMBER

DISCOUNTED SUBSCRIPTION RENEWAL ENDS 31 AUGUST

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

ANOTHER BACAR LAUNCH

SA AMSAT will launch another BACAR flight on Saturday 12 September 2009. The BACAR team recovered the payloads intact and is working on a new con-figuration to overcome the problems that saw the last BACAR flight de-orbit very quickly. As the team finalises the details of the next launch, www.amsatsa.org.za will be updated. The launch is scheduled for between 08:00 and 08:15.

SUMBANDILASAT LAUNCH STILL ON TRACK FOR 15 SEPTEMBER

The technical launch team from Sunspace, the company that built Sumbandila-Sat and integrated all the payloads, left for Baikonur Cosmodrome on Thurs-day and arrived yesterday. The team will unpack the satellite and go through rigorous tests to ensure that all the systems are working. The team is expected to be at Baikonur for nine days. One person will stay behind to do a final battery recharge prior to the launch.

On their return to Stellenbosch, the Sunspace team will finalise the setup of the ground station in preparation for activating the satellite. Sum-bandilaSat will be separated from the rocket about three hours after lift-off in its flight over Africa, approximately 30 minutes before coming within reach of the ground station in South Africa.

Extensive testing will be carried out for two to three months. Radio ama-teurs can expect a Christmas bonus, as the amateur payload will be tested and may be on periodically.

SA AMSAT is working closely with Sunspace and the Department of Science and Technology on an operational schedule, to be realised early in 2010.

DISCOUNTED SUBSCRIPTION RENEWAL ENDS 31 AUGUST

There are only a few days left to renew your subscription of the SARL at the discounted rate of R320 for ordinary members and R200 for senior mem-bers. From 1 September, the rates are R340 for ordinary members and R212 for senior members. Make use of the discounted rates and renew your sub-scriptions before it expires.

SARL PRESENTED AT TABLE OF FREQUENCY HEARING

The SARL presented its proposals at the Table of Frequency public hearings held by ICASA this past week. The SARL's Councillor for Regulatory Affairs, Hans van de Groenendaal, ZS6AKV, submitted proposals for expanding the 160 metre band to its full ITU range from 1 800 to 2 000 kHz. New allocations around 500 kHz and 5 MHz, and various microwave frequencies to cater for amateur WiFi networks were also requested.

ICASA's decision on the proposals is awaited.

NO MORE Q CODE SUFFIXES

ICASA has confirmed that the authority has blocked call sign suffixes that are part of the Q codes and SOS. A few amateurs' and one club call sign are in the Q-code group. When these call signs are no longer used, they will also be added to the blocked list. Radio amateurs who have call signs with Q-code suffixes are urged to apply for a change in call sign.

The SARL appreciates the action taken by ICASA.

NEW MEMBERS

The SARL welcomes new members who have joined in the past few months. We are sure that you will enjoy the benefits SARL membership offers, and ap-preciate your support of amateur radio:

David Whitehouse, ZSL-1841 George Klein, ZR1GRK I.R Westwood, ZS1WY
Karel van Reenen, ZS1JZ Scott Maltby, ZR2SAM Derek Stuart, ZR2WB
Neville Bowden, ZS2N Edward Smook , ZS2ES W.G Hewitt, ZS2CC Rudi

Mostert, ZS3RM Hennie Greyling, ZS4HG Thys Janse van Rens-burg, ZR5TVR Anr&#65533; Kehlert, ZR6ANK Martin Nortman, ZR6TMN Charlotte Miller, ZU6CEM Peter Miller, ZR6PCM Jacques van der Merwe, ZR6JA Russel Patterson, ZR6WAX Gert Combrink, ZR6PY Dylan De Witt, ZU6D Anton Janovsky, ZR6AIC Deon Kruger, ZS6DKR Braam Devenier, ZS6AYE

CONTEST NEWS

The SARL HF CW Contest will be run on Sunday 30 August from 16:00 to 18:00 CAT on 20, 40 and 80 metres. The exchange is a RST report and a sequential serial number starting at 001. The rules are available in the 2009 SARL Contest Manual.

The IARU Region 1 SSB Field Day takes place over the weekend of 5 and 6 September.

The Spring QRP Sprint will be run on Sunday 13 September.

CLUB NEWS

At the AGM of the Highway Amateur Radio club on Tuesday 18 August 2009, the following committee was elected:

Brian Roodt, ZS5BBR, Craig Hardman, ZS5CD, Gary Potgieter, ZS5NK, Keith Lowes, ZS5WFD and Odette McManus, ZU5OM.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is still at a mini-mum and that it is now more than 40 days without an official sunspot. The agony continues!

20 and 40 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoon onwards. During the late af-ternoon and early evenings, it will be good towards the North. In the morn-ing, it may be possible to make contacts with Australia. Contacts with New Zealand may be possible on 40 m during the evenings. During the early morn-ings and evenings, 40 m contacts may be possible with Brazil.

Vincent, ZS6BTY, publishes an excellent near real-time graphical link reli-ability prediction for all the amateur bands on the Pretoria Amateur Radio Club's website. This prediction is available at www.parc.or.za. Click on the "Propagation" tab.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the mid-dle of the day. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

24 August - closing date YL Sprint and 40 m Mobile logs; 30 August - SARL HF CW Contest; 5 September - West Rand Flea Market; 5 and 6 September - IARU Region 1 SSB Field Day; 12 September - BACAR launch; 13 September - Spring QRP Sprint 15 September - Launch of SumbandilaSat.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror Interna-tional programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmis-sion can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Dennis, ZS4BS/2 in Barkly East and edited by Hester van der Walt.

Thank you for listening, 73.

Can't even figure out how to put a picture of his "signature
building" on his page!

Hey, Jost, did you notice that the sole comment on your page is a
complaint that you spammed another group (rec.arts.sf.written), with a
warning that if it happens again your ISP will be notified? GET A
CLUE!

has he posted to the wrong group?
He's an architect and this is a ham radio group???

73, Ian.

2229. SARL NEWS SUNDAY 30 AUGUST 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-08-29 21:22:12 UTC
From: website@sarl.org.za
Message-ID: <20090829212004.A755933CC5@panix2.panix.com>

SARL NEWS SUNDAY 30 AUGUST 2009

You are listening to ZS6SRL, the official radio station of the South Afri-can Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

SILENT KEYS

It is with deep regret that the passing of two radio amateurs must be re-ported this morning. We extend our sincere condolences to their loved ones.

The key of Peter Hoyle, ZS6TAO, a member of the Sandton ARC, went silent on Thursday 27 August 2009.

The key of Roy Smith, ZS6ROI, a member of the East Rand ARC, also went si-lent on Thursday 27 August 2009.

PAUSE

In the news today

SARL HF CW CONTEST THIS AFTERNOON

WORK ZS10WCS - THE 2010 WORLD CUP SOCCER SPECIAL EVENT STATION

PLANS FOR BACAR LAUNCH ON 12 SEPTEMBER IN FULL SWING

RADIO ZS IS IN THE MAIL

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SARL HF CW CONTEST THIS AFTERNOON

The SARL HF CW Contest will be run this afternoon, Sunday 30 August, from 16:00 to 18:00 CAT on 20, 40 and 80 metres. The exchange is an RST

report and a sequential serial number starting at 001. Each contact counts 2 points, each zone worked per band counts 2 points and each station worked on all three bands counts 2 points. Please read the rules before the con-test and take note of Rules 4 and 5 of the General Rules. The rules are available in the 2009 SARL Contest Manual as well as HF Happenings 367 and 368.

WORK ZS10WCS - THE 2010 WORLD CUP SOCCER SPECIAL EVENT STATION

>From 1 September members of the Boland Amateur Radio Club will operate the 2010 World Cup Soccer special event station. The call sign will be on the air over weekends as propagation conditions allow. Full details of pre-ferred frequencies and QSL information are available on www.sarl.org.za.

PLANS FOR BACAR LAUNCH ON 12 SEPTEMBER IN FULL SWING

Arrangements for the BACAR launch on 12 September are progressing well. The launch will include the same payload as the August launches, namely a 40 metre beacon, a 2 metre beacon and an APRS beacon.

Activities at the launch site will start at 06:00 and at the NARC at 07:30. The launch window is between 08:00 and 08:30 CAT.

You can follow the launch at home or at the SARL National Amateur Radio Centre at Radiokop, Roodepoort.

Visit www.amsatsa.org.za for regular updates.

DID YOU TAKE ADVANTAGE OF THE DISCOUNTED SUBSCRIPTIONS?

The special rate for the 2009/2010 subscription ends on Monday 31 August. Make use of the opportunity to renew at R320. From Tuesday 1 September 2009, the rate increases to R340. Members who have not renewed by 30 Sep-tember will lose their membership benefits and after that will have to go though a new application process, which also means that the starting date will be the date of rejoining.

Currently the paid-up membership stands at 1 071, substantially more than the number at the same time last year but still substantially short of our 1 600 target. If you have not yet paid your subscription for the 2009/2010 year, please do so as soon as possible. If you have lost your invoice and need a new copy, please call Mariska on Monday on 011 675 2393 or send an email to admin@sarl.org.za.

RADIO ZS IS IN THE MAIL

Radio ZS was mailed on Friday and should be in your post box soon. The web version is now available online at www.sarl.org.za. There is a lot to read. Learn more about over the horizon communication using LEDs, build a simple battery checker, find out more about a VIP paddle (a must-have for a CW en-thusiast).

Ean Retief discusses the electronic "Spoof Operations" used by the Allied Forces before the D-Day landings in June 1944. The aim of these operations was to deceive the German forces in France about the landings.

On satellites, there is Eddie, ZS6BNE's regular update and an article ti-tled "Amateur Radio gets another voice in the sky," telling all about Sum-bandilaSat, and for VHFers, learn how to calculate a link budget.

If you are not a member of the SARL yet, and would like a sample copy, send an email to armi@sarl.org.za with Radio ZS July/August in the subject line.

BIG SURPRISE FOR RTA DELEGATES

Delegates attending the SARL Radio Technology in Action Symposium were in for a big surprise when besides the attendance prizes donated by RS, there was also a two-metre hand-held to be won. Kobus Conradie, ZS1K, of Let's Play Radio donated the radio. Thanks to Let's Play Radio and RS for their sponsorships.

The Cape Town event was the last one in the 2009 series. Work has already started on the 2010 series. Put the dates into you diary now - Durban - 29 May 2010, Cape Town - 24 July 2010, PE - 14 August 2010 and Gauteng - 18 September 2010.

CONTEST NEWS

The Spring QRP Sprint will be run on Sunday 13 September.

The SARL VHF/UHF Contest is scheduled for the weekend of 18 to 20 September 2009, with a digital contest and an analogue contest. Derek, ZS5Y, would like to receive inputs from clubs and radio amateurs about this contest. Derek can be contacted at derek@fotogravett.com.

CLUB NEWS

During the AGM of the Magalies Radio Amateur Club held on 22 August, the following members were elected to serve on the committee:

Chairman: Johan Nel, ZS6JPN. Vice Chairman and Treasurer: Nico du Toit, ZS6OI. Secretary: Nick Smit, ZR6NSP. Members: Sam van Zyl, ZS6JZ (Technical); Thomas Scott, ZS6TJS (Digital); Marco Nel, ZS6MJ (Editor); Chris Smit, ZS6FCS (PIO and SARL Liaison); Chris van Eeden, ZS6CVE (Bulletin co-ordinator); Johann du Plessis, ZS6PSS (Youth); Thys Maree, ZS6MJM (Webmaster) and Peet Greyling, ZS6PGN (Social).

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at a mini-mum and that it is now nearly 50 days without an official sunspot. Solar activity is at some of the lowest levels ever recorded.

20 and 40 m will provide best opportunities for DX. Conditions to the east and the west will be good from the afternoon onwards. During the

late af-ternoon and early evenings, it will be good towards the north. In the morn-ing, it may be possible to make contacts with Australia. Contacts with New Zealand may be possible on 40 m during the evenings. During the early morn-ings and evenings, 40 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the mid-dle of the day. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 August - SARL HF CW Contest, 16:00 to 18:00 CAT; 31 August - last day for discounted SARL membership renewals; 05 September - West Rand Flea Market; 05 and 06 September - IARU Region 1 SSB Field Day; 12 September - BACAR launch, 08:00 - 08:15; 13 September - Spring QRP Sprint; 15 September - Launch of SumbandilaSat; 18 to 20 September - SARL VHF/UHF Contest.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror Interna-tional programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmis-sion can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Dennis, ZS4BS, and edited by Hester van der Walt.

Thank you for listening, 73.
/EX

The Ohio/Penn DX PacketCluster
DX Bulletin No. 923
BID: $OPDX.923
August 31, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K3GV, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, N0TG, W0YR, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, ON9CDR, PC2A, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SV8CYV, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and ZL2TZE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd-August, through Sunday, 30th-August there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H2, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U30VIC, AUSTRIA. The Vienna International Centre Amateur Radio Club (4U1VIC) will be on the air during the Worked All Europe DX Contest (WAEDC), September 12-13th. This will be a SSB only operation. The station is located in the secured United Nation campus in Vienna, Austria, and due to access restrictions, they will not be able to operate the full 48 hours continuously. They will try to be on the air as much as possible.

4U1VIC will send QSL cards for all QSOs via bureau. If you are in a hurry you can send it direct including SAE and return postage to: AMATEUR RADIO CLUB, VIENNA INTERNATIONAL CENTRE, P.O.BOX 500, A-1400 VIENNA, AUSTRIA. ADDED NOTE: A new video about the 4U1VIC Radio Club in Vienna is available online at: http://www.vimeo.com/6301009

6Y, JAMAICA. Look for 6Y1V to once again be active in this year's CQWW Contests. The 6Y1V team has also announced that they will also once again sponsor one young ham operator (21 or under) to join their team and receive an all expense paid trip to operate in the 2009 CQWW SSB or CW Contest with the 6Y1V team. You can reside in any country in the world and be considered for this opportunity provided you hold a valid amateur radio license in your country and have some contest experience. This is a gift to a young ham whom has a passion for Ham Radio and contesting. It is their way of giving something back to this great hobby that has given so much to them! Complete details are available at: http://www.6y1v.com/youth.htm

911 ACTIVITY. Mike, W0YR, will once again (as for the past several years) be active as W0YR/911 on September 11th, to honor/commemorate those lives lost in a terrorist attack at the Twin Towers of the World Trade Center in New York City, the Pentagon in Arlington, Virginia, and the plane that crashed into a field near Shanksville,PA. He plans to operate as much of the day as possible. Mike states, "I just wanted to do it to remind those I work on the air of what this country endured because of hatred -- and also remind those who want to minimize it or forget it, that this WAS an Act of Terror and, even though they would like to revise history, the memory of those (among them, two of my friends) who perished on September 11th, 2001, will NEVER be forgotten or sullied." A special QSL will be issued. QSL via his home callsign.

C3, ANDORRA. Ruben/EA5BZ and possibly other operators from the URE Contest Group will be active as C37URE during the CQWW DX RTTY Contest (September 26-27th) as a Multi-Multi entry. QSL via EA5BZ.

CY0, SABLE ISLAND (Update/Postponed). OPDX has received the following press release on Friday, August 28th (edited):
"The Sable Island DXpedition scheduled for October 19, 2009, by Randy - N0TG, Ron - AA4VK, and Murray - WA4DAN is being placed on 'hold'. Unfortunately, Randy's son, Carter (who was part of the KP1 and KP5 team in 1992), has developed kidney cancer which has spread to the lungs. Although there will be challenging days ahead for Carter and the family of N0TG, we trust the prayers of friends will strengthen this family and successfully bring all through this trial.
The team appreciates the many sponsors who were willing to provide their support, even though CY0 was not at the top of the most needed list, the support of the DX Community from around the world, and the interests shown by the many DX'ers that 'signed' the website Guestbook. We will leave the website up and updates will be posted from time to time on Carter's progress, as well as our plans to reschedule the DX-pedition to CY0. <http://www.cy0dxpedition.com/>

Our hope is that Carter will beat this disease and be able to join us at Sable Island. We do consider this a 'hold' and we intend to reschedule as health concerns permit.
Thanks again to our ham radio friends for your support. We wish the best for Randy's son Carter and all the Rowe family. Randy's (N0TG) contact information is listed on QRZ.com..... Thanks for your prayers."

FG, GUADELOUPE (NA-102). Anthony, F4EUG, will be active as FG/F4EUG between September 3-10th. Activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

FT/G, GLORIOSO ISLAND (Update/Magic Band). Didier, F5OGL, Glorioso 2009 team leader, announced this past week (on August 25th)(edited): "The propagation forecast for the Magic Band from Gloriosos is very bad at the expedition time; quiet in all directions. Taking advice from the 6 meters specialists, they inform us that chances to give FT5GA to the world hams are very low and even less. The only one antenna available is a 2 element HB9CV, with no other possibility to bring another or several other more efficient one(s), included for EME; So it has been considered we had to focus on HF bands. So we sadly decided to concentrate our activity only from 160 to 10 meters... We ask the 6m community to understand our decision." For more details and updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr

HS8, THAILAND. Voravut, HS8JYX, is planning to be in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSL via HS8JYX.

IOTA NEWS.....
EU-001. Willem, PA1WLB, on holiday, is active as SV5/PA1WLB from Kos Island (Loc. KM36OV) between now and September 6th. Activity will be on 40 and 20 meters SSB (14189 and 7070 kHz; 5 kHz up/down). He will also be on RTTY (14089 kHz) or PSK (14071.5 kHz). QSL via his home callsign, by the Bureau or direct (see details on QRZ.com).

EA-145. Operators from the Cambridge University Wireless Society will be active as CT/homecall from Ilha Deserta, Portugal, between September 4-6th. Activity will be on most HF bands using CW and SSB. QSL via the operator's home callsign, direct or by the Bureau. For details, see: http://www.domsmith.co.uk/amateur-radio/dxpeditions/2009/ct

NA-044. Juergen, NF6J, will be active as VO2/NF6J from Battle Island (CISA NF-049) between 1300z, September 4th to 2300z, September 11th. Activity will be on 30/20/15 meters CW only. QSL via DL7RV, direct or by the Bureau.

OC-127. As reported last week, Mike/KM9D (H44MY) and YL Jan/KF4TUG (H44TO) continue to be anchored at Tesauma on Rennell Island, Solomon Islands; length of stay is not known. Mike was heard this past week on 40/30/20/15 meters CW. QSL via OM2SA, direct

or by LoTW.

SA-054. Members of the 4M5DX Group will be active as YW5O from La Orchila Island. Activity will be on all bands and modes. The group is awaiting the transportation schedule from the Venezuelan Navy. The exact days and team will be posted soon on the following Web page: http://www.yw5o.4m5dx.info

KH6, HAWAII. Esa, OH7WV, is planning to be active from here during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) or possibly Single-Op/All-Band entry. Callsign for the contest TBA. QSL via OH7WV.

KH6BZF PROPAGATION FORECAST/REPORT (For August 31st-September 6th)....
Aug 31 AN SOLAR REFERENCE
Sep 1 AN ---------------
Sep 2 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 3 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 4 AN GEOMAGNETIC REFERENCE
Sep 5 AN ---------------------
Sep 6 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

N4, UNITED STATES (Submarine Activity). A group of amateur radio operators in Charleston, South Carolina, will activate N4H from the site of the Confederate Submarine H.L. Hunleyon, September 19-20th. The H.L. Hunleyon was raised on August 8th, 2000, and located at the Warren Lasch Conservation Center on the old Charleston navy base and is currently being preserved in a 90,000 gallon water tank as archeologists investigate the cause of the vessels sinking. The Hunley disappeared without a trace on a return journey after using a 135 lb. torpedo to sink the U.S.S. Housatonic four miles off the coast of Charleston, SC., on February 17th, 1864, making it "The World's First Successful Combat Submarine". The special event station N4H will be on the air to commemorate this historic event and is expected to be on ALL bands 160-10 meters. Operating times will be between 1300-2100z (may be extended). A specially designed QSL card will be available. QSL via: Edward Padgett, PO Box 61362, North Charleston, SC 29419. A donation of 2.00 USDs is required, no SASE is needed. All proceeds after expenses will be donated to "The Friends of The Hunley for Research and Conservation". Visit their Web page at: http://www.nn4f.com/n4h

NA5, UNITED STATES (Grid Activation/VHF Contest). Joey, W5BAK, will be heading to Big Bend National Park (DL88) for the January VHF Contest and plans to be active as NA5RC between January 15-20th (2010). He states, "Send me an E-mail to get on the mail list, and I will keep you updated. We will be rover from several of the other area grids too but DL88 is the goal." QSL via his home callsign.

NP2, U.S. VIRGIN ISLANDS. Members of the Florida Contest Group will be active as NP2B during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are John/NP2B, Brian/KP2HC, Ann/KP2YL, Frederick/K9VV and Lisa/W4LIS. Visit the Florida Contest Group's Web page at: http://www.floridacontestgroup.org

OH0, ALAND ISLANDS. Operators Peter/DL5FF, Horst/DF6FL and Siegfried/DL9ZE will be active as OH0JWL, OH0/DF6FL and OH0/DL9ZE, respectively, from Eckeroe Island (EU-002) between now and September 12th. Activity will be on 20/17/15/10 meters using CW, SSB and RTTY. QSL via their home callsigns.

ON4, BELGIUM (Special Event). Members of the Radio Club of Binche (ON7RY) will activate the special event station ON4WAR, September 5-6th. Activity is to commemorate the Belgian resistance fighters (WWII), especially those of the Refuge B 40 in Waudrez (Belgium). The scheduled timetable of activities is as follows:
Saturday 6th - From 09:00 AM up to 06:00 PM (0700-1600z)
Sunday 7th - From 08:00 AM up to 04:00 PM (0600-1400z)
They announced, "At the hour up to the hour and a half CW transmissions with a Whaddom Paraset MK VII on 3560, 3579, 3583 and 7025 kHz. At the hour and a half up to the next hour, SSB transmissions on HF bands. QSL information via ON7RY (direct or by the Bureau)." For more details, visit their Web page at: http://www.on7ry.be

OY, FAROE ISLAND. Trygvi, OY4TN, reports that Johan, OY2J, is once again active after being QRT for many years. He has retired from his job and has finally found time to set up his radio station again. QSNs show he has been on 20 meters CW and SSB.

PACIFIC TOUR. Just a reminder that Don/G3BJ and Hilary/G4JKS will be on vacation in the South Pacific during September. Their activity schedule is as follows:
September 4-16th - Austral Islands (from Rurutu [OC-050] and Tubuai [OC-152]); callsign will be FO/G3BJ
September 18-25th - Niue (OC-040); callsign ZK2BJ
Operations will be mostly CW on 80-10 meters (no 17/12m). They will use a K3 transceiver and a Butternut HF6.

PACIFIC DXPEDITION/TOUR (Update/Reminder). Just a reminder that Gerben, PG5M, will be activating three DXCC entities in the Pacific between September 6-27th. His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2 (callsign not known yet)
September 8-14th: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 15-16th: Fiji; prefix 3D2 (callsign not known yet)
September 17-23rd: Tuvalu (OC-015); Callsign will be T2G
September 24-27th: Fiji; prefix 3D2 (callsign not known yet)
The callsign is not known for Fiji, but he has requested 3D2G. This will be an ultra light solo DXpedition and CW only. He will use an Elecraft K3, and his antennas are a 2x20m doublet, an ECO R7+ vertical for 40-10 meters and a 15m tall DX-Wire glass fiber pole for a 80m vertical. Suggested frequencies are: 3503, 7005, 10105, 14005, 18073, 21005, 24985 and 28005 kHz. Gerben will try to monitor the DXclusters and E-mail for feedback on possible useable frequencies. QSL via PG5M, by the Bureau or direct. For

direct requests, please enclose a minimum of 2 USDs for return postage.
More details and updates will be available on: http://www.dx.to

PACIFIC DXPEDITION/TOUR. Operators Andrea/IK1PMR, YL Claudia/K2LEO/PA3LEO, Wil/PA0BWL, Joe/AA4NN, Franz/OE2SNL, Gerhard/DJ5IW, and Kenneth/OZ1IKY are planning a DXpedition to three semi-rare entities (and possibly some other operations) in the Pacific between November 11th and December 13th. The tentative schedule is as follows:
Samoa (5W) - November 11-18th; minus OE2SNL; Vaiala Beach Resort on the northern side of the Island of Upolu (OC-097)
Tonga (A3) - November 19th- December 9th; Otuhaka Beach Resort on the western side of the Island of Tongatapu (OC-049)
New Zealand - December 2-5th; Auckland (logistics, possible activation of some IOTA group)
South Cook Islands (E5) - December 5-13th; minus OZ1IKY
Singapore (9V) - December 13-17th (possible radio operations)

Callsigns have not been announced yet. Focus will be on the lower bands, but activity is planned for 160-10 meters using CW, SSB and the Digital modes. The team will use three Elecraft K2/100 with DSP and amps. For more information and updates, watch:
http://www.ik1pmr.com/plans/a3/index.php?s=intro

PJ4, NETHERLANDS ANTILLES. Operators Peter/PJ4NX, Marco/PE2MC and Michiel/PG4M will be active from Bonaire (SA-006) between September 10-16th. They will take part in the WAE SSB Contest (September 10-11th) as PJ4NX. Before and after the contest they will use PJ4/homecall. QSL via their home callsign (QRZ.com addresses). Logs and photos will be available online at: http://www.pi4cc.nl/pj4

QSL INFO AND NEWS.....
QSL GB0BME via the Bureau or direct to G7WAW. This is a special event station by the Craven Radio Amateur Group (CRAG) from the Bancroft Mill Engine in Barnoldswick, Lancashire, England. See QRZ.com for more info.

PIRATE ALERT. Station signing C31LJ/m on August 27th, was pirated. Nenad, VE3EXY, reports that Peter is in Canada.

PIRATE ALERT. Phillip, ZL2TZE, informs OPDX that "Emma", ZL5SP, is again operating CW on 40m claiming to be in ZL5 Antarctica. He states, "It's the winter there at the moment, 24/7 darkness and it is highly unlikely that any workable propagation from ZL5 would be happening now, maybe in 2 or 3 months when their summer comes around. There is no ZL5SP in SMART which is the ZL Radio Frequency Service database where all callsigns are recorded. There is also no record held by NZART our National body..." Save your green stamps!

QSL V7XX via JH2BNL (NH0AA/NH2): Yuji Oda, 348-1 Nazukacho, Naka-ku, Hamamatsu-shi, Shizuoka 430-0811, JAPAN

QSL V73NF via JA2DSQ (KH2/JA2DSQ): Fuminori Nakayasu, 344 Ichinocho, Higashi-ku, Hamamatsu-shi, Shizuoka 435-0051, JAPAN

VC1W (CISA-132) QSL STATUS. Nenad, VE3EXY, reports that the QSLs are designed and sent to the printer. He will send the cards directly to him when printed, and Nenad will start procssing immediately.

VE1OTA QSL CHANGE. Nenad, VE3EXY, reports that they have decided to 'extend' the coverage to the year 2006. Feel free to send Nenad any VE1VOX/VE1OTA QSLs from 2006 onwards.

QSLS VIA LOTW: K5D

QSLS RECEIVED VIA MAIL: 3V9A, 4T6I, 5K5T, 5K0T, 5R8KD, 7O1YGF, 7P8CF, 7P8R, 9J2CA, DY1C, HK5QGX/0M, IY8WAP, PX8W, TZ6EI, VP8DLM, XW1B and YO9HP

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SX5, DODECANESE. Members of Aegean DX Group will activate Agathonisi Island (IOTA EU-001, GIOTA DKS 063 [for Greek Islands On The Air Award <http://www.5-9report.gr/giota>] as SX5AG between September 4-7th. Operators mentioned are Alexandros/SV8CYR, Vassilis/SV8CYV, Ilias/SV8FMY, Giorgos/SV8IJZ, Giannis/SW8MFF and Dirk/ON5CT. Activity is planned for 80/40/20/17 meters using SSB and the Digi modes mainly on the IOTA frequencies. Depending on the propagation, look for activity on 12/10/6 meters SSB. Suggested frequencies are:
SSB - 3785, 7055, 14260, 18124, 24950, 28460 and 50150 kHz
RTTY - 3580, 7035 and 14080 kHz
PSK - 3570 and 14070 kHz
QSL via their manager SV8CYR. For more info, see: http://www.qrz.com/db/SX5AG

T7, SAN MARINO. Operators Gerd/DJ5TT, Thomas/DK9FEC, Peter/DL1FX and Rainer/DL1ZBO will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQWW DX RTTY Contest (September 26-27th) as a Multi-? entry. QSL route TBA.

V5, NAMIBIA. Operators Wolf/DH3WO, Mathias/DJ2HD and Ulmar/DK1CE will be active as V5/homecall between September 5-26th. Activity will be holiday style on 40-10 meters using CW and SSB. QSL via their home callsigns.

VK6, AUSTRALIA. Operators Bernd/VK2IA and Kevin/VK6LW will be active as VK6AA during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via DL8YR. Activity will be from the Northern Corridor Radio Group's (VK6ANC) club station situated about 20 km north from the city center in Perth, Western Australia. See the station at:
http://www.ncrg.org.au

VP8, SOUTH GEORGIA ISLAND. It has been reported that Lars, VP8DIF, will arrive on South Georgia around the second week of October. He will stay at Husvik (WAP GBR-27). QSL via DJ9ZB, by the Bureau or direct. For more info and updates, visit Lars's Web site at:
http://www.lars-boehme.de/vp8dif/

VY2, CANADA (PEI). George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (IOTA NA-029, CIA PE-001) between September 1-28th. Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via

his home callsign, direct or by the bureau.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) will be active as Z37M during the CQWW DX RTTY Contest (September 26-27th) as a Multi-? entry. QSL via Z37M, by the Bureau or info on QRZ.com.

Next Theory Examination

The 21st of September is the closing date for applications to sit the next Theory Examination for an Amateur Station Licence which will be held on Tuesday the 6th of October at 2p.m in the ComReg Offices in Dublin. To reserve a place at the exam intending candidates should forward the appropriate fee to Sean Nolan EI7CD, 12 Little Meadow, Pottery Road, Dunlaoghaire, Co. Dublin.

The fee is 50 Euro or 25 Euro for full-time registered students, repeat candidates and those who are retired, unemployed or have a disability. Cheques and Money Orders should be made payable to the IRTS. When forwarding the exam fee intending candidates should enclose their postal address as well as phone and e-mail contact details. Sean's e-mail address for any further enquiries is ei7cd at gofree dot indigo dot ie

Intending candidates should note in particular, that in Section B of the paper National and International Rules and Operating Procedures- questions on the National Rules will be based on the new Wireless Telegraphy (Amateur Station Licence) Regulations 2009 which came into force on I June 2009. These Regulations and other matters in relation to the operation of amateur stations can be found in the Amateur Station Licence Guidelines published by ComReg in Document 09/45 which is available on the Publications section of the ComReg website at www.comreg.ie

There is also some very useful information available under Radio Theory in the Links section of the IRTS website at www.irts.ie

---

IRTS 2m Counties Contest

Today is the date for the Autumn 2m counties contest. It takes place between 14.00 and 16.00 local. The full rules are available on the IRTS website under the contest tab.

70cms Activity Hour

To try to promote activity and see if it is worthwhile to run a 70cms Counties contest. We will be having a 70cms activity hour following the 2m contest today Both FM and SSB stations will be welcome and both Calling channels will be monitored.432.2 for SSB and 433.5 for FM users.

IRTS SSB HF Field Day

Next weekend is the annual IRTS SSB HF Field Day, full details and rules are on the IRTS website.

Limerick Radio Club

Members of Limerick Radio Club using callsign EI4LRC will be taking part in the IRTS SSB HF Field Day next weekend. A barbeque will also be held on-site weather permitting.

Please contact Ger McNamara EI4GXB on 087-2532512 or ei4gxb /at/ gmail for further details of site location & directions.

MRG Experimenter Radio Group

The MRG experimenter Radio Group VHF/UHF SSB Challenge 2009 will take place between 15.00hrs &#65533; 18.00hrs (local time) next Sunday 6th September.

Fixed section: 144Mhz & 432Mhz (SSB only)

Portable section 144Mhz & 432Mhz. (SSB only)

Any EI/GI operator holding an amateur/experimenter licence can participate. Closing date for logs is October 4h 2009. Please forward completed logs to ei2mrg /at/ yahoo.com Trophies will be presented to the winners of the fixed and portable sections later in the year. A full copy of the rules can be had by visiting www.geocities.com/ei2mrg/

4m Activity

Nick, G0HIK, with 2 friends, will be travelling to The Scottish island of "Isla" [IO65] for 1 week from September 12th.He hopes to be active for the 4M contest on Sunday 13th.

He will probably be working 150 Watts into a 7 element beam on 70 MHz, and possibly have 2M with a 13 element beam and 200Watts. In addition to the above he also plans to be QRV HF for SOTA throughout the week.

His day job is telecoms technician on an oil rig in the Irish Sea.[AP1] IO83GU, where he is QRV on 2M, on SSB, FM, and CW from the works QTH, with good path to EI and GI.

Stolen APRS Digi Equipment

The EI7BFB-2 APRS digi equipment was taken from the premises where the station was housed in Finglas, Dublin.

Taken in the theft were

1 x Toshiba Satellite laptop with Ubuntu Linux installed (This operating system is not a default installation on these laptops) 1 x Kantronics KPC-3+ 1 x Kenwood TM-251e 1 x Watson 13.8V 20A black dual meter PSU

The above was stolen on Sunday the 22nd of this month, at 23:23 (last APRS beacon datestamp).

The stolen equipment belongs to Bernard EI8FDB and Dave EI7BFB SYSOP of the EI7BFB-2 APRS digi in Finglas, Dublin.

If anyone sees this or similar being offered, please contact Bernard at email address, ei8fdb /at/ ei8fdb.org, or 086-6021877

GB2STI Special Event Station

The station will be on the air this year again from the Railway Preservation of Ireland base in whitehead Co Antrim on Sunday the 13th of September.

There will also be train rides on site as it is an open day for the railway preservation society. All QSL&#65533;s via the buro to Brendan gi0kpf.

Tipperary Amateur Radio Group

The next monthly meeting of the Tipperary Amatuer Radio Group will take place on Thursday next the 3rd September in Raheen House Hotel, Raheen Road, Clonmel at 8.00 pm All are Welcome.

Rallies

Cork Radio Rally

Plans are well underway for the Cork Radio Rally which will be held in the Montenotte Hotel Cork on the 13th September.

All the major traders will attend. There is also a special rate for those who wish to stay overnight. Just mention Cork Radio club Rally when booking.

Food will be available all day, parking available. Doors will open around 11am so come early and get that bargain.

If you wish to trade or require a table please contact Con Mac Parthalain on 0861071312 please ASAP.

This week in History

1891 Thomas Edison applied for a movie camera patent.

I would recommend one of the Motorola mobile external speakers from the
90's such as a Spectra or Syntor speaker.

I have a few, including the Mastr2 mobile speaker and Motrac/Mocom 70 metal speakers that are very efficient for use on portables. There are subtle differences in the response curve due to different speaker and housing design Kenwood also makes a smaller mobile speaker that seems to peak at the higher end of the voice spectrum. A little shrill for me. You really need to try different speakers to see what works best for your ear and environment. I am currently using an RCA home theater speaker for an external speaker in another room but another works best in the shack. It is no use to have frequency response below 200 Hz or above 3kHz for best voice reception. PL tones or excessive bass at the low end will interfere with intelligibility at the low end, and at the high end you battle with noise. The actual spectrum that is required for most reliable discernment of what is being said is between 400-2400 Hz.

There are several hearing test web sites that ask stupid questions, but there is one that actually uses test sounds with noise at various levels. If you have a calibrated variable attenuator on your stereo, you can actually plot your hearing performance in each ear. One of these days I hope to stumble on to it again.

I ended up getting a "CLRspkr" speaker with built-in DSP noise reduction. It costs about $215, and
it is sold by West Mountain Radio. Here is a link:
http://www.westmountainradio.com/CLRspkr.htm

The DSP in the speaker is significantly better than the DSP in the Yaesu FT-897. I would rate it as
the best accessory I've added to my ham rig.

2235. Crossposting Permitted to rec.radio.amateur.moderated

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to

Cross-posted to: rec.puzzles,rec.radio.amateur.misc,sci.math,misc.legal,rec.food.cooking

Patrick Jost, award winning architect of Melbourne, Australia, has 3 4gb cards and a pair of 2gb cards with his current camera. Also a pair of 1gb cards with his backup/spare camera.

When travelling, his greatest fear is losing the camera itself, plus any cards in it or the bag. When he swaps a card out, it stays away from the bag until its been backed up. Paranoid, maybe. It also introduces another risk. Loose cards.

Patrick Jost has been known to rotate the cards on different travel days. At the end of day one, the card comes out, even if it’s not full. It might be used again on day four. That way, a card failure will be from different parts of the trip, rather than eliminating a whole section.

On his last trip, one picture was corrupted. It was necessary to shut the camera down and restart to recover so it was probably a camera issue. It hasn’t failed in several hundred shots since then. Needless to say, that card came out right away and wasn’t used again until the pictures were off-loaded and the card reformatted.

.....

Sounds like good, common sense (which has appeared several time before on the photo newsgroups) rather than a secret:
- don't rely on very large cards unless there's a really good reason;
- don't wipe the images from any card until they have been backed up to disc;
- do treat your cards (that is, the photos on them) as being of value.

What I don't understand (maybe it is a part of Patrick's secret) is why this posting was sent to non-photographic groups such as rec.food.cooking (don't drop your card in the soup, perhaps) and sci.math (let's calculate the chance of a card becoming corrupted).

Regards, Roger.

2238. FW: [CQ-Contest] Special Announcement from 6Y1V

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-01 16:39:09 UTC

To: <cq-contest@contesting.com>; "Fabian Kurz" <mail@fkurz.net>
>Subject: [CQ-Contest] Special Announcement from 6Y1V

It's official! 2009 is the year of the Young Ham Contest Program!

Krassy, K1LZ and I (KY1V) have agreed to sponsor a Young Ham team for piloting the 6Y1V contest station in this years CQWW DX SSB contest!

What does this mean? Well, quite simply, four (4) very lucky young hams will be selected this year for an all expense paid trip to Jamaica.

Wow are we excited. Get your essays in quickly. September 30th is approaching fast!

73 and good luck!

David ~ KY1V

PS: Remember, we just create the opportunity. Get on the air and work these kids. YOU make their dreams come true!

>From: "David Kopacz" <david.kopacz@aspwebhosting.com>
Sent: Tuesday, August 25, 2009 4:33 PM
To: <cq-contest@contesting.com>
>Subject: Re: [CQ-Contest] Why Are European Contesters Younger?

Since we're on the subject of youth and contesting, please take a moment to pass this to any young ham, a parent of a young ham or post in your next club publication.

Once again we are sponsoring one young ham operator (21 or under) to join our team and receive an all expense paid trip to operate in the 2009 CQWW SSB or CW contest with the 6Y1V team. You can reside in any country in the world and be considered for this opportunity provided you hold a valid amateur radio license in your country.

This is a gift to a young ham who has a passion for Ham Radio and DX'ing/contesting. It is our way of giving something back to this great hobby that has given so much to us!

To qualify, you must send an email to contest at 6y1v.com containing an essay of 500 words or more, in English, describing how you got started in ham radio, who guided you through the process (tell us about your Elmer), and tell us why you should be selected for this DX/contest opportunity. Please include your full name, call sign and home address.

We are looking for a young ham (21 or under), with some DX/contest experience, that would consider this opportunity a dream come true! You must have your parent's written permission to make the trip on your own, or they may join you, at their own expense.

We will continue to take applications from young hams until September 30, 2009. Our team will review all applicants for the young ham position and select one young ham to join us for this exciting DXpedition and contest opportunity.

We will pay all expenses for the young ham, including airfare, license fees, QTH rental share and food. The rest of the 6Y1V team will ensure this is the most memorable ham radio experience ever!

The selection process is based soley upon each young hams written essay of 500 words or more.

We are particularly interested in young hams that have never operated outside of their home country, have never been on any DXpedition and would not otherwise have opportunity to do so under any other circumstances.

Amateur Radio Newsline(tm) Report 1673 - September 4 2009

Amateur Radio Newsline report number 1673 with a release date of
Friday, September 4, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Wildfires rage in Southern California and
hams go on alert, the father of A-P-R-S proposes a universal ham radio
text messaging initiative, a Virginia ham will commemorate the memory
of those lives lost on 911 and more about those disappearing sunspots.
All of the details coming your way on Amateur Radio Newsline(tm) report
number 1673 right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND THE SOUTHERN CALIFORNIA WILDFIRES

Ham radio has been put on alert as wildfires rage across the state of
California. Bill Pasternak, WA6ITF, is in our newsroom in hot and
smoky Los Angeles with what we know so far:

--

On alert is probably the best way to describe amateur radio's role so
far as emergency responders and firefighters from across the region
responded to a series of wildfires sparked by the intense heat gripping
the great American Southwest and what appears in some cases to be human
carelessness. Investigators will eventually determine the causes but
those of us who live and word in the region only want to see them out.

The biggest of the blazes, and the one that affected ham radio in
several ways is the Station fire that began in the foothills above the
San Gabriel Valley of Los Angeles and raced North across those hills to
threaten the city of Acton. As we go to air, the Station fire has
consumed 144,000 acres in an area that's about 20 miles high by 30
miles wide and is now only about 38% contained. At least 50 homes have
been lost and two firefighters lost their lives when their engine fell
from a winding mountain road and tumbled some 800 feet.

Because of the hardening of the states radio communications system and
the redundancy of gear, few if any emergency communications facilities
were affected by any of the blazes. None the less, several of the
states Disaster Communications Service groups are on alert ready for
full activation at a moments notice. The largest of these is the group
allied to the K6CPT repeater operating on 145.300 MHz and serving the

greater Los Angeles area. As this is written, the repeater is in what can best be described as stand-by alert with all communications restricted to the assisting those fighting the Station fire.

Still with the Station fire, one ham radio repeater network was partially taken off the air by it. Dick Mc Kay, K6VGP, who operates the multiple-site Disaster Amateur Radio Network or DARN reports that their radios on Mt. Disappointment were taken off the air when the fire raced up the hill and took out the power lines. News photos show that one building that housed radio equipment was destroyed, but according to K6VGP the bunker that houses the ham radio system is concrete and its hoped that the radio system survived. The photo shows that the DARN antenna system is still there but its likely that the transmission line from the repeater to it may have melted away.

Dick says that he won't know the condition of the radio gear until he is allowed to make a trip up the mountain to visually inspect the site. The DCS system 145.3 MHz mentioned earlier is also on Mt. Disappointment and is still operating using a massive battery back-up system. This is one of the best ways McKay can be certain that the building that houses both repeaters is still in tact.

And as we go to air, that's about all that's known regarding ham radio in the current spate of fires in the region. But as those of us who live out here know, the worst months of what we call the fire season lies ahead. That comes in a few weeks when the seasonal Santa Ana winds team up with the dry and hot fall weather to create the potential for wind driven brush fires that have been known to swoop down and destroy entire communities within minutes. With this having been an exceptionally hot and dry year, everyone including ham radio first responders will be on high alert until the winter rains come, if we have any this year at all.

Reporting from Los Angeles where the sky is yellow with smoke, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline

--

It will be a while before many of these wildfires are declared contained or controlled and we will have follow-ups in future Newsline reports. (ARNewsline with assistance from CGC Communicator, K6VGP, K6OQK, others)

**

RESCUE RADIO: A UNIVERSAL HAM RADIO TEXT MESSAGING INITIATIVE

A universal ham radio text messaging initiative has been proposed by the ham who gave the hobby APRS. Writing in the special emergency communications issue of QST magazine, Bob Bruninga, WB4APR, introduces a broad new initiative to find ways to seamlessly connect many of the dozens of existing amateur radio text messaging capabilities together.

Bruninga's concept is that of a universal information exchange between ham radio, the Internet, cellphone and other broadband devices. Also included is the ability to do station tracking using APRS and message exchange to and from DTMF equipped ham radio gear.

Under the WB4APR concept all a ham radio operator would need would be his or her callsign as a text address to have emergency test messaging available. His article titled a Universal Ham Radio Text Messaging Initiative begins on page 72 of the September issue of QST. (ARRL)

**

HISTORY REMEMBERED: W0YR TO COMMEMORATE 911

A ham in Virginia will take to the airwaves to remember the lives of those who perished in the terrorist attacks of September 11th 2001. Michael Lonneke, W0YR, of Round Hill, says that his year after year operation as W0YR stroke 911 has several objectives. First is to honor and commemorate the lives of those lost in the terrorist attacks on the World Trade Center Twin Towers in New York City, the Pentagon in Arlington, Virginia, and the plane that crashed into a field near Shanksville, Pennsylvania.

Lonneke also says he does this every year to remind those whom he contacts of what this country endured on September 11th 2001 because of hatred. He also wants to remind those who would be revisionists of history and who want to minimize or forget the attacks that they were an act of terror against our nation.

Lonneke says that he will be operating CW, RTTY and SSB 10 through 80 meters and that a special QSL will be issued. QSL Mike via W0YR at his callbook address.

W0YR says that the memory of those who perished on September 11th, 2001, will never be forgotten. Two of those who died were his friends. (W0YR)

**

SOLAR PROPAGATION: FINALLY A SHORT LIVED SUNSPOT

The imminent demise of Sunspot 1025 seems to reinforce our report last week on the work of astronomers Bill Livingston and Matt Penn of the National Solar Observatory in Tucson, Arizona. They have found that sunspot magnetic fields are definitely waning and believe that sunspots could completely disappear within a few decades.

According to Spaceweather dot com, sunspot 1025, which emerged on Monday, August 31st to interrupt a string of 51 spotless days. Sunspot 1025 was described in an eHam.net posting by Thomas Giella, NZ4O, as a small solar cycle 24 sunspot group that had emerged in the northern and western hemisphere of the Sun. But it did not last very long. On Wednesday, September 2nd, Spaceweather announced that sunspot 1025 was rapidly fading away. (Spaceweather, eHam)

**

BREAKING DX NEWS: FIRST EVER EME DXPEDITION TO MONGOLIA

Some breaking DX news. This with word that JT1UN and JT1UN/5 will be the call signs of the first ever E-M-E DXpedition to Mongolia by W7EME, and K7YO. The operation will begin on October 10th and continue through the 14th. W7EME will operate JT65B on 144 MHz with K7YO on 432 MHz. Equipment on 2 meters will be a single M2 yagi and 450 watts output. The70 centimeter station will run 250 watts to a pair of long beams. More details are at www.mmmonvhf.de/latest.php?id(49 (MMMonVHF)

**

WORLDBEAT: RADIO CHINA TO VACATE 7.1 TO 7.2 MHz HAM SPECTRUM

Good news for hams who use 40 meters. The IARU Region 1 website reports that Radio China is to stop broadcasting on five frequencies in the 7.1 to 7.2MHz range.

Chinese authorities say that they have made frequency adjustments to their broadcasting schedule as it affects all transmissions that were previously operating in the new, exclusive, worldwide 7.1 to 7.2MHz amateur radio band. Transmissions from the Radio China transmitters should be out of that spectrum shortly. (ARRL, WIA, others)

PUBLIC SERVICE: HAMS NEEDED TO ASSIST IN BOSTON JIMMY FUND WALK

Steve Schwarm, W3EVE, says that he is in need of several hams to help with the Jimmy Fund Walk on Sunday September 13th This is a one day event dedicated to conquering all forms of cancer held on the Boston Marathon course and taking up most of the day.

Steve says that as with the Marathon, radio amateurs on 2 meter FM will be on posted on transport busses and at each first aid and water stations. If you live in the Boston area or will be there on the day of the event please contact Steve by e-mail to w3eve (at) earthlink (dot) net. More on the event is on line at www.jimmyfundwalk.org (W3EVE)

**

WRONG HEADED ENFORCEMENT: FCC CITES CALIFORNIA RESIDENT OVER DEFECTIVE INDOOR TV ANTENNA

You may find this one hard to believe, but the FCC has issued a Citation to California resident Irma Frausto for using a defective amplified indoor television antenna in the residence in the city of Compton. One that she could not possibly know was playing havoc with a nearby cellular telephone site. Bruce Tennant, K6PZW, has more:

--

On August 13th agents from the Los Angeles FCC Office investigated a complaint that something was interfering with the operation of a Verizon cellular site. The agents T-hunted the interference to the Frausto's residence. Further investigation revealed that the source of the interfering signal was a Philips model MANT 300 amplified television antenna installed on top of a television set in the Fausto home. .

Apparently the antennas internal amplifier had broken into self-oscillation on 840.356 MHz. The spur was strong enough to interfere with the input to a Verizon local cell site. And you would think that's where it would all end. Disconnect the faulty antenna and problem solved. But that's not where this story ends.

On August 20th the FCC issued a Citation to Irma Fausto naming her as the responsible party. Why the FCC chose to issue a Citation rather than the usual warning letter or any letter at all is not explained.

And if we may editorialize a moment, even stranger is the demand by the FCC that Ms. Fausto respond to the Citation and specify what actions have been taken to correct the violation when its likely all she would do is return it to where she bought it or throw the thing in the nearest garbage can. At least that's what we would do.

We also wonder if the FCC intends to follow up with Philips to make certain that no other MANT 300 amplified indoor antenna is causing similar problems elsewhere in the United States. One would think that Phillips is the responsible party in this scenario since it was the one who manufactured the defective amplified antenna in the first place.

Lastly we must ask why so much emphasis is being put on reprimanding a citizen for something beyond her control when there are far more important matters to contend. This definitely includes cleaning up the now almost two decade old rats nest of jamming, filthy language, illegal broadcasting and other violations found on 14.275 MHz in the 20 meter band. Violations that the FCC seems to be turning a blind eye to no matter how much the ham radio community complains.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting and editorializing from Los Angeles.

--

Oh yes. Those of you interested in a good lesson in government bureaucratese can read the entire text of the Citation issued to Irma Fausto at http://www.fcc.gov/eb/FieldNotices/2003/DOC-292933A1.html (CGC, FCC, ARNewsline(tm))

**

ENFORCEMENT: FCC ORDERS TV STATION TO STOP ITS ANALOG AUDIO TRANSMISSIONS

The FCC has ordered a television broadcaster to cease its audio transmissions on 87.9 MHz in the FM broadcast band. Since last June 12th conversion of all TV from analog to digital the digital signal of Freedom Broadcasting's WRGB-TV, channel 6 in Schenectady , New York has been broadcasting its audio over analog 87.9 FM, but it was apparently without permission.

Now the FCC orders that the station cease doing so immediately and WRGB has complied. Station manager Robert Furlong admitted in a posting to the stations website that it did not have FCC authorization to transmit any analog signal at this time. Furlong said that the station is reviewing for getting the station back on FM. (FCC)

**

WORLDBEAT: ZL 3 CM CONTACT IS NOT A WORLD RECORD

A follow up to last weeks story on the hams down-under setting what some thought might be a new worlds record for the 3 centimeter band. According to Gene Zimmermann, W3ZZ, who writes the World Above 50 MHz column for QST magazine, that 3 cm microwave contact may have been a record for New Zealand but it's definitely not a terrestrial world record.

According to Gene, as recently as August 25th K2LNS operating at WA2FGK worked W9ZIH over a distance of 1086 km. Many longer contacts across the Mediterranean have also been made. Currently, the world terrestrial record is I stroke DJ3KM to 4X slash DJ4AM. That one was over a path of 2079 km. (W3ZZ)

**

HAM HELP REQUIRED: AMSAT NEEDS TWO PUBLICATION VOLUNTEERS

AMSAT-North America currently has two positions that need a volunteer to jump in and assist with its publishing efforts.

First, the AMSAT Journal needs a person who can provide translation from German to English. This is because AMSAT-DL has published several significant updates about the Phase 3 E satellite project which need to be shared with English speaking operators. The same volunteer would also be tasked with translation from English to German to enable sharing of articles both ways.

Also, the weekly AMSAT News Service ANS Bulletins has an opening for an editor to take on news gathering and reporting work. This is a rotating position shared with 3 existing editors so your duty would occur approximately once every 4 weeks.

If you can help please contact AMSAT Vice President of User Services, Gould Smith, by e-mail to wa4sxm@amsat.org (AMSAT-NA)

**

HAM HAPPENINGS: VW MOBILE DXPEDITION NEEDS OPERATORS

A three month mobile DX expedition in a restored 1971 VW van is looking for operators. The course will begin in Mexico in November and wind up in Tierra del Fuego off the southernmost tip of the South American mainland. Those interested must be in good health, expect an arduous high drama journey and be ready for weather variations ranging from the searing heat of the Amazon jungle to the bitter cold of windswept Cape Horn. For more information, contact K0GMO by e-mail to gorvonj4@frontiernet.net . (K0GMO)

**

HAM HAPPENINGS: FREE DXPEDITION TRIP FOR A YOUNG HAM

The operators of the 6Y1V contest station in Hopewell, Jamaica, are offering a young radio amateur the chance to join their team for the 2009 CQWW SSB or CW contest. Applicants must be age 21 or younger. The operator selected will receive an all expense paid trip to join the teams operations in one of the two contest operations. The 6Y1V group calls this project a gift to a young ham whom has a passion for ham radio, DX'ing and contesting. It says that it's the groups way of giving something back to this great hobby that has given so much to them. More information is on line at www.6y1v.com/youth.htm (6Y1V)

**

THE SOCIAL SCENE: DIGICON 09 IN IRELAND SEPTEMBER 19

Turning to the ham radio social scene, word that the Northern Ireland Digital Communications Conference known as Digicon 09 takes place on Saturday September 19th . The venue is the Technology Education Center in Tyrone, Ireland. The Digicon 09 features lectures on D-STAR, Satellite Communication, Digital ATV, Echolink and more. Further details are on line at www.wtarc.co.uk (MI0MSO)

**

ON THE AIR: CELEBRATING THE 19TH ORKNEY INTERNATIONAL SCIENCE FESTIVAL

The Orkney Wireless Museum Amateur Radio Station in the United Kingdom will be in operation from its premises at Kiln Corner, Kirkwall through Wednesday 9 September. This, during the 19th Orkney International Science Festival. Probable operating periods will be weekdays and Sunday afternoons between 2.30 and 4.30pm and Saturday morning between

10 am and 12.30pm. Operation of this special events station will be primarily on High Frequency SSB. The Science Festival attracts participants from as far away as Australia, Slovenia, Ghana, Russia, Denmark, Spain, as well as from across the UK. Topics range from studies of the ice of the Antarctic to the Cross River gorillas of Nigeria and the Cameroon. (Southgate)

**

THE SOCIAL SCENE: DAYTON 2009 VIDEOS FROM ARVN

And back in the United States, producer Gary Pearce, KN4AQ, spent his days at the 2009 Dayton Hamvention with camera in hand. Now after three months of editing in his North Carolina studio, Gary and his Amateur Radio Video News organization has released what he called the 2009 Dayton Collection. This years set includes the FCC forum where you get to know the new ham radio rules enforcer Laura Smith. Also included are the ARRL, TAPR and Software Defined Radio sessions along with a tour of all the goodies to be seen at this years Hamvention. For details take your web browser to www dot arvideonews dot com. (ARVN)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: MEASURING THE NEAR INFRA-RED SPECTRUM

In what may prove to be a major development for scientists in fields ranging from forensics to quantum communications, researchers at the National Institute of Standards and Technology have developed a new, highly sensitive, low-cost technique for measuring light in the near-infrared range. According to Science Daily, the technique can measure the spectrum of the specific wavelengths of near infrared light used widely in telecommunications as well as the very weak infrared light at single-photon levels given off by biomaterials and nanomaterials. More on this interesting scientific concept can be found on-line at http://www.sciencedaily.com/releases/2009/08/090826152723.htm (Science Daily)

**

HAM RADIO IN SPACE: FO-29 IN RECOVERY MODE

In ham radio space related news, JE9PEL reports that the Fuji Oscar 29 ground control stations have been working on recovering this satellite. This, after an outage reported by users during the week of August 24th.

As of August 28 the control station has succeeded in transmitting commands to the satellite and received good response. But to be on the safe side FO-29 is available only when it is over Japan so that the control station can command the satellite, retrieve telemetry data, and analyze the results.

The receiver aboard FO-29 is used for both command and transponder operations. If it were open for general world-wide use there might be far too many stations attempting to uplink to the bird that would interfere with ground controllers efforts to command the satellite.

Fuji Oscar 29 controllers say that they will advise when the satellite becomes available for general amateur radio use. Check the AMSAT website for the latest information on the satellites availability. (ANS)

**

HAM RADIO IN SPACE: GOOD NEWS FOR ARISSAT-1

Some good news regarding the ARISSat-1 project. The ARISS International Team has been informed that there is still space available for shipment of the ARISSat-1 electronics on the projected cargo flight to the International Space Station in January of 2010.

As reported last week, ARISSat-1 is the new name for SuitSat-2. This, the result of the spacesuit that was to house SuitSat-2 being cast away from the International Space Station several weeks ago.

And speaking of SuitSat-2, word is that the spacewalk to launch it is still set for April 2010. Only now it will likely be the ARISSat-1 deployment instead. (ANS)

**

WORLDBEAT: 6 TO 10 METER CROSSBAND REPEATER PROPOSED IN THE UK

A new 6 meter to 10 meter crossband repeater may soon come on the air from the United Kingdom. G3ZXX reports on a meeting with the nations Emerging Technology Coordination Committee which is responsible for vetting all repeater proposals within the UK and with telecommunications regulator Ofcom. He says that no special authority in the form of a Notice of Variation has been granted for the machine. However, subject to some minor changes to the application its hoped that it will be approved. Further information and updates on this project re at the URL found at http://twxrg.web.googlepages.com/home (G3ZXX)

**

WORLDBEAT: NEW VK 137 kHz BEACON ON THE AIR ON WEEKENDS

The Wireless Institute of Australia reports that a new low frequency beacon is on-the-air from the township of Wonga Park. Operated by Drew Diamond, VK3XU, the system consists of a 50 watt transmitter into a long-wire antenna operating CW on 137.4 kHz. Its on the air Saturday and Sunday afternoons and evenings local time. QSN reports go to Drew by e-mail to vk3xu (at) wia (dot) org (dot). Please provide the date, time, signal strength and grid locator of the received signal at your station. (WIA)

(WIA)

**

ON THE AIR: 4U1VIC TO OPERATE WORKED ALL EUROPE DX CONTEST

On the air, word that the Vienna International Center Amateur Radio Club station 4U1VIC will be on the air during the Worked All Europe DX Contest on September 12th and 13th. This will be a SSB only operation with the station is located in the secured United Nation campus in Vienna, Austria. Due to access restrictions, the operators will not be able to be on the air continuously for the full 48 hours, however they will be on the air as much as possible. QSL this operation via the bureau. A new video about the 4U1VIC is available at www.vimeo.com/6301009 (OPDX)

**

ON THE AIR: CELEBRATING RAILWAYS IN IRELAND

And from Erin's Isle comes word that GB2STI will be on the air again this year from the Railway Preservation of Ireland base in Whitehead County Antrim. This in celebration of the Open House Day of the Society. Operation will be on Sunday the 13th of September and as an added attraction there will be train rides on site. All QSL's go via the bureau to GI0KPF. (IRTS)

**

ON THE AIR: ZS10WCS TO CELEBRATE 2010 WORLD SOCCER GAMES

As of September 1st, members of South Africa's Boland Amateur Radio Club have taken to the air as Zed-S-10-W-C-S. This, to commemorate the upcoming 2010 World Cup Soccer games. The special event station will be on the air over weekends South Africa time as propagation conditions allow. Full details of preferred frequencies and QSL information are available on www.sarl.org.za. (Boland Amateur Radio Club)

**

DX

In DX, word that Bob Paton VK0BP, is currently working at the Antarctica Davis Base Station and will be there until November 1st. Check for him on 14.010 to 14.350 MHz from about 1500 to 1800 UTC on

SSB and PSK31. The Shortwave Central blog says Bob may also activate other field huts in the area where he will sign-on as VK0BP slash P. QSL as directed on the air.

EA5BZ and possibly other operators from the U-R-E Contest Group will be active as C37URE from Andorra during the CQWW DX RTTY Contest. This, on September 26th and 27th. QSL via EA5BZ.

F4EUG, will be active from Guadeloupe portable FG through September 10th. His activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

HB9VELO will be on the air throughout September to mark the U-C-I Road World Championships taking place in Mendrisio, Switzerland. Operation is SSB, CW, PSK and RTTY on all bands. The QSL manager is HB9OCR.

A station signing C31LJ slash M heard on August 27th is reported to be a pirate operation. VE3EXY the real C3ILJ is currently in Canada.

HS8JYX, is planning to be in the CQWW DX SSB from Thailand. That radio sport event takes place October 24th to the -25th and he will enter as a Single-Op/Single-Band 20 meter entry. QSL via HS8JYX.

OY4TN reports that OY2J is once again active from Faroe Island after being QRT for many years. He has retired from his job and has finally found time to set up his radio station again. Reports indicate that he has been on 20 meters using CW and SSB.

Higher in frequency, N8OFS will be using the special callsign N8O on 6 meters from Geneva State Park in Grid EN91MV. This for the Ohio State Parks On The Air and ARRL September VHF Contests on September 12th between 1800 and 2400 UTC. Operation will be FM only on 52.525, 52.54, 52.49, 52.51 and 52.55 MHz. QSL direct only to N8OFS

Lastly, where there is no 4 Meter band in I-T-U Region 2, its widely used in Region 1 especially in Europe. Now word that G0HIK, with 2 friends, will be traveling to the Scottish island of Isla for a week from September 12th. He hopes to be active for the 4 Meter contest on Sunday 13th. He will probably be using 150 Watts into a 7 element beam on 70 MHz, and possibly 2 meters with a 13 element beam and 200 watts. If you have a 70 MHz receiver, you might want to listen out for this 4 meter signal from across the Atlantic pond.

Above from various DX news sources

**

THAT FINAL ITEM: AN ADDED FEATURE FOR A POPULAR HT

And finally the story of a strange feature of a popular HT. One that could save your life. Well, maybe. Marilyn Syme, VK3DMS, of the WIA News has this rather dramatized comedy report:

--

A practical example of the Emergency feature on the FT-60R. After testing the Emergency feature of the FT-60R, a web poster has scenario created the following for your enjoyment.

>From the manual: "Use this feature if you are out on a walk and want a quick way of alerting a family member to a dangerous situation. The alarm sound may discourage an attacker and allow you to escape."

(It might work this way)

Mr. Ham : "It's a lovely day for a walk."

Attacker: "I'm going to attack you."

Mr. Ham : "Wait right there, Mr. Attacker while I unlock my FT-60R keypad, place it in VFO mode, set the volume to maximum, and hold down the Emergency key shortcut for 2 seconds."

FT-60R: *blink, blink, blink* *beep, beep, beep*

Mr. Ham: "Ah ha! Now Mr. Attacker, my blinking LCD display and DTMF keypad will blind you while the beeping sound will disorient you."

Attacker: "Oh no!"

Mr. Ham: "In 60 seconds, my FT-60R will also send SOS de CALLSIGN via CW on the UHF calling frequency and any amateur radio operator within 1/2 mile who both knows the frequency of and is monitoring the UHF calling frequency will hear *beep, beep* on his radio too. He will then return home and either retrieve his UHF direction finding go-kit or improvise some from the ARRL Handbook. When he returns and locates my position, he will then call the authorities and inform them of my situation."

Attacker: "I am discouraged."

Im Marilyn, VK3DMS.

--

Well, that might work down-under but here in the USA the radio would likely be up for sale on the Internet long before you could report the theft to the local police. (WIA News)

Replacement issue

GB2RS NEWS

Sunday 6th September 2009

The news headlines

* RSGB response to Ofcom statement on Power Line Adaptors

* Beat the intruders with CW says IARU

* Bletchley Park disappointed with Government response

The RSGB notes Ofcom's recent statement on PLT with alarm and concern. The RSGB has been engaged with Ofcom on this matter now for several years and is surprised that it has made such a statement without proper consultation with affected parties beforehand. The statement is dismissive of the issue, inaccurate in many respects and fails to respond to the recent formal, detailed, complaint submitted by the Society. While the Society is pleased to hear that it will be consulted as part of the independent consultation that Ofcom intend undertaking, we feel that this can only delay matters further and will add little to the wealth of knowledge already available on the subject. The Society will make a more detailed public response shortly. The full Ofcom statement can be found on the Ofcom and RSGB websites.

The IARU is encouraging amateurs to get on the air and use CW on the 7MHz band. This is because Portuguese fishermen are abusing 7000.4kHz using USB every morning from 0700 - 0900UTC and later. These fishermen are located off the North of Portugal. Use this frequency for CW traffic, says the IARU.

Following the disappointing government response to the Downing Street petition urging the Prime Minister to offer assistance to Bletchley Park, the Bletchley Park Trust has been boosted by an overwhelming reaction of public support. The government responded that although it agreed that the buildings on the Bletchley Park site are of significant historic importance and, although recognising the excellent work being carried out there, at present it has no plans, nor the resources, to extend its sponsorship of museums and galleries beyond the present number. The investment from English Heritage and Milton Keynes Council has provided great help with the substantial infrastructure works needed and visitor numbers to Bletchley are steadily increasing. The Bletchley Park Trust is committed to their restoration of the historic site.

At the invitation of the Western Education and Library Board, GB4FUN will be in Northern Ireland for the majority of September. The programme includes 46 school slots spread over two weeks during which over a thousand pupils will enjoy the GB4FUN experience. GB4FUN will also be undertaking a number of club visits and will also take part in DiGIcon 09 which takes place on Saturday 19 September. Full details of the GB4FUN Northern Ireland visit can be found on the GB4FUN website.

The MoD has informed Ofcom of a GPS jamming exercises taking place between 7 and 11 September and then between 14 and 18 September in Mid Wales. The exercise will take place between 9 and 5pm. The actual location is within 5km of North 52 degrees 0.881 minutes and West 3 degrees 38.518 minutes, which is the Sennybridge Training Area, Mid-Wales.

Replacement issue

An RSGB Train the Trainers session will take place at The Post Mill Community Centre, Market Street, South Normanton, Derbyshire DE55 2EJ, on 19 September. Note that this is in addition to the Telford session on the same date. The Train the Trainers scheme helps tutors enhance the standard of their Foundation, Intermediate and Advanced licence courses. Alan Betts, G0HIQ, and Brian Reay, G8OSN, will be presenting the all-day course. For more information and to register, contact Jim, G0EJQ, on 01522 532604 or by e-mail to g0ejq@rsgb.org.uk. For details of further Train the Trainers sessions, see the calendar at www.g8osn.org.uk.

The RSGB National Club of the Year competition is well under way with many clubs across the UK committed to take part. Entries for the Regional competition have to be in by 31 December and the winners of the Regional heats will be put forward to the National competition. The winning club will be announced in April 2010 and the winners will receive a major prize plus the National Cup and a certificate. Full details can be found on the main RSGB website and on the individual regional websites.

Even more traders have booked to attend the National Hamfest on 2 and 3 October at the Newark and Notts Showground. The latest traders to book are Vine Antennas, KMK UK Ltd, Tecadi from Germany with their ex-army masts and David Wood with lots of components and other useful bits and pieces for the radio amateur. Over 100 tables have been booked and so there will be plenty for the visitors to browse both inside and outside the main hall.

And now for the details of rallies and events for the coming week

The annual Telford Hamfest place today, Sunday, 6 September, at Enginuity, the hands-on engineering museum in Coalbrookdale, Telford, Shropshire TF87DQ. The usual traders will be in attendance. There will also be lectures by GEO, the weather satellite group. Doors open at 10am. More information from Mike, G3JKX on 01952 299677 or Martyn, G3UKV on 01952 255416.

The Leicester Amateur Radio Show will be on Saturday 12 and Sunday 13 September at Loughborough University, just over 1 mile from Junction 23 of the M1. Visitors should enter the University by the West Entrance and follow the signs for the radio show parking. Once parked they should board one of the shuttle coaches that will take them to the Exhibition Hall. Disabled visitors arriving by car should enter the University via the East Entrance and follow the signs to the disabled parking area. For further information phone 01455 823344.

The Torbay Annual Communications Fair will take place at Newton Abbot racecourse, Newton Abbot, Devon TQ12 3AF. Doors open at 10.30am with disabled visitors able to gain access half and hour earlier. Entry will cost £2. There will be the usual trade stands, a Bring & Buy as well as catering facilities.

Now for the news of special events

Members of the Gloucestershire Amateur & Electronics Society will be running GB2GHW for Gloucester Heritage Weekend on 12 and 13 September. St Michael's church tower has recently been refurbished as a heritage cultural centre thanks to Lottery funding. The tower is right on the city cross and they plan to erect a dipole antenna from the top of the tower and will be working from 10am to 4pm.

Replacement issue

Hoover ARC will be operating as GB0BHR for the Blaenavon Heritage Railway on 12 and 13 September from the platform of the station. If you are in the area, the group invites amateurs to call in and see them.

GB4GCL, for the Girl guides Centenary Launch, will be active from 2 to 6pm from The Parks, North Shields. Operation will be on HF as well as 2m, 70cm and 6m. Details from Ken, M1DZV on 0191 371388.

Churches and Chapels on the Air is on Saturday 12 September. To see those participating look at www.wacral.org and click the CHOTA 2009 tab.

GB0CAS for Campton All Saints will be operating on 80m in the CHOTA event that will be on air during the annual Historic Churches Trust Bike `n Hike sponsored cycling and walking fundraising event on 12 September. It will be on the air between 10am and 6pm. QSLs to G3JNB.

Between 10 and 13 September, GB80RBP will once again be operating from the former RAF station Bentley Priory, for the Civic Trust's Open Heritage Weekend in Stanmore, Harrow, NW London. The Radio Society of Harrow is planning to demonstrate various modes including HF, RTTY with Creed Teleprinters, ATV, SSTV, PSK31 and Morse code to the visiting public over the weekend. There will also be some WW2 military radio kit on display. All visitors are welcome over the weekend. On 10 and 11 September there will be private tours of Bentley Priory. Further details on the Bentley Priory Battle of Britain Trust's website.

GB50ATG will be operated by John, GW4SKA, for the month of September. This special event call is to celebrate the Golden Jubilee of BARTG, the British Amateur Radio Teledata Group. Look for him on both RTTY and PSK. John, as a keen contester, will probably be active in the RTTY contests in September, especially the CQWW. Check www.bartg.org.uk for details of the Golden Jubilee Award, special QSL cards and also wall plaques. GB50ATG will be on the air until the end of June 2010.

GB1WT will be on the air from Wickham in Hampshire to commemorate over 200 years of the Admiralty Shutter Telegraph System. The event is scheduled to start at 2pm on Wednesday 9 September and will finish at 9am on Saturday 12 September. Operation will be on the HF bands including 40m. Full details of the event are on QRZ.com.

And now the HF DX news compiled from 425 DX News and other sources.

There will be a lightweight, solo DXpedition by N7OU to Chatham Island signing ZL7/N7OU between 18 and 30 September. It will be CW only on 10 to 80m, QSL via N7OU.

Between 8 and 17 September W3BTX and W3TEF will be again activating P41USA. This operation will also include the September VHF Contest. All QSLs should go to W3TEF.

An ecological radio amateur autoexpedition called Eurasia Rally 2009 will take place until 21 September. They plan to cross over 10,000km of territory in Russia, Kazakhstan, Uzbekistan and Kirghizia during the trip. From territory of the Russian Federation they will be active as homecall/P. The special callsign UP3WFF will be used from Kazakhstan. The other callsigns are not yet known.

Replacement issue

The expedition will be active on 7, 10 and 14MHz. It will be possible to watch the expedition's movement at www.eurasia-rally.com.

OZ6OM will be on the air in the Nordic Activity Contest on 10 September between 1700 and 2100UTC. He intends to transmit around 50.173 and 50.230MHz. If the weather is good he will go hill- topping from JO55CE otherwise it will be from JO55EJ.

Now the contest news

Three RSGB contests are taking place today, 6th September. It's the final hours of the ever-popular RSGB SSB Field Day, which finishes at 1300UTC; the RSGB 144MHz Trophy Contest that finishes at 1400 and the fifth and final 2m Backpackers Contest of 2009 that finishes at 1500UTC.

The Worked All Britain 144MHz QRP Contest takes place today, Sunday 6 September, from 1000 to 1400UTC. The exchange is report serial number and WAB square. Contestants are encouraged to know their locator square to enable them to exchange details with those in the RSGB Trophy and Backpackers events which coincide. Rules and logsheets are available from the Contest Manager G0BFJ QTHR or from the WAB website

www.worked-all-britain.co.uk.

September 8 sees the 432MHz UK Activity Contest take place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

On 10 September the 80m Club Sprint takes place between 1900 and 2030UTC. It's the SSB leg and the exchange is serial number and name. Power restrictions are 10 or 100W.

The IARU International Amateur Television Contest takes place from 1800UTC on Saturday 12 September until 1200UTC on Sunday 13 September on all bands from 70cm upwards. Stations are encouraged to participate, or just look for increased amateur TV activity on these bands. Talkback is most likely to be found on 144.75MHz FM. Details of how to enter the contest can be found on the BATC website, www.batc.org.uk; entrants do not need to be BATC members.

The 2nd 70MHz Contest takes place on 13 September from 0900 to 1200UTC. Using all modes, the exchange is signal report, serial number and locator.

The entire 48 hours of the following weekend, 12/13 September, is when the Worked All Europe SSB Contest takes place. Remember that European stations only want to work non-Europeans, so please don't try to give points away to them. Instead, call DX stations, who will be delighted to work you. The contest runs between 0000 and 2359UTC over than weekend and the exchange is signal report and serial number.

The 51st Scandinavian Activity Contest CW leg takes place on between 1200UTC on 19 September and 1200UTC on 20 September. Using the 3.5, 7, 14, 21 and 28MHz bands, the contest exchange is signal report and serial number.

Replacement issue

Now the solar factual data for the period from the 24th to the 30th of August, compiled by Neil Clarke, G0CAS on the 31st of August.

Two notable events took place during the period. The first, on the 26th, when the Sun had been spotless for 700 days for this minimum. The first spotless day took place on the 27th of January 2004. Looking back at the last ten sunspot minimums the average number of spotless days per minimum is only 485. Remember that there will be many more spotless days to come before the Sun will display spots again on a regular daily basis. The second event took place on the 29th when the Sun had been spotless for 50 consecutive days. This makes it the fourth longest period on record dating back to 1849. Out of interest, the third longest spell lasted 54 days in 1879, the second was in 1901 and lasted 63 days. The longest spotless period lasted 92 days and took place in 1913. To break that record the Sun would have to remain spotless until the 11th of October. Will it happen? As always we will have to wait and see. Who said sunspot minimum was boring?

Solar activity was very low with the Sun spotless every day. Solar flux levels barely moved from day to day and averaged 68 units. The 90 day solar flux average on the 30th was 68. That's one unit up on last week where it reached its lowest level. X-ray flux levels remained below the minimum reporting level every day. Geomagnetic activity was quiet until the 30 when a coronal hole disturbance arrived. This was slightly more active than expected with the hole increasing in size since it's last rotation 28 days ago when the Ap reached 10 units. On the 30th the Ap was 19 units. The worst of the disturbance lasted for 12 hours from 0600 hours to 1800 hours. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second to 490 by the 30th. Particle densities were low, however, around midday on the 30th they peaked at 17 particles per cubic centimetre. While the geomagnetic field was quiet the Bz only varied between minus and plus 5 nanoTeslas but on the 30th varied between minus 11 and plus 12 nanoTeslas.

And finally the solar forecast. This week solar activity is expected to be at very low levels. Could the Sun be spotless for another week? Solar flux levels should be in the high 60's for most of the week. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. Darkness hour lows are expected to be about 9MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try this path will be between 1000 and 1700 hours UTC. We are now at the end of this year's summer sporadic-E season; therefore, this will be the last forecast. Openings could still take place during the coming week. Also the occasional openings may take place for the next couple of months. Openings will tend to be brief and not very intense. There is a short winter sporadic-E season which normally takes place around Christmas and the New Year period.

And that's all for this week from the propagation team.

NEWS FOR SCOTLAND Today, Sunday 6 September, will see the last GB2RS news reading to be given by Ron, GM4DQJ at 9am on 145.525MHz in the

Perth area. Ron started his readings in July 1984, and has thus been serving the RSGB in this way for some 25 years. We thank him for his dedication and now have to ask for an RSGB member to come forward and take his place. The remaining reader for the Perth area is Paul GM6MEN, who is willing to carry on as a sole reader for a few months, but needs a back- up reader if he is to continue beyond the end of this year. Possible volunteers should contact the GB2RS News Manager Gordon, G3LEQ on 01 565 652 652 for further information.

On Tuesday 8 September Livingston and District Amateur Radio Society is having an operating evening. Contact Norman, on 07740 946192.

On Wednesday 9 September Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905.

On Wednesday 9 September Lothians Radio Society is having a talk on offshore pirate radio by Colin Wright, GM4HWO. Contact Andy Sinclair, by email to lrs_secretary<at>moosedata.com.

On Thursday 10 September Aberdeen Amateur Radio Society is having a talk on Ham Radio Deluxe by George Anderson, GM0VGI. Contact Lewis, GM4AJR, on 01224 575 663.

NEWS FOR WALES On Monday 7 September Dragon Amateur Radio Club is having a talk on the strange world of digital signals by GW0ETF. Contact Stewart Rolfe, GW0ETF, on 01248 362229.

On Monday 7 September Llanelli Amateur Radio Society is on the air. Contact Craig, MW0MXT, on 01269 840292.

On Saturday 12 September Swansea Amateur Radio Society is running a coach trip from south Wales to the Leicester Amateur Radio Show at Loughborough University. For details or to reserve a seat Contact Roger, GW4HSH, on 01792 404422.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

2242. ELF Destroys Radio Tower over Antenna Dispute

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-04 17:46:45 UTC
From: Anon <anon@anon.anon>

Lunatic Fringe I know you are out there...

A couple of years ago the ELF started burning cables to antennas for cell towers and ham radio operators in the Portland, OR area.

==> GET SET FOR THE 2009 SIMULATED EMERGENCY TEST

It's time to get ready for the 2009 ARRL Simulated Emergency Test! ARRL
Field Organization leaders are planning an event that will actively
involve members of the Amateur Radio Emergency Service (ARES), the Radio
Amateur Civil Emergency Service (RACES), the ARRL National Traffic
System (NTS) and many other related groups that prepare for and respond
to emergencies. Public service agencies and organizations in your
community, ARRL Section or state will also be invited to participate.
```

You, too, are invited to be a part of this ARRL sponsored nationwide exercise on October 3-4, 2009, or whenever it is held in your area.

Although October 3-4 is the focal point weekend, ARRL Sections, ARES teams and nets may conduct their exercises anytime -- and especially during September through December. If you don't know who to contact, please touch base with your ARRL Section Manager and/or Section Emergency Coordinator or Section Traffic Manager for assistance. See page 16 of QST for Section Manager contact information or check the ARRL Web site <http://www.arrl.org/sections/>. From there, you'll find links to ARRL section pages with appropriate contact information. There can be a role for you no matter what your level of experience. After all, it is a training opportunity to try out something new under simulated emergency conditions, learn or practice useful skills in traffic handling and net operation, and observe emergency communications protocols and management.

ARRL Field Organization officials in your area and Section are planning the simulated emergency scenarios that will be used during the SET event. These scenarios are designed to help you gain valuable operating experience, or to practice what you have learned previously or to put your Amateur Radio Emergency Communications Course training into action. In any emergency -- real or simulated -- a number of public service or public safety agencies and organizations are often also involved in the response.

ARRL Section Leaders and local or district-level leaders are encouraged to work closely with these served agencies, and the SET is a great chance to demonstrate the capabilities of Amateur Radio in the community and beyond. For more information on whom the ARRL maintains a National Memoranda of Understanding with, check this page <http://www.arrl.org/FandES/field/mou/>. Guidelines and specific SET reporting forms for ARRL Section and Field Leaders will be posted online <http://www.arrl.org/FandES/field/forms>. Please report your SET activities to your Section Leaders and to HQ.

==> ARES AWAITS ACTIVATION FOR WILDFIRES, TROPICAL STORMS

Even as the Station fire threatens Los Angeles' communications infrastructure atop Mt Wilson and Tropical Storm Erika and Hurricane Jimena die down in the tropics, amateurs -- including ARES groups -- await being called to help.

Mt Wilson houses many antennas for television and FM radio stations in the Los Angeles area, as well as antennas for pagers, cell phones and even Amateur Radio repeater systems. But even as the fire encroaches on these vital communications links, the infrastructure is still in place and working.

"We have established coordination with Dennis Smith, KA6GSE, the Section Emergency Coordinator for the Los Angeles Section," said ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD. "As of the

afternoon of Thursday, September 3, no ARES missions have been established. Of course, if the communications infrastructure at Mt Wilson is compromised in any way, area ARES groups will be ready to do whatever is needed to provide communications support."

As of Friday afternoon, what was once Tropical Storm Erika has weakened and is now classified as a remnant over the northeastern Caribbean.

Angel Santana-Diaz, WP3GW, an ARRL Public Information Officer in Puerto Rico, told the League that "at 8:10 AM [on Thursday, September 3], I made contact with Lionel Ellis, J69KZ, on St Lucia on 7.169 MHz, where he does a regular net. I asked him how were they doing, and he told me that there are thunderstorms and copious rain, but nothing serious at the moment. I am monitoring the band if something comes up. Over here in Puerto Rico, the government is finishing the preparations to be ready when Erika passes by, which is expected to be tomorrow, possibly as a tropical depression." The NWS said that unsettled weather will spread across the US and British Virgin Islands and Puerto Rico later Thursday, continuing through Friday. It would then spread across Dominican Republic and Haiti this weekend and possibly into the Bahamas early next week.

Pacific Hurricane Jimena -- a Category 1 storm -- made landfall near the southern Baja near San Buenaventura, Mexico on Wednesday, September 2. According to the NWS, there have been reports of damage to poorly constructed buildings, major beach erosion over the southern Baja and flash flooding; resorts along the southern tip of Baja California did not experience any major damage. Jimena has now weakened over land and has been downgraded to a tropical storm over the central Baja, with maximum sustained winds decreasing to 45 miles.

The NWS said that Jimena will likely become a depression late Thursday and then drift slowly west and southwest as a remnant low on Friday. Heavy rains and flooding will be the primary impacts over the central Baja and adjacent portions of the western coast of Mexico. Some gusts to tropical storm strength are still possible.

Dura said that WX4NHC, the Amateur Radio station at the National Hurricane Center <http://www.wx4nhc.org/>, has also been monitoring Erika and Jimena, but did not activate for the storms. "There really aren't that many amateurs in the affected areas, which makes reporting conditions quite difficult," he said. "We here at ARRL HQ are keeping a close eye on everything."

==> THE DOCTOR IS IN THE ARRL LETTER

This week, ARRL Letter readers are in luck! The ARRL's very own Doctor, author of the popular QST column "The Doctor Is IN," answers a question from his mailbag:

Jim Walker, KN6TC, of Wiggins, Mississippi, asks: My repeater's PC controller to radio interface provider requires a "COS (Carrier Operated Signal) from the radio." The manufacturer states that this "greatly

reduces drop out and falsing" that are sometimes experienced while using VOX receive/transmit control. It seems to be an alternate for VOX, but I have failed to receive an answer as to what it is in terms I can understand. Neither radio nor interface providers have responded to my e-mail questions.

The Doctor answers: Early repeaters were generally switched to transmit by a carrier operated relay, or COR. The relay would be actuated if the repeater receiver detected a carrier on frequency, as indicated by the opening of the squelch. This was a much more reliable switching mechanism than if the repeater transmit switching responded to detected speech (VOX), since VOX could toggle back and forth due to gaps in speech.

In the early days of repeaters, the equipment was constructed around vacuum tube and relay technology. Current technology is based on solid state devices -- including transistor switching -- that is more reliable than the earlier electromechanical relays. Thus, the more general term "COS" for Carrier Operated Signal, Carrier Operated Squelch or Carrier Operated Switch is often used instead of COR. For more information, check out this Web site <http://www.repeater-builder.com/tech-info/repeaterterm.html>.

Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST, the official journal of the ARRL.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment covers the month of August.

The Central and Roanoke Divisions will hold elections for Vice Director on November 20. The incumbent Directors in the Central, Hudson, New England, Northwestern and Roanoke Divisions faced no opposition and were declared elected <http://www.arrl.org/news/stories/2009/08/26/11041/?nc=1>.

The ARRL responded to the FCC's Notice of Proposed Rule Making, ET Docket 09-36, concerning implanted medical devices that operate on 413-457 MHz (70 cm) <http://www.arrl.org/news/stories/2009/08/12/11020/?nc=1>.

ARRL President Joel Harrison, W5ZN, wrote a letter to the National Safety Council, highlighting issues regarding the use of Amateur Radio emergency communications devices in vehicles <http://www.arrl.org/news/stories/2009/08/09/11012/?nc=1>.

The DXCC Desk approved the 2000 DXpedition to Yemen, 7O1YGF, for DXCC credit. Amateurs may also apply for DXCC credit for 7O1YGF via Logbook of The World <http://www.arrl.org/news/stories/2009/08/12/11022/?nc=1>.

ARRL Technical Relations Manager Brennan Price, N4QX, attended meetings of United States Working Party 5A (the Land Mobile Service excluding IMT, plus the Amateur and Amateur-Satellite Services). He also worked on a proposal for the 500 kHz agenda item for WRC-12. ARRL Technical Relations Specialist Jon Siverling, WB3ERA, attended meetings of US Study Group 1 (regulatory). He is preparing for ITU-R meetings, scheduled for later this month in Geneva.

Come October 1, there will be new Section Managers in the Los Angeles, South Texas and Georgia Sections <http://www.arrl.org/news/stories/2009/08/19/11027/?nc=1>.

The ARRL announced that it will honor the 140th birthday of co-founder Hiram Percy Maxim by authorizing eligible amateurs to add /140 to their call signs from September 2-9 <http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1>.

All 2009 Field Day logs that have been received have been posted to the Claimed Scores page on the ARRL Web site <http://www.arrl.org/?artid=9141>.

The ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding nearly $9000 to eight schools <http://www.arrl.org/news/stories/2009/08/11/11016/?nc=1>.

The ARRL Teachers Institute on Wireless Technology wrapped up. During 2009, 93 teachers from 29 states attended eight sessions -- including two at ARRL HQ -- and a new TI-2 for previous TI graduates <http://www.arrl.org/news/stories/2009/08/05/11003/?nc=1>.

W1AW, the Hiram Percy Maxim Memorial Station, changed over to new digital modes <http://www.arrl.org/?artid=9068>.

The October issue of QST, the September/October issues of QEX and NCJ and the 2010 edition of The ARRL Handbook were released to the printer.

The winner of the QST Cover Plaque Award for August is Allen Baker, KG4JJH, for his article "A 10 Meter Moxon Beam" <http://www.arrl.org/?artid=9153>.

Staff Travel: Chief Executive Officer David Sumner, K1ZZ, and Membership and Volunteer Programs Manager Dave Patton, NN1N, traveled to Tokyo for Ham-Fair and GAREC 2009; Field and Regulatory Correspondent Chuck Skolaut, K0BOG, represented the ARRL at the Kansas State Convention; Media and Public Relations Manager Allen Pitts, W1AGP, traveled to the New Mexico State Convention; Lab Manager Ed Hare, W1RFI, attended the West Virginia State Convention and the IEEE Electromagnetics Compatibility Society EMC Symposium in Texas; Field and Public Service Team Supervisor Steve Ewald, WV1X, represented the League at the National Conference on Community Preparedness, and Emergency Preparedness and Response Manager Dennis Dura, K2DCD, went to the Texas State Convention.

==> GET READY FOR THE UPCOMING ARRL SEPTEMBER VHF QSO PARTY

September is here, and according to ARRL Contest Branch Manager Sean Kutzko, KX9X, that means the VHF bands are getting a workout. "If you've never experienced the fun of VHF+ operating, the ARRL September VHF QSO Party <http://www.arrl.org/contests/rules/2009/sepvhf.html> is a great place to start.

"With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands," he said. "Getting on the VHF bands is simple," he said. "If you have a radio that can transmit on both CW and SSB, that's great, but you can operate on either mode." When operating on VHF, Kutzko explained that your Maidenhead grid square is the common geographical information exchanged <http://www.arrl.org/locate/gridinfo.html>.

While there will be some contest activity on FM simplex (especially near large population centers), Kutzko said that most long-distance VHF+ QSOs are conducted on CW or SSB; that means horizontally polarized antennas: "A dipole for 6 meters is only 9 feet, 4 inches long and is an easy construction project," he explained. "Try to get the dipole in the air as high as possible, but even 15 feet off the ground will make some QSOs. If you have an antenna tuner that can handle 6 meters, you can try loading up another of your antennas on 6 meters with reasonable success. For 2 meters and 70 cm, a horizontal loop will work nicely for SSB and CW contacts." You can find plans for simple VHF antennas at the Technical Information Service area of the ARRL Web site <http://www.arrl.org/tis/info/other-v.html>, in the Antennas chapter of The ARRL Handbook <http://www.arrl.org/catalog/?item=NO-HB2009>, or in the VHF and UHF Antenna Systems chapter of The ARRL Antenna Book <http://www.arrl.org/catalog/?item=9876>.

Kutzko advises that there are a few things to know about operating on 6 meters: In the US and Canada, there is a "calling frequency" on 50.125 MHz USB. Most SSB activity will take place between 50.125 MHz and 50.250 MHz. If conditions are exceptional, Kutzko said you may hear signals above 50.250: "CW signals can be found from 50.100 MHz to 50.080 or so. The frequencies between 50.100 and 50.125 MHz are a 'DX Window,' meaning it is reserved for QSOs between W/VE and DX stations. Please do not make stateside-to-stateside QSOs in the DX Window."

Because VHF+ antennas are relatively small, Kutzko said that many amateurs operate from portable locations, such as a hilltop or a campground. Others operate the contest as a "rover," operating from their car or truck while transmitting from multiple grid squares over the contest period. "Tracking rovers during the contest is almost as much fun as the contest itself," he said.

The ARRL September VHF QSO Party runs from 1800 UTC Saturday, September 12 through 0300 UTC Monday, September 14. Be sure to use those extra bands on your transceiver and get in on the fun you've been missing on 6 meters and up! <http://www.arrl.org/contests/rules/2009/sepvhf.html>

==> HAPPY BIRTHDAY, HIRAM!

On Tuesday, September 2, the League celebrated the 140th anniversary of the birth of ARRL's co-founder and first President, Hiram Percy Maxim, W1AW. Maxim -- born in 1869 -- decided a national organization for Amateur Radio was in order after he needed a "relay" station in Agawam, Massachusetts to pass a message he was sending from Hartford to Springfield, Massachusetts. In honor of The Old Man's (TOM) birthday, the ARRL is holding a week-long Special Event, where eligible amateurs may add /140 to their call signs. A complete list of who may add /140 can be found on page 20 of the September 2009 issue of QST. Hams who work at least 25 /140 stations can earn an attractive certificate; this certificate can be endorsed in increments of 25 QSOs, up to 100 <http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1>.

Maxim was no stranger to technology. He entered the Massachusetts Institute of Technology (Class of 1886) and graduated at the tender age of 16. Through the activities of his son Hiram Hamilton Maxim, TOM became interested in Amateur Radio. In 1908, he filed for a patent for a firearms silencer <http://www.google.com/patents/about?id=dWJ-AAAAEBAJ>; the patent was granted the following year. Maxim used this technology to make silencers for guns, motor exhausts, safety valves and air releases. In all, Maxim received 59 patents, most of them in the field of mechanical engineering.

In 1928, Maxim, along with other dignitaries of the day -- including Thomas Edison -- attended a party at the home of George Eastman, the founder of Kodak. TOM was an avid film buff and was even involved in the early days of motion pictures. Check out this video (available on YouTube) of a dapper Maxim at Eastman's party <http://www.youtube.com/watch?v=osqjdVZDxCg>.

"I hope everyone enjoys our Special Event honoring Hiram Percy Maxim," said ARRL Chief Executive Officer David Sumner, K1ZZ. "I know if TOM was alive today, he would be on the air, having a ball!" Maxim, together with Clarence Tuska, founded the ARRL in 1914. Maxim served as President of the ARRL from its inception until his death from complications stemming from a throat infection in 1936. -- Thanks to Howie Lash, AE0KU, for bringing the YouTube clip to our attention

==> SEPTEMBER IS NATIONAL PREPAREDNESS MONTH

Once again this year, ARRL is a coalition member of the National Preparedness Month. This event is an annual nationwide effort held each September to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses and schools.

National Preparedness Month 2009 is sponsored by the US Department of Homeland Security. The goal is to increase public awareness about the importance of preparing for emergencies and to encourage individuals to take action. Throughout September and the months surrounding it, Homeland Security will work together with a wide variety of organizations, including local, state and federal government agencies

and the private sector, to highlight the importance of family and business emergency preparedness, as well as to promote individual involvement through events and activities across the nation.

More information can be found online <http://www.ready.gov>. You are encouraged to consider this year's ARRL Simulated Emergency Test and all preparations as well as post exercise evaluations as a demonstration of your readiness and Amateur Radio's readiness. Be an active participant in SET, and join others nationwide in National Preparedness Month.

==>SOLAR UPDATE

Tad "The Sun burns crimson bright" Cook, K7RA, this week reports: This week we saw another one of those fast-disappearing sunspots -- it lasted just two days, over the last day of August and the first of September. No other sunspots were observed during the month of August. Sunspot numbers for August 27-September 2 were 0, 0, 0, 0, 12, 12 and 0 with a mean of 3.4. The 10.7 cm flux was 67.7, 67.9, 68, 67.2, 68.3, 69.1 and 68.2 with a mean of 68.1. The estimated planetary A indices were 5, 2, 2, 19, 5, 4 and 3 with a mean of 5.7. The estimated mid-latitude A indices were 4, 2, 2, 12, 5, 2 and 2 with a mean of 4.1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by Shel Silverstein's "Where the Sidewalk Ends" <http://www.poemhunter.com/poem/where-the-sidewalk-ends>.

==>IN BRIEF:

* This Week on the Radio: This week, the All Asia Contest and Colorado QSO Party are on September 5-6. The Tennessee QSO Party is September 6-7. Next week is the ARRL September VHF QSO Party September 12-14. There are two NCCC Sprints this week -- one on September 11 and another on September 12. The WAE DX Contest (SSB), the Arkansas QSO Party and the FISTS Get Your Feet Wet Weekend are September 12-13. The North American Sprint (CW) and the SKCC Weekend Sprint are both September 13. The NAQCC Straight Key/Bug Sprint is September 17. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, September 20, 2009, for these online course sessions beginning on Friday, October 2, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference;

Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL to Close in Observance of Labor Day: ARRL Headquarters will be closed in observance of Labor Day on Monday, September 7. There will be no W1AW bulletin or code practice transmissions that day. ARRL Headquarters will reopen Tuesday, September 8 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

* Allen Baker, KG4JJH, Wins August QST Cover Plaque Award: The winner of the QST Cover Plaque Award for August is Allen Baker, KG4JJH, for his article "A 10 Meter Moxon Beam." Congratulations, Allen! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the September issue by Wednesday, September 30.

* W1AW Earns TPA #306: On September 1 -- after W1AW Station Manager Joe Carcia, NJ1Q, made contact #149 (CW) and #150 (RTTY) with Mark Stull, AB8WV, of Parkersburg, West Virginia -- W1AW received Triple Play Award #306 on September 2. "Finally, after eight months, W1AW can now boast the ARRL's newest award, the TPA," Carcia said. "What makes this so very cool is that we received this award on Hiram Percy Maxim's 140th birthday." The Triple Play Award is earned by hams who, after January 1, 2009, achieve Worked All States on three modes -- CW, SSB and Digital -- and upload their logs via Logbook of The World. Find out more about the Triple Play Award on the ARRL Web site <http://www.arrl.org/news/stories/2008/12/05/10490/>.

* Manufacturer of Texas Bug Catcher Antenna to Cease Operations: After October 31, 2009, GLA Systems -- the manufacturer of the Texas Bug Catcher antennas <http://www.texasbugcatcher.com/> -- will cease taking orders for new antennas; according to their Web site, all orders received before that date will be filled. "Effective November 1, only orders for items that are in stock at the time will be accepted. Effective December 31, 2009, the toll free line, 1-800-588-2841, will be

discontinued." No reason was given for the closure, but on GLA's Web site, owner Henry Allen, K5BUG, said. "It has been a fun 30 years, but it is time to hang it up. I would like to thank everyone who has made this experience possible."

* Den Connors, KD2S (SK): The first president of Tucson Amateur Packet Radio (TAPR) <http://www.tapr.org/> Den Connors, KD2S, of Pepperell, Massachusetts, passed away September 3 from lymphoma. He was 58. Connors, an ARRL Life Member, conducted the first amateur packet radio contact with all-American hardware and software, using the Tucson Amateur Packet Radio Terminal Node Controller (TNC) with Lyle Johnson, WA7GXD (now KK7P), at 9:12 PM (PST) on June 25, 1982. The tests were conducted at 146.55 MHz, with both stations sending plain-text ASCII messages. "Den was instrumental in the early PACSAT work, and as TAPR's first president, led that organization from a local club he co-founded into an international organization," Johnson said in an e-mail. "His was a very cheerful, positive, can-do influence."

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during

registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

WAEB radio tower toppled in Whitehall, FBI investigates

By Frank Warner

Of The Morning Call

September 5, 2009
Quantcast

A 350-foot-tall WAEB radio tower crashed to the ground early Friday in Whitehall Township after its support cables were cut, township police said.

Five hours later, two radio towers near Everett, Wash., were knocked to the ground by a bulldozer in what officials feared was an act of eco-terrorism.

The FBI said Friday night is looking into the possibility the two crimes are linked.

''The FBI is aware of [the Whitehall case] and is going to be looking into it,'' said J.J. Klaver, FBI special agent in Philadelphia. ''I don't want to venture a guess as to whether the two things are related. That's probably premature.''

Klaver added, however, that it is extraordinary that one radio tower would be toppled in the East and two would fall in the West on the same morning.

''These are somewhat unusual incidents,'' he said. ''To have radio towers collapse, I think, is unusual. I've never heard of one radio tower collapsing.''

So far, he said, Whitehall police have the case. The FBI would take a closer look only if its agents found it likely a federal law had been violated.

The WAEB tower, one of five identical towers owned by Clear Channel in a Whitehall field west of MacArthur Road, lay in red and white pieces. Whitehall police said it came down between 1 and 1:30 a.m.

The radio tower property is three miles north of Route 22. Until Friday, the toppled tower stood at the northern end of the property.

''It looks like some of the cables were cut,'' a township police spokesman said. ''It appears to be criminal mischief. The Detective

Division has the case.''

No one was injured, and no homes or commercial buildings in the area were damaged, the spokesman said.

WAEB continued to broadcast without interruption Friday, station Program Director Craig Stevens said by e-mail. He said the station adjusted quickly to operate with only four of the five towers.

In Washington state around 3:30 a.m. Pacific time, authorities said, a bulldozer was used to topple two towers of Everett radio station KRKO. One of the towers was 350 feet tall; the other was shorter.

An ''ELF'' sign was left at the Everett area scene, but officials could not confirm the destruction was the work of the anti-development Earth Liberation Front.

The KRKO station was planning to add radio towers, and ELF members were known to oppose the plan. There were no similar expansion plans in Whitehall.

Whitehall Planning Commission member Dick Drosnock said Friday the Whitehall towers have not been controversial.

''I don't know that they have been mentioned at any meeting,'' he said.

2248. SARL NEWS SUNDAY 06 SEPTEMBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-05 19:00:11 UTC
From: website@sarl.org.za

SARL NEWS SUNDAY 06 SEPTEMBER 2009

You are listening to ZS6SRL, the official radio station of the South Afri-can Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

SILENT KEY

SARL News has been informed that the funeral service for Peter Hoyle, ZS6TAO, whose key went silent on Thursday 27 August 2009, will be held on Monday 14 September 2009 at 10:00 at the Dove Chapel in Jorrison Street, Braamfontein.

In the news today

BACAR SET FOR LAUNCH ON SATURDAY

SUMBANDILASAT LAUNCH ON TRACK

ZS10WCS ON THE AIR THIS WEEKEND

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

BACAR SET FOR LAUNCH ON SATURDAY

The second BACAR flight of 2009 will be launched on Saturday 12 September from the Klerksdorp (PC Pelser) Airfield. The co-ordinates are S26°52'00" and E26°43'00". The reason for a change in launch site is to meet the re-quirements of the air traffic authorities.

The launch is planned for between 08:00 and 08:30 CAT. Launch cover-age will start at 07:30 from the SARL National Amateur Radio Centre on 7 082 kHz and 145,750 MHz.

The payload includes an APRS system operating on 144,800 MHz which will be switched on 2 minutes before launch and allow APRS stations to

fol-low the flight of BACAR. The callsign of the APR beacon is ZS6SAT-7. A VHF beacon on 144,825 MHz will be operating every 2 minutes for the first 30 minutes of the flight on voice, MCW and CW, after that every 5 minutes for the following 119 minutes and then revert back to every 2 minutes.

A 40 metre beacon will be operating on 7 022 kHz with telemetry in-formation every one minute. The information includes the inside and out temperature and the pressure in millibar. Visit www.amsatsa.org.za for more information on the flight.

Get a certificate: Radio Amateurs who submit a telemetry line of the 40 metre transmission together with details of their location will be awarded a BACAR certificate of participation. Telemetry details must be sent to bacar@sarl.org.za on the day of the launch.

Certificates for the August launch will be mailed within the next two weeks.

SUMBANDILASAT LAUNCH ON TRACK

The launch of SumbandilaSat is on track for 15 September 2009. In an inter-view with SA AMSAT, Johan Erasmus, SunSpace systems engineer, speaking from the launch site in Kazakhstan, said that the satellite had travelled well and that all systems performed according to specification during the test-ing phase after the satellite was unpacked in the clean room at the Baikonur launch facility in Kazakhstan. He said that the amateur payload performed well. The beacon, parrot repeater and transponder were tested from a distance and RF levels measured. "We were delighted with the re-sults."

The butane propulsion system tank was filled and the batteries charged. On Wednesday 2 September SumbandilaSat was integrated with the launch platform. The main payload, a Russian governmental satellite, has arrived in Baikonur for integrating. The launch platform is expected to be transported to the actual launch facility and integrated with the rocket during the coming week. "All looks good for a 15 September launch", Johan Erasmus said.

Listen to the interview on www.amsatsa.org.za and on Amateur Radio Mirror International later this morning.

ZS10WCS ON THE AIR THIS WEEKEND

The special event station to celebrate the 2010 world cup soccer event will be on the air every weekend. During September the operation will be managed by the Boland Amateur Radio Club. QSL is via the bureau. Full details on www.sarl.org.za.

A UNIVERSAL AMATEUR RADIO TEXT MESSAGING INITIATIVE

A universal amateur radio text messaging initiative has been proposed by the amateur who gave the hobby APRS. Writing in the special emergency com-munications issue of QST magazine, Bob Bruninga, WB4APR,

introduces a broad new initiative to find ways to seamlessly connect many of the dozens of ex-isting amateur radio text messaging capabilities together.

Bruninga's concept is that of a universal information exchange be-tween amateur radio, the Internet, cell phone and other broadband devices. Also included is the ability to do station tracking using APRS and message exchange to and from DTMF equipped amateur radio gear.

Under the WB4APR concept all a amateur radio operator would need would be his or her callsign as a text address to have emergency test mes-saging available. His article titled "a Universal Amateur Radio Text Mes-saging Initiative" begins on page 72 of the September issue of QST.

NEW MEMBERS

This week we welcome the following new members: Jacobus van der Westhuizen, ZR6KBS, and B P Meyer, ZR6MP. Thank you for supporting the SARL and Amateur Radio.

MISSED THE MEMBERSHIP SPECIAL?

If you did miss the membership special which ended at the end of August you still have till 30 September to renew your membership and maintain an un-broken membership record. The fee for an ordinary member is only R340 per annum, that is less than R1 per day, little enough to be a member of the national body that looks after the frequency bands and represent amateur radio at all levels of government, and internationally though membership of the International Amateur Radio Union at the ITU. It is your membership that adds to the strength of the SARL's voice. To join, visit www.sarl.org.za or call Mariska at 011 675 2393 Monday to Thursday from 08:30 - 16:00 and on Friday from 08:30 - 11:00.

PIO MEET ON MONDAY

The Public Information Network meets on Monday at 19:45. For more details on the PIO network visit media resources on www.sarl.org.za.

OCTOBER RAE

The Closing date for the October 2009 RAE Entries is on the 24th September 2009.

It is imperative that all application forms are submitted to the SARL office in a completed format by this date.

No Late entries will be accepted. Incomplete forms or missing docu-mentation will result in a disqualification to write the RAE.

Should you have any queries relating to the RA examination, or are unsure of what to provide, please contact Mariska at the SARL office on Tel 011 675 2393 2393 Monday to Thursday from 08:30 - 16:00 and on

Friday from 08:30 - 11:00 or alternately email her to admin@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at a mini-mum. The new sun spot that appeared during the week has faded and a new spotless streak has begun. Solar activity is at some of the lowest levels ever recorded.

20 and 40 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoon onwards. During the late afternoon and early evenings it will be good towards the North. In the morning it may be possible to make contacts with Australia. Contacts with New-Zealand may be possible on 40 m during the evenings. During the early mornings and evenings 40 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

06 September - IARU Region 1 SSB Field Day; 07 September - PIOs meet at19:45; 12 September - BACAR launch, 08:00 - 08:15; 13 September - Spring QRP Sprint; 15 September - Launch of SumbandilaSat; 18 to 20 September - SARL VHF/UHF Contest; 24 September - Entries for the October RAE to be in.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror Interna-tional programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmis-sion can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

One of the hard things for all types of club is keeping the momentum going. One of the problems that amateur radio clubs face is developing activities that are inclusive of the majority of members. When we think

about this, we realise that the hobby is very diverse in the areas that

can attract personal interest - homebrew can be anything from kits to replicas, antennas to transceivers, analogue and digital. Field activities can be QRP, contest and DX or any mix of all these things.

So within our clubs we need to find ways of including people in ways that can allow them to share their interests and encourage others in growing their knowledge and experience of this great hobby. Not every one wants to be a paper hanger and cover the shack walls with certificates and awards and not every one is an avid collector of QSL cards but we can share why these things make our personal enjoyment of the hobby better and the tricks we have learned to do things better. Our personal enthusiasm for the aspects of the hobby can be a big incentive

for some one else to dip their toe in the water.

It has been around for a long time and is a bit corny but the following

can be a way of helping us focus on how we can help our club.

Someone has said that membership of any organisation is made up of four

bones....

There are the "wishbones" who spend all their time wishing someone else

would do the work....

There are the "jawbones" who do all the talking but very little of anything else....

Next comes the "knucklebones" who knock everything that everyone else tries to do....

And, finally, there are the "backbones", who get under the load and do the work.

What kind of member are you?

wishbone or a backbone enter the quiz in our discussion point. - HAS

CONTESTING REACHED ITS PEAK?

All up and coming in this edition of
WIANEWS for week commencing Sept 6

Barry Miller VK3BJM activates Rare Grid Locator PF87 WEEKEND of Oct 10.

VK3BJM will travel to Mount Arden in order to activate grid locator PF87 on the 2 m band. Mount Arden is in the Flinders Ranges, about 20 km NNW of Quorn, SA.

Activation will be on Saturday, Sunday and until 1000 CST Monday.

Operating on 144 MHz, with a 14 el yagi and 300+ watts.

Wednesday September 2

Brisbane, Australia's Courier Mail Newspaper, page 3, has the story on "The Bird Wars"... A feathery ruffling of feathers on Digital Radio in Australia.

It seems that now 3 (Three) of Australia's largest networks, the governments ABC, along with commercials Austereo and the Racing Radio Network of 4TAB are "going to the birds"... or should that be "giving you the bird?"

For close on a week ABC and Austereo have been broadcasting nothing but bird sounds on their spare digital channels. Their "bird feed" is being fed to all mainland state capitals.

Now a channel touting itself "The Real Bird man!" sprung up Wednesday.

This Digital channel has photographs of Budgies and is playing "Bird Music"...
Eg..

Surfer Bird
Bird Dog
Fly Like A Bird
Snow Bird... The list "flys on"....

No ownership of "The Real Bird man!" is mentioned on air...
But, it DID appear at the same time as RadioTAB's extra digital channel signed off!

I WONDER!!!

Hello, this is Mellisa Bullock VK4FMEL, with a report from Peter Harding VK4OD, RD Contest Manager.

He has advised that as of last Monday night he had received some 170 Logs sent by Electronic means and snail mail. These numbers are down on previous years.

As of today, Sunday 6th September, you have only 9 (Nine) days to ensure that, by the last mail on the 15th September, he has received your

RD 2009 Logs. ANY LATE logs will be returned.

We remind everyone to send their Electronic logs to rdlogs@wia.org.au as he has several scrutineers also reading the emails.

sun 13
Operators We need your input.

Following the phenomenal response to Westlakes Project of the month, simple called The Squid Pole Antenna, controversy has reigned supreme at the club between those who continually seek new, and possible better means of getting the ultimate signal to air and the die hard skeptics, set in their ways with already tried and proven means of communication as to the which works best in a portable situation.

The so called Squid pole as we know is not new but following a very comprehensive article by VK7JJ, picked up by our ever vigilant Project Manager VK2YP it's introduction and acceptance by Westlakes members has been amazing.

Following weeks of slanging between two prominent members, namely VK2CW and VK2YP with the theme of "mine works better than yours". A means of settling the debate once and for all will be undertaken at Westlakes Teralba site Saturday October 3rd. at approximately 2 pm, using 7.100 MHz +- LSB in the 40 metre band.

Now this is where we need your input.
At the above date and time both combatants will broadcast alternately on separate Radios using their portable antenna of choice, using the same power output, then will stand by to receive a hopefully accurate signal report accompanied by a location from you the listener. These reports will be recorded. Reports will be valid from any where in the world
The final results will be collated and Westlakes unbiased President will be asked to adjudicate as to the better antenna on the day.
It would be hoped that this will put an end to the discussion but logic no doubt will dictate otherwise.

This has been Frank VK2FJL reporting on behalf of Westlakes ARC
for the VK1WIA National News

VK3

It is a busy week in VK6.

On Monday at 10am the RAOTC broadcast will take place on the linked News repeaters, and on 20metres directly from VK3.

The West Australian Repeater Group will have their meeting at 7.30pm at the Peter Hughes Scout Communications Centre aka the Hillview Scout Hall.

Tuesday and the Radio Amateurs Old Timers Group have their luncheon at the Bayswater Hotel at 12 noon.Good Lunch good company, and open to interested hams.

The Northern Corridor Radio Group meet at 7.30pm at Ham Heaven on Tuesday.

Wednesday brings a rash of on-air nets, the first being the southern electronics group on 146.725 in Albany at 7.30pm, with Wicen on 3.600 at 8pm, and Wicen on 146.750 or other at 8.30pm.

The Scout Radio Team meet at the Peter Hughes Scout Communications Centre aka the Hillview Scout Hall at 7pm on Friday.

The Hills Amateur Radio Group meet on Saterday from 1pm at the paxhill Girl Guides hall in Lesmurdie. All times are Western Australian Standard Times. And if you have any energy left after that lot - can I borrow some?

The Australian Institute of Physics - Tasmanian Branch runs a public lecture series throughout the year and this may interested many Radio Amateurs.

The theme is the International Year of Astronomy:

Tomorrow Monday 7 September at 8.00 pm in the U.TAS. Sandy Bay Campus Proffessor Penny Sackett, Australian Government Chief Scientist will be giving a lecture entitled - Contributions of Astronomy to all of Science.

Then again Thursday 17 September at 8.00 pm Proffessor Ray Norris from the C.S.I.R.O. will give a public lecture entitled
"The Astronomy of Aboriginal Australians."

DISCUSSION POINT
Geoff Emery vk4zpp

One of the hard things for all types of club is keeping the momentum going. One of the problems that amateur radio clubs face is developing activities that are inclusive of the majority of members. When we think

about this, we realise that the hobby is very diverse in the areas that

can attract personal interest - homebrew can be anything from kits to replicas, antennas to transceivers, analogue and digital. Field activities can be QRP, contest and DX or any mix of all these things.

So within our clubs we need to find ways of including people in ways that can allow them to share their interests and encourage others in growing their knowledge and experience of this great hobby. Not every

one wants to be a paper hanger and cover the shack walls with certificates and awards and not every one is an avid collector of QSL cards but we can share why these things make our personal enjoyment of the hobby better and the tricks we have learned to do things better. Our personal enthusiasm for the aspects of the hobby can be a big incentive

for some one else to dip their toe in the water.

It has been around for a long time and is a bit corny but the following

can be a way of helping us focus on how we can help our club.

Someone has said that membership of any organisation is made up of four

bones....

There are the "wishbones" who spend all their time wishing someone else

would do the work....

There are the "jawbones" who do all the talking but very little of anything else....

Next comes the "knucklebones" who knock everything that everyone else tries to do....

And, finally, there are the "backbones", who get under the load and do the work.

What kind of member are you?

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

ADVANCED COURSES COMPLETED SUCCESSFULLY

Last weekend saw the Summerland Amateur Radio Club's first advanced licence course under the new system.

All of the candidates studied and read the text and other sources in their own time before the course which consisted of two weekends of tutorials, group learning, revision and the exams.

They had four successes, with the fifth candidate just a couple of answers from success.

Look out for Geoff, Ron, Ross and Chris sporting new call signs!

For all five candidates, a significant proportion of the marks lost reflected on the complex and confusing wording of the questions rather than on their technical content.

Summerland feel they have shown that the concept of self study and a two weekend course is a realistic way of preparing for the exam.

A Standard course is likely to be held in February next year.

Course information, revision notes and a collection of reference material is being assembled.

A one day Regulations course is also planned for those wishing to upgrade from Foundation to Standard. Dates and course information will be advised when available.

Following on from that item from VK7 and the U-TAS seminar comes an invitation to yet another powerful seminar, but in the Far North of VK.

The IEEE Northern Australia Section, IEEE Northern Australia Communication Chapter and the School of Engineering and Physical Sciences at James Cook University invite you to attend a technical seminar happening on Monday 14th September from 4 pm to 5 pm.

It's entitled

"HOW RELIABLE IS EARTH LEAKAGE EQUIPMENT WHEN USED WITH VARIABLE SPEED DRIVES"

It will be given by Dr. Graham Woods of Orana Engineering.

For further information please contact:
A/Prof. Keith Kikkert, Chair IEEE NA Section, Ph:47814259
A/Prof. A Zahedi, Head Electrical & Electronic Engineering,JCU Ph: 4781 6907

Ham Collage in Perth

If you live in vk6 and you're a shortwave listener or scanner enthusiest and listen to our bands, have you considered joining us?

Ham collage is looking for candidates for their next foundation course due to be held over the satuday and Sunday the 19th and 20th of September as a two-day course with the examinations to be held the following weekend.

Make sure your register your interest as quickly as possible on their website, hamcollage.com.au or google ham collage.

Positions fill up very fast and don't forget to get a copy of the foundation manual avalible from the WIA website, it really does help.

C.C.A.R.C. committee would like to congratulate two of their members that were issued with their licence and call signs Thursday 27th.

Steven Lloyd VK7FXXX and Hamish Carnegie VK7FHAM are two new "F" calls that you will no doubt be hearing soon on local North West repeaters and on the HF bands.

So, when you hear these gents come up on air, give them a shout and welcome them to our hobby.

(David, VK7EX, President CCARC)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Australian 137 kHz beacon on-the-air

Drew Diamond, VK3XU, is operating a CW beacon on 137.4 kHz every Saturday and Sunday afternoons and evening.

Drew has activated a 50-watt transmitter into an inverted wire antenna from Wonga Park.

He would like to receive signal reports, they can be sent to his email address: vk3xu@wia.org.au

provide date, time, signal strength and grid locator (eb QF22ML).

Due to the very low antenna efficiencies at this frequency, Drew estimates his effective radiated power is 6 milliWatts. His signal has been heard in Melbourne, Sale and Sydney.

RSGB NEWS FROM G4NJH

Enigma Weekend at Bletchley Park

Over the weekend 5th and 6th September, Bletchley Park in Buckinghamshire will be marking the 70th anniversary of the arrival of Alan Turing and Gordon Welchman with an Enigma Weekend.

Their usual Enigma exhibits will multiply when over 70 more previously top-secret machines from all around the world will be on display. Another highlight will be a talk on Saturday 5th September by Prof. Tom Perera, W1YP, entitled The U-Boat Menace and the Enigma. He will have an exhibit of his discs and various Enigma machines too.

Bletchley Park is open from 10.30 each day and entry costs o10 per adult, which entitles you to visit as many times as you like for 12 months.

African pirates on 20 metres

Another African pirate net is active on 14,002.1kHz, daily at 18.00 UTC or later. The IARU Region 1 ask that amateurs observe and report to DK2OM, the Coordinator IARUMS Region 1. Check out the IARU Region One website for ways to contact DK2OM.

==========

NEWS FROM ARNEWSLINE

CELEBRATING HPM AT AGE 140

And back in the United States the ARRL has announced that the Hiram Percy Maxim Birthday
celebration is back this year honoring the 140th anniversary of the birth of the League's first president and co-founder who held the call letters W1AW. The special event is open to all amateurs, and the goal is to work the stations adding /140 to their callsigns, and contact as many as possible during the event period, September 2nd to the 9th. A special

certificate is available for making at least 25 contacts with endorsement increments of 25, and a maximum endorsement of 100. More information can be found in the September issue of QST magazine. (ARRL)

LACK OF GLOBAL DEMAND ENDS MOST COPPER THEFTS

It wasn't long ago when we were reporting that the theft of copper and other conductive metals was rampant. Power lines were cut down for their copper content, pipes in buildings under construction were ripped away, and wiring was disappearing.

But that's no longer the case as the global recession has resulted in a drop in demand for most metals with copper among the hardest hit.

The price of copper reached an all-time high in mid-2008 of more than $4 per pound on the world market, with the greatest demand from China. That price then plummeted to $1.50 per pound shortly after the global economic recession began last fall. This makes it not very profitable for a thief to risk his or her life for less than the price of a hot dog from a street vendor.

Add to this newly enacted laws like one in California that requires scrap metal dealers buying bulk metal to get a photo ID from anyone bringing in the items and to delay payment for three days. It also requires recyclers to photograph the items, pay only by check and take the seller's thumbprint.

PAINT ON PHOTOVOLTAIC SOLAR CELLS HOLD PROMISE FOR ENCOMM

Science Daily reports that solar cells could soon be produced more cheaply using nanoparticle inks that allow them to be printed like newspaper or

painted onto the sides of buildings or rooftops. This to absorb sunlight and produce electric power.

The article cites the work of University of Texas chemical engineer Brian Korgel. Korgel is hoping to cut the cost of producing high output solar cells to one tenth of their current price by replacing the standard manufacturing process for solar cells.

Right now photovoltaic cells are made using a gas phase depositing system that must be carried out in a vacuum chamber and requiring high temperatures. For the past two years, Korgel and his team have been working on this low-cost, nanomaterials solution to photovoltaics manufacturing. He believes that nanomaterial inks could be printed onto a surface using a roll-to-roll process on a plastic substrate or stainless steel. Because of this the prospect of being able to paint the inks onto a rooftop or building is not far fetched as one might at first believe.

His team has so far developed solar-cell prototypes with efficiencies at one percent but notes they need to be about 10 percent. He says that if he can get the level to the 10 percent mark, then there's real potential for commercialization. He says that then you could see this new production

technique being used in three to five years. For hams involved in public service and emergency communications work, such a source of sunlight power used to charge battery banks would mean communications could continue even if the power mains we out of service for an extended period of time.

Funding for the research comes from the National Science Foundation, the Welch Foundation and the Air Force Research Laboratory. The complete story is at www.sciencedaily.com/releases/2009/08/090824115907.htm

==========

WEIRD AND WONDERFUL

Chicken feathers may help cars use hydrogen fuel in the future.

The feathers would not be the fuel, but they could help store it.

Hydrogen, the most common element in the universe, has long been touted as a clean and ample energy alternative to fossil fuels. When hydrogen reacts with oxygen, instead of yielding pollutants as fossil fuels do, it simply generates water.

Unfortunately, hydrogen is hard to store and transport. Hydrogen vehicles currently keep it in tanks in either liquid or pressurized gas form. As a pressurized gas, it takes up roughly 40 times as much space as gasoline, and as a liquid it needs to be kept at extremely low temperatures.

"Using currently available technology, if you had a 20-gallon tank and filled it with hydrogen at typical room temperature and pressure, you could drive about a mile," said researcher Richard Wool, director of the Renewable Resources program at the University of Delaware in Newark.

It has been suggested by Wool and his colleagues that superheated chicken feather fibers could hold vast amounts of hydrogen. They first looked at chicken feathers because they are extraordinarily cheap - the United States alone generates some 6 billion pounds of the feathers per year.

Chicken feather fibers are mostly composed of keratin, the same protein found in nails, scales, claws and beaks. When carefully heated for precise times to specific temperatures, the carbon-rich surfaces that result on the fibers attract hydrogen, somewhat like how activated charcoal filters can pull out impurities from liquids or gases.

The heating process can also form hollow tubes between the fibers, strengthening their structure, and make them become more porous, boosting their surface area and thus their capacity to store gas.

One can then pump gas into the fibers and store it at high pressure, and to release the gas, one just depressurizes it or raises the temperature.

HAS CONTESTING REACHED ITS PEAK?

Another article worth reading and discussing is titled Has Contesting Reached Its Peak appearing in the still available August issue of CQ Magazine. In it author John Dorr, K1AR, notes that even with a decline in the overall number of licensed radio amateurs world-wide that interest in radio sporting or contesting is at an all time high. Dorr's article looks into the likely reason for this interesting trend and postulates on what the future may be. It's a good read for anyone with an interest in radio sports or the overall future of our hobby and if the WIA Contest crew would like to provide it's members with current up to date info on WIA contests, we are only to ready to broadcast it here!

911 commemoration

Mike, W0YR, will once again (as for the past several years) be active as W0YR/911 on September 11th, to honour/ commemorate those lives lost in the terrorist attack on the Twin Towers of the World Trade Center in New York along with the attack on the Pentagon in Arlington, Virginia, and the plane that crashed into a field near Shanksville, PA.

He plans to operate as much of the day as possible.

Mike states, "I just wanted to do it to remind those I work on the air of what this country endured because of hatred -- and also remind those who want to minimize it or forget it, that this WAS an Act of Terror and, even though they would like to revise history, the memory of those (among them, two of my friends) who perished on September 11th, 2001, will NEVER be forgotten or sullied."

A special QSL will be issued. QSL via his home callsign.

Phil VK6GX when sending in his callback/comments from the WA 160 meter broadcast last week told us that several stations have been experiencing interference on 1840kHz.

It would seem plasma televisions are the culprit.

The interference is apparrently frequency stable, but it's bandwidth varies, according to one report, with the video content.

One station on the callback has a 46 inch HD plasma TV, a very well known and respected top of the market brand. He can detect the emissions with an AM portable radio at very strong strength, 30 metres from his house. He has had to invest in an alternate LCD television for his XYL to watch while he is on air, the interference is so bad from the plasma.

He is negotiating with the manufacturer to see what can be done. It's dissapointing that such equipment can be approved!

With this in mind, Phil is considering shifting the 160m broadcast up to 1845kHz as by all reports solicited from the callback stations, this is

a clear frequency.

He is seeking further advice from the callback stations over the next few weeks to ensure 1845kHz is satisfactory for all, then, all being well, shift on 4th October.

(Phil VK6GX).

WW SPECIAL INTEREST GROUPS --- APRS

JA1OGS / VK4GO Art has reurned to VK and is located in Cairns.

Art dropped us a note to say he will be "super active again in APRS", and already has spoken with the Cairns radio club president John VK4JKL about setting up a new APRS digipeater.

Art is going to give the local club a couple of APRS demonstrations, included will be all the Foxdelta APRS kits.

Check out his webpage
http://ja1ogs.com

Also he is hoping for a D-Star repeater for Cairns.

3DA0SS Swaziland

David, GI4FUM, has returned from Swaziland and reports that the 3DA0SS expedition was a big success. Around 20,000 QSOs were made, many of them on the data modes.

The International Scout Camp was also a great success with the scouts learning many new development skills.

The I.R.T.S. committee, with the agreement of the CQ.IR Contest sponsor, Dargle Builders Limited, agreed that the excess in the contest fund which amounted to more than 1,000 Euro, should be donated to the Swazi scouts towards the cost of providing clean water at their campsite.

While David was there, the new pump was installed and commissioned and clean water is now available for all the camp needs.

Following the AFRI75 expedition to Swaziland and the resultant publicity for the Scout Project there, many individual Society members donated monies for projects at the campsite.

Radio News Bulletin
Sunday 6th September 2009

IRTS AGM 2010

The 78th AGM of Irish Radio Transmitters Society will be held over the weekend Saturday 24th and Sunday 25th April 2010.

The venue will be the Fairways Hotel and Leisure Complex Dublin Road, Dundalk, Co Louth. The Dundalk Amateur Radio Society will be the host for the weekend.

Further details for booking tables etc can be had by contacting the DARS Chairman, Thos EI2JD chairman /at/ ei7dar.com or Secretary, Peter EI4HX > secretary /at/ ei7dar.com

Hotel Bookings can be made to info /at/ fairways.ie A number of rooms have been reserved for anyone staying overnight, and it is advisable to book early.

The IRTS Dinner will start at 8.30 PM Saturday 24th, Rally will commence at 11.00 Sunday morning, and the AGM will start at 2.00 PM.

A good weekend is promised to all who attend.

Theory Examination

It is now only two weeks to the closing date for entry to the next Theory Examination on October the 6th.

Intending candidates should send the appropriate entry fee as soon as possible but in any event before 21 September. Full details are on a link from the 'Key Clicks' section of the IRTS website at www.irts.ie

---

Limerick Repeater

The Limerick Repeater will be undergoing maintenance in the next few weeks and may be out of commission

sporadically to facilitate works being carried out. Outages will be kept to a minimum, but please bear with us while improvements are carried out.

Limerick Radio Club have a major enhancement program planned for the repeater which involves a substantial cash outlay, and users of the repeater in the region are reminded to contribute to the repeater funds which can be done by contacting the treasurer Tony Condon EI2AW at QTHR

AREN News

The Sean Kelly Tour took place last Sunday (August 30th), and from all accounts it was quite successful with roughly 2700 hardy cyclists taking to the road on Saturday evening.

AREN was requested to assist Civil Defence in maintaining an accurate location of as many of the three different sub-events (50k, 100k and 160k) as possible, allowing them to more cleverly deploy their own medical resources around the course. Great use was made of the SEARG APRS digi-peater network, and it definitely proved it's usefulness on the day. It allowed the members in Net Control to keep both the Civil Defence and event organisers updated as to the locations of various vehicles almost in real-time.

Many thanks to EI2KA, EI8FDB, EI5GOB, EI2GN, EI3IQ, EI2JP, EI7IG, EI8EPB and EI8JA for their assistance on the day.

AREN Net

The next AREN net is on Monday the 7th of September at 19.30PM

IRTS SSB HF Field Day

This weekend is the annual IRTS SSB HF Field Day, full details and rules are on the IRTS website.

MRG Experimenter Radio Group

The MRG experimenter Radio Group VHF/UHF SSB Challenge 2009 will take place between 15.00hrs – 18.00hrs (local time) today.

Fixed section: 144Mhz & 432Mhz (SSB only)

Portable section 144Mhz & 432Mhz. (SSB only)

Any EI/GI operator holding an amateur/experimenter licence can participate. Closing date for logs is October 4h 2009. Please forward completed logs to ei2mrg /at/ yahoo.com Trophies will be presented to the winners of the fixed and portable sections later in the year. A full copy of the rules can be had by visiting www.geocities.com/ei2mrg/

EI9E/P & RSGB National Field Day

The RSGB announced the results of their VHF National Field Day contest held on the first weekend in July. A team of dedicated contesters using the callsign EI9E/P from the Wexford VHF Group, the Network Southern Area Radio Experimenters Club and the East Cork Radio Group again finished with the highest overall score in the Open section. The group is awarded the leading overseas entry for the RSGB contest.

The EI9E/P team this year was: EI7FJ, EI6GF, EI2FG, EI8IQ, EI5ASB, EI3JE, EI6BT, EI9HQ, G4CLA, LY3MM, EI4GZB and EI2HQ who's XYL provided the most delicious rhubarb and Bakewell tarts.

The results can be seen at http://www.vhfcc.org/results/09/nfd/nfd.html

Stolen APRS Digi Equipment

The EI7BFB-2 APRS digi equipment was taken from the premises where the station was housed in Finglas, Dublin.

Taken in the theft were

1 x Toshiba Satellite laptop with Ubuntu Linux installed (This operating system is not a default installation on these laptops) 1 x Kantronics KPC-3+ 1 x Kenwood TM-251e 1 x Watson 13.8V 20A black dual meter PSU

The above was stolen on Sunday the 22nd of this month, at 23:23 (last APRS beacon datestamp).

The stolen equipment belongs to Bernard EI8FDB and Dave EI7BFB SYSOP of the EI7BFB-2 APRS digi in Finglas, Dublin.

If anyone sees this or similar being offered, please contact Bernard at email address, ei8fdb /at/ ei8fdb.org, or 086-6021877

Free Service: Amateur Radio Asset Management

The Rig Register is a free service to record your equipment details in a safe and easy to find place. Your equipment can be marked as lost or stolen for others to check.

The Rig Register isn't just for stolen equipment. Groups and clubs can use it as an asset register and a shared login between committee and leaders would allow access to the group's or club's asset list. Please note, when signing up if the postcode field is left blank it does not cause any problems when trying to register from outside of the UK.

More details on the website at www.therigregister.com

Rallies

Cork Radio Rally

Cork Radio Rally, which will be held in the Montenotte Hotel Cork on the 13th September.

All the major traders will attend. There is also a special rate for those who wish to stay overnight. Just mention Cork Radio club Rally when booking.

Food will be available all day, parking available. Doors will open around 11am so come early and get that bargain.

If you wish to trade or require a table please contact Con Mac Parthalain on 0861071312 please ASAP.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 924
BID: $OPDX.924
September 7, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N3SL, NG3K, N4AA & QRZ DX, W4VQ, KH6BZF, KM6HB, K8YSE, KG8DP, A35RK, CX3AN, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G0IAS, GW4SKA, HA0HW, I1JQJ/IK1ADH & 425 DX News, LA5HE, PA7DA, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and ZL2TZE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-August, through Sunday, 6th-September there were 203 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V5, V8, VE, VK, VK9N, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B/C4, CYPRUS. Andy, LZ2HM, will be active as 5B/LZ2HM between September 10-15th. Activity will be on the HF bands plus 6 and 2 meters (KM64HV). Also, he will be active as C4I (on SSB) in the Worked All Europe DX Contest (WAEDC), September 12-13th. QSL via LZ2HM, using info on QRZ.com.

5B, CYPRUS. Nick, G3RWF, will be active once again from the Island of Cyprus (AS-004, MIA MCI-002, WLOTA L0051) as 5B/G3RWF between September 8-22nd. Activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that Harry, 7Q7HB (G0JMU), is again in Malawi for a period of up to 3 months. He is going to be active MAINLY on the Digital modes and CW. QSL as usual is ONLY DIRECT to G0IAS with sufficient funds for return cards. NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT!

A3, TONGA (News). Paul Kidd, A35RK, reports that the first special non-resident "contest" callsign, A31A, was just issued to a group of European operators who will be in Tonga in November, he presumes for the CQWW DX CW Contest. Also, Paul was granted the first "resident" special callsign, A35A, which he will only use for contests and special events. A35RK is still his "regular" callsign. Paul provides the following special announcement by the Department of Communications (dated September 2nd):
The Radio Licensing Officer for the Kingdom of Tonga, Fe'ao Vakata, has today approved the following changes in licensing procedures:

1) Callsigns issued to citizens and long-term residents of Tonga will be in the A35xx format.
2) A Tongan citizen or long-term resident can, upon request, be issued a "special" callsign for use in contests and special events. This "special" callsign will be in the A35x format.
3) Visiting operators will be issued an A31xx format callsign upon presentation of a valid license from their home country and payment of license fee.
4) Visiting groups of operators, for contest and special event purposes only, may request a special callsign in the A31x format.
Note that, hereafter, all visitors will be issued callsigns from the newly authorized A31 prefix block. The A35 prefix block is reserved for residents only.

Further information and license applications may be obtained from:
Fe'ao Vakata, Licensing Officer
Ministry of Communications and Information
P.O. Box 1380
Nuku'alofa, Tonga
ph: (676) 28-170
email: fvakata@pmo.gov.to
fax: (676) 24-861

AN8, CANARY ISLANDS. Operators Luis/EA8AY, Jeronimo/EA8NC and Jose/EA8CCD will use the special callsign AN8R during the CQWW DX CW Contest (November 28-29th) as a Multi-? entry. QSL via EA8AY. Visit the special AN8R Web page at: http://www.ea8ay.com/an8r_team/index.html

B7, CHINA. Look for B7P to be active in this year's CQWW DX Contest by the following group of operators:
CQWW DX SSB Contest (October 24-25th)- Operators Terry/BA7NQ, JinQuan/BA7JC, Paul/BA7JS, Guo/BA7IN, Yang/BD7IXG, Wu/BA7IA,

Hu/BD7KSF and Lv/BD7MFB. Possibly as a Multi-Multi or
Multi-Single entry.
CQWW DX CW Contest (November 28-29th) - Operators Terry/BA7NQ, JinQuan/
BA7JC, Paul/BA7JS, Guo/BA7IN, Yang/BD7IXG, Wu/BA7IA and Esa/
OH7WV. Multi-Multi entry.
Activity by both groups will be on 160-10 meters. QSL both operations
via BD7IXG.

CT8, AZORES. Frank, DK5FT, will be active as CT8/DK5FT from the Island of Sao Miguel (EU-003, DIP AZ-002, WLOTA L2016), September 10-22nd. Activity will be on all bands and modes, propagation permitting. QSL via his home callsign, bureau is preferred.

CT8, AZORES. Chris, DL2MDU, will be active as CT8/DL2MDU from the Island of Sao Miguel (EU-003, DIP AZ-002, WLOTA L-2016), September 13-26th. Activity will be on all HF bands. QSL via his home callsign, by the bureau (preferred) and LoTW.

DX MAGAZINE'S MOST WANTED SURVEY. It is that time again to participate in DX Magazine's annual "Most Wanted Survey". The 2009 survey is now being taken through October 15th. Carl, N4AA, editor of "QRZ DX" and "The DX Magazine" <http://www.dxpub.com/> reports that the survey forms are available at: http://www.dxpub.com/dx_survey2009.html
PLEASE NOTE: Carl states, "THIS IS NOT - REPEAT NOT - A COMPLETE LIST OF ALL DXCC COUNTRIES. However, if you need something that is not on the list, you may add it at the bottom of the survey form in the COMMENTS box. Please pass the word to your DXer friends that the survey is up and running and will be there until OCTOBER 15th."

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W from Ondarroa City (WW Loc. IN83SH, DME: 48073, Province of Biscay) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via EB2BXL.

ET3, ETHIOPIA. Jim, WU0I, currently in Addis Ababa as a U.S. Foreign Service Officer, expects to be on the air by October as ET3JD after certain formalities are taken care for the importation of his amateur radio equipment. He expects to have his gear and the permission to use it completed within 2 weeks. Activity will be mainly 40/20/15 meters, but he would also like to spend more time on the WARC bands ï¿½ particularly 30 and 17 meters. Modes will be CW, SSB, PSK31 and possibly RTTY (for contests mostly). Jim mentions, "My CW is pretty rusty, so please be patient with me!" QSL only direct to: Jim DeLoach, ET3JD, 2030 Addis Ababa Place, Dulles VA 20189-2030, USA. For more details and updates, visit: http://www.deloach.net/ET3JD.html

FS, ST. MARTIN. Gregg, W6IZT, will be active as FS/W6IZT from St. Martin Island (IOTA NA-105, DIFO FS-001, WLOTA L-0383, Grid FK88) between now and September 13th. Activity will be on 40-6 meters using CW, SSB and RTTY. QSL via N7XG, direct or by the bureau or LoTW.

FS, ST. MARTIN. Dennis, KT8X, will once again be active as FS/KT8X from March 5-12th. This will be a holiday style operation with an emphasis on the 30/17/12 meter bands using CW, SSB and RTTY. However, he does plan to enter the ARRL DX SSB Contest as a Single-Op entry. QSL route will be the "Logbook of The World" (LoTW).

FT/G, GLORIOSO ISLAND (Update). As the FR5GA team departs from Reunion Island on September 11th this week to head to Glorioso Island, many DXers world-wide will be crossing their fingers hoping that this operation will take place and not be postponed again.

IOTA NEWS.....
EU-011. Operators Dave/G4IAR and XYL Judith/G4IAQ will be active as G4LAB/p from the Isles of Scilly between October 9-19th. Activity will be on the HF bands, on or near the usual IOTA frequencies. QSL via G4IAR, direct only (QRZ.com address).

EU-014. Nicolas, F5TGR, will once again be active as TK/F5TGR from Porto Vecchio, Island of Corsica (DIFM TK-001, MIA MCO-001, WLOTA L-1390), between September 6-18th. Activity will be on 40-10 meters using CW and SSB. He will also try to be active from an island in the EU-100 group. QSL 100% via the French REF bureau.

EU-025. Angelo, IW9HLM, will once again be active as IR9X from S. Agata Li Battiati Catania, Sicily Island (IIA SC-001, MIA MI-107, WLOTA L-1362, WW Loc. JM77MN) during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL direct to IW9HLM, or LoTW.

EU-094. Members of the Granville ARC (F5KAQ) will be active from Saint Nicolas Island (DIFM AT-010, WW Loc. IN77XR), in the Glenans archipelago (in French Britanny and Province Britanny [DPF 06]), September 11-18th. They will be using the callsign F5KAQ/p and homecall/p. Activity will be on HF bands, as well as 6 and 2 meters, possibly as high as 10 GHz, using CW, RTTY, PSK and SSB. Operators mentioned are: Benoit/F8PDR, Jean-Jacques/F5NKX, Denis/F5RJM, Rolf/F9ZG, Alain/F5HVI, Rene/F6CMC and Alain/F6ACH. QSL via F5RJM, direct to CBA w/SAE (1 IRC or 1 USD for Europe, and 1 IRC or 2 USDs elsewhere) or by the French Ref-Union Bureau. This is the same group that activated Tombelaine (2007) and Brehat (2008).

EU-109. Jon, M0OVL, will be active as homecall/p from the Island of Inner Farne, September 25-26th. However, this will be a short 4 hours operation (each day) between 1000-1400z. This activation will be dependent on the weather conditions. Visit his Web site at: http://www.m0ovl.co.uk

EU-125. Rene, DL2JRM, will be active as OZ/DL2JRM/p from Romo Island (DIA NS-001), September 18-20th. Activity will be on 40-10 meters, mainly CW. QSL via his home callsign, direct or by the bureau.

NA-044. Juergen, NF6J, will be active as VO2/NF6J from Battle Island (CISA NF-049) between now and September 11th. Activity will be on 30/20/15 meters, CW only. QSL via DL7RV, direct or by the bureau.

NA-062. Mark, KG8DP, will once again activate Grassey Key between November 2-9th. Operations will be stationary at Grassey Key and mobile has he travels to Key West and all points on the ocean. He will use the callsign KG8DP, as well as his club callsign NA8KD. This will be a week trip. QSL both KG8DP/NA8KD via info on QRZ.com (w/SASE). Mark will be using an IC-7000, 1.2 kw amp mobile and GLA-1000B portable amp. Antennas were not mentioned.

NA-230. (Rare IOTA) As this bulletin was being written, Cezar, VE3LYC, was active as VY0O from Gilmour Island in the Ottawa Islands group in Hudson Bay (Nunavut Territory). Activity was mainly on 20 meters SSB. The length of his stay will be very short (maybe one or two days left or it possibly may be over by the time you read this).

J6, ST. LUCIA. Bill, WB5ZAM, will once again be active here as J68WI between September 28th and October 11th. He states, "Will have access to G5RV 160m antenna, so maybe I will be on there once it is up at J69MV's QTH. Modes SSB and CW." QSL via WB5ZAM.

JD1, MINAMI-TORISHIMA. Masa, JA6GXK, continues to be active as JD1BMM from Marcus Island (IOTA OC-073, JIIA OC-073-001) until September 28th. Activity is on all bands and modes. Over the past week he was very active on 30/20/17 meters using RTTY and PSK, with some 20 meters SSB. QSL by the bureau or direct (QRZ.com address).

JW, SVALBARD. Just a reminder that Ingrid/LA8FOA, Unni/LA6RHA and some YL members of the Scandinavian YL Radio Amateurs (SYLRA)(and possibly their OM) plan to activate the Longyearbyen radio station this week from Svalbard between September 6-13th. They have already received the callsign JW1SYL for the operation. For more details and updates, please visit the following Web pages at:
http://home.online.no/~la6rha/expedition_to_svalbard.htm
http://www.sylra.is/index2.html

JW, SVALBARD. Operators Just/LA9DL, Erling/LA6VM and Halvard/LA7XK will once again be active from Longyearbyen on Svalbard during the SSB part of the "2009 Scandinavian Activity Contest" (SAC) (September 26-27th). They will operate during the contest with the callsign JW5X. QSL is via LA5X, direct or via the LA bureau. Before and after the contest they will be active with their respective JW callsigns (JW9DL, JW7XK and JW6VM) on all bands and modes. QSL for these contacts are via their home callsigns, direct or by the Bureau. Look for JW7XK to be mainly on BPSK31 and RTTY, while JW9DL and JW6VM will work SSB and CW.

KH6BZF PROPAGATION FORECAST/REPORT (For September 7-13th)....
Sep 7 AN SOLAR REFERENCE

Sep 8 AN ---------------
Sep 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 11 AN LN - Low Normal
Sep 12 AN
Sep 13 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
SPECIAL ADDED NOTES: Does not look too good from what Lee provides.
Lee states there were "NO" sunspots during the month of August 2009.
As this was being written, we are approaching 60 days in row without
any sunspots since July 10th. Lee states, "This is not a typical cycle
start up graphing the last four solar cycles. It has been reported
that this is only the 4th time the sun has been blank for at least 50
days since 1849. The 3rd longest streak on the list is 54 days between
February-April 1879. The record is 92 days in 1913. For more details
on the solar cycle and sunspots, visit the following Web sites at:
http://www.solarcycle24.com
http://users.telenet.be/j.janssens/Spotless/Spotless.html
On band conditions, Lee states that the low bands (160, 80/75 and 40
meters) continue to be very active on the North American continent.
It appears that 6 meter activity has closed down right after our last
meteor shower (Typical!!!).

NEW OFFICERS FOR 2009-2010.....
* The following people will represent the Central Texas DX and Contest
Club (CTDXCC) in the coming year:
President - Susan King, K5DU
Vice-President - Bob Farmer, W9BF
Secretary - Jim George, N3BB
Treasurer - Craig Markley, AD5YJ
DX Coordinator - Gerry Moravec, WD5AAM
Contest Coordinator - Jim Parnell, W5JAW
Web-Master - Ken Harker, WM5R
Visit the CTDXCC Web page at: http://www.ctdxcc.org

* The newly-formed Arizona Outlaws Contest Club announces its lineup of
officers for 2009-2010:
President - Bob Epstein, K8IA
North Region VP - Dick Zalewski, W7ZR
Central Region VP - Mike Fulcher, KC7V
South Region VP - Dave Gilbert, AB7E
Secretary/Treasurer/Webmistress - Sandy Farley, N7RQ
Public Relations/Awards - John Arthurs, K7WP

OD5, LEBANON. Look for special event station OD5F to be on the air from
September 27th to October 6th. Station's location is in the ï¿½Village
Francophoneï¿½, Lebanese University in Hadath. Activity is to celebrate

the Francophone games which is held every 4 years. Some 3,000+ athletes, youths and artists from 56 French speaking countries will participate in these games. The event is a popular sports and art festival. For more details, see: http://www.libanvision.com/jeux-liban.htm
A special QSL card will be available. More info is forthcoming.

PA09, THE NETHERLANDS (Special Event/LH Activity). Jaap, PA7DA, informs OPDX that during the "Open Monumentendag, European Heritage Days" in The Netherlands, on September 12th, the Noordwijk Lighthouse (NET-019) will be open to the public. Special event station PA09MONUMENT will be active on HF and 2 meters. QSL via the Dutch QSL Bureau (DQB) to PA7DA.

PACIFIC TOUR. Rick, AI5P, will once again head to the Pacific this coming October to activate three different islands. His tentative schedule between October 1-31st is as follows:
FK - Grande Terre, New Caledonia (OC-032, DIFO FK-001, WLOTA L-1280) between October 1-8th; his callsign FK/AI5P.
YJ - New Hebrides, Vanuatu (OC-035) between October 10-18th; his callsign YJ0PX.
VK9N - Norfolk Island (OC-005, WLOTA L-1469) between October 22-31st; his callsign AI5P/VK9N.
Activity from all locations will be mostly CW on all HF bands. QSL via his home callsign, direct or by the Bureau.

PJ4, NETHERLANDS ANTILLES. Operators Tom/ZP5AZL, Dale/N3BNA, Jorge/CX6VM, Noah/K2NG, Peter/PJ4NX, Anibal/ZP5VAY and possibly others will be active from Bonaire (SA-006) as PJ4K during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via ZP5AZL. Operators will be there between October 20-26th and will be active before and after the contest as PJ4/homecall. QSL via operator's instructions.

QSL INFO AND NEWS.....
FT5YI QSL STATUS. Nicolas, F4EGX, has received his QSL cards for his FT5YI activity (between November-December 2008) and will soon be sending them in the mail.

IRCS AVAILABLE.....
Steve, N3SL, reports: "Obviously you all know the current version IRCs expire 12/31/09. Handling ZK2V's recent trip, I now have over 200 of these 'short term' IRCs. If you can find the space, I'd appreciate the ad that I'll sell these at 1.25 USDs each - postage free for 1-19, 1 USD for any quantity over that." His E-mail address is: N3SL@aol.com

John, K1XN, from The GoList, reports that he has only 25 IRCs left. They are all stamped and expire on 12/31/2009. First E-mail gets them at 1.00 USD each plus 75 cents shipping. If you are interested, E-mail him at: golist@gmail.com

NOT THE QSL MANAGER. Jean-Michel, F6AJA, reports that he is NOT the QSL Manager for the latest activity of 4J0FR in August (correct route is QSL via F6FYD; the operator). Jean-Michel states, "I have only the

logs/QSLs for the August 1995 and December 1997-January 1998 operations."
The logs are on the web at: http://www.lesnouvellesdx.fr/voirlogs.php

PIRATE ALERT. Phillip, ZL2TZE, reports that ZL callsigns from old operations are being targeted by pirates. The callsign ZL9C was heard on 40 meters August 26th. Phillip states, "If those who think a ZL call is a pirated one please check with the following link and input the callsign and a result will be had in seconds." The Web page is: http://www.nzart.org.nz/call-book/index.html
If you enter a callsign in the "Green Window" (such as ZL9C), you will get the following: Searching SMART for ZL9C
0
Callsign|Name|Address
Results are produced directly from the RSM SMART database.
Data is protected by New Zealand Crown copyright.

QSLS VIA LOTW: 7P8DA, C6APR, CN3A, DV1JM, EA1AKS, EA3GLB, HI8PLE, J5UAP, KH2L, VK9GMW and OE1A

QSLS RECEIVED VIA MAIL: 3D2AG/P, 4J15TX, 7Q7SI, CG200I, EU5ROPE, HK5MQZ/0M, HU1M, JW/OK1JK, V51AS, VC8B, VE3DZ/VP9, VK9GMW, WX3B/p, YL2BJ and Z21SI

QSLS RECEIVED VIA THE BUREAU: 1A0KM, 3XM6JR, 5R8IC, 5T5DC, 6W/RW3TN, A5100A, H44V, JW8DW, KH0PR, P29NI, SV0XBM/9, TC53A, TN6X, UK8AJ, V51AS, V60IL, V8FWU, VP8DLS, XV3M, Z29KM and ZL7/KH0PR

S7, SEYCHELLES. Mauro, HB9ENI, will be active as S79MI from Praslin Island (AF-024), October 21-26th. Activity will be on the HF bands and 6 meters using SSB and RTTY. He also plans to be on the CQWW DX SSB Contest (October 24-25th). QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

SPECIAL EVENT. Look for special event callsign GB50ATG to be active on the air until the end of June 2010. Activity is to celebrate the Golden Jubilee of the "British Amateur Radio Teledata Group (BARTG). Several BARTG members will be sharing the special callsign and will be operating from various locations. During the month of September, the callsign will be used by John, GW4SKA, from his usual address in Wales. This will include operations in the CQWW Contest. So, if you work GB50ATG in a contest "this month", it should count as a GW multiplier. Also, check the BARTG Web site for details on their "Golden Jubilee Award", special QSL cards and wall plaques at: http://www.bartg.org.uk

SPECIAL EVENT. Mark, KM6HB, will again (every year since 2005) operate special event station K6P in remembrance of "POW-MIA Recognition Day", September 18-20th (0000-2359z). Suggested operating frequencies are: SSB - 21350, 18150, 14253, 7250 kHz, and PSK-31 and RTTY on the appro-priated frequencies. Receive a folded pictured QSL card via KM6HB: Mark McMullen, P.O.Box 27271, Santa Ana, California 92799 (S.A.S.E please).

ST, SUDAN. Robert's, S53R, next work assignment (for UN WFP) has taken him here. He arrived in the Sudan early last week and expects to be on

the air by the end of the month or early October. His possible callsign will be ST2X. He states, that his radio and amp are still in S5-land, but are expected to be shipped. More details are forthcoming.

SV5, DODECANESE. By the time you read this, Mort, G2JL, should be active as SV5/G2JL from Lipsi Island (IOTA EU-001, GIOTA DKS-056, MIA MGD-017, WLOTA L-0766) for the next three months. Activity will be on all bands and modes, propagation permitting. QSL via his home callsign, direct or by the Bureau.

TK, CORSICA (EU-014). Heinz, DF6ZY, will once again be active as TK/DF6ZY from the main island between September 16th and October 3rd. Activity will be on 80-10 meters, mostly on RTTY, but he will switch to SSB or SSTV on request. QSLs via home callsign, by the DARC Bureau or direct.

TK, CORSICA. Rene, DL2JRM, will be active as TK/DL2JRM/p from the Island of San Cipriano (IOTA EU-164, DIFM TK-037, MIA MCO-013), September 14-15th. Activity will be on 40-10 meters QRP CW, using solar power. QSL direct or by the Bureau to DL2JRM.

V2, ANTIGUA. Tom, K7ZZ, will be active as V25Z from Yepton Estate Cottages (IOTA NA-100, WLOTA L-1118, WW Loc. FK97CC), which is located on the north shore of the island, between October 19-28th. Activity will be on all bands and modes. QSL via K7ZZ, direct only.

VP8, FALKLAND ISLANDS. Members of the Uruguay DX Group's globetrotters are working on plans for this year's DXpedition. The group plans to activate the Falkland Islands for one week between November 14-21st. Their activity will focus on the lower bands, Digital modes and the 30/17/12 meter bands. Announced calls are: VP8BUH for SSB and VP8BUG for the Digitals modes. Operators mentioned include: Gus/CX2AM, Gus/CX3CE, Bert/CX3AN, Mario/CX4CR and Luis/CX4AAJ. Probably QSL Manager is EB7AEY. More details are forthcoming.

XR0, EASTER ISLAND (Update/Callsign Change). An international team of operators will be active as XR0Y (not XR0YA as first announced) from Rapa Nui between October 31st and November 15th. According to the newest licensing statement released by the Chilean Ministry of Telecommunication (aka Subtel), after arrangements by Radio Club de Chile, the group was delighted to announce that they received permission to use the new shorter, special callsign assigned to DXpeditions from Easter Island. Since this callsign has been in use 2 times in the past (1995, 2000), organizers of this expedition will pay much attention to inform numerous DX bulletins and QSL info databases about the new callsign and their QSL route for the upcoming activity in 2009. All details regarding their QSL Manager will be announced soon. For more details on this DXpedition, see OPDX.920 or visit their Web page at: http://rapanui2009.org

YJ, VANUATU. The Croatian team of Ante/9A4DU and Nikola/9A6DX are planning to be active as YJ0DU and YJ0DX, respectively, a little after the first of the New Year. The duo hopes to activate not one, but several of the islands within Vanuatu. Their equipment will be a FT-857 with wire antennas.

YN, NICARAGUA (Update). Eric, K9GY, will be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW DX CW Contest (September 28-29th) as a Single-Op/All-Band/Low-Power entry. He will be there between November 25-30th. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

ZS10, SOUTH AFRICA (Special Event). Look for special event station ZS10WCS to be active between September 2009 and July 12th, 2010. Activity is to celebrate the hosting of the "2010 FIFA World Cup South Africa", world football event <http://www.fifa.com/worldcup/index.html>, where 200 teams will compete. Expect every day activity between June 1st and July 12th, but only weekend operations during the months leading up to the event. QSL via the SARL'S (South African Radio League) Bureau or direct to: SARL, P.O. Box 1721, Strubensvallei 1735, South Africa.

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

Ohio/Penn DX Special Bulletin No. 924.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 924.1
BID: $OPDX.924.1
September 7, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network F5NQL & UFT and F5OGL following DX information.

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader, sent out a press release (dated September 7th - edited by OPDX) stating that the FT5GA team (which includes Didier/F5OGL, Yves/F5PRU and Franco/F4EVR) picked up 291 kg of gear (transceivers, PAs, power supplies, antennas, masts and miscellaneous stuff). It was delivered to Mr. Alain Lefellec, the export freight manager of the "Logfret Inc." (international freight service), located at "Roissy Charles de Gaulle Airport". The team thanks him for his kind reception and his help to make this expedition a success. Two pallets of equipment will fly tomorrow to the Reunion Island, where they will be transported by the freight service to the Air Force Base 181. The team now has in their hands the authorization to transmit on the Radio Amateur Service bands, from Grande Glorieuse. The document of authorization can be viewed at the bottom of the "Glorieuses 2009" Web page at: http://glorieuses2008.free.fr/index-e.htm

CORRECTION DEPARTMENT. The were two small errors in OPDX.924 under "FT/G, GLORIOSO ISLAND (Update)". The original line states, "As the FR5GA team departs from Reunion Island on September 11th this week to head to Glorioso Island,", it should have stated "As the FT5GA team departs from Paris, France, on September 11th this week to head to Glorioso Island".

Help Requested - ACORN Net
2009-09-08

The Army Cadet League of Ontario is investigating
the establishment of a Royal Canadian Army Cadet radio
network based on Amateur Radio technology. Dubbed 'ACORN',
for 'Army Cadet Ontario Radio Network', the aim is to
support optional training and certification of Army Cadets
as licenced Amateur Radio operators throughout Ontario.
Possible pilot sites for this initiative include Dryden,
Thunder Bay, Timmins, North Bay, Stratford or London,
Oakville, Cobourg, 709 Communications Unit at Fort York
in Toronto and 2332 Communications Unit in Ottawa.

Radio Amateurs of Canada has been asked to facilitate
this project by identifying Radio Amateurs who live in the
pilot areas and have the interest, time and qualifications
to mentor and provide instruction to young would-be hams,
as well as to assist in setting up and managing Amateur
Radio stations. Any interested Radio Amateur residing in
a pilot area is asked to contact Rod Hardman, VE3RHF,
email address rod.hardman @ gmail.com. Military experience
would be helpful but is not a requirement.

R.D. (Bob) Cooke VE3BDB
President, Radio Amateurs of Canada

I've found a schematic and found that the power transformer puked and die
d,
so I've ordered a new transformer from Yaesu.

The old transformer, model KT-28-A is an "open frame" style with numbered

solder terminals.

Current production transformers, model KT-28-E-3, don't have numbered sol
der
terminals, but rather colored wire outputs (unfortunately not labeled).

Does someone have a recent G-1000DXA (or G-800DXA) who wouldn't mind lift
ing
the cover to tell me the wire colors of:

1) 110V primary
2) 28V secondary to the PS board (bottom board)
3) 16V secondary to the CNTL-Unit board (top board)

Thanks!

RAC Bulletin 2009-027E Decision Expected Soon on Ontario
Cell Phone Issue - Bill 118.

A decision by Ontario's Ministry of Transportation in regards
to exemptions to Bill 118 (the Bill to limit cell phone use
by drivers in moving vehicles) is expected to be announced
at any time.

All Ontario Radio Amateurs who are concerned about the
possibility that Bill 118 might curtail the operation of
two-way radio equipment while driving a vehicle in Ontario
are encouraged to contact their local MPP and Transport
Minister Jim Bradley. For the latest information on Bill
118 please visit the RAC Blog site at
<http://www.racblog.wordpress.com> .

Greetings....
A ham friend of mine recently gave me a old, I would call it,
historical multimeter... Out of curiosity, I opened it up and WOW!!
history... It took me way back...
Problem.. I measured the 2 batteries.. both were virtually flat...
Does anyone have the schematic and the battery voltages...
I would like to trace out the wiring, to the batteries, so I can,
possibly, rewire the batteries....

2259. Patrick Jost says "Pruitt-Igoe was NOT award-winning"

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-11 01:52:54 UTC
From: architectural_innovations <architecturalinnovations@rocketmail.com>
Message-ID: <9cac399d-421e-422e-bde3-49a5cbd9b0c8@q7g2000yqi.googlegroups.com>
Source record: 6373
Cross-posted to: misc.invest.futures,sci.math,rec.radio.shortwave,rec.radio.amateur.misc,rec.bicycles.misc

In a recent interview, Melbourne-based architect Patrick Jost had the following comments on Pruitt-Igoe:

“First of all” he said, “Pruitt-Igoe never won an award. That’s a misconception. I think most of Pruitt-Igoe’s fame comes from the fact that it was in Koyaanisqatsi, and then the music from that part of the film has been used in other films, such as Snyder’s Watchmen.”

“The architects, Cochran Gardens, did win awards, but certainly not for Pruitt-Igoe” Jost said.

Patrick Jost is known for innovative designs that maximize the inherent properties of materials while taking into consideration how people live and special needs of the community.

Amateur Radio Newsline(tm) Report 1674 - September 11 2009

Ladies and gentlemen, with some thank you's to those who support these newscasts, here's Amateur Radio Newsline's Support Fund Administrator, Andy Jarema, N6TCQ

--

In the month of September 2008 we heard from regular contributors Joseph Bartzi, Jr., KC8DKF of Columbus, OH; William Walters, WA2IBM in San Jose and Stephen Perluss and the South Orange Amateur Radio Association in Mission Viejo.

Via PayPal there was Christopher Johns- Brewton, AL; Harry Bump and the Lebanon Valley Society of Radio Amateurs in Richland, PA and Barry Youmans and the Silvercreek Amateur Radio Association, W8WKY in Rittman, OH.

In October we heard from Pete Ostopchuk, N9SFX and Elkhart Electronics in Osceola, IN. Via PayPal there were Martin Falk and Erik Fuller, KE5VBO

Remember that these newscasts don't just spontaneously erupt- they require us going and getting the news. That requires internet and telephone service, and for some reason, the service providers have very little humor when it comes to pay for their services. To help us keep these humorless people otherwise happy, please write to us at the Support Fund address given at the end of this newscast, or use our easy PayPal link on our website, arnewsline.org.

Thank you. I'm Andy Jarema, N6TCQ, at our (cough, cough) smoky studios here in Los Angeles.

--

Andy will be back with us in the near future with more than-you's to those who have contributed to the support fund. (ARNewsline(tm) Support Fund)

**

Now, Amateur Radio Newsline report number 1674 with a release date of Friday, September 11, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio assists as Hurricane Jimena hits Baja California, a ham looses his home in a California brushfire, South Africa's latest ham radio satellite is made ready for launch and the

International Amateur Radio Union says its time to fight back against spectrum intruders using the Morse code. Find out the details on Amateur Radio Newsline(tm) report number 1674 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO VS HURRICANE JIMENA

Ham radio has become the main communication artery into and out of portions of Baja California, Mexico. This, after hurricane Jimena, packing winds approaching 145 miles hour came ashore after first hitting the tip of Baja California Mexico. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

Until now most hams have never heard of the Sonrisa Net. It meets daily at 13:30 UTC on 3.968 MHz. But in recent days this net has become the communications backbone out of parts of Baja California that were ravaged by Hurricane Jimena.

According to David Stein, KE6ENI, its Geary Ritchie, WB6PKH, of Danville, California, who operates on the Sonrisa Net that has been one of the principal information conduits into and out of the storm ravaged area. Among the reports that he received on Thursday September 3rd and Friday September 4th from hams in Baja was that the main long bridge north of Santa Rosalia was down. So were several of the new bridges between Mulegï¿½ and Santa Rosalia. Also that there was major damage to the old Marina at Santa Rosalia, but no loss of boats and more important there was no loss of life.

Reports out of San Carlos are that several boats sank in the San Carlos harbor. Meantime, as of 8 am Pacific on Friday the 4th there was no electrical power in the towns of Loreto, Mulegï¿½, San Carlos and Santa Rosalia. Some cellular telephones were working though the towers were thought to be on emergency power.

As of the 5th there is still no power water or phone in the Mulegï¿½ area and Bahia de Conception. WB6KPH also confirmed that health and welfare traffic is being passed using amateur radio phone and digital modes to those back in the U.S. as well as those up and down the Baja Peninsula.

Obviously this information will be several days old by the time many of you hear it. As with any emergency, the situation in the wake of Hurricane Jimena is constantly changing and we will have more on these rescue radio efforts in an upcoming Amateur Radio Newsline report.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Marcia Meyer, KI6INK, aboard her boat in Puerto Escondido near Loreto, was net control. She's been helping to connect people and allowed those on boats and on land in the U.S. and others stretched across Baja to connect with each other in an orderly manner. (Information supplied by David Stein, KE6ENI, via QRZ.com)

**

RESCUE RADIO: N6MGM HOME LOST IN SOCAL ARSON BRUSH FIRE

The Station Fire still burning in the hills North of Los Angeles has claimed the home of Mark Moore, N6MGM. Terry Graves, K7FE, an editor at QRZ dot com says that he spoke to Moore on Monday, September 7th. Moore who works at Ham Radio Outlet in Burbank California wanted everyone know that he, his wife Amanda, K6MDY, their children and pets are all in good health. They are however emotionally devastated because the fire consumed the home, it's belongings and memories collected over many years. Moore's amateur radio station was also lost.

As of Monday, September 7th the Station Fire had destroyed 157,220 acres or about 230 square miles. The fire, already the largest on record in Los Angeles County, is reported to be about 50% contained but is not expected to be fully under control until September 15th at the earliest. In addition to the two firefighters who died on August 30th when their truck fell into a canyon during the blaze, nine firefighters have been injured in the Station fire which investigators say was caused by arson.

Through Terry Graves and QRZ dot com, Moore express his appreciation to all for your support and best wishes. He says that the family is fine and have a roof over its heads. He asks everyone to please focus their thoughts and prayers to those that lost everything and have no home to go to anymore. He adds to also please remember the two firefighters we lost in the firestorm. (K7FE via QRZ.com)

**

HAM RADIO IN SPACE: SUMBANDILASAT A GO FOR SEPTEMBER 15 LAUNCH

South Africa's SumbandilaSat is still on track for September 15th launch. In an interview with South Africa AMSAT, Johan Erasmus, a systems engineer with SunSpace at the launch site in Kazakhstan, said that the satellite had traveled well and that all systems performed according to specification during the testing phase.

--

Erasmus: "We've been busy since our arrival here, first to check out the satellite to make sure that it survived the journey fine. We have been checking the test results with the ones that we made before shipping and they all checked out fine. So we didn't have a y unexpected problems with the satellite itself."

--

Erasmus says that the beacon, parrot repeater and transponder were tested from a distance. He said that RF levels measured on the money and that everyone was delighted with the results. You can hear the entire interview with Johan Erasmus on line at www.amsatsa.org.za (Amateur Radio Mirror International)

**

HAM RADIO IN SPACE: SWISSCUBE MAY LAUNCH SEPT 21

And the HB9AFO SwissCube web page reports that ham radio satellite may be launched on September 21st. SwissCube is one of four amateur radio satellites that will be launched from India on an PSL-VC14 booster. More information on this hamsat is on line at tinyurl.com/SwissCube. (Southgate)

**

RADIO LAW: IARU SAYS TO MORSE INTRUDERS ON 40 METERS AWAY

A new way to fight intruders on 40 meters. Jam them with C-W.

The International Amateur Radio Union is encouraging amateurs to get on the air and use CW on the 7 MHz band. This is because Portuguese fishermen are abusing 7,000.4kHz using USB every morning between 07.00 and 09.00 UTC and later.

The fishermen are located off the North of Portugal. The IARU says that hams should use this frequency for CW traffic as much as they can. (Southgate, others)

HONORING A FRIEND: WALTER CRONKITE KB2GSD REMEMBERED

A memorial service for former CBS newsman Walter Cronkite, KB2GSD, took place on Wednesday morning, September 9th in Avery Fisher Hall at Lincoln Center in New York City. Among those present to speak at the service were President Barack Obama and former president Bill Clinton. The program also included presentations by Cronkite's son Chip and astronaut Buzz Aldrin.

Walter Cronkite anchored the CBS Evening News for 19 years from 1962 to 1981. During that time he became known as the most trusted man in America. His legacy in the world of amateur radio are the two videos he hosted for the American Radio Relay League. These are "Amateur

Radio Today" and "The ARRL Goes to Washington."

As previously reported, Walter Cronkite, KB2GSD, died on July 17th from complications to cerebrovascular disease. He was 92 years old. (ARNerwsline(tm) from published reports)

ENFORCEMENT: HAM EXPLAINS WHY HES QUITTING EMMCOMM AT WORK

A ham who posted on an Internet website that he had assisted in an emergency communications drill at work has come forward to explain why he was contacted about his action by FCC ham radio rules enforcer Laura Smith. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

In his posting to the QRZ.com website, Jeffery Casselberry, W0WLS, says that last July he volunteered to take part in a state sanctioned communication drill which was backed by the Missouri Hospital Association. At that time he was the only licensed amateur in the facility so he said yes.

According to Casselberry this drill took place during business hours while he was on the clock. He explained that he had built the amateur station for the hospital and with it the facility better than most in communicating locally and to the state capital.

W0WLS went on to say that he was so thrilled about the drills success that what he made what he terms as the mistake of posting his excitement on the QRZ website. Someone who read it decided to cut and paste his comments and send them off to the FCC. As a result, W0WLS says that he received an informal email from the FCC's Smith acknowledging his violation and requesting a response.

Casselberry says that he responded to Smith and explained in detail the events of his alleged violation. Smith responded with the following e-mail which reads as follows and we quote:

"Jeff: Again, just so we are clear, Section 97.113 (a)(3) of the Commission's rules specifically states that "no amateur station shall transmit: communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." This means that if you are an employee of the hospital you may not operate the amateur equipment on their behalf even after hours or while you are on a break. The operation of the amateur equipment must be conducted strictly by volunteers." -- end quote.

Casselberry went on to say that he does not want to become a poster child for some emergency communications cause on QRZ.com. He says that he is done with this type of ham radio activity and it will never happen again. He's even gone so far as to tell his employer that he is done with this type of radio activity and will take no further part in it's emergency communications program.

W0WLS ends by noting that he is a hobbyist and don't need this sort of turmoil in my life. As such, he will make no further comments on this issue.

I'm Norm Seeley, KI7UP, in Scottsdale, Arizona, reporting for the Amateur Radio Newsline.

RESCUE RADIO: COWICHAN VALLY HAMS INVITED TO NEW EMERGENCY CORPS

Canada dot com reports that the Cowichan Valley Regional District in the province of British Columbia is looking to an alliance with local ham radio operators to assist in times of disaster. To that end, the District and the Cowichan Valley Amateur Radio Society are hosting two information sessions this month for amateur radio operators willing to be part of a regional emergency communications team.

Meetings were scheduled at for the mornings of September 5th and the 19th. Sybille Sanderson is the Districts public safety education coordinator. She says the idea is to find out what we do in emergency communications, the kind of training we're going to be offering and the kinds of places where radio amateurs could help.

The Cowichan Valley is a region around the Cowichan River and Cowichan Lake on Vancouver Island, in British Columbia. Those hams volunteering could help at the neighborhood level and emergency centers in the event of a flood, earthquake, a massive power outage or other catastrophic event. (Canada.com)

RADIO EDUCATION: RAC ASKED TO HELP FIND ELMER HAMS

The Army Cadet League of Ontario, Canada is considering the establishment of a Royal Canadian Army Cadet radio network based on amateur radio technology. Dubbed 'ACORN', for 'Army Cadet Ontario Radio Network', the aim is to support optional training and

certification of Army Cadets as licensed Amateur Radio operators throughout Ontario.

Radio Amateurs of Canada has been asked to facilitate this project by identifying hams who live in the various pilot areas and who have the interest, time and qualifications to mentor and provide instruction to young would-be hams. Amateurs will also be needed to assist in setting up and managing amateur radio stations.

Any interested Canadian radio amateur residing in a pilot areas is asked to contact Rod Hardman, VE3RHF by e-mail to rod (dot) hardman (at) gmail (dot) com. Military experience would be helpful but is not a requirement. (RAC)

RADIO VANDALISM: ELF CLAIMS TO HAVE TOPPELED TWO RADIO TOWERS IN WASHINGTON

A radical group calling itself the Earth Liberation Front is claiming responsibility for toppling two radio station towers in Snohomish County Washington early Friday morning, September 4th. The towers, owned by station KRKO were felled using a stolen machine called an excavator. A sign left at the scene said the Earth Liberation Front was responsible.

The two towers have been at the center of controversy for several years. There are four towers currently at the location and there have been plans to build two more. Opponents of the expansion claim that radio waves can harm people and wildlife. More recently, nearby residents said that signals interfering with home phone and intercom lines have increased since KRKO recently boosted its broadcasting power.

The station is still broadcasting on a backup transmitter and antenna. It says that it is going to offer a reward for information leading to the arrest and conviction of those responsible for this criminal act. (Published reports)

COMMUNICATIONS TECHNOLOGY: OALKAND CENTER FLIGHT COMS GO OUT

Air traffic controllers at a major control center in California say they were forced to use their personal cellular telephones to guide dozens of planes. This, when the aircraft direction communications system briefly went out on Wednesday, August 26th.

The communications outage affected about half of the roughly 80 controllers on duty at the Oakland Center in Fremont. Gone for several minutes were both radio and telephone communications. According to news reports the controllers said they used personal mobile phones to contact other controllers to relay flight plan information to airplanes in Western region.

The Federal Aviation Administration issued a statement saying that at no time were any planes were in danger during the 15-minute outage and that only five flights were delayed. (Published Reports)

CHANGING OF THE GUARD: FAMED BROADCASTER JIM WHITE KM0X - SK

Famed St. Louis radio personality Jim White, KM0X, has passed away. According to his close friend Bob Heil, K9EID, Jim died on Wednesday, September 2nd of complications to surgery. White had entered the hospital for an operation to remove his spleen. Bob says the surgery went well but several hours later a blood clot took Jim life.

Jim White was a true legend on the St. Louis airwaves. He spent most of his broadcast career at KMOX radio where for 30 years he was known as "The Big Bumper." According to Bob Heil, White gained the name 'Big Bumper' because he always started off his late night show by saying -- quote -- I am one of the things that go bump in the night. And while at KMOX the Arbitron service placed White's nightly show in the number one spot holding down a 33 point rating for all of those years.

In addition to his own show, for 25 years, White, who previously held the call W0NJB, and Bob Heil did the 'High Tech Heil' segments on Wednesday nights. And for many years Jim wanted the KMOX call on his license plates. But there was one person who stood in the way. That is until the Vanity Call Sign program came along:

--

K9EID: "The General Manager at KMOX never wanted anyone to have the KMOX license plate so each year he would purchase the plate and put it in a file. It never showed up on anyone's car. When Jim got the KM0X vanity call he ordered the plate. Missouri does not put the slash through the zero so Jim had KMOX on his license. He always thought that

was a very cool thing and we always got a laugh out of it."

--

Bob tells Newsline that he misses Jim very much. He says that the two of them were not only close friends but that they had this great on-air rapport and started in 1977. They spent their airtime having a lot of fun telling the listeners in the 44 states covered by the stations 50,0000 watt signal about these new hi-tech "toys' coming to the consumer marketplace. And at least once a month they would do a segments about amateur radio that resulted in a lot of call ins from hams. Bob says that after Jim retired and moved to Orange, Alabama, the two of them kept in contact on 75 meter SSB.

Jim White, KM0X, is survived by his wife Pat, two daughters and four grandchildren. A memorial service was to be held Tuesday, September 8th at St. Andrew by the Sea Church in Gulf Shores, Alabama. Contributions in Jim Whites name may be made to the Salvation Army in St. Louis or the Christian Service Center in Gulf Shores. (K9EID, STLToday, ARNewsline(tm))

**

THE CHANGING OF THE GUARD: DATA PIONEER DEN CONNORD, K2DS - SK

And the changing of the guard in ham radio continues. This with word that amateur radio data and space communications pioneer Dennis T. "Den" Connors, KD2S, passed away September 3rd at St. Joseph's Hospital in Nashua, New Hampshire, from Hodgkins Lymphoma.

Den Conners was the first president of Tuscon Amateur Packet Radio overseeing the groups transition from a local Tucson , Arizona-based club into the multi-national TAPR organization. He was a major force in the adoption of AX.25 as the amateur packet protocol standard.

Under his leadership, TAPR introduced the TNC-1 and then later the TNC-2 Terminal Node Controllers. These units are credited with introducing the world of digital text communications to the ham radio masses. Connors also worked with AMSAT North America's Tom Clark, K3IO, to define an amateur store-and-forward packet radio satellites. This concept eventually morphed into the AO16, IO-26, AO-27, and MO-30 Microsats..

A resident of Pepperell, Massachusetts, Den Conners was only age 58. In lieu of flowers, memorial contributions may be made in his memory to the Community Church Memorial Fund, Post Office Box 320, Pepperell, Massachusetts, 01463 or to the National Marrow Donor Program at www.marrow.org. (ANS)

HAM RADIO IN SPACE: FO-29 RECOVERY EFFORT CONTINUES

Recovery efforts continue for the Fuji Oscar FO-29 ham radio satellite that as reported last week went silent during the week of August 24th. The latest word from JE9PEL is that some partial CW telemetry from FO-29 was received by PY5LF during the orbit 64384. Then the birds transmitter shut down once again.

JE9PEL says that at the present time the ground control team continues to analyze telemetry. Also, there are continuing attempts to restore the satellite to full operation each time it flies over Japan. The latest information on the satellite recovery effort can be found on line at www.ne.jp/asahi/hamradio/je9pel/fo29rest.htm (ANS)

WORLDBEAT: UK CEASES MANUFACTURE OF TV RECEIVERS

The production of television receivers marked made in the United Kingdom has ended. On Thursday, August 22nd the final TV rolled off the production line at Toshiba's factory in Plymouth, England marking an end to the manufacture of a technology the UK invented.

In the UK, John Logie Baird is the man credited with inventing the television receiver. He demonstrated his first television set to the world in 1926. His Baird Corporation was the world's only recognized TV manufacturer at the end of the 1920s, with their Televisor Model B being the first mass-produced, commercially available set.

In the United States the work of Baird is little known. Here the credit as to who was the inventor of modern television really comes down to two different people in two different places both working on the same problem at about the same time. They were Vladimir Zworykin, a Russian-born American inventor working for Westinghouse and later RCA, and Philo Farnsworth, a privately backed inventor from the state

of Utah. The duplicity of work eventually lead to a court battle that with patent priority status ruled in favor of Farnsworth in 1939. You can read the full BBC news report at http://news.bbc.co.uk/1/hi/technology/8222421.stm (Telegraph OnLine, BBC, Wikipedia.com, others)

THAT FINAL ITEM: SEARCHING FOR WALDO THE ROBOT

Lastly, scientists along Florida's Gulf Coast are trying to find a radio controlled underwater robot that has mysteriously vanished. Jerry Gaul, KE7GGV, has the details:

--

Scientists at Mote Marine Laboratory have lost a bright yellow submersible research robot somewhere in the Gulf waters off Venice, Fliorida.

The sea going remote control research device from laboratory in Sarasota has been missing since Monday, August 31st. Scientists aren't sure what happened to the robot, which is nicknamed Waldo. Some think that it might have sprung a leak or suffered a malfunction and sunk. Others believe that It also could be on the surface, but its communication beacon or E-L-T has malfunctioned and that it cannot signal its location.

Waldo the sea going robot is 6-foot-long, weighs about 115 pounds, has short wings midway up its cylindrical body and cost about $100,000. He was also equipped with a detector to find a toxic algae bloom called red tide that was valued at another $30,000.

If you live along the Gulf Coast and see something bright yellow strange floating off shore, that could be the missing robot.

For the Amateur Radio Newsline, Im Jerry Gaule, KE7GGV.

--

If you find Waldo or even hear his radio signal you may be eligible for Mote Marine Laboratory's no-questions-asked reward. Their contact number is area code 941-388-4441. Ask for extension 271. (ScienceOnLine, Daily-Tech, others)

It IS news for the 13th NOT the sixth as I actually read aloud
when presenting this weeks news..

SOO.. IT'S all up and coming in this edition of
WIANEWS for week commencing Sept 13

WHATS COOKIN?

Mobile phone activates kitchen oven.

The New York Times are reporting on an EMC case involving an oven that turns itself on in the presence on a low level RF field from a Cell (Mobile) Phone.

Many people will have run across the beep-beep-beeping noise that you can get if a cell-phone is nearby to a poorly designed amplified speaker system.

BUT in this case, when the oven detected an RF field it switched on and set itself to high - creating a significant safety hazard.

The New York Times report, which contains a video, can be seen at www.nytimes.com/2009/08/23/nyregion/23about.html?_r=2

(nyt/southgate)

WHEN TRIPLE OH IS A GREAT BIG NO!

ACMA in a recent press release noted that although previously referred to as Triple O it is now to be called TRIPLE ZERO. This previous term is no longer used due to a concern that it may cause confusion for users of alphanumeric keypads who may dial the letter 'O' rather than zero.

Handset blocking for repeated non-genuine calls to Triple Zero

The Australian Communications and Media Authority has welcomed a recently introduced industry initiative to address the incidence of non-genuine calls to the Triple Zero (000) emergency call service.

The industry initiative will progressively limit calls from mobile handsets being used to make repeated non-genuine calls to the Triple Zero emergency call service.

Telstra, given its experience as the Emergency Call Person, has advised that handling of genuine calls is being increasingly compromised by the need to deal with non-genuine calls or calls that do not relate to time critical or life threatening emergencies.

Under the industry initiative, developed in consultation with the ACMA, mobile handsets from which repeated non-genuine calls are made to Triple Zero operators may be blocked across all mobile networks from being able to make calls. Progressive steps will be taken to formally warn the owner of the mobile handset before the handset is blocked, in addition to the caller details being provided to police as appropriate.

(ACMA Media contact: Donald Robertson, Media Manager on (02) 9334 7980).

Dennis mentioned this last week, now further on the "Great Squidpole Squabble".

Following the phenomenal response to Westlakes Project of the month, simply called The Squid Pole Antenna, controversy has reigned supreme at the club between those who continually seek new, and possible better means of getting

the ultimate signal to air and the die hard sceptics, set in their ways with already tried and proven means of communication as to the which works best in a portable situation.

A means of settling the debate once and for all will be undertaken at Westlakes Teralba site Saturday October 3rd. 2 pm, using 7.100 MHz.

Both combatants will broadcast alternately using their portable antenna of choice, then will stand by to receive a hopefully accurate signal reports accompanied by a location from you the listener.

Tune in and give a report!

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

The weekend of 5th - 6th of September saw ARK's Academy swing into action again with yet another foundation course. a nice and sunny weekend saw Seven candidates study for their foundation course. The results a 100% pass rate !"

Instructors Ivy VK3IVY and Lino VK3BAD were delighted with the result and both candidates and instructors celebrated with tim tams and donuts

after the exam session.

Many thanks to Assessors Keith VK3FT , Peter VK3AVE, Lionel VK3NM , Lino VK3BAD , and John VK3ARK for giving their time over the last few months

conducting various assessments.

So please welcome John, David, Jason, Peter, Adam, Jacqui and Angus to the amateur radio fraternity when they pop up with their new call signs in a few days time

ARK's Academy will be offering more foundation courses early in the new

year and will again be offering our weekend regulations course followed

by our standard/ advanced upgrade course, all courses are free of charge and next year will be conducted in a brand new facility being constructed , a forty seat pit style lecture theatre, with an extensive outside deck which will be a great location for lunch.

If your in the Melbourne area and want to either get your foundation license or upgrade to Standard or Advanced please contact ARK's Academy e-mail John vk3ark@wia.org.au

Website can be found at http://www.carnagevisors.net/arks-academy/"

(John Fisher VK3ARK / VK3DQ / M0GJF)

Ham College VK6

Ham collage in perth are looking for candidates for their next foundation course to be held over the weekend of the 19th and 20th of this month.

The course is two days with the exams held the following weekend. If you're travelling from a remote area for your course, arrangements can be made for you to sit your exam on the first weekend.

Tea, coffee and biscuits are provided.

to register your interest, log on to hamcollege.com.au or google ham college.

Septembers AR Magazine, and yes, Tom Potter says it's in newsagents now has begun a series of occasional articles especially suited to the interests of Foundation Licensees.

Turn to page 18 and read Ross Pittard VK3CE on the design and construction of a simple but effective antenna for 2 metres (or 70 cm).

This is the well-known J-Pole concept which uses ordinary TV ribbon transmission line.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

IRELAND

The Sean Kelly Tour took place August 30th, 2700 hardy cyclists taking to the road on Saturday evening. The Irish version of VK's WICEN assisted Civil Defence in maintaining an accurate location of as many as possible, allowing them to more cleverly deploy their own medical resources around the course.

Great use was made of the APRS digipeater network, and it definitely proved it's usefulness on the day. It allowed the members in Net Control to keep both the Civil Defence and event organisers updated as to the locations of various vehicles almost in real-time.

(irts)

Manufacturer of Texas Bug Catcher Antenna to Cease Operations:

ARRL News are reporting after October 31, 2009, GLA Systems, manufacturer of the Texas Bug Catcher antennas will cease taking orders for new antennas; No reason was given for the closure, but on GLA's Web site, owner Henry Allen, K5BUG, said. "It has been a fun 30 years, but it is time to hang it up. I would like to thank everyone who has made this experience possible."

Den Connors, KD2S (SK):
The first president of Tucson Amateur Packet Radio (TAPR) Den Connors, KD2S passed away September 3. He was 58.

Connors, an ARRL Life Member, conducted the first amateur packet radio contact with all-American hardware and software, using the Tucson Amateur Packet Radio Terminal Node Controller (TNC) with Lyle Johnson, WA7GXD (now KK7P), at 9:12 PM (PST) on June 25, 1982. The tests were conducted at 146.55 MHz, with both stations sending plain-text ASCII messages. "Den was instrumental in the early PACSAT work, and as TAPR's first president, led that organization from a local club he co-founded into an international organization," Johnson said in an e-mail. "His was a very cheerful, positive, can-do influence."

(arrl)

FCC CITES CALIFORNIA RESIDENT OVER DEFECTIVE INDOOR TV ANTENNA

You may find this one hard to believe, but the FCC has issued a Citation to California resident Irma Frausto for using a defective amplified indoor television antenna. She could not POSSIBLY know it played havoc with a nearby cellular telephone site.

Bruce Tennant, K6PZW, has more:

On August 13th agents from the Los Angeles FCC Office investigated a complaint that something was interfering with the operation of a Verizon cellular site. The agents T-hunted the interference to the Frausto's residence. Further investigation revealed that the source of the interfering signal was a Philips model MANT 300 amplified television antenna installed on top of a television set in the Fausto home. .

Apparently the antennas internal amplifier had broken into self-oscillation on 840.356 MHz. The spur was strong enough to interfere with the input to a Verizon local cell site. And you would think that's where it would all end. Disconnect the faulty antenna and problem solved. But that's not where this story ends.

On August 20th the FCC issued a Citation to Irma Fausto naming her as the responsible party. Why the FCC chose to issue a Citation rather than the usual warning letter or any letter at all is not explained.

And if we may editorialize a moment, even stranger is the demand by the FCC that Ms. Fausto respond to the Citation and specify what actions have been taken to correct the violation when its likely all she would do is return it to where she bought it or throw the thing in the nearest garbage can. At least that's what we would do.

We also wonder if the FCC intends to follow up with Philips to make certain that no other MANT 300 amplified indoor antenna is causing similar problems elsewhere in the United States. One would think that Phillips is the responsible party in this scenario since it was the one who manufactured the defective amplified antenna in the first place.

Lastly we must ask why so much emphasis is being put on reprimanding a citizen for something beyond her control when there are far more important matters to contend. This definitely includes cleaning up the now almost two decade old rats nest of jamming, filthy language, illegal broadcasting and other violations found on 14.275 MHz in the 20 meter band. Violations that the FCC seems to be turning a blind eye to no matter how much the ham radio community complains.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting and editorializing from Los Angeles.

Oh yes. Those of you interested in a good lesson in government bureaucratese can read the entire text of the Citation issued to Irma Fausto at http://www.fcc.gov/eb/FieldNotices/2003/DOC-292933A1.html

OPERATIONAL NEWS -

RD CONTEST MANAGER PETER VK4OD:-

"As you listen to this newscast, today Sunday the 13th Sept, well, you have
just 48 hours to get your Log for this years RD Contest, to me, albeit Snail
Mail or Electronically sent.

Tuesday 15th Sept at 17:00, any logs that arrive after that will be returned
unopened, and will miss out for this years Contest.

The checking and double checking is proceeding quite well, and those logs that
needed correcting I have advised the sender why the correction was made.

Once all the data entry is completed, the FULL results will appear in AR, at the earliest possible publication. We will announce the winning State, along with the FIRST Place positions.

As soon as possible the Certificates will be issued to the FIRST Place winners for each of the categories, or should it happen to the EQUAL FIRST place getters.

Just received news that F5OGL has received the necessary permit to operate from Grande Glorieuse..

5 to 8 operators will activate this rare island thanks to the authorisation of the armed forces under the high authority of general Dominique LEFEUVRE, Commander of the French Signals and Graduate Studies School of Rennes and the HQ of the Southern Indian Ocean Forces.

Host on the islands will be the Foreign Legion;
"There is no doubt this will be another exciting expedition."
said Didier F5OGL.

The FT5GA team departs from France, September 11th to head to Glorioso Island.

[The Glorieuses or Glorioso Islands are a group of French islands and rocks totalling 5 square kilometres in the northern Mozambique channel, about 160 kilometres northwest of Madagascar.]

Pay freeze tipped as Radio NZ slashes costs

Radio New Zealand staff were expected to agree to a freeze on salaries as the public broadcaster identifies $1.5 million of savings to make ends meet.

Radio NZ is facing another round of cost cuts after the Government ignored warnings of chronic under funding and staff shortages.

Cutbacks are common in the media sector, which has been ravaged by an advertising slump. Commercial radio stations have also been laying off staff, and Television New Zealand has cut staff and programming.

Radio NZ does not rely on advertising and all government departments face cuts.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator B.L.Manohar (Arasu) VU2UR
r3msc_iaru@rediffmail.com

Do you enjoy Amateur Radio or are you a keen Shortwave Listener?

Are you willing to contribute to the global amateur radio community?

How?

By simply doing what you enjoy best - listening and reporting intruders, whilst you listen or communicate via the HF bands or even suspect a pirate on the VHF and UHF bands.

All you need to do is simply file a report on any potential intruders you hear:

* Frequency (in kHz) - Bandwidth
* Time (UTC)
* Day of the Month,
* Mode
* Country if you know
* Identification
* Bearing (if available)
* Remarks (calls if known, language, locations, names, sked times)
* An audio sample, if possible

How do YOU report an intruder?

Well the NZART are advising ZL'ers to simply e-mail ms@nzart.org.nz

or even join the Australasian ham band intruder watch via
http://groups.google.com/group/IntruderWatch?hl=en

John Martin ZL1GWE says "If we are successful within the IARU Region 3 in confirming, detecting and evicting intruders from the HF bands, we will share this success with you all. We need to ensure the Amateur Radio bands are available for your enjoyment and especially during an emergency situation".

That address again is http://groups.google.com/group/IntruderWatch

(John Martin Monitoring Service Coordinator - NZART de ZL1GWE grid:RF73MF)

Beat the intruders with CW says IARU

The RSGB are reporting that the IARU is encouraging amateurs to get on the air and use CW on the 7MHz band.

7000.4 kHz in particular.

This is because Portuguese fishermen are abusing 7,000.4kHz using USB every morning between 07.00 and 09.00 UTC and later. These fishermen are located off the North of Portugal.

Use this frequency for CW traffic, says the IARU.

(RSGB)

Back to ZL land and New Zealand's M.E.D. With the co-operation of the ACMA direction finding service in Australia, were chasing for a licensee an interfering signal around 7 megs.

This interfering signal was identified as a time signal station which had recently come on to the frequency from Ottawa, Canada.

Negotiations are being held between administrations as to how to overcome the interference issue.

(med-southgate)

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Peter Ellis VK1PE has an idea for a novel club project: a really good heat transfer compound.

Some weeks ago I saw a story about a computer geek who made up a thermal transfer compound using diamond dust. Then, this week I came across a story from an American university that is developing a process to fuse diamonds into a copper matrix for use in super high power transmitters.

There's a theme here.

It turns out that diamond is the natural material with the highest rate of heat transfer, around 2,000 Watts per metre Kelvin, which is around five to six times better than silver and copper.

Diamond dust can be bought fairly cheaply on eBay or locally. Look for 60,000 mesh diamond powder used for cutting and polishing. A suitable 'grease' is available at chemical supply companies and hobby suppliers. Look for polydimethylsiloxane (PDMS) and polytetraflouroethylene (PTFE), which have to be mixed. Don't get anything containing zinc oxide, because that is a thermal insulator compared to diamond.

So, for about $30-40 you could make up a syringe of seriously good thermal compound for use with radio projects, computers, or other electronics. Just be careful, and follow the instructions at "inventgeek.com".

This could be a club project, and you pay per millimetre squirted from the syringe.

For radio news, I'm Peter Ellis VK1PE

Amateur Radio Previews
September 2009

Amateur Radio magazine for September is now in your newsagents. And it is well worth picking up a copy. Why not reserve one every month to make sure they are not sold out on you. You will see a couple of intrepid amateurs on the front cover, well rugged up, because they are operating from the Mount Kosciusko summit - portable, of course.

If you are a Foundation Licensee, turn straight to page 40 for a full report on the 5-day Scout Camp that focused on amateur radio. Arthur Greaves VK3FBEE had a wizard time, and so did all his interstate mates, with training sessions, radio construction projects, HF and VHF contacts across the region, and operating mobile from Puffing Billy in the Dandenong Ranges. The whole thing was aided and abetted by Robert Broomhead VK3DN and Bob Bristow VK6POP from the WIA Board. A couple of good photos, too.

Yes, back to Mount Kosciusko, and a detailed account on page 27 by Compton Allen VK2HRX about his Easter adventures on the top of Australia. He reports that he had his pick of all the 2-metre repeaters in the south-east. Then he tried HF and worked dozens of stations. With a noise-free site at an elevation of 2,229 metres, how could he go wrong? Compton also provides some first-hand descriptions of this high mountain terrain, illustrated with a couple of excellent pictures.

October Amateur Radio will be published on time, as always.

Saving lives through Emergency Communications

The fifth Global Amateur Radio Emergency Communications Conference, GAREC-2009, hosted by the Japan Amateur Radio League and held in conjunction with Ham Fair 2009 in Tokyo, Japan, with participation by representatives of IARU and all three of its regional organizations, National IARU Member Societies and specialized Amateur Radio Emergency Communications Groups from all three ITU/IARU Regions;

considering

the statements of GAREC-05 (Tampere, Finland), 06 (Tampere, Finland), 07 (Huntsville, Alabama, USA), and 08 (Friedrichshafen, Germany), the progress made on the implementation of the recommendations expressed therein, and recent experiences from exercises and actual emergency operations;

noting

1.the relationships between the amateur service and organizations engaged in public protection and disaster relief, and in particular the formal agreements and understandings that exist between the IARU and the United Nations, the International Telecommunication Union (ITU), and the International Federation of Red Cross and Red Crescent Societies (IFRC),

2.the reports on recent emergency communications operations presented at GAREC-09, in particular the earthquake disaster relief operations in Japan (1995), China (2008) and Italy (2009) and the Australian bushfire communications (2009), as well as

3.the reports on experiences to date with GlobalSETs, Center of Activity Frequencies, ALE, emergency communications across borders, and other important topics presented at GAREC-09;

congratulates

the radio amateurs who performed so well in meeting emergency communications needs;

thanks

1. the conference participants and others who prepared these reports and presentations, and

2. the IARU for completing the emergency communications brochure previously recommended by GAREC;

requests the ITU

1.to continue to support the activities of IARU in facilitating the role of the Amateur Radio Service in emergency communications by fully implementing the provisions of Radio Regulations (RR) Article 25 as revised by the World Radiocommunication Conference (WRC-03, Geneva 2003) through the appropriate mechanisms of its Telecommunication Development Bureau and to support national Administrations in such implementation, and

2.to continue to study the possibilities for the introduction of an International Amateur Radio License facilitating the work of Amateur Radio Service in international assistance and related training activities;

calls upon all National IARU Member Societies and all specialized Amateur Radio Emergency Communications Groups

1.to establish close working relationships between the National IARU Member Society and independent specialized Amateur Radio Emergency Communications Groups in the respective countries as well as to cooperate internationally,

2.to request their national regulatory authorities implement the modifications to Article 25 of the Radio Regulations adopted by the World Radiocommunication Conference 2003 (WRC-03), in particular the regulations governing third-party traffic during emergencies and during training for emergency operations,

3. to provide training in emergency communications to as many amateurs as possible in their respective countries with particular emphasis on:
a.personal and logistical preparedness, the psychological aspects of entering a disaster area, and familiarity with the civil protection system in their country,
b.specific communications techniques of particular value in emergencies, and
c.remembering that the skills developed in the amateur service can be of great benefit to disaster relief organizations in maintaining and operating their own telecommunications networks,

4. whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, web-sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic,

5. to use their contacts with national regulatory authorities to encourage the accession to and implementation of the Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations,

6. to support the work of the IARU on an international Emergency Communications Handbook and to provide copies of existing agreements with institutional partners in emergency response as well as copies of emergency communication guidelines, manuals, and checklists developed for national or local use as inputs to this work,

7. to work towards the implementation of the Memoranda of Understanding established between the IARU and ITU, IFRC, and the United Nations by

seeking cooperation with the respective national institutions and organizations in their country,

8. to continuously improve their awareness of the mission, vision, and values of served agencies, and

9. to represent themselves as a human and technical resource able and willing to investigate the communication requirements of served agencies, offer recommendations when asked, and facilitate emergency communications when required;

requests the IARU

1. to encourage its National IARU Member Societies to actively support the mission of Amateur Radio as an emergency communications resource, including but not limited to the actions listed above,

2. to support the IARU International Coordinator for Emergency Communications in the work with the ITU (BDT) on the implementation of the Article 25 of the Radio Regulations (WRC-03) and to support the ongoing work towards an International Amateur Radio License, and

3. to actively support the work on the IARU Emergency Communications Handbook in respect to the publication of the handbook;

calls upon governments and telecommunication administrations

to facilitate the role of the Amateur Radio Service in emergency communications by fully implementing the provisions of Radio Regulations (RR) Article 25 as revised by the World Radiocommunication Conference (WRC-03, Geneva 2003) and by encouraging joint training activities and exercises of Amateur Radio Emergency Communications Groups and institutional providers of emergency response; and

recommends

that GAREC conferences should continue to be held in locations throughout the world to the extent possible and should maintain the character of GAREC as an informal meeting among representatives of IARU member societies and of Amateur Radio Emergency Communications Groups within or outside of the respective National IARU Member Society, serving as a forum for the exchange of experience and as an advisory body for the work on emergency communications of the IARU.

Adopted by consensus in the final session of GAREC-2009 on 25 August 2009.

WW SPECIAL INTEREST GROUPS --- STAMP COLLECTING OPERATORS
radiostamps@yahoogroups.com

Norway releases new radio stamp

Part of the Norwegian Year of Cultural Heritage, is this summers release of the Kurï¿½ radio stamp.

A new icon saw the light of day in 1950 when Radionette launched its Kurï¿½r radio. The Kurï¿½r was the company's greatest success, and the red transistor model in imitation alligator skin was the undisputed winner. Radionette's history started in 1927 with 24-year old Jan Wessel, in a small rented room in Oslo. "Good, reasonably priced radios for everyone" was the motto of the company's self-taught founder, and with the Kurï¿½r he struck a gold mine.

The radios sold like hot cakes, not only in Norway, but all over the world.

They were exported to 60 countries and Radionette became a household name. Factories were set up in Iran, South Africa and Turkey.

After the golden 50s, Radionette found itself in difficulties. Sales fell at the end of the 60s and in 1972 the company was merged with Tandberg Radiofabrikk. In 1978 Tandberg closed Radionette down and went into liquidation itself later the same year. A major electrical retailer acquired the trade mark and the Radionette name still exists today.

The radios are manufactured in Asia.

Caboolture Radio Club

The 2009 Annual General Meeting of the Caboolture Radio Club will be held on Saturday October 10, 2009 at 11:00 AEST.

Positions of President, Vice President, Treasurer, Secretary and two committee are to be filled. Members are encouraged to cast their vote; proxy voting forms have been emailed and posted to all current financial members. If you do not receive your proxy form and need one please contact the club secretary, vk4qd@wia.org.au

Off street parking and refreshments available, visitors welcome.

Caboolture Radio Club is also trialling a new repeater at Ocean View 146.625.

Preliminary reports indicate coverage south to Boonah, West to Yarraman and North to Nambour with most of Bribie Island a formality. Why not check in on the Monday evening net at 19:45 AEST and offer a signal report.

(Adam JAROSZUK (VK4IM.))

Central Highlands in Central Queensland
http://au.groups.yahoo.com/group/charc/

Central Highlands ARC AGM draws near

The AGM is held each year at Camp Fairbairn on the waters edge of
Fairbairn Dam near Emerald CQ, during the September School Holidays.
Beginning on Friday afternoon Sept 25th through to Sunday Sept 27th.
All previous and present members and guests are invited to join the
Central Highlands mob for a great get-together over the weekend.
Accommodation is available on site, there is a big BBQ dinner on Saturday
Night with your chefs being Helen Wood and Steve VK4SMW, followed by
the Monster Auction with new Auctioneer of Renown Roy VK4RM,
plus a Recovery Breakfast on Sunday morning.
A great place to meet and catch up on things plus a chance to see
how much water is in Lake Maraboon and take in the scenic wonder of the region!

Dormitory style accommodation is $13.20 per head per night.
Day visitors $6.00 per day.

Saturday Lunch Sausage Sizzle is $2.00 per head.
Saturday Night BBQ dinner is $16.00 per head.
Sunday morning Recovery breakfast is $6.00 per head.
